A paper on the objectives and goals of internship programs

This paper focuses on the objectives of internship programs, role allocation, and issues and problems associated with this form of experiential education. Goals and objectives of internship training are reviewed in relation to the student as primary beneficiary, the university interest in internship programs, and benefits to the host agency. Role allocation concerns, the system of university values and incentives, faculty role, student role, and the host agency are also discussed. Additional issues discussed include who should participate, where students should intern, compensation practices, and evaluating intern performance. A 40-item bibliography is included.

SUBJECT AREA(S)

This 44-page report includes objectives and goals of internship programs, role allocation, faculty role, student role, and host agency role.

INTENDED USERS AND BENEFICIARIES

This monograph is primarily for faculty members and administrators in colleges and universities, as well as internship directors in noneducational institutions.

SOCIAL EDUCATION/ SOCIAL SCIENCE

1275

OVERVIEW

JOHN D. HAAS
University of Colorado
Boulder, Colorado

The nature of society and the social studies curriculum

Public school curriculums grow out of the peculiar nature of the society in which the schools exist. The schools and curriculums in China, Chile, Russia, and America are reflections of the larger society in each nation. The values of the nation/state manifest themselves in its public schools—in curriculums, in instructional behavior, in organizational patterns, in ways of treating students and subject matter.

In societies where there is widespread agreement on core values, or in authoritarian societies, those responsible for planning and developing curriculums have a relatively easy task. In such nations, guidelines and directives emanating from the national government are both prescriptive and proscriptive. Little is left in doubt; little in the way of choice is allowed.

The curriculum planners face formidable tasks, however, if a society is pluralistic in its values and commitments, and operates within a democratic framework calling for citizen participation in decisionmaking at many government levels. In short, educators in democratic societies are confronted with an array of dilemmas in deciding on clear criteria or rationales for public school curriculums. This is especially true for those educators responsible for curriculums in social science and social education.

A rationale for social studies education should confront the difficult issues which emerge from the values of a democratic society. Some of these issues are:

- Nationalism versus Internationalism
- Individualism versus Fraternalism
- Human Dignity versus Oppression
- Humanism versus Materialism
- Religion versus Secularism
- War versus Peace
- Energy and the Environment versus Conspicuous Consumption
- Developed Nations versus Developing Nations
- Affluence versus Poverty

Social studies rationales should also provide definitions of (positions on) such value concepts as democracy, freedom, equality, and social order.

Social studies and social science education

As one would expect, social studies educators differ as to the rationales they advocate and defend. One dimension of disagreement in rationales concerns the issue of *social studies* education versus *social science* education. Wesley and Wronski assert that "in contrast with the social sciences, the social studies are designed primarily for instructional purposes. They are those portions or aspects of the social sciences that have been selected and adapted for use in the school or in other instructional situations." This point of view sees the social studies as primarily an organizing concept for including or excluding certain knowledge from certain academic disciplines. It becomes crucial, therefore, which disciplines (or aspects of disciplines) are viewed as contributing to social studies curriculum—that is, which disciplines or subjects comprise the social sciences. Should the social studies educator draw content and processes from economics for use in the social studies curriculum? from history? philosophy and theology? psychology and social psychology? both physical and cultural anthropology?

If one views the social studies as simplified versions or portions of the social sciences, one assumes that social studies, as a term, is plural in nature, a collection of related pieces: "The social studies *are* . . ."

Other social studies educators consider this broad curricular field to be singular in nature, a separate discipline in itself—even though it is secondarily dependent on knowledge from the social sciences. Shaver states that a definition of social studies education "should begin with clear recognition that social studies education is general education. [Social studies education is] that part of the school's general education program which is concerned with the preparation of citizens for participation in a democratic society."

Content and process in social studies education

Another dimension which yields differences in social studies rationales is that of content versus process. Some educators claim that the significant content in social studies courses should be those valid generalizations and advanced organizers (concepts) which provide useful explanations (and predictions) of human social behavior. Others argue that, given a knowledge explosion and information overload, the most useful knowledge is that of processes or ways of knowing. The advocates of content stress high-mileage concepts and generalizations, while proponents of process stress learning to learn and to think. The former focuses on the known, the latter on knowing.

Three traditions in social studies education

Over the years, there have been at least three traditions with respect to rationales for social studies education. (This discussion of three traditions draws on an article by James L. Barth and S. Samuel Shermis: "Defining the Social Studies: an Exploration of Three Traditions," *Social Education*, vol. XXXIV, No. 7 (Nov. 1970).)

Dr. John D. Haas is an Associate Professor of Education in the School of Education at the University of Colorado, Boulder, Colorado.

These three traditions or schools of thoughts are: (1) Social studies as citizenship transmission (or transmission of the cultural heritage), (2) social studies as social science (or knowing concepts, generalizations and modes of inquiry from the spectrum of the social sciences), and (3) social studies as reflective inquiry (or knowing how to think, learn, and decide). Each tradition views differently questions of purpose, content, and method. Further, implicitly or explicitly, they differ in their conceptions of society and democracy, in the learning theories they accept or reject, and in the normative views they hold of the nature of man and, in particular, of children and adolescents.

What the three traditions do have in common are "a set of goals which describe how the content of citizenship education is to be selected, organized, and taught" and "a conception of citizenship."

Social studies as citizenship transmission. This position has the weight of tradition behind it. Its content is drawn from the cultural heritage as selected by the consensus majority and based on prevailing interpretations and values which have stood the test of time. As one might expect, history (as manifested in the writings of the "great" consensus historians) is the core academic discipline to this rationale. Traditional values (as distinguished from emergent values) are the bases for determining desirable student (i.e., citizen) behavior. When national and local community values conflict, this school of thought would probably resolve the confrontation by asserting that the local community values are the preferred interpretations and manifestations of national values.

Citizenship is conceived as conformity to local/national norms and as obligation to preserve and conserve, to obey and accept "historical imperatives," and to behave "responsibly" at all times. The knowledge needed by the effective citizen is that which leads to loyalty to the Nation, to patriotic fervor, and to support of societal institutions. Such knowledge must be perennial, validated by its survival over the centuries, and, therefore, firmly established in the folk wisdom.

Educators advocating this position would most probably suggest that effective teaching methods are historical narrative and exposition, description of present-to-past-to-present social conditions (with emphasis on continuity), and persuasive appeals to students to adopt traditional values.

Social studies as social science. The focus of this tradition is on the spectrum of the social science disciplines (usually including history), which have emerged since the turn of the century as a viable academic grouping "fitting" somewhere "between" the sciences and humanities. There is no consensus as to which academic disciplines should be included in the social sciences. Many historians feel that their discipline because of its lack of a specialized jargon and theoretical structure and because of its comprehensiveness, integrating nature, and philosophical bent is more appropriately categorized as a humanity. Many physical anthropologists and physical geographers, because their disciplines rely so heavily on the theory and methodologies of the physical sciences, feel that their disciplines should be considered sciences rather than social science.

What then is a social science? A broad definition is that a social science is an academic discipline which systematically studies behavior, phenomena, and events which occur in human social environments. Such a definition is broad enough to include the following disciplines as social sciences:

- Anthropology (both social or cultural anthropology and physical anthropology)
- Economics
- Geography (both cultural and physical)
- History
- Law
- Political Science
- Psychology
- Social Psychology
- Sociology

Of course, depending on one's preferences or biases, such disciplines as philosophy, theology, and cybernetics might be added to the above list. On the other hand, if one substitutes "studies scientifically" for "studies systematically" in the definition of a social science, then the list might be restricted to anthropology, economics, geography, political science, psychology, social psychology, and sociology.

This rationale position hinges on two assumptions: (1) That the effective citizen requires reliable knowledge in the social realm in order to make informed decisions; and (2) that the best knowledge available are the concepts, generalizations, and modes of inquiry found in the social sciences. Once the social sciences are defined, the spectrum of disciplines to be included are identified, and the concepts, generalizations, and modes of inquiry with the most utility are selected, one has the superstructure for creating a social studies curriculum.

If students behave in the reasoned and scientific ways in which social scientists go about their work as social scientists, students will be better persons in their personal and social lives. Further, if students can view dispassionately social reality through many disciplinary lenses, they will not be plagued by the myopia of the single discipline interpretation.

The most popular and succinct statement defining this position is that of Wesley and Wronski who assert that "the social studies are designed primarily for instructional purposes. They are those portions or aspects of the social sciences that have been selected and adapted for use in the schools or in other instructional situations."

Proponents of the "social studies as social science" tradition differ as to what teaching methods are most appropriate. Some suggest that after the "high mileage" concepts, generalizations, and modes of inquiry have been selected, any method of communicating this knowledge is appropriate as long as it results in students' learning the crucial set of knowledge, skills, and attitudes. To this group, choice of method is purely pragmatic.

Others argue that the modes of inquiry used by social scientists (historical method, scientific method, case study, survey, etc.) should also be modes of instruction. Both teachers and students should employ modes of inquiry as styles of teaching and learning. They place the learning of inquiry skills as the medium for learning the selected concepts and generalizations and for learning the attitudes of social sciencing (rigorous analysis, tentativeness of findings, healthy doubt and skepticism, etc.). Thus, the classroom and community should become the laboratories for students' social science experiments and investigations.

Social studies as reflective inquiry. In regard to this tradition, Barth and Shermis make the point that "although reflective inquiry owes much to the method of inquiry that has obtained among social sciences, there are important differences" between social sciencing and social studies as reflective inquiry. Perhaps the use of the term *inquiry* in descriptions of both traditions is misleading. This third school of thought might better be titled "Social studies as reflective thinking and decisionmaking." The distinctions to be made are that the ways of the social scientists are limited in comparison to the multitude of ways of knowing used by laypersons, citizens, political leaders, and others who are not in the guilds of the social scientists; and that the results of social scientists' investigations are conclusions and generalizations which too often cannot be readily applied to social problems and are of limited value to decisionmakers citizens and leaders.

The sources for this rationale position are general processes of thought: Learning-to-learn skills, decisionmaking models, critical thinking paradigms, policy formation procedures, consensus building techniques, personal awareness and growth strategies, and intercultural and interpersonal human relations perspectives. "Citizenship is defined not as a precommitment to a given set of community norms or values but as a process." In this view, "citizenship means that students acquire practice in making decisions which reflect significant social problems and which presently affect them or are likely to affect them."

The teaching methods advocated for this tradition are an amalgam of exposition, discussion, values clarification, and inquiry. In short, the teaching methods are the mirror images of the processes to be learned: inquiry (or reflective thinking or critical thinking) is both teaching model and learning model. "Inquiry as a method means that a teacher and his/her students will identify a problem that is of considerable concern to them and to our society and the relevant facts and values will be examined in the light of criteria."

The three traditions and four current rationales

The three broad traditions of social studies as citizenship transmission, social studies as social science, and social studies as reflective inquiry emerge from the historical evolution of this broad field in the American public school curriculum. Today there seem to be at least four discrete rationales being advocated by social studies educators, derived from the writing of the leaders in social studies education specifically from articles in journals in the field and from social studies methods textbooks for both preservice and inservice teachers. Of course, there is bound to be some overlap with the Barth and Shermis three traditions synthesis.

These four discrete rationales may be viewed as points on a continuum which extend from the single core discipline (history), to the multidiscipline concept (social sciences), to two variants of the new, separate discipline approach. Each of these points along the continuum can be identified with particular advocates who can be grouped under a single rationale position. The chart which follows depicts the four rationales, the leading advocates for each rationale, and the relationship between each rationale and the three traditions described by Barth and Shermis.

Rationale	Advocates	Relation To Three Traditions
History: Integrating discipline for the social studies	Mark Krug Alan Kownslar	Mainly to social sciences as citizenship transmission. Partly to social studies as social science.
Structures of the social sciences: Concepts, generalizations, and modes of inquiry	Edwin Fenton Barry Beyer Irving Morrissett Lawrence Senesh	Mainly to social studies as social science. Slightly to social studies as citizenship transmission.
Reflective/critical thinking: Concepts, issues, and valuing	Shirley Engle Robert Ennis Maurice Hunt and Lawrence Metcalf	Mainly to social studies as reflective inquiry. Partly to social studies as social science.
Analysis of public issues: Valuing and thinking	Donald Oliver Fred Newman Harold Berlak James Shaver	Mainly to social studies as reflective inquiry.

SOCIAL SCIENCE/ SOCIAL EDUCATION

Although one could argue convincingly for anthropology or sociology as the choice of a social discipline to serve as the core or integrating nexus for the development of a social studies curriculum, tradition, nationalism, and the preference for continuity and stability in a society have made history the keystone in single subject approaches. This rationale may be called "History: Integrating Discipline for the Social Studies."

Equality of emphasis across a spectrum of social science disciplines, a multidisciplinary view of social reality, is a recent approach to social studies education which may be titled "Structures of the social science: Concepts, generalizations, and modes of inquiry."

During the past 50 years, some social studies educators have claimed that, although one must borrow from and indeed must be indebted to the social sciences, the social studies *is* a separate, distinct applied discipline. Social studies *is* not merely the selection from and application of knowledge in the social sciences, but *is* a different entity—different in scope, use, and nature. A likely analogy might be that social studies is to the social sciences what engineering is to mathematics, physics, chemistry, and other "pure" or "basic" disciplines. This separate discipline orientation has spawned two variants which one can label "Reflective/critical thinking: Concepts, issues, and valuing" and "Analysis of public issues: Valuing and thinking." Both draw heavily from the literature of skill or process learning and from the actual or potential conflicts which are inevitable in democratic, pluralistic societies. The first emphasizes process, controversial issues, and selected social science concepts, while the second combines process with the nature and resolution of contemporary (yet nontransient) public issues and controversies. These two rationales confront squarely the value-laden aspects of social issues and decisionmaking.

Current trends in social science education

The period from 1961 to 1970 is best characterized as the era of "The New Social Studies." During this era, social studies courses, content, materials, and teaching methods were reexamined, and with the aid of Federal funds (U.S. Office of Education and National Science Foundation), new approaches to all four of these curricular areas were introduced. Concurrently, the experience of Vietnam exploded in social studies arenas, resulting in increased concern for social issues and personal and social values.

The decade of the sixties brought changes to social studies education, but these changes were largely undirected, chaotic, and capricious. As a result, today it is virtually impossible to identify any single consensus view of social studies at either the national level or for any single State. In the social studies today, a condition of near anarchy prevails; or, put another way, each local school district is "doing its own thing" in social studies.

Nevertheless, several trends set in motion during the sixties and early seventies can be currently observed, though it is difficult to determine their "staying power":

Elementary school social studies

- Less reliance on the "expanding human communities" approach (i.e., nuclear family, neighborhood, community, State, etc.).
- Less concern for mastery of facts, coupled with increased concern for concepts/generalization, inquiry, and activity-based lessons and units.
- Some movement toward "process" learning (either the problem-solving process or scientific method process).
- Expansion of the social science disciplines from which content is drawn: Anthropology, economics, geography, history, political science, psychology, social psychology, sociology.
- Availability of at least two controversial behavioral science-based social studies programs: Social Science Laboratory Kits (Lippitt and Fox, Science Research Associates) and Man: A Course of Study (Education Development Center, Curriculum Development Associates).
- A "minority" movement to accent values and moral development.
- A plethora of materials and media, though there is still a reliance on the textbook "series" (K-6 or 1-6, with a single sequence from each publisher).
- Some integration of social studies and other subject areas such as reading or science.
- A current battle to preserve social studies (also science) as a viable curricular area in the wake of "overboard" concerns for reading and mathematical skills.
- Increased attention to out-of-school, community-based activities, an expansion of the concept of field trips.
- Increased concern for skills: Reading, charting, graphing, map-reading, etc.
- A "minority" movement to combat racism and sexism in materials, methods, and attitudes.
- Increased use of role-playing, dramatization, simulations, and simulation games (even "Transactional Analysis for Tots").
- Some attempts to integrate the 15 career clusters of USOE into social studies curriculum.
- Slight attention to sociopolitical issues.

Secondary school social studies

- A proliferation of new and diverse courses, some in the previously "neglected" social science disciplines (e.g., anthropology, psychology, sociology, social psychology), some focused on topics (e.g., future studies, global studies, values clarification), and some based on contemporary social issues (e.g., "Analysis of Public Issues" program, law-related education, overpopulation, environmental issues, war and peace, sexism, racism).
- Variations in the time allotted to courses: Year-long, semester, and minicourses (4-9 weeks).
- Deemphasis of the discipline of history.
- A "minority" movement by some teachers who prefer "inquiry" or "discovery" methods of teaching and learning.

- Another "minority" movement to humanize the classroom and to deal more with student concerns and affective topics (values, values clarification, feelings).
- An abundance of curricular materials and media: Books, pamphlets, paperback series, slides/tapes, filmstrips, filmstrip/tape, films, overhead projector transparencies, photo collections, posters, maps, globes, and artifacts.
- The virtual abandonment of any *necessary* scope and sequence to the social studies curriculum.
- Deemphasis of required courses, with more required-with-options approaches and more purely elective courses (especially in the 12th grade).
- Some increase in community-based courses such as community studies, political internships, career education explorations, and social studies practicums.
- A "trace" of activist activities designed to provide students with experience in sociopolitical action and to increase the political efficacy of youth.
- An increasing fascination with and use of simulation games and simulations (over 200 of these are available from publishers and perhaps another 1,000 have been developed by teachers for local use).
- Newly published curriculum "packages" with heavy emphasis on "inquiry" teaching and learning, for the traditional social studies subjects of history, geography, and political science (i.e., government and civics): Amherst History Project, High School Geography Project, American Political Behavior, Comparing Political Experiences.

Current research thrusts in social studies education

It is difficult to delineate those research arenas which are peculiar to social studies education. Further, there is little cumulative research in this curricular field, with the exception of a sustained concern for reflective or critical thinking research over the past 50 years.

The following topics or questions probably account for about three-fourths of the current research in social studies education:

- Survey of extent of use of "new social studies" materials and methods.
- Survey of the changing patterns of course sequences and electives, and the substantive content of particular courses.
- Various types of research (survey, historical, experimental) on the goals and objectives of the social studies.
- Socialization research: Political, economic, geographical.
- Local and State evaluation and assessment research (also national assessment by the National Assessment of Educational Progress project of the Education Commission of the States).
- Research on "developmental stages" (the cognitive model of Piaget and the moral development theory of Lawrence Kohlberg).
- Theoretical and experimental research on the reflective or critical thinking process.

Note: This *Catalog* makes a distinction between Social Science and Social Education. Social Education products deal with applications of theories or principles derived from the social sciences; Social Education products stress the interconnectedness of various aspects of a student's social environment. NIE-supported research and development in the areas of values or moral education can be found in the Social Education section of this *Catalog*.

ENVIRONMENTAL EDUCATION CONCEPT LESSON CARDS

An instructional program for students in K-6 organized around conservation education, natural environment, and outdoor recreation

The Union 58 *Environmental Education Instructional Program* (K-6) is organized around conservation education, natural environment, outdoor recreation, and social environment concepts:

1. A family is a social environment (grades K-1).
2. Different cultures have different social environments (grades 2-3).
3. Living things respond to their (social) environments (grades 2-3).
4. Living things respond to their (natural) environments (grades 3-4).
5. Earth's resources are generally finite (grades 3-4).
6. People need to work constantly to conserve natural resources (grades 3-4).
7. Individual plants and animals can be identified by the various characteristics of their species (grades 4-6).
8. Man's environments and the natural environment are often in direct competition for natural resources (grades 4-6).
9. Natural resources may be enjoyed (grades 4-6).
10. Concern for the natural environment should be coupled with its recreational use (grades 4-6).

The K-6 concept program constitutes the basis of the Union 58 environmental education/outdoor education program which encompasses field trips, classroom visitations, and weekend day trips, as well as overnight camping trips.

SUBJECT AREA(S)

The subject area is environmental education.

INTENDED USERS AND BENEFICIARIES

This program is immediately applicable to those students who attend Union 58 schools in Groveton, Stark, and Stratford, New Hampshire.

The component coordinator works closely with Union 58 students and teachers in the development of Environmental Education (EE) lessons both in the classroom and outdoors.

The Union 58 Experimental Schools Program (ESP) EE lesson program incorporates both the immediate natural and social environments—and phenomena located within—into the instructional process.

Teachers use a variety of approaches regarding EE introduction into the classroom. Some infuse the EE lessons into different subject matter areas (e.g., social studies, science, mathematics); others treat EE as a separate subject and therefore reserve a period of time for specific lessons; and others concentrate on field trips and other outdoor activities.

The lessons are student oriented and directly involve students in the awareness/learning process.

GOAL(S) OR PURPOSE(S)

The purposes of this program are: (1) To develop student awareness of the natural and social characteristics of the immediate and more remote areas/regions, (2) to expose students to the natural and social resources of the area, and (3) to develop student understanding of the interrelationships between man and nature.

PATTERNS OF USE

The 10 concepts outlined in the beginning of this report are arranged in grade grouping sequences (i.e., K-1, 2-3, 3-4, and 4-6). Using this approach, teachers can rearrange the order of presentation within a grade sequence without seriously affecting the structure of the total K-6 program.

The process of developing an environmental education concept lesson product in grades 7-12 has begun. The Union 58 project does not expect lessons to be developed and in printed form until May or June 1975. Lessons in grades 7-12 will be organized around lessons and activities which extend the K-6 program and are infused into specific subject matter areas.

The lessons can be used at three different stages of instructional development (K-6):

(1) Introductory phase—Introduces a lesson or unit in a particular subject matter area.

(2) Integration—The EE lesson is infused into the subject matter content and becomes part of the course of study and activities.

(3) Culminating phase—The lesson can be used as a culminating activity.

ASSESSMENT PROVISIONS

Since January 1975, teachers have been involved in implementing EE into their classrooms.

Lesson and materials evaluation forms have been developed by level I, but the feedback, to date, is minimal; and no conclusions can be drawn.

TIME REQUIREMENTS

Each lesson card contains a statement of the time it will take to develop the instructional activity. The time required to develop a lesson varies with each lesson.

IMPLEMENTATION PROCEDURES

The average classroom teacher can develop and implement lessons. Unless lessons deal with highly technical subject matter (e.g., biology or geology), there is no need for extensive training. The lessons can be infused into several subject matter areas.

There is no set pattern of lesson development—only suggested approaches. Using this approach, the EE lessons can be implemented in the classroom or outdoors in ways which best suit the abilities, experiences, and training of teachers.

The infusion of environmental education into the existing curriculums does not require extensive organizational or scheduling changes. Lessons can be developed in the classroom and/or outdoors.

MATERIALS AND EQUIPMENT

Each EE lesson suggests several different types of materials and instructional activities that can be used. Several different types of materials (filmstrips, books, magazines, poster sets, activity kits, and microscopes) have been purchased.

ASSURANCES AND CLAIMS

Assurances

The K-6 concept lessons have been developed for the purpose of exposing students to both natural and social environments and for developing awareness of the interrelationships between man and nature.

The Union 58 ESP *Environmental Education Concept Lesson Cards* has been produced by the project staff with all students (K-6) in mind. There has not been any intention to develop a sexist program. Both boys and girls are involved in lesson activities.

As developed, the concept lessons could be replicated or transported to other sites and infused into the classroom curriculum.

Claims

There are not sufficient data available at this time to enable the Union 58 ESP project to make any claims of effectiveness, social fairness, or product development regarding the concept lessons produced.

DEVELOPER/AUTHOR:

New Hampshire School Supervisory Union 58
Experimental Schools Program
Groveton, N.H. 03582

Richard Peters, Project Director
Ellen Sommers, Coordinator

AVAILABILITY

The original intention of the Union 58 ESP project was to develop an outdoor education (weekend camping) program for students in grades 7-12. During the project's initial year, the decision was made to develop a K-12 environmental education program of awareness and exposure for students in Groveton, Stark, and Stratford, New Hampshire. This is still the project's prime mission. Only within the past few months has the project developed a product tailored to local abilities and needs. At this time, the Union 58 project has no plans to publish.

The development of EE concept lessons for K-6 students and grades 7-12 students is an ongoing process which involves development, implementation, evaluation, and revision.

The product has not been copyrighted. Samples of the lessons developed, to date, are available from the New Hampshire School Supervisory Union 58 Experimental Schools Program project:

INFORMATION CURRENT AS OF MARCH 1975 ■

DISCUSSING CONTROVERSIAL ISSUES

A high school program to develop teachers' and students' skills in discussing controversial issues effectively in the classroom

Discussing Controversial Issues (DCI) is a program for high school teachers and students. The overall course objective is to develop teachers' and students' skills in discussing controversial issues effectively in the classroom. The course materials identify 14 moderator techniques that teachers practice and 14 participant techniques that students practice.

The course defines a "controversial issue" as any issue on which there is legitimate disagreement and which students and teachers feel is worth discussing. Within the scope of the course objectives, the content of the issue is not as important as how people talk about it. What is essential is that the discussion facilitates reflective, open inquiry.

Because value conflicts are inherent in American society, educators contend that the ability to communicate about differences of opinion is useful as a tool to help students inform themselves on socially important issues and to understand alternative viewpoints.

SUBJECT AREA(S)

The course may be used most easily in classes where the curriculum raises social, personal, and moral issues.

INTENDED USERS AND BENEFICIARIES

Course materials are particularly relevant for social studies or English teachers. It is possible to involve teachers from other disciplines when an aspect of their curriculums is adaptable to discussion of controversial issues (such as questions of business ethics in business education and the role of women in a homemaking class).

Course materials for students were developed at the high school level, primarily for grades 10, 11, and 12. The materials can be used with most 9th-grade classes and can be adapted for junior high school students, but the materials and suggested activities are less appropriate and more difficult at these grade levels.

GOAL(S) OR PURPOSE(S)

The goal of this course is to develop skills for discussing controversial issues effectively. Briefly, the steps to achieve this goal are: (1) To have an open discussion in which people feel free to say what they think, (2) to listen to others and keep the discussion focused, (3) to analyze different points of view, and (4) to evaluate the effectiveness of the discussion.

PATTERNS OF USE

The program is designed to be used by teachers and students in grades 9-12. The course can be incorporated into existing curriculums or offered as a short elective course in discussion skills. The skills presented in the lessons are cumulative, and lessons should be presented in the order of appearance.

ASSESSMENT PROVISIONS

Teachers volunteer for training in *Discussing Controversial Issues*. They choose which of their classes or students will participate. The course is self-instructional and self-evaluative. Direct supervision is neither required nor suggested. The teacher's handbook contains planning forms, self-evaluation forms, and self-check forms.

TIME REQUIREMENTS

Depending on the students' level of skill and the teacher's own priorities, the course can last 3-8 weeks (4 or 5 weeks is average).

IMPLEMENTATION PROCEDURES

The course is most manageable with 4 to 8 teachers, with 10 teachers being the maximum for a single school at any one time. If more teachers want to participate, recycling of the course is advised. A room should be set aside for course materials and audiovisual equipment. Schedules for sharing films and equipment should be established.

Summary Cost Information

The prices are estimates based on the average cost of similar materials produced by the developer. Initial cost to the user includes the purchase of the instructional films. The coordinator and student handbooks may be reused. Each teacher taking the course will require a handbook, as consumable evaluation forms and checklists are provided therein. Initially, the school or district should provide a blank video tape or audiotape to be used by each teacher for evaluation of discussion sessions. These tapes can be reused by teachers taking the course later.

Personnel Required for Product Adoption and Implementation

A coordinator recruits teachers to take the course, introduces the course and methods to the teachers, sets up the course schedule, and maintains the video tape or audiotape equipment. Any staff member could fill this role, but it is usually filled by a principal or district supervisor.

ASSURANCES AND CLAIMS

Questionnaire responses by teachers who participated in the main field test revealed that 80 percent felt the product was better than other inservice education experiences. Ninety-two percent felt it should be included in the high school curriculum.

While producing the course materials, the developers were concerned that the materials would not be accepted in some communities because the discussion of controversial issues in the classroom is itself controversial. However, of approximately five localities in which the materials have been field tested, only one reported that the course was "too hot to handle."

The program is designed to train teachers to assume a nonjudgmental role as a facilitator or moderator and not to use discussions to indoctrinate students or to impose their value judgments on students. Students learn to assume the role of active participants to gain insights into their own and other people's opinions.

As a result of field observations and the subsequent data analysis, it became apparent that most of the 17 classes in 2 of the urban schools reacted to DCI in a markedly different way from the rest of the sample. These two inner-city schools, which included compensatory and opportunity classes, exhibited considerably lower entry levels and less improvement on several variables than did the other experimental classes. Interviews with the teachers in these schools revealed that, for many of the students, DCI was an intrusion into their previous arrangements regarding their curriculums; they now resented having to take part in the course every day for more than 4 weeks.

Because of these circumstances, it was decided to analyze the two inner-city schools separately from the rest of the sample. The relative lack of success in these schools limited the scope of generalizability regarding the course's effectiveness.

Teachers from the suburban schools were successful in learning 11 of 13 moderator skills. Some of the variables evinced low frequencies, but it is not known how often techniques should be used. Teachers from the inner-city schools improved in only four variables.

Student participants from the suburban classrooms improved for all course behaviors except one. Their most significant gains were in student-to-student interaction, acknowledgment of a previous speaker, asking for evidence, and reviewing the main points of the discussion. The students in the inner-city schools made fewer and smaller gains.

MATERIALS AND EQUIPMENT

Required Items	Quantity Needed	Cost per Item in Dollars	Replacement Rate and Cost	Source if Different from Distributor

LANGUAGE OF PERSONAL EXPERIENCE (LOPE)

An instructional package to help children from ages 10 to 12 learn how to analyze significant elements of personal experience

The *Language of Personal Experience* (LOPE) is a supplemental language arts/social studies instructional package for children ages 10 to 12. LOPE is designed to give children a vocabulary which will help them to describe their personal reality in a consistent way. The intent is to help children learn to analyze those elements of personal experience which lead them to behave in certain ways in specific situations. They come to understand the perceptions, feelings, opinions, and conclusions that both produce and result from human behavior. The package makes no pronouncements about the relative merits of perceptions, specific feelings, opinions, or behaviors. Rather, it portrays at every opportunity the full range of options and remains as neutral and nonjudgmental as possible.

As a result of the last field test, LOPE is being revised from 25 sequenced lessons to 19 sequenced lessons, each running 30 minutes or less. It is group-paced but gives ample opportunity for individualized help when necessary. The instructional material is complete on the audiotape. The children in the classroon listen to the continuing story of a group of children at a summer camp. As part of the discussion of incidents in the story, various emotions are explored in the taped stories—loneliness, shyness, fear, anger, excitement, pleasure. The advantages and disadvantages of sharing feelings with others is also investigated: When is it easy and when is it difficult? When is it necessary? When is there a choice? At intervals during the story there are learning breaks, during which the children in the classroom are directed on the tape to complete dittoed discrimination exercises on the lesson's concepts. Feedback on the correct completion of these exercises is also given on the tape. At the conclusion of each lesson, a classroom activity is also introduced by the tape, to be led by the teacher. Classroom activities are designed to reinforce the concepts taught by LOPE and to provide the teacher with an active role. The instructional role of the teacher is largely a supportive one—in preparing the classroom, in observing students' abilities to acquire program concepts, and in supplementing each lesson with exercises suggested in the teacher's manual.

SUBJECT AREA(S)

Intrapersonal skills training—the overall purpose of LOPE is to provide children with a means by which they can understand better their personal experiences, as well as to share these experiences with others, to the extent that they wish to do so.

Key concepts emphasized in the program include the following: To account for a person's behavior, one must first look at the specific situation that person is in; feelings or emotions are always precipitated by some perception; all experience is personal, because both the perception and the emotion of an experience belong to the person having the experience, and the same situation can be experienced differently by different people.

INTENDED USERS AND BENEFICIARIES

LOPE has been designed for children of all abilities aged 10 to 12. Research shows that it is during these years that children's primary identification changes focus from parents to peer relationships.

GOAL(S) OR PURPOSE(S)

Children completing LOPE will be able: (1) To develop a consistent vocabulary for describing personal experience and for describing personal experience vs. expressing opinions, (2) to understand different reasons for a feeling or a behavior and to select the most likely explanation for it, and (3) to recognize when there is insignificant or incomplete data to reach a conclusion. With an understanding of what makes up human experiences and why people act differently in the same, similar, or different situations, the learners will be able to operate more effectively in their environment.

PATTERNS OF USE

The package is organized into 19 sequenced lessons. LOPE may be used independently or as a supplement for the regular language arts/social studies program.

ASSESSMENT PROVISIONS

Feedback to students is provided in two ways: Directly from the tape and from the teacher while observing the student using the materials.

TIME REQUIREMENTS

The program is intended to be used approximately 3 times a week in 40- to 50-minute sessions, with completion of the package in 6 to 7 weeks. However, the program can be used approximately 40 to 50 minutes each week (1 lesson per week), with completion in 19 or 20 weeks.

IMPLEMENTATION PROCEDURES

No special resources or classroom arrangement are required for the implementation of LOPE. Teacher training is included in the package through a taped training session. The teacher's manual which accompanies the program is an important source of suggestions for incorporating LOPE concepts into other subject areas. The developers suggest that parents observe the program in use and become familiar with the vocabulary used in LOPE, so that they will understand the value of the program.

ASSURANCES AND CLAIMS

Assurances of Harmlessness

When used as directed, LOPE will not affect users negatively. This assurance is based on observations of the program being tested on approximately 1,200 students in the fall of 1974, as well as examination of this material by two psychologists in January and March 1974.

Assurances of Social Fairness

LOPE does not perpetuate social biases. Materials were examined by the Rights for Human Subjects Committee in 1973 and 1974, and it was found that children's roles were, for the most part, equitable.

Assurances of Replicability or Transportability

In the fall of 1974, LOPE was field tested in 13 6th-grade classes without developer assistance of any kind. However, the revisions currently being made in the package will be tested in the fall of 1975. Careful product development and revisions have been based on learner/user feedback, as well as expert judges' opinions. Assurances of the replicability of the revised product cannot be made at this time.

MATERIALS AND EQUIPMENT

Required Items	Quantity Needed	Cost per Item in Dollars	Replacement Rate and Cost	Source if Different from Distributor
Classroom set, including posters, audiotapes, ditto masters for lesson exercises, teacher's manual, teacher training tape, and a volume of scripts	1 set per school or per 35 students	Not determined	Reusable

INFORMATION CURRENT AS OF MARCH 1975

PASS IT ON, I

A multimedia product to increase opportunities for children ages 5-7 to grow in self-confidence

Pass It On, I, is one of two process-oriented instructional products developed as a set by the Children's Folklore Program. The product is designed for 5-, 6-, and 7-year-old children and their teachers. It uses traditionalized play—children's folklore—to increase opportunities for children to grow in self-confidence; in appreciation of group similarities and differences; in creativeness; and in the development of skills of communication, group organization and management, problem solving, and decisionmaking.

Pass It On, I, is made up of a sequence of five *Pass It On* activities and a staff instructional package. Each activity presents folklore items or forms that children can learn and perform together, and stimulates the sharing and learning of folklore from the children's own repertoires. Instructional materials for children include five 3- to 5-minute, 16mm color films which introduce folklore items, riddle books for practice in riddling, and cartoon books which provide motivation and reinforcement for learning and sharing folklore. Staff instructional materials include a guide for the orientation of teachers, a film and audiotape to sensitize teachers to children's folklore, and a handbook of guidelines and lesson plans for the presentation of *Pass It On, I.*

The design of *Pass It On, I,* draws from research which is based on findings of psychologists, anthropologists, and linguists, and which is related to the effects of play on child development. Studies indicate that adults' thinking processes, as well as their self-confidence and social skills, are rooted, to a large degree, in the play of their childhood.

Research evidence shows that play is a nonthreatening environment where children readily employ and experiment with systems of rules and with skills they see adults apply. *Pass It On, I,* further draws from the value of traditionalized play, which is children's folklore, as a vehicle of cultural expression and child-to-child communication. The ultimate content of *Pass It On, I,* is the children's own folklore repertoires, their own interaction, and their own responses. Because of this, children are actively involved in learning and creating learning situations.

Three strategies are used in *Pass It On, I:* (1) Team teaching, the combination of classes from different grade levels, provides opportunities for new play groups and therefore increases opportunities for interaction across age, sex, and ethnic groups; (2) small groups are used since they are manageable and increase opportunities for participation by individual children; and (3) the use of 9-, 10-, and 11-year-old children as group helpers provides leadership for the older children, while reducing supervisory requirements on teachers and expanding the younger children's opportunities to learn.

Teachers using *Pass It On, I,* must orient the older group helpers, arrange schedules, plan grouping procedures, introduce activities, and operate projection equipment. However, *Pass It On, I,* teachers function primarily in a resource role. They may offer specific information to the children, or they may facilitate smoother interaction in the small groups through brief participation, questions, or suggestions. Additional time created through team teaching and the use of group helpers can be applied to teacher observation of group activities. This observation can increase the effectiveness of the teacher as a resource.

SUBJECT AREA(S)

Pass It On, I, is a process-oriented product, and several concepts are considered in the process orientation. Children's folklore takes the forms of games, rhymes, riddles, songs, stories, and dances, which are known and performed by children. The aspect of performance, a communicative process among children, is inseparable from the definition. It is performance that traditionalizes the form and that makes the form a vehicle for cultural expression. As a communicative process, folklore requires creativeness and conveys the culture of the performer and the performer's group. More is involved in the learning and performance of folklore. Skills are required even to use the form. These include problem solving, decisionmaking, group organization and management, and communication skills. In acquiring an item of folklore and the skills it requires, a child must follow, informally in a social interaction context, a process of learning that approximates the process for learning in the cognitive realm. Thus, *Pass It On, I,* emphasizes a wide range of concepts: Concepts from cultural anthropology; concepts from the folklore of children; concepts from sociolinguistics; concepts from developmental psychology; concepts of aesthetic expression, artistry, creativity, and cultural expression; concepts from each child's cultural folklore repertoire and each child's skills; and concepts from teacher understanding of the sensitization to children's folklore.

INTENDED USERS AND BENEFICIARIES.

Pass It On, I, is designed for use by 5-, 6-, and 7-year-old children and their teachers. Testing and school personnel responses indicate benefits were achieved for the target group. In addition, testing found that 9-, 10-, and 11-year-old children who served as group helpers during *Pass It On, I,* also identified aspects of the product as useful in increasing positive communication between parents and children and between community and school.

GOAL(S) OR PURPOSE(S)

This product has the following goals: (1) To increase the target children's interaction across age, sex, and ethnic groups, and thereby enhance verbal and nonverbal communication skills, increase group organization and management skills, and strengthen problem-solving and decisionmaking skills, (2) to increase sharing of folklore among target children from differing age, sex, and ethnic groups, and thereby enhance self-confidence of individual children, increase awareness of group similarities and differences, improve the individual child's adeptness in cultural expression, and broaden the individual child's experience in creativeness; and (3) to orient teachers in use of *Pass It On, I,* and thereby sensitize teachers to the nature of children's folklore and to its role in their children's development, increase teacher effectiveness in the resource role, and familiarize teachers with materials, strategies, and presentation of *Pass It On, I.*

PATTERNS OF USE

Pass It On, I, is a self-contained product made up of five *Pass It On* activities which are presented to children sequentially. An optional activity can be used in conjunction with the activities or alone in a sixth presentation. The staff instructional package involves approximately 4 hours of orientation prior to implementation of *Pass It On, I.*

TIME REQUIREMENTS

Each of the five *Pass It On, I,* activities includes folklore activity time (30 minutes) and folklore trading time (15 minutes). One activity is presented each week for 5 weeks anytime during the school year. The optional activity, if used, can be broken down into several 5- to 15-minute additions to regular activities, or it can be presented as an individual 45-minute activity during the sixth week.

Orientation for teachers, contained in a self-instructional package, takes place prior to implementation of *Pass It On, I,* and involves self-instruction (3 hours), group helper media viewing session (30 minutes), and group helper orientation session (30 minutes).

IMPLEMENTATION PROCEDURES

The product can be used in both team-taught and traditional, self-contained classrooms. It can be implemented with or without older children as group helpers. However, team teaching and the use of older group helpers are recommended strategies. In some cases, schools wishing to use these strategies will have to make special provisions.

ASSURANCES AND CLAIMS

This product has been pilot tested in 8 classrooms with 150 5-, 6-, and 7-year-old children. It is scheduled to be field tested in late spring 1975.

At the end of the 6-week pilot test period, the teachers reported that their pupils' interest and participation were positive during the instructional periods. Attitudes of participating teachers and school administrators toward the program were positive also.

Parents of pupils involved in the pilot test were informed in writing of their children's involvement. All teachers reported favorable reactions and interest from parents.

Teachers completed a checklist each week of the program. Results from the checklist and from the post-pilot test interview are summarized below. The teachers in the program reported the teacher handbook as extremely useful, with few reports of problems in understanding or usefulness. No problems were reported with implementation of the product that might have occurred during the pilot test period if the product staff had not made regular site visits. No problems were reported with product implementation that could not have been handled without the help of the Southwest Educational Development Laboratory staff. Ease of use of multimedia materials was also reported. The teachers reported no problems with equipment. Thus, the products are reported by users to be transportable.

Teamed classrooms utilizing older 4th- and 5th-grade helpers or self-contained classrooms utilizing no helpers were designated at each pilot test site. No differences were found in pupil interest, pupil participation, or pupil mastery of activities due to either treatment.

At the end of the pilot test, a majority of teachers reported a preference for implementing the program in a teamed situation. Using older group helpers reportedly benefited the teachers who used them, the teachers' children, and the teachers' helpers as well. The teachers reported an advantage in being able to act as observers during the folklore period. The observer role enabled them to learn more about their children, whom they were able to see from a different point of view.

Stimulus materials (six media presentations, the "Riddle Book," and "Comic Book") were reviewed by a panel of specialists external to the program. The panelists found no biases toward socioeconomic or ethnic groups present. No bias regarding sex stereotyping was mentioned although the subject was not addressed specifically. In addition, the panelists found the stimulus materials to be appropriate to the developmental level for which each was designed, and relevant to the promotion of effective development. The panelists found the stimulus materials not to be detrimental to the refinement of social communication skills nor to the understanding of cultural diversity, and they found them to encourage social interaction. They found the stimulus products appropriate for use by students who do not read well or at all.

A process-oriented product in which mastery is measured by evidence of the process can only be measured by observation. Although no claims can be made before field test data are gathered, findings from observations made by teachers, program staff, and evaluation staff during pilot test are summarized below.

Voluntary participation across sex, age, and ethnic groups did not increase during the period of pilot test for a majority of pupils as observed by both program and evaluation staff. This may be due to the tendency of children at this age to form one-to-one relationships rather than to work in groups.

The teachers reported observing changes in their socially and academically shy children ("loners") as well as in their social leaders which they attributed to the program. No changes attributable to the program were reported among academic leaders. All changes reported were toward increased participation.

Emphasis during the field test will center more on progression through the stages of folklore and observation of emerging leadership roles than on social interaction patterns, as was emphasized during the pilot test.

MATERIALS AND EQUIPMENT

Required Items	Quantity Needed	Cost per Item in Dollars	Replacement Rate and Cost	Source if Different from Distributor
Unit set (2 classrooms)	1 set per unit	165.00	Reusable	
Staff instructional package	1 set per school or district	80.00	Reusable	

Note: Both color 16mm films and color video tape cassettes will be available for the presentation of activity instructional films. A video tape cassette playback unit is required for the use of the latter.

PASS IT ON, II (PART OF THE CHILDREN'S FOLKLORE PROGRAM)

A multimedia product to increase opportunities for children ages 6-8 to grow in self-confidence

Pass It On, II, is one of two process-oriented instructional products developed as a set by the Children's Folklore Program. The product is designed for 6- and 8-year-old children and their teachers. It uses traditionalized play—children's folklore—to increase opportunities for children to grow in self-confidence; in appreciation of group similarities and differences; in creativeness; and in the development of skills of communication, group organization and management, problem solving, and decisionmaking.

Pass It On, II, is made up of a sequence of five *Pass It On* activities and a staff instructional package. Each activity presents folklore items or forms that children can learn and perform together, and stimulates the sharing and learning of folklore from the children's own repertoires. Instructional materials for children include five 3- to 5-minute, 16mm color films which introduce folklore items, riddle books which are resources for practice in riddling, and cartoon books which provide motivation and reinforcement for learning and sharing folklore. Staff instructional materials include a guide for the orientation of teachers, a film and audiotape to sensitize teachers to children's folklore, and a handbook of guidelines and lesson plans for the presentation of *Pass It On*.

The design of *Pass It On, II*, draws from research which is based on findings of psychologists, anthropologists, and linguists and which is related to the effects of play on child development. Their studies indicate that adults' thinking processes, as well as their self-confidence and social skills, are rooted, to a large degree, in the play of their childhood. Research evidence shows that play is a nonthreatening environment where children readily employ and experiment with systems of rules and with skills they see adults apply. *Pass It On, II*, further draws from the value of traditionalized play, which is children's folklore, as a vehicle of cultural expression and child-to-child communication. The ultimate content of *Pass It On, II*, is the children's own folklore repertoires, their own interaction, and their own responses. Because of this, children are actively involved in learning and creating learning situations.

Three strategies are used in *Pass It On, II*: (1) Team teaching, the combination of classes from different grade levels, provides opportunities for new play groups and therefore increases opportunities for interaction across age, sex, and ethnic groups; (2) small groups are used since they are manageable and increase opportunities for participation by individual children; and (3) the use of 9-, 10-, and 11-year-old children as group helpers provides experience in leadership for the older children, while reducing supervisory requirements on teachers and expanding the younger children's opportunities to learn.

Teachers using *Pass It On, II*, must instruct themselves and the older group helpers, arrange schedules, plan grouping procedures, introduce activities, and operate projection equipment. However, *Pass It On, II*, teachers function primarily in a resource role. They may offer specific information to the children, or they may facilitate smoother interaction in the small groups through brief participation, questions, or suggestions. Additional time created through team teaching and the use of group helpers can be applied to teacher observation of group activities. This observation can increase the effectiveness of the teacher as a resource.

SUBJECT AREA(S)

Pass It On, II, is a process-oriented product, and several concepts are considered in the process orientation. Children's folklore takes the forms of games, rhymes, riddles, songs, stories, and dances which are known and performed by children. The aspect of performance, a communicative process among children, is inseparable from the definition. It is performance that traditionalizes the form, that makes the form a vehicle for cultural expression. As a communicative process, folklore requires creativeness and conveys the culture of the performer and the performer's group. More is involved in the learning and performance of folklore. Skills are required even to use the form. These include problem solving, decisionmaking, group organization and management, and communication skills. In acquiring an item of folklore and the skills it requires, a child must follow, informally in a social interaction context, a process of learning that approximates the process for learning in the cognitive realm. Thus, *Pass It On, II,* emphasizes a wide range of concepts: Concepts from cultural anthropology; concepts from the folklore of children; concepts from sociolinguistics; concepts from developmental psychology; concepts of aesthetic expression, artistry, creativity, and cultural expression; each child's cultural folklore repertoire and each child's skills form the basis of content, thereby bringing into the classroom the culture and skills of each group in the community; and teacher understanding of and sensitization to children's folklore.

INTENDED USERS AND BENEFICIARIES

Pass It On, II, is designed for use by 6-, 7- and 8-year-old children and their teachers. Testing and school personnel response indicate benefits were achieved for the target group. In addition, testing found that 9-, 10- and 11-year-old children who serve as group helpers during *Pass It On* also benefit from the experience. Teachers and principals involved in product testing received positive response to the folklore program from parents. Teachers and administrators also identified aspects of the program as useful in increasing positive communication between parents and children and between community and school.

GOAL(S) OR PURPOSE(S)

The goals of this program are: (1) To increase target children's interaction across age, sex, and ethnic groups, and thereby enhance verbal and nonverbal communication skills, increase group organization and management skills, and strengthen problem-solving and decisionmaking skills; (2) to increase sharing of folklore among target children from differing age, sex, and ethnic groups, and thereby enhance self-confidence of individual children, increase awareness of group similarities and differences, improve the individual child's adeptness in cultural expression, and broaden the individual child's experience in creativeness, and (3) orient teachers in the use of *Pass It On* and thereby sensitize teachers to the nature of children's folklore and to its role in children's development and to increase teacher effectiveness in the resource role.

PATTERNS OF USE

Pass It On, II, is a self-contained product in which the five *Pass It On* activities are presented to children sequentially. An optional activity can be used in conjunction with the activities or alone in a sixth presentation. The staff instructional package involves approximately 4 hours of orientation prior to implementation of *Pass It On, II.*

TIME REQUIREMENTS

Each of the five *Pass It On* activities includes folklore activity time (30 minutes) and folklore trading time (15 minutes). One activity is presented each week for 5 weeks anytime during the school year. The optional activity, if used, can be broken down into several 5- to 15-minute additions to regular activities, or it can be presented as an individual 45-minute presentation during a sixth week.

Orientation for teachers, contained in a self-instructional package, takes place prior to implementation of *Pass It On, II,* and involves self-instruction (3 hours), group helper media viewing session (30 minutes), and a group helper orientation session (30 minutes).

IMPLEMENTATION PROCEDURES

The product can be used in both team-taught and traditional, self-contained classrooms. It can be implemented with or without older children as group helpers. However, team teaching and the use of older group helpers are recommended strategies. In some cases, schools wishing to use these strategies will have to make special provisions.

ASSURANCES AND CLAIMS

This product has been pilot tested in 8 classrooms with 223 6-, 7-, and 8-year-old children. It is scheduled to be field tested in late spring 1975.

At the end of the 6-week pilot test period, the teachers reported that their pupils' interest and participation were positive during the instructional periods. Attitudes of participating teachers and school administrators toward the program were also positive.

Parents of pupils involved in the pilot test were informed in writing of their children's involvement. All teachers reported favorable reactions and interest from parents.

Teachers completed a checklist each week of the program. Results from the checklist and from the post-pilot test interview are summarized below. All of the teachers in the program reported the teacher handbook as extremely useful, with few reports of problems in understanding or usefulness. Few teachers reported problems with the management of the program. Over half reported no problems with implementation they couldn't deal with without the help of SEDL staff. Ease of use of multimedia materials was also reported. Over half of the teachers reported no problems with equipment. Thus, the products are reported by users to be transportable.

Teamed classrooms utilizing older 4th- and 5th-grade helpers or self-contained classrooms utilizing no helpers were designated at each pilot test site. No differences were found in pupil interest, pupil participation, or pupil mastery of activities due to either treatment.

At the end of the pilot test, a majority of teachers reported a preference for implementing the program in a teamed situation. Using older group helpers reportedly benefited the teachers who used them, the teachers' children, and the teachers' helpers as well. The teachers reported an advantage in being able to act as observers during the folklore period. The observer role enabled them to learn more about their children, whom they were able to see from a different point of view.

Stimulus materials (six media presentations, the "Riddle Book," and "Comic Book") were reviewed by a panel of specialists external to the program. The panelist found no biases toward socioeconomic or ethnic groups present. No bias regarding sex stereotyping was mentioned, although the subject was not addressed specifically. In addition, the panelists found the stimulus materials to be appropriate to the developmental level for which each was designed, and relevant to the promotion of effective development. The panelists found the stimulus materials not to be detrimental to the refinement of social communication skills nor to the understanding of cultural diversity, and they found them to encourage social interaction. They found the stimulus products appropriate for use by students who do not read well or at all.

A process-oriented product in which mastery is measured by evidence of the process can only be measured by observation. Although no claims can be made before field test data are gathered, findings from observations made by teachers, program staff, and evaluation staff during pilot test are summarized below.

Voluntary participation across sex, age, and ethnic groups increased during the period of pilot test for a majority of pupils as observed by both program and evaluation staff.

The teachers reported observing changes in their socially and academically shy children ("loners") as well as in their social leaders which they attributed to the program. No changes attributable to the program were reported among academic leaders. All changes reported were toward increased participation.

Emphasis during the field test will center more on progression through the stages of folklore and observation of emerging leadership roles than on social interaction patterns, as was emphasized during the pilot test.

MATERIALS AND EQUIPMENT

Required Items	Quantity Needed	Cost per Item in Dollars	Replacement Rate and Cost	Source if Different from Distributor
Unit set (2 classrooms) including 5 16mm color films (approx. 5 min. each), riddle books and cartoons relating to folklore activities, and note sheets for parents	1 set per unit (2 classrooms)	170.00	Reusable	
Staff instructional package including 1 16mm color film (14 min.), a teacher handbook, an orientation guide for teachers, and an audiotape cassette	1 set per school or district	80.00	Reusable	

Both color 16mm films and color video tape cassettes will be available for the presentation of activity instructional films. A video tape cassette playback unit is required for the use of the latter.

INFORMATION CURRENT AS OF MARCH 1975 ■

FROM CHILD TO CHILD (PART OF THE CHILDREN'S FOLKLORE PROGRAM)

A motivational overview used to familiarize the viewer with the importance of play to the learning of young children

From Child to Child is a motivational overview and a staff instructional product. As a motivational overview, it is used to familiarize the viewer with the importance of play and informal activities to young children's learning. It also shows ways that Southwest Educational Development Laboratory's (SEDL's) Children's Folklore Program uses such activities. As a staff instructional product, the film is used in a teacher orientation package to sensitize teachers, visually and aurally, to the importance of folklore activities in child development.

From Child to Child, produced as a 16mm color film or as a video tape cassette, focuses on children's folklore activities, emphasizes the role which they perform in a child's development, and outlines goals and the development process of the Children's Folklore Program. The film delineates the use of children's folklore, which is traditionalized play, in instructional products to increase children's opportunities to grow in self-confidence and to enhance development of appreciation of group similarities and differences, communication skills, creativity, group organization and management, and problem-solving and decisionmaking skills.

The developers recognize the need for the understanding of play as an educational concept and, in particular, the role of traditionalized play (children's folklore) in the development of important skills in children. A growing body of research indicates that play provides a nonthreatening environment in which children can experiment with systems of rules and with skills they see applied among adults. Children's folklore is a communicative process which allows for creative and cultural expression. For this reason, children's folklore is well suited for use in an integrated school situation. Besides providing all children with the opportunity to increase their self-confidence through creative expression, it is an effective vehicle for promoting cross-cultural understanding.

SUBJECT AREA(S)

From Child to Child contains a description of children's folklore activities and the skills developed through these activities, as well as a commentary on Southwest Educational Development Laboratory capabilities in developing instructional products using the folklore of children. Children's folklore activities are indistinguishable from play to most people. These activities include games, rhymes, riddles, songs, stories, and dances which are known and performed by children. Through these activities, children develop abilities in communication, problem solving, decisionmaking, group organization and management, and social interaction. In the design and development of *From Child to Child*, the Southwest Educational Development Laboratory children's folklore component drew from a wide range of concepts: Concepts from cultural anthropology; concepts from the folklore of children; concepts from linguistics and sociolinguistics, concepts from developmental psychology; concepts of aesthetic expression, artistry, creativity, and cultural expression; teacher understanding of and sensitization to children's folklore; and viewer understanding of children's folklore and its use in instructional products.

INTENDED USERS AND BENEFICIARIES

As a motivational overview, *From Child to Child* is designed to be shown to lay personnel interested in children's folklore, including persons outside the field of education as well as educators and those in education-related fields. It also is used at professional meetings and conferences to diffuse information about Southwest Educational Development Laboratory and the Children's Folklore Program.

As a staff instructional product, *From Child to Child* is designed to be used by teachers as part of an orientation package. In this capacity, it is shown first to sensitize teachers to children's folklore and again after a self-check questionnaire to help teachers identify specific playground behaviors.

GOAL(S) OR PURPOSE(S)

From Child to Child seeks to illustrate the Children's Folklore Program goals: (1) To develop an awareness and appreciation of group similarities and differences, (2) to develop artistic/expressive competence, (3) to develop linguistic/communication skills, and (4) to develop problem-solving and decisionmaking abilities in human relations.

The film also seeks to convey a feeling for children's folklore to any lay audience not familiar with the importance of play in children's development and to sensitize teachers to children's folklore activities, as well as the developmental skills promoted through those activities.

PATTERNS OF USE

From Child to Child is a self-contained product which can be used in two ways: As a motivational overview and as a staff instructional product. As a staff instructional product, it is used in conjunction with an organizational manual, an audiotape, and a teacher's handbook.

TIME REQUIREMENTS

From Child to Child is a 14-minute film. When used as a staff instructional product as part of a teacher orientation package, it is shown twice, for a total of 28 minutes.

IMPLEMENTATION PROCEDURES

As a motivational overview, *From Child to Child* is used by lay personnel interested in the Children's Folklore Program or by Southwest Educational Development Laboratory staff to disseminate information about the program. As a staff instructional product, it is used either by a teacher or a group of teachers, or by a selected trainer with a group of teachers.

ASSURANCES AND CLAIMS

The overview film for the Children's Folklore Program was pilot tested in spring 1974. The film also was reviewed by a Southwest Educational Development Laboratory staff panel not involved in its design. Care was taken in choosing the panelists to insure multiethnic and sex balance and to provide experience from various backgrounds, including both theoretical and practitioner.

As a result of the panel review, revisions in the film include lessening emphasis on black American folklore, increasing emphasis on Chicano folklore, and using more males in the films. Other revision recommendations included emphasizing the process of folklore as much as the content of folklore and improving film quality and narration.

No sex or ethnic bias has been reported in the revised version. Care was taken in the revision to include a balance of sex, ethnic, and social roles in the film. The revised film will be field tested during spring 1975.

The film was reported by the panelists to reinforce informal learning techniques, to encourage social communication skills among children, to help children understand and accept group differences, to model processes for problem solving and decisionmaking in a social setting, and to emphasize children's learning from each other. Efforts were made in the revised version to retain these strengths as emphasized in the earlier version.

RESPONSIVE EDUCATION PROGRAM

A program for grades K-3 meant to strengthen educational experiences by responding to the uniqueness of learners

The *Responsive Education Program* for primary grades (K-3) is based on the belief in building a pluralistic society through strengthening educational experiences to respond to the uniqueness of learners as individuals and group members. A basic tenet of the program recognizes and encourages parental and community involvement in the educational system. Three major goals provide direction for program operations. The program will assist the learner: To experience and develop behaviors for a cultural pluralistic environment, to develop a healthy self-concept, and to develop cognitive abilities. Each of these program goals is supported by a set of learner objectives.

In a culturally pluralistic environment, the learners: (1) Like themselves and their people; (2) have factual information about their cultural and ethnic group from the perspective of the group; (3) are aware of and respect facts about other cultural and ethnic groups' historical pasts and presents; (4) value human dignity and worth and apply these values to human rights and social justice; and (5) perceive options available to them and use them for problem solving to meet personal, community, and world needs.

Learners with healthy self-concepts: Use their own values, ideas, and feelings authentically and appropriately; identify and use resources in problem solving; use possibilities within limits; and self-evaluate and take credit for their accomplishments.

The educational climate or environment of a responsive classroom includes a physical setting that is functional and current, readily accessible, and relevant to and representative of the children. It also contains potential for variations in grouping size and composition, activity level, and means of expression.

The curriculum of a responsive classroom would: Emphasize the learning process as opposed to only learning facts; provide learning experiences that simulate the real world use of content skills and concepts; be designed around experiences that evolve from an activity base; and include teacher and learner materials which represent, or are able to be adapted to represent, the immediate environment and the people within it.

The teachers are integral and key contributors in a responsive learning environment. They are skilled observers of the learners, documenting activities and behaviors. They respond to the learners in a manner that supports and contributes to responsive objectives and principles. They establish an educational climate, develop a curriculum, and facilitate student experiences.

The students in a responsive learning environment engage in exploring, planning, choice making, and goal setting. They discover individual self-strengths, preferences, and liabilities. They develop a repertoire of abilities for building a broad and varied experiential base as well as self-consciousness. The students interact with all aspects of the educational environment, including other students. Individually, or within a group, they may take on the role of leader, follower, or evaluator. These interactions can be curriculum oriented and may also involve personal and social issues. As the students increase their experiential repertoire, develop self, and address the personal and social issues, they take responsibility for their actions.

SUBJECT AREA(S)

The *Responsive Education Program* permeates and encompasses the curriculum of the primary grades.

INTENDED USERS AND BENEFICIARIES

This program is designed for students in the primary grades (K-3). Upper elementary students are also utilizing the responsive process. Teachers and principals receive inservice training in the implementation of the program.

GOAL(S) OR PURPOSE(S)

The goals of this program are to help the learner: (1) To experience and develop behaviors for a cultural pluralistic environment, (2) to develop a healthy self-concept, and (3) to develop cognitive abilities. The development of competencies in adults to assist the learner reach these goals is the major purpose of the inservice training program.

PATTERNS OF USE

The program is a learning process that can be applied to all aspects of the primary level curriculum. It would be built into lesson plans for curriculum content and activities.

ASSESSMENT PROVISIONS

Learning is assessed by the teacher and school evaluators. Standardized tests may be used, as well as tests designed to measure specific program outcomes, such as language production, problem solving, and forms of educational experiences.

TIME REQUIREMENTS

This program is operational for the complete school year during the appropriate number of instructional hours per day.

IMPLEMENTATION PROCEDURES

The program requires preservice training prior to beginning the school year and ongoing inservice training during the school year for adults in the classrooms. Teachers are encouraged to implement one element of responsiveness at a time. Planning time is needed either at the beginning or at the end of each school day.

Classrooms may need to be organized to provide for learning centers, individual work areas, small-group activities, and large-group sessions. Materials will need to be available to students, accommodating different learning styles and pacing.

Parents are encouraged to particpate in the classrooms and become involved in the educational program.

Summary Cost Information

Cost for total program implementation as well as specific elements will be available in fall 1975. The prices given in "Materials and Equipment" are subject to change.

Personnel Required for Product Adoption and Implementation

A classroom teacher participating in inservice training can implement this program. Teaching assistants (paraprofessionals) or parent volunteers receiving training would accelerate implementation. Administrators directly responsible for classroom instruction should also be involved. If 10 classrooms are established, a local staff developer/trainer should implement the training. Inservice training for staff developers/teachers/administrators is available from the Far West Laboratory.

ASSURANCES AND CLAIMS

Assurances

The information gathered during the development of this program in 14 school systems in 13 States over a period of 5 years indicates that the students continue to progress and meet district standards. The developer has not received any reports of harm associated with the use of the product. In fact, most systems have extended the program beyond the initial pilot classrooms.

Classroom curriculum materials are thoroughly tested and verified. Training materials have undergone rigorous development, and the training process has been developed and refined over a period of 5 years.

Claims

Classroom observation data collected by the two national contractors have clearly shown that the distinctive educational philosophy of the program has been successfully translated into a classroom setting. This distinct classroom process has been successfully replicated in a large number of classrooms, in school districts varying widely in geographical and social factors, across grade levels, and across years of program operation. In classrooms where this responsive process has been implemented, data show that children's self-concept development and problem-solving ability have increased.

Children's gains in "basic skills" have been another important goal of the program. A variety of evaluation studies conducted by participating school districts, by the Far West Laboratory, and by two national contractors, have documented program success in improving the competence of children in the areas of reading, quantitative skills, and language skills for grades kindergarten through 3d. In another study, children in the program were shown to have gained significantly more on intelligence measures than comparison children over a 3-year period.

A number of components and methods have proved their worth not only in the context of the total program, but also as independently applied tools for improving early childhood education. The Parent/Child Toy-Lending Library has been used as an independent resource both nationally and internationally. The Learning Booth has been evaluated extensively within the program and also has potential as an independent unit. Many school districts across the Nation have used the *Responsive Education Program* as a model and have borrowed extensively from its principles and methods. Some of these principles and methods have been packaged as units in the flexible learning system, a comprehensive program for teaching and certifying early childhood teaching personnel.

A distinctive feature of the program is its method of delivery and implementation. Emphasis is placed on maximum participation by all concerned participants within the community: Teachers, teacher trainers, administrators, and especially parents. In particular, the program has had considerable success in increasing the participation of parents in the education of their children, both directly as teacher resources in the classroom and as decisionmakers in policy matters.

MATERIALS AND EQUIPMENT

Required Items	Quantity Needed	Cost per Item in Dollars	Replacement Rate and Cost	Source if Different from Distributor
Kindergarten:				
Typewriter and materials for the learning booth	1 per class	350.00		Smith Corona and developer
Curriculum content materials (toys and games); may be substituted for regular classroom materials	As normally provided	200.00		Publishers
Grades 1, 2 and 3:				
Curriculum content materials (SCIS, Language Experience in Reading)	As normally provided	200.00		
Teacher training materials in healthy self-concept, problem solving, language skills, literature, analyzing textbooks, learning centers, etc.	1 per staff developer and 1 per teacher	10.00 each

SOCIAL ENCOUNTER AND RESEARCH CURRICULUM FOR HUMANIZATION (SEARCH)

An individualized, interdisciplinary program of social education for grades K-3

Social Encounter and Research Curriculum for Humanization (SEARCH) is a Piaget-based, individualized, interdisciplinary program of social education for grades K-3. SEARCH focuses on the interaction between children and their personal, social, and cultural environments. A total of 40 classroom units constitutes the K-3 package. Each unit is accompanied with multimedia instructional materials and preevaluation and postevaluation instruments. The materials are packaged for self-management and ready access by the students.

SEARCH content is organized around five psychosocial life functions: Self-realizing, governing, producing and consuming goods and services, utilizing environments, and interpreting and generating ideas and events. The functions reflect the fact that human action and awareness begin with a personal focus and expand, as cognitive development expands, toward a focus on all humanity. The functions also relate to the traditional social science disciplines from which SEARCH obtains the content of its instruction: Geography, history, economics, political science, sociology, anthropology, and psychology. SEARCH has a three-phase instructional plan related to Piaget's developmental sequence: Encounter, research, and action.

The encounter phase consists of activities that introduces a unit, and concentrates on the development of the child's image and language for material in that unit. The research phase emphasizes the active investigation and exploration of a particular problem related to that unit. The action phase activities require the child to demonstrate knowledge of the unit material by relating it to its own social reality and sharing the knowledge with classroom peers.

The teacher is primarily a facilitator of instruction; the teacher monitors critical checkpoints in testing and keeps records of the child's performance. The central focus, however, is on the child's own activity. Emphasis is on the learner's increasing responsibility to manage his/her own activity. Choice of various materials by the student is encouraged, placement is determined after pretest diagnosis, and mastery testing occurs upon the completion of a unit.

The sequence of activities is presented by means of a flow chart which applies to the materials in every SEARCH unit. The average time spent on a unit is 3-1/2-4 hours per child. The SEARCH's instructional program for grades K-3 is conveniently divided into 3 groups of 10 units; each group is roughly associated with a grade level of instruction. Every unit begins with a diagnostic pretest and concludes with a unit mastery test. The instructional plan allows for the child to pace learning as the various activities are pursued. The materials provide for independent, as well as partner and group, experiences.

SEARCH is in its third year of tryout in an urban center elementary school in Philadelphia, Pennsylvania. Preliminary findings indicate that the instructional strategies used in SEARCH are effective and that the materials are particularly appealing to students. A new addition to the SEARCH program is STEP (SEARCH teacher education program), which is currently being tested. STEP, a self-instructional program, includes a handbook and several multimedia presentations to acquaint teachers with the strategies and procedures of the SEARCH program. STEP also includes a START unit for teachers to prepare students to use the SEARCH instructional plan.

SUBJECT AREA(S)

Social education is the subject area.

Structurally the SEARCH functions are designed to organize more traditional social studies content into an integrated program. Larger themes such as personality, order, value, cosmos, and culture are links between the SEARCH functions and such disciplines as psychology, sociology, anthropology, political science, economics, geography, and history.

INTENDED USERS AND BENEFICIARIES

The SEARCH units have been designed for kindergarten and 1st-grade students of all ability levels within the normal range. Students should be English-speaking, but need not know how to read. Additional materials for grades 2 and 3 are in preparation.

GOAL(S) OR PURPOSE(S)

The student successfully completing the SEARCH units: (1) Is able to demonstrate increasing control over the acquisition of social information and experience, (2) is able to demonstrate more effective processing of social studies information and conceptual knowledge, and (3) is able to relate the concepts of various social studies disciplines to the student's own social reality.

PATTERNS OF USE

SEARCH units are sequenced within functions. Any one function can be studied independently of the other four. For an integrated interdisciplinary program, all five functions should be studied at each grade level. The functions can also be used to supplement an existing program and can be obtained singly if purchase of the entire program is not possible. The instructional program is accompanied with teacher education material.

ASSESSMENT PROVISIONS

At the beginning of each SEARCH unit, the student takes a three-part pretest that measures competence in that unit. On the basis of that pretest, the student is then placed in the appropriate encounter or research activity. All students complete research and action tasks. They may skip encounter tasks if they are able to demonstrate knowledge of the image and language of a unit. A posttest gages student progress on all three phases of instruction. Pretests and posttests are accompanied with teacher materials for charting student progress.

TIME REQUIREMENTS

Testing and instruction of one SEARCH unit averages from 3-1/2 to 4 hours per unit. There are 10 units in a grade level, or approximately 30 weeks of three half-hour sessions for each grade level.

IMPLEMENTATION PROCEDURES

SEARCH requires only standard audiovisual equipment. No special organizational changes are necessary for the program's implementation. The SEARCH teacher education program works best with at least 3 or 4 hours of preinstructional preparation. The community and families of SEARCH learners seem to relate well to the program, and the content appears socially meaningful to children of varying ethnic and social circumstances.

Summary Cost Information

The kindergarten and grade 1 SEARCH units will be available for approximately $650; this price includes the cost of 20 units ($450), 20 teacher unit notebooks ($140), and a teacher education package ($20). It is noted that the materials will, in all likelihood, be shared by two classes at each stage. Thus, if 120 kindergarten and 1st-grade students were involved, the initial per-pupil cost would be $5.42. Consumables may be replaced at a cost of $60 per grade level for 10 units. This amounts to $2 per student per year. In addition, SEARCH's units are packaged separately and may be purchased at the discretion of the buyer. Thus, if a buyer decided to purchase only six of the stage I (K) units, the cost per student would be reduced further.

The self-instructional teacher education package will permit teachers and curriculum personnel to acquaint themselves with SEARCH and with the procedures required to implement SEARCH's individualized instructional system. The teacher education package is designed to be implemented by local personnel. In addition, a special workshop conducted by a SEARCH staff member can also be arranged as an optional teacher preparation program at the school site. This optional workshop would cost $250 plus expenses.

Personnel Required for Product Adoption and Implementation

No special qualifications or training, aside from the SEARCH teacher education program, are required to being revised continually in order to ascertain and assure who desire to implement SEARCH in their classroom should be able to do so. In order to facilitate optimum implementation of SEARCH's instructional system in classes consisting of 25 or more students, it is recommended that an aide be employed to assist the teacher.

ASSURANCES AND CLAIMS

The SEARCH program, presently under development, is continually being revised in order to ascertain and assure its intrinsic quality. Over a period of 2-1/2 years, some 100 kindergarten students and an equivalent number of 1st-graders participated in the testing of SEARCH units.

Assurances

During SEARCH's 2-1/2-year testing period, there have been no user reports or evaluator observations of harmful psychological, physiological, or social bias effects due to the use of the program. This was not due to chance since a systematic attempt was made in the development of SEARCH's instructional materials to assure that sexism, racism, and other forms of social bias were not perpetuated. A systematic attempt was also made to incorporate instances of affirmative action which would have the effect of promoting social fairness.

External reviewers have attested to the validity of the conceptual base for SEARCH's content. The soundness of SEARCH's instructional design has also been affirmed. One reviewer even ranked SEARCH among the top three of the "new" social studies programs.

It is expected that data regarding a hands-off test of the replicability of SEARCH will be available by November 1975. A SEARCH teacher education program (STEP), a self-instructional program, is also available to further assure the replicability of SEARCH. The instructional units and the teacher education program are housed in individual packages which are readily transportable from the development site to a school and between classes in a school.

Claims

The SEARCH program, being Piaget-based in terms of its instructional plan, does not require students to be able to read and is rich in graphic and manipulative materials. As such, SEARCH accommodates the entry level skills of a great majority of the primary school population and provides experiences appropriate to cognitive and affective stages of development.

Kindergarten and 1st grade SEARCH units have been tested in several classrooms for instructional effectiveness. In the majority of cases, outcomes with respect to SEARCH units met the developers' intentions in terms of expected gains in student achievement. SEARCH also gained the general acceptance of the students, teachers, and administrators at its developmental site.

Logical analyses conducted by external reviewers established the intrinsic quality of SEARCH's content. External reviewers also attested to the harmlessness and social fairness of SEARCH's material. In addition, teachers have commented that the content of SEARCH parallels and further enriches the social studies curriculum used in their school district.

The development of SEARCH has been guided by a comprehensive evaluation/development model consisting of four tryout and three revision stages. The model has provided both logical and empirical feedback to the developers for further revision. Specific evaluation questions were posed at each tryout stage. Tryout data were obtained and documented via structured evaluation procedures and forms. The results of more than 2-1/2 years of testing in the classrooms have shown that, in general, the kindergarten and 1st grade SEARCH program achieves the instructional effects that were planned.

MATERIALS AND EQUIPMENT

Required Items	Quantity Needed	Cost per Item in Dollars	Replacement Rate and Cost	Source if Different from Distributor
10 units (individually boxed) per grade level	1 set per class of 32	Only developmental market estimates available: approx. 24.00 per unit; 245.00 per grade level for 10 units	Printed consumable paper replaced yearly: $6.00 per unit; $60.00 per grade level* for 10 units	
10 teacher unit notebooks	1 set per teacher**	70.00 (approx.) for 10	Reusable	
1 SEARCH teacher education package	1 per teacher**	20.00 (approx.)	Reusable	

*Subject to increasing production costs.
**Unit notebooks and teacher education materials may be shared by teachers.

AVAILABILITY

Revisions based on materials and systems tryouts will be completed for the stage I (K) SEARCH materials by November 1975. The revised stage II (grade 1) materials will be available by April 1976. Interested parties can make arrangements with the developer to purchase and/or produce from the prototype these kindergarten and 1st-grade materials for the 1975-76 school year. Prototype copies of stages III and IV (grades 2 and 3) will be available by August 1977. An evaluation report on the overall effectiveness of SEARCH K-3 will be completed by November 1977. Contact the developer for information:

INFORMATION CURRENT AS OF MARCH 1975 ■

RD 180 009

SOCIAL EDUCATION, YEAR 1

A multimedia instructional package to introduce social concepts about the family to 1st graders

The *Social Education, Year 1 Program,* is a multimedia, multicultural, instructional package including materials for teachers and pupils. Each unit consists of three to seven lessons and includes an instructional manual, a test based on the curriculum, and special multimedia, instructional materials (such as filmstrips, films, audiotapes, puzzles, puppets, teaching pictures, and game cards). The program contains 16 units which focus on the family. Three additional units feature materials that assist the teacher at the beginning and end of the school year and on special occasions throughout the year. Social science concepts are introduced and developed in recurring cycles.

Each unit incorporates specified objectives and the inquiry method to enhance the intellectual process development of young children. The program uses criterion-referenced measures for evaluation purposes. Staff development is built into the instructional units, with lesson planning and all materials furnished for the teacher. In addition, a self-contained, 3-hour multimedia staff development package accompanies instructional materials.

The teacher, through the structured activity, physically involves the pupils in an experience to provide a base for learning. Open-ended questions are asked, and the children's appropriate responses are accepted. The teacher uses instructional techniques and materials provided by the program to encourage children to become more actively engaged in the learning process. The teacher leads the children to discover and to elaborate on concepts, asks questions which encourage them to develop logical thinking patterns, and assists them in developing tools for dealing with the social, economic, and political realities of life. The children are given opportunities for self-identification and to develop an appreciation of lifestyles and ethnic and economic groups. Pretests, posttests, and unit tests are administered, and the children's responses are evaluated.

The learners gain self-confidence by succeeding in developing thinking skills without depending on reading. The child is motivated to learn by the enjoyment experienced in the learning situations.

In a sample unit on communication, the children explore the many ways people communicate ideas, instructions, and feelings. The students are encouraged to examine the methods and media by which others communicate—sounds, gestures, pictures, the spoken word, and the written word. Finally, the students are shown how they need these channels of communication to relate to others.

SUBJECT AREA(S)

The purpose of the program is to provide experiences for children which will enable them to develop significant, functional social concepts. Since the 1st graders' experiences are almost totally within their families, the social concepts introduced in the 1st-grade program are about the family. By using the family as a model, the 1st-grade children are introduced to such concepts as interdependence, dependence, roles, communication, and education.

INTENDED USERS AND BENEFICIARIES

Pupils in the program are at a developmental level usually associated with the 1st grade. Although tested primarily with pupils in schools located in low socioeconomic communities, *Social Education* has been used successfully with children in a wide range of socioeconomic communities. Pupils using the program are multiethnic.

Other potential users are the teachers, supervisors, coordinators, and administrators who will implement the program; university professors in teacher education programs; and regional service-center personnel.

GOAL(S) OR PURPOSE(S)

The pupils who participate in this social education program will be able: (1) To develop selected concepts from the social sciences that relate to people in families, (2) to enhance their self-confidence by succeeding in learning without depending on reading ability, (3) to develop their thinking skills, (4) to develop an awareness of cultural diversity, and (5) to enjoy their learning activities.

PATTERNS OF USE

Units can be presented in any order; however, it is recommended that the lessons within each unit be presented in sequence. The numbered units comprise a comprehensive 1-year curriculum which will meet social studies requirements in most States. The three supplemental units may be used separately, in related subjects, or as enrichment materials in art, language study, or in preparation for special days.

ASSESSMENT PROVISIONS

Teachers of the *Social Education Program* are provided with two forms of criterion-referenced evaluation measures for classroom use—proficiency measures (unit tests) and mastery test. The proficiency measures enable teachers to evaluate how well the children have learned the concepts introduced in each unit. The mastery test provides a means for the teacher to evaluate children's mastery of concepts presented during the year, and can also be used, at the teacher's discretion, as a pretest to provide comparison information for the end-of-year administration of the mastery test.

TIME REQUIREMENTS

The product is intended to be used from 20 to 30 minutes daily for approximately 100 teaching days. Total number of teaching days will vary according to the number of lessons selected by teachers from the three supplementary units.

IMPLEMENTATION PROCEDURES

No special equipment or facilities are required. The program does not require a specialist teacher. Any teacher who attends the 3-hour orientation session will be able to implement the program. The lessons may be taught in large or small groups. No special organizational requirements are needed in the school. The program has been adapted successfully in a variety of school settings (traditional and open classrooms, graded or nongraded).

Personnel Required for Product Adoption and Implementation

The *Social Education Program* does not require extensive preservice staff development for teachers. The teaching strategies, questioning sequences, and supporting media for concept development are provided with the instructional materials. A 3-hour teacher orientation package introduces teachers to the program and orients them to the materials. This training might be implemented by a primary supervisor or social studies consultant within the school district.

During the summer the laboratory conducts a 2-day seminar in Austin, Texas, for school personnel identified as teacher trainers to provide further training in teacher orientation package, program goals and premises, program scope and sequence, intellectural process development, use of instructional materials, and evaluation instruments and procedures. Attendance at this seminar is optional. The teacher orientation package may be used successfully by trainers who are unable to attend the seminar. All materials and complete directions for conducting teacher-training sessions are included in the kit.

ASSURANCES AND CLAIMS

Assurances

Formative data obtained from classroom teachers and pupils during the 4-year developmental process were used for revising and refining the program. These data provided no indication of sociological, psychological, or physical harm to pupils exposed to the program.

External review of *Social Education, Year I*, curriculum materials and teacher responses to user questionnaires indicated no sexual, racial, social, or other stereotyping or bias. However, an inhouse intern report conducted in late 1973 indicated a tendency for males to play the dominant roles in the materials.

With minimal producer assistance, curriculum materials were field tested in 53 classrooms in Texas, California, Louisiana, and Pennsylvania, and in 11 migrant classrooms in south Texas. Teacher responses to user questionnaires were highly favorable to the program. Since field test, 107 sets of year-1 curriculum materials have been sold to users in at least 13 States.

Claims

Social Education materials have been design tested, pilot tested, and field tested with thousands of children with diverse ethnic and cultural backgrounds. Each of the 380 schools in which the materials were tested has a high concentration of children from low-income families. In addition, external review of the materials indicated a high degree of pedagogical soundness, academic substance, and an effective use of media.

Mastery test results based on curriculum objectives indicate a high percentage (80-95 percent) of the children master program goals. Different ethnic groups are equally successful in meeting these goals.

On standardized social studies tests, children in the *Social Education Program* tend to score higher than children of similar ethnicity in social studies programs at comparison sites.

Teachers and observers report children's interest in the program is quite high, indicating the materials are successful in maintaining pupil attention.

External review of the curriculum materials indicated that they were sufficiently flexible to allow the children to respond from their own social experiences and value orientations and that opportunities are provided for all children to enhance their self-images and for the teacher to accept a variety of value orientations from the children.

The *Social Education Program* is a product of Southwest Educational Development Laboratory's systematic multiyear process of educational development, which begins with context analysis (a study of needs) and moves through design testing, pilot testing, and field testing to diffusion. Revision—based on feedback gathered at test sites—plays a major part throughout the process. Products are systematically refined after design test, after pilot test, and again after the more advanced field test.

MATERIALS AND EQUIPMENT

Required Items	Quantity Needed	Cost per Item in Dollars	Replacement Rate and Cost	Source if Different from Distributor
Student materials:				
Classroom set including teaching manuals, filmstrips, records, artist pictures, spirit masters	1 set per 30 students	111.00	Reusable; spirit masters consumable in 5 years	
Replacement materials:				
Media package (all artist pictures and spirit masters)	1 set per 30 students	60.00	Consumable in 5 years

INFORMATION CURRENT AS OF MARCH 1975 ■

SOCIAL EDUCATION, YEAR 2

A package for 2d graders to develop selected concepts from the social sciences that relate to families in a community

The *Social Education, Year 2 Program*, is a multimedia, multicultural, instructional package including materials for teachers and pupils. Social science concepts from six disciplines are introduced and developed in recurring cycles. Each unit consists of three to seven lessons and includes an instructional manual, a test based on the curriculum, and special multimedia, instructional materials (such as filmstrips, films, audiotapes, puzzles, puppets, teaching pictures, and game cards). The program contains 21 units which focus on many families in a community and the overlapping social, public, and economic activities and organizations which provide for the needs and wants of a community. Three units feature materials that assist the teacher at the beginning and end of the school year and on special occasions throughout the year.

Each unit incorporates specified objectives and the inquiry method to enhance the intellectual process development of young children. The program uses criterion-referenced measures for evaluation purposes. Staff development is built into the instructional units, with lesson planning and all materials furnished for the teacher. In addition, a self-contained, 3-hour multimedia staff development package accompanies instructional materials.

The teacher, through the structured activity, physically involves the pupils in an experience to provide a base for learning. Open-ended questions are asked, and the children's appropriate responses are accepted. The teacher uses instructional techniques and materials provided by the program to encourage children to become more actively engaged in the learning process. The teacher leads the children to discover and to develop logical thinking patterns, and assists the children in developing tools for dealing with the social, economic, and political realities of life. The children are given opportunities for self-identification and to develop an appreciation of lifestyles and ethnic and economic groups. Pretests/posttests and unit tests are administered, and the children's responses are evaluated.

The learners gain self-confidence by succeeding in developing thinking skills without depending on reading. The children are motivated to learn by the enjoyment experienced in the learning situations.

In a sample unit on communities, the children explore how the community offers a living laboratory in which to observe people meeting their needs and interacting with their environment. In this unit the children are provided with an introductory framework for observing and analyzing the components of most modern communities.

SUBJECT AREA(S)

The purpose of the program is to provide experiences for children which will enable them to develop significant, functional social concepts. In the second year of the program, the concept of family introduced in the first year is expanded to include many families in a community. The study of a community includes the study of scarcity and unlimited wants through a study of specialized production, interdependence, exchange, markets, prices, costs, and public policy.

INTENDED USERS AND BENEFICIARIES

Pupils in the program are at a developmental level usually associated with Year 2. Although tested primarily with pupils in schools located in low socioeconomic communities, *Social Education* has been used successfully with children in a wide range of socioeconomic communities. Pupils using the program are multiethnic. Other potential users are the teachers, supervisors, coordinators, and administrators who will implement the program; university professors in teacher education programs; and regional service-center personnel.

GOAL(S) OR PURPOSE(S)

The pupils who participate in this social education program will be able: (1) To develop selected concepts from the social sciences that relate to people in communities, (2) to enhance their self-confidence by succeeding in learning without depending on reading ability, (3) to develop their thinking skills, (4) to develop an awareness of cultural diversity, and (5) to enjoy their learning activities.

SOCIAL EDUCATION

RD 180 010

PATTERNS OF USE

Units can be presented in any order; however, it is recommended that the lessons within each unit be presented in sequence. The numbered units comprise a comprehensive 1-year curriculum which will meet social studies requirements in most States. The three supplemental units may be used separately, in related subjects, or as enrichment materials in art, language study, or in preparation for holidays.

ASSESSMENT PROVISIONS

Teachers of the *Social Education Program* are provided with two forms of criterion-referenced evaluation measures for classroom use—proficiency measures (unit tests) and mastery test. The proficiency measures enable teachers to evaluate how well the children have learned the concepts introduced in each unit. The mastery test provides a means for the teacher to evaluate children's mastery of concepts presented during the year, and can also be used, at the teacher's discretion, as a pretest to provide comparison information for the end-of-year administration of the mastery test.

TIME REQUIREMENTS

The product is intended to be used from 20 to 30 minutes daily for approximately 140 teaching days. Total number of teaching days will vary according to the number of lessons selected by teachers from three supplemental units.

IMPLEMENTATION PROCEDURES

No special equipment or facilities are required. The program does not require a specialist teacher. Any teacher who attends the 3-hour orientation session will be able to implement the program. The lessons may be taught in large or small groups. No special organizational requirements are needed in the school. The program has been adapted successfully in a variety of school settings (traditional and open classrooms, graded or nongraded).

Personnel Required for Product Adoption and Implementation

The *Social Education Program* does not require extensive preservice staff development for teachers. The teaching strategies, questioning sequences, and supporting media for concept development are provided with the instructional materials. A 3-hour Teacher Orientation Package introduces teachers to the program and orients them to the materials. This training might be implemented by a primary supervisor or social studies consultant within the school district.

During the summer the Laboratory conducts a 2-day seminar in Austin, Texas, for school personnel identified as teacher trainers to provide further training in Teacher Orientation Package, program goals and premises, program scope and sequence, intellectural process development, use of instructional materials, and evaluation instruments and procedures. Attendance at this seminar is optional. The Teacher Orientation Package may be used successfully by trainers who are unable to attend the seminar. All materials and complete directions for conducting teacher-training sessions are included in the kit.

ASSURANCES AND CLAIMS

Assurances

Formative data obtained from classroom teachers and pupils during the 3-year developmental process were used for revising and refining the program. These data provided no indication of sociological, psychological, or physical harm to pupils exposed to the program.

External review of *Social Education, Year 2* curriculum materials and teacher responses to user questionnaires indicated no sexual, racial, social, or other stereotyping or bias. However, an inhouse intern report conducted in late 1973 indicated a tendency for males to play the dominant roles in the materials.

With minimal producer assistance, curriculum materials were field tested in 53 classrooms in Texas, California, Louisiana, and Pennsylvania, and in 12 migrant classrooms in south Texas. Teacher responses to user questionnaires were highly favorable to the program. Since field test, 113 sets of year-2 curriculum materials have been sold to users in at least 12 States.

Claims

Social Education materials have been design tested, pilot tested, and field tested with thousands of children with diverse ethnic and cultural backgrounds. Each of the 380 schools in which the materials were tested has a high concentration of children from low-income families. In addition, external review of the materials indicated a high degree of pedagogical soundness, academic substance, and an effective use of media.

Mastery test results based on curriculum objectives indicate a high percentage (80-95 percent) of the children master program goals. Different ethnic groups are equally successful in meeting these goals.

On standardized social studies tests, children in the *Social Education Program* tend to score higher than children of similar ethnicity in social studies programs used at comparison sites.

Teachers and observers report children's interest in the program is quite high, indicating the materials are successful in maintaining pupil attention.

External review of the curriculum materials indicated that they were sufficiently flexible to allow the children to respond from their own social experiences and value orientations and that opportunities are provided for all children to enhance their self-images and for the teacher to accept a variety of value orientations from the children.

The *Social Education Program* is a product of Southwest Educational Development Laboratory's systematic multiyear Process of Educational Development, which begins with context analysis (a study of needs) and moves through design testing, pilot testing, and field testing to diffusion. Revision—based on feedback gathered at test sites—plays a major part throughout the process. Products are systematically refined after design test, after pilot test, and again after the more advanced field test.

MATERIALS AND EQUIPMENT

Required Items	Quantity Needed	Cost per Item in Dollars	Replacement Rate and Cost	Source if Different from Distributor
Student materials:				
Classroom set including teaching manuals, filmstrips, records, artist pictures, spirit masters	1 set per 30 pupils	189.00	Reusable; spirit masters consumable in 5 years	
Core package	1 set per 30 pupils	78.00	Consumable in 5 years	
Teacher materials:				
Staff Development Kit (filmstrips, audiotapes, manuals)	1 set per 30 pupils	15.00	Reusable

SOCIAL EDUCATION, YEAR 3

An introduction to basic relationships among lifestyles, environments, and traditions for 3d graders

The *Social Education, Year 3 Program*, is a multimedia, multicultural instructional package including materials for teachers and pupils. Social science concepts from six disciplines are introduced and developed in recurring cycles. Each unit consists of three to seven lessons and includes an instructional manual, a test based on the curriculum, and special multimedia, instructional materials (such as filmstrips, films, audiotapes, puzzles, puppets, teaching pictures, and game cards). The program contains 16 units which focus on the study of a variety of cultures under contrasting geographic conditions and which represent the simple and the complex, the urban and the rural, and the old and the new. Two units feature materials that assist the teacher at the beginning and end of the school year. One unit is especially designed to help the child develop a greater appreciation of the cultural and historical differences of four cultures in the United States.

Each unit incorporates specified objectives and the inquiry method to enhance the intellectual process development of young children. The program uses criterion-referenced measures for evaluation purposes. Staff development is built into the instructional units, with lesson planning and all materials furnished for the teacher. In addition, a self-contained, 3-hour multimedia staff development package accompanies instructional materials.

The teacher, through the structured activity, physically involves the pupils in an experience to provide a base for learning. Open-ended questions are asked, and the children's appropriate responses are accepted. The teacher uses instructional techniques and materials provided by the program to encourage children to become more actively engaged in the learning process. The teacher leads the children to discover and to elaborate on concepts, asks questions which encourage the children to develop logical thinking patterns, and assists the children in developing tools for dealing with the social, economic, and political realities of life. The children are given opportunities for self-identification and to develop an appreciation of lifestyles and ethnic and economic groups. Pretests, posttests, and unit tests are administered and the children's responses are evaluated.

The learners gain self-confidence by succeeding in developing thinking skills without depending on reading. The children are motivated to learn by the enjoyment experienced in the learning situations.

In a sample unit called "The Weather Worriers," the children explore how various cultures have developed ways of handling the universal problem of adapting to temperature. The students learn that human beings are learning to control environments and to invent artificial environments in which to live. The unit draws from the disciplines of biology, physical anthropology, geography, sociology, cultural anthropology, economics, and psychology.

SUBJECT AREA(S)

The purpose of the program is to provide experiences for children which will enable them to develop significant, functional social concepts. In the third year of the program, the children are introduced to basic relationships among lifestyles, environments, and traditions. Through the study of a variety of cultures, the students develop an understanding of their own culture and their reactions to life situations. The cultures studied exist under contrasting geographic conditions and represent the simple and complex, the urban and rural, and the old and new. Sample titles of units are "We Need Each Other," "A Way of Life," "Food for Thought," "Tell Me Why," "The Dream Animal," and "Kith and Kin."

INTENDED USERS AND BENEFICIARIES

Pupils in the program are at a developmental level usually associated with the 3d grade. Although tested primarily with pupils in schools located in low socioeconomic communities, *Social Education* has been used successfully with children in a wide range of socioeconomic communities. Pupils using the program are multiethnic. Other potential users are the teachers, supervisors, coordinators, and administrators who will implement the program; university professors in teacher education programs; and regional service-center personnel.

GOAL(S) OR PURPOSE(S)

The pupils who participate in this social education program will be able: (1) To develop selected concepts from the social sciences that relate to people in communities, (2) to enhance their self-confidence by succeeding in learning without depending on reading ability, (3) to develop their thinking skills, (4) to develop an awareness of cultural diversity, and (5) to enjoy their learning activities.

PATTERNS OF USE

Units can be presented in any order; however, it is recommended that the lessons within each unit be presented in sequence. The numbered units comprise a comprehensive 1-year curriculum which will meet social studies requirements in most States. The three supplemental units may be used separately, in related subjects, or as enrichment materials in art, language study, or in preparation for special days.

ASSESSMENT PROVISIONS

Teachers of the *Social Education Program* are provided with two forms of criterion-referenced evaluation measures for classroom use—proficiency measures (unit tests) and mastery test. The proficiency measures enable teachers to evaluate how well the children have learned the concepts introduced in each unit. The mastery test provides a means for the teacher to evaluate children's mastery of concepts presented during the year, and can also be used, at the teacher's discretion, as a pretest to provide comparison information for the end-of-year administration of the mastery test.

TIME REQUIREMENTS

The product is intended to be used from 30 to 45 minutes daily for approximately 140 teaching days. Total number of teaching days will vary according to the number of lessons selected by teachers from the three supplemental units.

IMPLEMENTATION PROCEDURES

No special equipment or facilities are required. The program does not require a specialist teacher. Any teacher who attends the 3-hour orientation session will be able to implement the program. The lessons may be taught in large or small groups. No special organizational requirements are needed in the school. The program has been adapted successfully in a variety of school settings (traditional and open classrooms, graded or nongraded).

Personnel Required for Product Adoption and Implementation

The *Social Education Program* does not require extensive preservice staff development for teachers. The teaching strategies, questioning sequences, and supporting media for concept development are provided with the instructional materials. A 3-hour teacher orientation package introduces teachers to the program and orients them to the materials. This training might be implemented by a primary supervisor or social studies consultant within the school district.

During the summer the Laboratory conducts a 2-day seminar in Austin, Tex., for school personnel identified as teacher trainers to provide further training in the teacher orientation package, program goals and premises, program scope and sequence, intellectual process development, use of instructional materials, and evaluation instruments and procedures. Attendance at this seminar is optional. The teacher orientation package may be used successfully by trainers who are unable to attend the seminar. All materials and complete directions for conducting teacher training sessions are included in the kit.

ASSURANCES AND CLAIMS

Assurances

Formative data obtained from classroom teachers and pupils during the 3-year developmental process were used for revising and refining the program. These data provided no indication of sociological, psychological, or physical harm to pupils exposed to the program.

External review of *Social Education, Year 3,* curriculum materials and teacher responses to user questionnaires indicated no sexual, racial, social, or other stereotyping or bias. However, an inhouse intern report conducted in late 1973 indicated a tendency for males to play the dominant roles in the materials.

With minimal producer assistance, curriculum materials were field tested in 41 classrooms in Texas, Louisiana, and California. Teacher responses to user questionnaires were highly favorable to the program. Since field testing, 117 sets of year-3 curriculum materials have been sold to users in at least 12 States.

Claims

Social Education materials have been design tested, pilot tested, and field tested with thousands of children with diverse ethnic and cultural backgrounds. Each of the 380 schools in which the materials were tested has a high concentration of children from low-income families. In addition, external review of the materials indicated a high degree of pedagogical soundness, academic substance, and an effective use of media.

Mastery test results based on curriculum objectives indicate a high percentage (80-95 percent) of the children master program goals. Different ethnic groups are equally successful in meeting these goals.

Teachers and observers report children's interest in the program is quite high, indicating the materials are successful in maintaining pupil attention.

External review of the curriculum materials indicated that one impact of the use of the materials was the creation of pupil awareness of the world's cultural diversity.

The *Social Education Program* is a product of Southwest Educational Development Laboratory's systematic multiyear process of educational development, which begins with context analysis (a study of needs) and moves through design testing, pilot testing, and field testing to diffusion. Revision—based on feedback gathered at test sites—plays a major part throughout the process. Products are systematically refined after design test, after pilot test, and again after the more advanced field test.

INFORMATION CURRENT AS OF MARCH 1975 ■

RELEVANT EXPLORATIONS IN ACTIVE LEARNING (REAL) SETS I AND II

A set of resource materials designed to help people better understand themselves and their potentials

Relevant Explorations in Active Learning (REAL) is a set of written and recorded resource materials called Minipacs. There are two versions: One for high school students and another for educational staff. The Minipacs are divided into two sets (REAL I and II). Participants may use individual Minipacs or the complete sets, either independently or in a group. Each Minipac focuses on one kind of human experience relevant to all learners.

A key person in a school, called a materials manager, has the responsibility of providing learning experiences with REAL Minipacs. The materials manager manages the Minipac materials and the learning environment. By identifying students and adults who wish to be involved in a group, or in individual Minipac experience, and providing Minipac materials and guidance in their use, the materials manager may contribute to the success for use of REAL Minipacs.

The content of the Minipacs is aimed at helping people better understand themselves and their potentials. Each Minipac addresses a particular psychosocial issue which all human beings confront to some degree at some time in their lives. As learners experience a Minipac, they take an active role in the self-discovery process.

SUBJECT AREA(S)

These materials are intended to foster personal growth in the affective areas of learning.

INTENDED USERS AND BENEFICIARIES

Minipacs are designed for use by adults in educational settings (such as teachers, counselors, and paraprofessionals) and by high school students. The Minipacs provide opportunities for both adults (e.g., teachers) and high school students to learn on their own and in small groups. Adults may decide to become involved with Minipacs because they want or need to learn more about the Minipac topics. One of the benefits for a counselor who has already experienced a Minipac might be that the counselor is better able to facilitate a student's use of Minipacs. Minipacs can thus offer an adult a personal learning experience as well as a means in the school setting to facilitate student learning.

GOAL(S) OR PURPOSE(S)

Goals of REAL are to enable users: (1) To have a clearer understanding of the Minipac ideas, (2) to have identified related values and needs that play an important part in their lives, (3) to have a clearer understanding of possible conflicts and problems they have experienced in terms of the Minipac topic, and (4) to have identified some new desirable actions or answers to problems associated with the Minipac topic.

PATTERNS OF USE

Minipacs are intended to be resource materials, rather than a predefined curriculum. The users will need to make their own plans and decisions about how the Minipacs will be incorporated in learning experiences. One way to apply them is to have users attend to, and learn from, the things they do about such planning and decisionmaking.

It is possible for an individual to use a Minipac entirely alone. One way teachers have used them is by introducing them to students, establishing procedures and outcomes expected, and then letting students proceed in self-directed learning. Another way has been to establish procedures for small groups of students to use Minipacs and then share group outcomes with the teacher if desired. Teachers and counselors have also used Minipacs by interacting with students and guiding the activities as they go through them. Adults have also used Minipacs in these different ways. Minipacs have been used as core materials in workshop designs.

The assumptions underlying the use of these independent packages in schools are as follows:

1. For either set I or set II, there is no prescribed order that yields the most "effect" on learners.

2. Minipac usage for conditions of development and evaluation has been divided into two sets. The selection of topics for set I is in general areas of experience common to most learners. The topics focus on many of the problems learners encounter. Topics for set II focus on learning about the learning process.

3. Each Minipac possesses the potential for accommodating a large number of variations and needs. The teacher or counselor will be able to use the Minipac as a complete package for independent or group work and use various components of the Minipac when developing special units in related areas. Each component is designed to be independent of the others, with the exception of the directions booklets.

ASSESSMENT PROVISIONS

No screening provisions are made for initial entry into the system. Once working with the Minipacs, participants use self-assessment techniques to monitor their understandings.

TIME REQUIREMENTS

It is desirable to go through all the ideas and activities of a particular Minipac. It can be expected that it will take about 5 hours to do so. It may take longer, depending on how much self-exploration, contemplation, and sharing individual users care to engage in. Shorter experiences can be conducted using parts of a Minipac. Most often, one Minipac is experienced in a sequence of meetings such as five consecutive 45-minute classroom periods. Not all the ideas or activities proposed in the materials may be relevant to some users or feasible in a given situation.

IMPLEMENTATION PROCEDURES

At the time of this writing, the REAL Minipacs are under development. The implementation procedures described are those which are recommended and are being used during the testing period.

Those persons interested in using REAL in a program or course are invited to a 1-day orientation workshop. The purpose of the workshop is to introduce REAL, provide active participation in a group Minipac experience, explore ways to structure learning experiences with Minipacs, and plan for back-home use requirements.

Those persons desiring to experience the adult version of REAL with a group need to get a schedule and meet in a workshop setting for approximately 30-40 hours. Conditions for the workshop site should include: (1) A comfortable room, preferably carpeted, large enough to allow groups of five to seven to work without interfering with each other; (2) comfortable chairs and tables for small groups of five to seven, and (3) beverages and refreshments available in the room, if possible.

Generally, it is expected that someone will take the role of introducing the Minipacs and direct their use.

ASSURANCES AND CLAIMS

Assurances of Harmlessness

REAL is still under development and testing as of this writing. In preliminary trials, users of this system have been repeatedly asked for feedback. There have been no reports to date of actual instances of, or serious concern about, physical, psychological, or sociological harm. A question raised by reviewers in the field concerning early prototype materials was used as a basis for deleting some photographs, illustrations, and terms in the current versions.

Assurances of Social Fairness

Social fairness issues have been considered in creating and revising these materials. Guidelines supplied by NIE concerning sexism have been especially attended to.

Assurances of Replicability

The system is being designed to be used as resource materials according to the desires of students and teachers. Issues of use are being explored in current evaluations which will be reported by November 1975.

Claims of Effectiveness

Reports of effectiveness will be based on evaluation studies underway at the time of this writing. They will be available by November 1975.

Claims of Careful Product Development

This system is being developed over a 3-year period involving repeated rounds of trial and revision. Evaluation includes pilot trials, interim formative testing, and a field test focused on dissemination issues.

PEOPLE AND PROBLEMS

A film created for teachers to stimulate thought and discussion on developing problem-solving skills of students

People and Problems is a 10-minute film developed to stimulate thought and discussion on problem solving. Designed for adults, the film is highly motivating and is intended to interest teachers in developing problem-solving skills in their students. The film depicts persons solving problems in everyday life so that teachers will see the value of teaching problem-solving skills in the classroom.

Problem solving is presented as an important and challenging aspect of everyone's everyday life. Through scenes of everyday problem-causing events, an awareness is created of how often everyone is confronted with problems. The film promotes an understanding of how important problem-solving skills are to everyone in our society. Also emphasized is that problem solving is a positive force in our lives. A process which children and adults can use is illustrated through the action in the film. Although the process is flexible, the film represents it as a more effective alternative to the familiar trial-and-error procedure. A brief paper provided with the film gives suggestions to stimulate discussion after the viewing.

SUBJECT AREA(S)

The major objective of the film is affective—to motivate and interest teachers and children in problem solving. Content emphasizes:

(1) Problems are a part of our daily lives.

(2) It's important to be able to solve problems effectively.

(3) Problems are a positive force in life.

(4) Using a method or process to solve problems increases one's effectiveness.

INTENDED USERS AND BENEFICIARIES

Although *People and Problems* was designed primarily for teachers, the developers believe the film might be highly motivating to children as well, and could probably be used to stimulate interest in problem-solving skills in all age groups.

GOAL(S) OR PURPOSE(S)

The primary goal of the film is to motivate teachers to develop problem-solving skills in their students. When the film is shown to children, the primary goal is to interest them in developing effective problem-solving skills. Secondary goals are to illustrate how important problem solving is in our society and to introduce an effective process with which to attack problems.

PATTERNS OF USE

People and Problems is designed to be used as an introduction to a problem-solving curriculum or at any point in the curriculum to generate interest in problem solving. With teachers, it can be used as the introduction to a staff development workshop or any workshop emphasizing "learning to learn" skills. It can be used independently to generate ideas.

ASSESSMENT PROVISIONS

No formal testing procedures are included with this product.

TIME REQUIREMENTS

People and Problems is a 10-minute film. Discussion after screening can be extended or limited to suit the purpose of the viewers.

IMPLEMENTATION PROCEDURES

No special procedures are required to implement this product.

ASSURANCES AND CLAIMS

No social bias has been brought to the attention of the multiethnic program staff. Care was taken to include multiethnic representation and a balance of nonstereotypic sex roles in the film.

MATERIALS AND EQUIPMENT

SOCIAL DEVELOPMENT AND BEHAVIOR: AN ABSTRACT BIBLIOGRAPHY

An annotated bibliography referring to children's peer relationships, interpersonal competence, social attitudes, and sociometric techniques

This selective annotated bibliography contains references to social development and behavior in children. Entries are from *Research in Education* (RIE) and *Current Index to Journals in Education* (CIJE), January 1970 through March 1974. Topics include peer relationships, interpersonal competence, social attitudes, socialization, and sociometric techniques.

Subject areas of documents cited in the bibliography include: Children's social development and behavior, peer relationships, interpersonal relationships, and children's socialization.

INTENDED USERS AND BENEFICIARIES

This bibliography was prepared to alert early childhood teachers and administrators to materials in the ERIC system that are related to the social development and social behavior of children. This publication would also be of interest to social workers, psychologists, and researchers.

GOAL(S) OR PURPOSE(S)

The goal of this bibliography is to provide a useful list of current research reports, program descriptions, and discussions in response to numerous requests for information on the influence of the child's environment and interpersonal relationships.

A CRITICAL ANALYSIS OF VALUES EDUCATION RESOURCES

A paper to aid in the selection of values education materials

The primary purpose of this paper is to help social studies educators identify and select appropriate values education materials. Building on an initial ERIC/ChESS volume *Values Education: Approaches and Materials*, the author of this companion work provides narrative analyses and checklists of characteristics for nearly 100 sets of elementary and secondary, student and teacher social studies materials. Reflecting a variety of approaches to values education, the materials analyzed include those which have been explicitly designed to teach values development. Each item is analyzed according to four general categories: Its descriptive characteristics (e.g., title and grade level), preconditions for use (e.g., classroom and school atmosphere needed when using the materials), substantive characteristics (e.g., objectives and type of student activities), and evaluative characteristics (e.g., provision for student evaluation and field test information). An annotated bibliography on values education materials is included in the paper.

SUBJECT AREA(S)

Social Studies and Values Education

This paper includes short analyses of values education materials, presentation of typology for values education approaches, explanation of analysis instrument and checklist chart, and annotated bibliography.

INTENDED USERS AND BENEFICIARIES

The intended users of this paper are social studies teachers (K-12), department chairpersons, supervisors, consultants, field agents; and curriculum developers and decisionmakers and teacher trainers (inservice and preservice) in a variety of subject areas.

EDUCATING PRISONERS FOR SOCIALLY CONSTRUCTIVE ROLES

A document concerned with the prevention of juvenile delinquency, and the education and certification of teachers of inmates

This document reviews problems, alternatives, and recent development in the education of prisoners. The authors state as a guiding argument that, while inmates are severely handicapped according to traditional academic measures in terms of the current movement in education towards individualized instructions, nowhere is there a more fertile ground for receptive students than in correctional institutions. The following problems are cited: The lack of programs to prepare inmates for socially constructive roles in communities, job discrimination against former inmates (the new careers program for rehabilitated offenders is discussed as a solution for this), and the poverty background of many prisoners. The document reports specifically on work release programs; the prevention of juvenile delinquency through education; vocational, career, and college programs; and the education and certification of teachers of inmates. Appendixes are: (a) "A Summary of Teacher Corps Corrections Projects: 1968-74," (b) "College Programs in State and Federal Penal Institutions" (listed by State), and (c) "National Survey of Postsecondary Education Programs for Incarcerated Offenders."

SUBJECT AREA(S)

Subject areas include the education of prisoners, the prevention of juvenile delinquency, and the education and certification of teachers of inmates.

INTENDED USERS AND BENEFICIARIES

Educators and administrators concerned with the rehabilitation of criminal offenders are the intended users.

GOAL(S) OR PURPOSE(S)

The goal of this product is to provide an overview of prison-based education, including recent developments and alternatives for the future.

PREPARING SCHOOL PERSONNEL RELATIVE TO VALUES: A LOOK AT MORAL EDUCATION IN THE SCHOOLS

A clarification of the development of moral judgment

This paper clarifies the development of moral judgment and the means by which educators can stimulate this development. Moral teaching is defined as the process of open discussion aimed at stimulating the child to move to the next step in development. Research evidence shows that internalized principles of moral judgment cannot be taught, but their development can be encouraged.

The main conclusions of the paper are: (1) The definition of "good behavior" should not be relative only to the standards of biases of the teacher; (2) the teacher's initial task is to understand, from the child's viewpoint, what is good and bad about a given behavior; (3) since the child's judgment follows a developmental sequence, some thinking can be defined as more morally mature than others; (4) it is psychologically and ethically legitimate to encourage the child to act in accordance with the highest level of judgment; and (5) insofar as discrepancies between judgment and action reflect a form of cognitive conflict that may serve to promote development, encouraging correspondence between judgment and behavior will be a stimulus to further development, as well as changes in overt behavior. The teacher must be concerned about the child's moral judgments rather than about conformity with the beliefs and judgments of the teacher.

SUBJECT AREA(S)

Moral judgment and development in the child and the role of the teacher in fostering moral development.

INTENDED USERS AND BENEFICIARIES

Elementary and secondary school personnel and collegiate trainers are the intended users of this publication.

GOAL(S) OR PURPOSE(S)

This publication is intended to familiarize the American teacher with recent psychological and philosophical work on the problem of moral education and to present a model for understanding and teaching morality.

PREPARING TEACHERS, STUDENTS, AND CITIZENS TO DEAL CONSTRUCTIVELY WITH THE PROBLEMS AND POTENTIALITIES OF AGING

A monograph to understand the physical and psychological aspects of aging

This monograph offers information, suggestions, and proposals to teachers, students, and citizens to increase their understanding of the aging process, in both its physical and psychosociological aspects. Part I, "What is Aging?," examines various aspects of aging, some of its major characteristics, and what it is like to grow old in the United States today. Part II is concerned with the physical aspects of aging: How the body changes; the aging processes of human cells, human tissue, and organ systems; aging and disease; Some theories on why aging takes place and suggestions on how to deal constructively with aging. Part III examines some psychosociological aspects of aging, with emphasis on ways to encourage continued psychological and social involvement with the rest of the world. Appendixes provide details of resources for additional information. Appendix A describes programs for senior citizens, specifically those provided by ACTION and the Department of Labor. Appendix B lists materials available free from the Administration on Aging. Appendix C gives the locations of all regional and State agencies on aging.

SUBJECT AREA(S)

Aging, especially the physical process and the psychosociological effects, is discussed in this monograph.

INTENDED USERS AND BENEFICIARIES

This publication is directed at students, teachers, and citizens. It is hoped that the information and suggestions in the monograph will aid the reader in increasing personal and professional capacity.

GOAL(S) OR PURPOSE(S)

This monograph contains information to help increase understanding of the process of aging in both its physical and psychosocial characteristics.

SOCIAL DEVELOPMENT IN YOUNG CHILDREN: A REPORT FOR TEACHERS

A review of the current psychological research on social development in children ages 3-8

A brief (approximately 100 pages) review of the current psychological research on social development in children 3 to 8 years old has been prepared in a format which makes this information accessible and comprehensible to teachers. Basic research findings are tied to specific suggestions for classroom practices, so that the relevance of the psychological research is clearly apparent to the reader.

Topics covered in the report include aggression, prosocial behavior, moral development, motivation to achieve in school, and peer interaction. Each major chapter is introduced by a recommendations digest which summarizes suggested teaching techniques and the research rationales on which they are based. Extensive reference sections offer documentation and possibilities for further reading in particular areas.

The report is designed to serve as a reference for individual classroom teachers, as well as a focal point for group discussions in formal or informal teacher training situations.

SUBJECT AREA(S)

The report reviews the psychological research literature on aggression, prosocial behavior, moral development, motivation to achieve in school, and peer interaction in 3- to 8-year-old children. The report suggests teaching techniques consistent with psychological findings in these areas of social development.

INTENDED USERS AND BENEFICIARIES

The potential audience for this report includes practicing preschool and early elementary school (K to 3) teachers, teachers in training, and personnel involved in training or supervising other teachers.

The report is brief and direct enough to be used by busy teachers who have little time to devote to outside reading. It is suitable for graduates of 2-year associate degree programs, as well as for teachers with more extensive training.

GOAL(S) OR PURPOSE(S)

The goals of this program are: (1) To provide teachers of 3- to 8-year-old children with a coherent understanding of current psychological knowledge about young children's social behavior, (2) to suggest teaching techniques consistent with current psychological research findings, and (3) to provide extensive references for further reading in particular subject areas.

PATTERNS OF USE

This report may be used independently by individual classroom teachers, but it is especially well suited for use in informal or formal training sessions. Preliminary audience reactions to the report indicated that it can provide a stimulating focus for discussion during inservice training sessions. It may also serve as a text in academic courses, perhaps in conjunction with other texts covering specific areas. The report was prepared jointly with a similar report, *Cognitive Development in Young Children: A Report for Teachers*. The two books, which share similar goals and formats, can be used together to cover a broader range of psychological findings on child development.

Recommendations digests, which introduce each major section of the report, have been designed as summaries of the major psychological points made in each section and the specific teaching techniques which are consistent with the psychological findings. These digests can be used as quick reference guides and may be particularly valuable for training classroom personnel who are not comfortable with larger amounts of written material.

TIME REQUIREMENTS

Most teachers could carefully read through the report in 3 to 4 hours. A preliminary skimming of the recommendations digests could be accomplished in one-half hour or less.

MATERIALS AND EQUIPMENT

Copies of the reports will be available through the Government Printing Office. The cost per copy has not been established at this writing.

ASSURANCES AND CLAIMS

The preparation of this report was guided by a desire to preserve a cautious and moderate perspective on new research in theories, in order to minimize the dangers of premature application of incompletely tested psychological conclusions. Recommendations are only included which experimental psychological research indicates may be beneficial. The teaching techniques suggested are not given with any guarantees of effectiveness, although some have been used successfully in research situations or in innovative educational programs. In most cases, the report suggests strategies which teachers can adapt to the needs of their own classrooms.

The report was carefully edited to eliminate potential biases related to sex, race, religion, age, or socioeconomic stereotypes.

A preliminary draft of the report was read and discussed by 25 practicing preschool and early elementary school teachers in the Seattle, Washington, area. All teachers found something of value in the report, although certain sections were more relevant to some groups of teachers than to others. The teachers' written reactions to the report indicate that they found it useful in broadening their awareness of recent psychological research, suggesting new techniques based on that research, and reminding them of principles and techniques they had forgotten.

SOCIAL ORGANIZATION OF THE HIGH SCHOOL

Training materials to help educational administrators and teachers look at educational encounters in terms of social action organization

Social Organization of the High School (SOHS) provides a set of field-generated training materials for educational administrators, educational researchers, and teachers. Three major units each center on one key concept. The materials are arranged in such a fashion that the learner first views the high school as a total social system, then proceeds to look at the structural components of that social system and finally begins to observe the social action inherent in establishing rules and behavior guides within the school. Each unit is self-contained in that it can be used separately for specific training purposes, but the inherent value of the approach is in looking at the school as a total system. The basic component of each unit is a set of field notes which were gathered in three high schools—one inner city, one suburban, and one rural—during a 3-year study. The field notes are arranged so that particular concepts dealing with the social organization of the high school emerged from the materials themselves. There are introductory materials to the total program and to each unit designed to prepare the learner to use the materials. An analytic section following each section and at the end of the materials is designed to give the learner the experience of analyzing field data. A book of readings dealing with field research techniques is also part of the materials.

SOHS represents an approach to looking at educational encounters in terms of their organization in social action. A number of recent social commentators on education have described the high school, for example, as a focal point of current educational and social problems. There is increasing evidence that more socialization, and possibly more learning, takes place in peer-mediated social systems in the high school; and yet we know little about the optimum organization to facilitate such learning and nothing about how such systems interact with the formal organization of the school. This results, in large measure, from the fact that studies and, consequently, materials in education have tended to focus on the individual student as a learner. There has also been a failure to look at the social organization of education as a natural setting for learning because most organizational theory and methodology in education comes from a concern with administration and management, and so intersects with the literature on formal organizational analysis. While learning studies focus on students, organizational studies focus on adults. Yet, current trends in education—emphasis on affective and humanistic education, behavior modification, encounter and sensitivity programs, open classrooms, and greater peer group reference in governance—indicate that educators are beginning to sense that the informal social systems in schools can be primary facilitators for learning. As a result, there has been a growing movement to apply the techniques and conceptual methods of anthropology to education. Most administrators and teachers and many educational researchers were prepared in schools of education to a tradition of educational research which was highly analytic and purported to present interrelationships among elements of a system which were conceptually independent of any given situation. The ethnographic materials which are being developed in education today, however, are holistic, situational, descriptive, nonanalytic, and generally designed to result in a statement of system characteristics rather than of the inevitable association of the elements within the system. As a result, there is a growing need for materials designed to prepare educators to use field-generated data and results as a means of improving educational practice. At the same time, such materials can also be used to broaden the social perspectives of educational researchers.

In using these materials, the learner is presented with actual field notes which have been extracted from the field-journals of individual anthropologists studying collectively three high schools and which are arranged to inform specific conceptual areas in the social organization of high schools. The learner is first introduced to the general notion of social, as contrasted to formal, organization of the school and then is given an extensive description of each of the three school sites. The three units are designed so as to draw field note material from each of the three (urban, suburban, and rural) high school sites so that there is also the opportunity to look comparatively at geographical, demongraphic, organizational, and cultural differences. The materials are programed so that the student proceeds to draw inferences by individual and social agendas, make comparisons, and develop tentative hypotheses about important concepts in the social organization of schools. At the same time, the student is given materials dealing with general concepts of social organization and with the field methodology used to gather the information being studied.

SUBJECT AREA(S)

Social Organization in Schools: Anthropology and Education, Field Methods in Educational Research.

How schools are organized as social systems, comparison of bureaucratic and organic structures in schools, the nature and effects of sorting, territoriality and the process of making and breaking rules in schools, the process of group formation and the conflict with individualization, methods of field study applied to education, how to study the learner's own educational setting, how to develop testable hypotheses from field data, and the use and interpretation of field data.

INTENDED USERS AND BENEFICIARIES

Although designed primarily for use by educational administrators and teachers, this program has been tested with, and can be used as training materials for, educational researchers and graduate students in the social sciences with an interest in education.

GOAL(S) OR PURPOSE(S)

The students who use these materials will be able: (1) To draw inferences from their own or somebody else's field observations, (2) to develop hypotheses about the social organization of the specific school involved as well as that of schools in general, and (3) to test these hypotheses against their own and other data.

PATTERNS OF USE

This program is a self-contained set of materials with content and exercises which are sequential and cumulative. It may be used as part of an ongoing course or as an independent program in anthropology and education, educational organization and change courses, secondary education courses, and research methods courses.

ASSESSMENT PROVISIONS

Learning is assessed by the learner and by the instructor as well. Learners take pretests and posttests and develop specific materials which can be evaluated.

TIME REQUIREMENTS

The SOHS materials require 24 hours of class sessions or individual study to complete.

IMPLEMENTATION PROCEDURES

These materials require a specialist teacher for optimal use, but can be used as self-instructional devices as well. If they are used as classroom material, there should be no more than 20-25 students in the class.

MATERIALS AND EQUIPMENT

The SOHS materials are still under development and field testing, so the final cost figures are not available. At present, materials can be made available at cost. All required materials are part of the self-contained system and can be provided for under $30 per student. Workshops will be provided at cost by the Horace Mann-Lincoln Institute, Teachers College, Columbia University.

ASSURANCES AND CLAIMS

Although the materials are transportable, there is little or no evidence that the course would be transportable (i.e., that the materials can stand alone, although they were designed to do so). On the other hand, there is no reason to assume that a similar course may not be taught successfully elsewhere.

Insofar as social bias is concerned, the materials seem to be free of any, except for those sections that deal with the actual interactions observed by the field workers. Whenever an interaction between a teacher and a student reflected social bias, it was not edited out. The developers feel that these instances of bias provide the basis for discussion of the role that social bias plays in schools.

The major claim to be made about the SOHS materials is that they provide the only materials presently available for training educators to study their own schools as social systems. Moreover, the materials are based upon actual field study of existing high schools and use actual field notes as the basis for instruction and demonstration. At all stages of development of the materials, the actual field sites were used to provide coherence, empirical testing, and validation for the materials. A formative evaluation was carried out with two classes of administrators, teachers, and social-science students, and the materials have been modified on the basis of this experience.

In addition to providing educators and researchers with learning experiences in viewing schools as social organizations, the materials teach the research skills that were used to gather and analyze the data and lead the learners to the study of their own schools. Three major principles emerge in the materials and for the learners as a result: (1) That it is possible to be rigorous and empirical in field-oriented research, which recognizes the real-world character of education, if the objectives of the research are clearly stated and if the methods for collection and analysis of qualitative data are carefully chosen and applied; (2) that change in education requires an understanding of institutional, as well as individual, behavior modification as the basis for sustained and meaningful change; and (3) that unless such programs of change and innovation are developed out of and reinform some body of theory, they inevitably fail to become institutionalized and so do not produce lasting change.

VALUES EDUCATION: APPROACHES AND MATERIALS

A paper to help social studies educators organize, comprehend, and choose values education materials appropriate to their needs

The fundamental purpose of this paper is to help social-studies educators organize, comprehend, and choose "values education" materials appropriate to their particular needs. The first chapter explains a typology of values education approaches into which the curriculum materials are classified. These approaches include inculcation, moral development, analysis, clarification, and action learning. Each approach is discussed in terms of its rationale and purpose, teaching methods and instructional model, illustrative learning activities, and exemplary programs and materials. The second chapter presents and explains an instrument for analyzing values education materials. Short narrative summaries of analyses of 13 sets of values resources are also provided. An extensive, largely annotated, bibliography of student, teacher, and theoretical background materials on values education composes the last chapter.

SUBJECT AREA(S)

Social Studies and Values Education

The paper comprises a detailed explanation of a typology of values education approaches, presentation and explanation of an analysis instrument, sample analyses of 13 sets of materials, and an extensive annotated bibliography.

INTENDED USERS AND BENEFICIARIES

The intended users of this paper are social studies teachers (K-12) and department chairpersons; supervisors/consultants, field agents; curriculum developers and decisionmakers; and teacher trainers (inservice and preservice) in a variety of subject areas.

SOCIAL PSYCHOLOGY: A RESOURCE FOR ELEMENTARY AND SECONDARY EDUCATORS

A volume which describes 10 areas of educational practice for applying social-psychological resources

The author of this volume describes 10 areas of educational practice for applying social-psychological resources. Social psychology can be presented as a social science discipline in the curriculum. In addition, it can be applied to the teacher's leadership role of the classroom learning processes; to the functioning of the classroom peer group as a learning group; to staff development and leadership in the school building and school system; to the development and operation of the school building; to the development of the school community; to the development of the larger socialization community; to the recruiting, training, and utilization of the human resources needed for quality education; to future projections for educational planning; and to the utilization of social-psychological knowledge itself for improving education and coping with resistance to change. Two or three illustrations for each area of application are provided. An inventory of resources with a social-psychological focus concludes the paper.

SUBJECT AREA(S)

The subject area is social science; specifically, social psychology as an educational resource.

INTENDED USERS AND BENEFICIARIES

The intended users of this product are curriculum planners, elementary and secondary teachers and administrators, and college methods teachers concerned with the social studies.

AMERICAN GOVERNMENT INFORMATION UNIT (AGIU) (CURRICULUM ALTERNATIVES FOR SECONDARY SCHOOLS)

A review and comparison of nine high school social studies programs

The *American Government Information Unit* reviews and compares nine high school social studies programs:

1. Utah State University Social Studies Project (A curriculum focused on thinking reflectively about public issues);
2. High School Curriculum Center in Government Project (American political behavior course);
3. Sociological Resources for the Social Studies (Episodes in social inquiry series);
4. The Harvard Social Studies Project (AEP public issues series);
5. Holt Social Studies Curriculum (Comparative political systems course);
6. Lincoln Filene Center Secondary Social Studies Program;
7. Law in American Society Foundation (Justice in urban America series);
8. Educational Research Council Social Science Program (ERCSSP): Concepts and inquiry (The price of freedom course);
9. The Amherst Project.

Each is considered in terms of its major features: Curriculum use, length of use, content perspective, content organization, student ability level, and cost per pupil per year. Characteristics such as the following are reviewed: Grade level, sample topics, student tests, teacher training requirements, format, instructional strategy, readability level, developing agency, publisher, and availability.

The 314-page volume helps high school social studies teachers obtain decision-oriented information on the "new social studies" materials that encourage adults to challenge students with issues, ideas, and raw data. It serves as a guide to those materials that lead students to inquire, develop hypotheses, and reach their own conclusions.

SUBJECT AREA(S)

American Government (high school level).

INTENDED USERS AND BENEFICIARIES

Teachers, social studies coordinators, administrators, and trainers of secondary school social studies personnel are the intended users.

GOAL(S) OR PURPOSE(S)

To provide a comparative synthesis of curriculum developments in secondary level social studies for school personnel responsible for curriculum decisionmaking.

PATTERNS OF USE

The information unit can be used by individuals or in small groups.

IMPLEMENTATION PROCEDURES

No special equipment or facilities are needed.

ASSURANCES AND CLAIMS

The AGIU underwent preliminary, main, and combined main/operational field tests. During the combined MFT and OFT, subjects reviewed all parts of the AGIU and followed review instructions, including the requirements that they review all programs through the "summary" level and that they read at least three reports. The AGIU met all its objectives under MFT conditions. The studies were carried out in Iowa and in Southern, Eastern, and Western States. Development and field testing are reported in two ERIC documents, ED 052 114 and ED 051 065.

LEARNING WITH GAMES: AN ANALYSIS OF SOCIAL STUDIES EDUCATIONAL GAMES AND SIMULATIONS

A book which describes and analyzes games and simulations suitable for children in grades K-12

Seventy social studies educational games and simulations, all of which are designed for kindergarten through 12th grade and many of which are applicable to adults, are described and analyzed in the major section of this book. Each of the analyses is divided into eight categories and provides: An overview of the game; a description of the physical qualities and cost of the materials; suggested time required to play the game; intended user characteristics; rationale and general objectives; basic concepts, generalizations, trends, themes, or simulated situations which are the basis for the content of the materials; procedural activities and responsibilities of students and teachers; and evaluative comments. Arrangement of the analysis is alphabetical by game title. Games are cross-referenced by the developer, grade level, publisher, subject area, and miscellaneous. In addition to the analyses, the book contains an extensive list of sources and resources on the development and use of educational games, including an annotated bibliography of books on simulation design and use, listings of game bibliographies and directories, various developers in the field of social studies, and several newsletters and journals dealing with simulation/games. An abbreviated games and simulation guide which includes a list of more than 250 games available in social studies education but not analyzed in the previous section of the book, is also included.

SUBJECT AREA(S)

Social studies/social sciences including simulation/games is the subject area.

This paper includes sources and resources for games and simulations—directories, bibliographies, developers, newsletters, and journals; introduction to game analyses; 70 analyses; and games/simulation guide.

INTENDED USERS AND BENEFICIARIES

The intended users are social studies teachers (K-12), curriculum decisionmakers, supervisors/consultants, and department chairpersons.

BRINGING ABOUT CHANGE IN SOCIAL STUDIES EDUCATION

A publication which addresses itself to the unique problems of diffusion, adoption, and change in social studies

Despite the present availability of high-quality curriculum materials for use with the inquiry approach of the new social studies, the pace of change is slow. This paper addresses itself to the unique problems of diffusion, adoption, and change in social studies, and with the principles and practices which can be applied to solve these problems. The first four chapters attempt: (1) To analyze some of the barriers to change in education generally and in social studies education particularly, (2) to summarize some of the relevant research concerning the problems and processes of change in education and in other areas, (3) to describe various change models and roles, and (4) to outline some strategies and techniques that might be used for bringing about diffusion and adoption of the new social studies. Chapter 5 presents an overview of some of the main types of change projects that have been carried out in the new social studies, and chapter 6 describes one such project, the social studies field agent training program of Indiana University. The final chapter provides an annotated bibliography of some of the key sources on the process of change that might be of use to practitioners in the field of social studies education.

SUBJECT AREA(S)

Subject areas include social studies, diffusion, educational change and strategies, change agents, information dissemination and utilization, inquiry training, inservice teacher education, changing attitudes, and role perception.

INTENDED USERS AND BENEFICIARIES

The intended users of this product are social studies teachers (K to adult level), educational innovators, curriculum decisionmakers, supervisors/consultants, teacher trainers (inservice and preservice), department chairpersons, and school administrators.

COPING WITH COMMUNITY CONTROVERSY: GUIDELINES FOR INTRODUCING NEW SOCIAL STUDIES PROGRAMS

General guidelines and introduction to new social studies programs

This paper offers guidelines focusing on the issues that must be faced when controversy arises with the introduction of new social studies programs. Three basic principles, relating to the nature of the public school as an institution, give a philosophic underpinning to the guidelines: (1) People have a right to know the rationale and content of what is offered in school; (2) the school is an instrument of society, not a primary molder of society, and, therefore, is a referee of social systems, not an advocate of one; and (3) the school must insist on meeting the basic requirements of the role of reason. The 12 guidelines are divided into 3 categories: General guidelines, introducing new programs, and responding to attacks.

SUBJECT AREA(S)

Subject areas are social studies, community controversy, educational change, and role of school.

INTENDED USERS AND BENEFICIARIES

The intended users of this paper are social studies teachers (K-12), supervisors/consultants, field agents, department chairpersons, curriculum developers, and school administrators.

18, 19, 20: WILL THEY VOTE?

A document containing suggestions and resources for preparing and motivating new young voters

Content, classroom suggestions, and resources for preparing and motivating new young voters are the focus of this publication. The first section of the paper contains chapters on universal suffrage (a historical and current view), whether public affairs should be entrusted to the people, the role of voting in a representative democracy, the role of political parties, and practical politics. Each of these topics is followed by some suggestions for strategies and materials to use in dealing with it. The second major portion of the publication is devoted to an annotated list of relevant resources—institutions, books, classroom materials, and games.

SUBJECT AREA(S)

Social studies/social sciences: Civics, political issues, political science, social action, and voting.

The history and present state of universal suffrage; the role of voting and political parties in a representative democracy; practical politics; and instructional resources including books, periodicals, classroom materials, and games/simulations.

INTENDED USERS AND BENEFICIARIES

The intended users of this product are secondary and undergraduate social studies/social science teachers, social studies department chairpersons, and social studies supervisors/consultants.

GEOGRAPHY IN ELEMENTARY AND SECONDARY EDUCATION: TRADITION TO OPPORTUNITY

A paper on the precollege teaching of the geography of the United States, from 1800 to the present

This paper on the precollege teaching of geography documents the teaching of geography in the United States from 1800 to the present and projects it into the future. Analyses of how views on physical, regional, and human geography have affected elementary and secondary curriculums and a history of the incorporation of geography into the social studies curriculum in the 1940's are included. In the 1960's, the High School Geography Project (HSGP) and various elementary level projects shaped elementary and secondary geography into an interdisciplinary and conceptually oriented subject with emphases in affective learning and urban studies. Critical elements for geography education envisioned for the future are decisionmaking, valuing, and resolving conflict. Traditional tools for locational analysis applied to these elements will validate geography's importance in the curriculum. Conceptual models for these processes and specific examples of their application—deciding whether to build the Alaska Pipeline, investigating the values behind locating a parking lot, and resolving a conflict over the location of the future settlement of Jamestown—provide direction for teaching the geography of the future. An annotated bibliography on geography and the teaching of geography is also included.

SUBJECT AREA(S)

The social studies/social sciences pertaining to geography as a tradition in education; geography in the social studies and in the future; and decisionmaking, values education, and conflict resolution in geography are the subject areas.

INTENDED USERS AND BENEFICIARIES

Elementary and secondary social studies teachers, curriculum developers and decisionmakers, and social studies supervisors/consultants are the intended users.

GLOBAL DIMENSIONS IN THE NEW SOCIAL STUDIES

A survey which identifies a number of materials and guides that contain components useful for global education

This survey identifies materials and approaches in social studies/social science education that contain one or more components useful for global education. These components are described analytically, in a format designed to facilitate comparisons between materials. The intention of the authors is to provide a handy, practical tool for teachers and curriculum supervisors. It can help them in their selection of new materials which in turn can be integrated with the existing curriculum in order to help students better understand the realities of the global dimensions of their lives. Fourteen projects are analyzed and indexed by subject, director, source, publisher, and grade level. Twenty-two simulation/games and eight global education projects and organizations are annotated. The introduction to the survey and a final bibliography give an overview of global (international) education as a part of high school curriculums from the early 1960's to the present.

SUBJECT AREA(S)

Social studies/social science including global and international studies, political science, world affairs, and foreign relations are the subject areas.

This document gives purpose, design, and summary of survey; terminology related to teaching strategies, subfields, and substantive issues of international studies; analyses of 14 national social studies projects; and annotated lists of simulation/games, centers, projects, and organizations.

INTENDED USERS AND BENEFICIARIES

The intended users are secondary social studies teachers, department chairpersons, supervisors/consultants, and curriculum decisionmakers.

GUIDELINES FOR USING A SOCIAL SIMULATION/GAME

Suggestions which provide analytical and critical information on the use of simulation/games in social studies classrooms

Designed to help teachers maximize outcomes when using any social simulation/game, these guidelines are one part of a project which attempts to provide analytical and critical information on the use of simulation/games in social studies classrooms. The general approach of the guidelines is applicable to any of the simulation-type activities now used in classrooms, although the orientation is specifically designed for simulation/games. The first part outlines the general teaching/learning approach, or philosophy, that underlies social simulation/games. The second part is a practical guide to preparing for and conducting social simulation/games. Steps outlined are preliminary planning and preparations, game startup, game play, debriefing, and teacher's postgame tasks. Sample pages of the survey version used in classrooms to provide feedback for the revised guidelines are reproduced. Two other publications developed by this project are *Simulation/Games in Social Studies: What Do We Know?* and *Simulation/Games in Social Studies: A Report.*

SUBJECT AREA(S)

Social studies: Simulation/games.

This product presents underlying philosophy for games and detailed guidelines—their development, recommendations for use, teaching/learning approach, and some specific steps for using simulation/games (preliminary planning and preparation, game startup and play, debriefing, and postgame tasks).

INTENDED USERS AND BENEFICIARIES

The intended users of this product are social studies teachers (K-12), supervisors/consultants, teacher trainers (inservice and preservice), and department chairpersons.

PREPARING TO TEACH POLITICAL SCIENCE: SOURCES AND APPROACHES

A monograph listing resources and instructional methods for secondary teachers of political science

This 29-page monograph presents resources for secondary teachers of civics, government, problems of democracy, comparative political systems, and international relations. Resources are listed under categories that represent three different approaches to the study of political phenomena. A section also provides general resources for teachers who would like to read more about the discipline of political science—its scope, boundaries, and methodology—and about specific approaches. In addition, the paper gives practical instructions for obtaining and using the resources to improve classroom instruction in political science.

SUBJECT AREA(S)

Social studies/social science: Political science, civics, government, problems of democracy; comparative political systems, and international relations.

Subject areas include definitions of "politics," approaches to the study of political phenomena and curriculum materials reflecting such approaches, ways to change and improve existing course structures, and general resources on political science for secondary teachers.

INTENDED USERS AND BENEFICIARIES

This paper specifically addresses teachers of civics, government, problems of democracy, comparative political systems, and international relations in secondary schools.

PROFILES OF PROMISE (POPS)

A set of descriptive brochures that highlight innovative social studies program and practices

Profiles of Promise (POP's) are descriptive brochures that highlight innovative social studies and social education practices which teachers can easily adapt to their own classrooms or schools. Each of the 45 brochures contains a description of a program and information about its objectives, planning, personnel, communications, and evaluation.

The titles of the 45 *Profiles* are as follows:

1. Toward the Human Element: Creating a Democratic Environment
2. Social Studies Lab: Enfield's Exciting Alternative
3. III Annual Dade County Social Studies Fair
4. Cross-Age Teaching in the Social Studies
5. The New City School
6. The Dig: A Study in Archaeology
7. Integrated Social Studies
8. Community Laboratory in Political Science
9. Interim: Not a Time for Rest
10. Finding Relevance in Your Own Backyard: A Course in Local History
11. Project Pride: Probe, Research, Inquire, Discover, Evaluate
12. The Proper Study of Man
13. Innovative Social Studies in Urban Elementary Schools
14. The Sharing of Knowledge and Concerns: The Advisory and Learning Exchange
15. Children and the Law
16. A Bilingual Navajo Curriculum Project
17. An Exercise in Realism: Contemporary Family Life
18. A Student-Centered Approach to Social Studies
19. Cooperative Group Process
20. Studies in the Environment: Redesigning the Community
21. Society Environment Science
22. A Cultural Approach to the Teaching of Social Studies
23. Caring is Basic at James Madison School
24. Boulder Experiments
25. A Total Immersion Day
26. Solving a Community Problem: Computer Car Pooling
27. Individualized Elective Program
28. Careers in Social Science
29. Crazy Shapes and Cool Impressions: A Corporation
30. A Human Rights Curriculum
31. Downtown Learning Center
32. Out of the Classroom—Into the Field
33. Poss/Haspeg: Exploring the Social Studies
34. The Studies of Urban Studies: A School Within a School
35. Death and Dying—A Living Study
36. Mini-Versity: A New Approach to Continuing Teacher Education
37. Learning for Living: Adolescents in Preschool
38. Bringing China to the Classroom
39. High School in the Community: Providing Alternatives in Education
40. Newspaper in the Classroom
41. American History and English Developmental Program
42. Women's Studies in the Junior High School
43. Adapting a Curriculum Project
44. Man Between War and Peace: An Interdisciplinary International Studies Course
45. Bringing the John F. Kennedy Library into the Classroom

SUBJECT AREA(S)

The subject area is social studies; specifically, innovative educational practices for elementary and secondary classrooms.

INTENDED USERS AND BENEFICIARIES

The intended users of these brochures are elementary and secondary classroom social studies teachers, school administrators, and university methods teachers.

TEACHING AMERICAN HISTORY: SOURCES AND APPROACHES

A paper to help social studies teachers redesign American history courses to incorporate new teaching processes and approaches

The purpose of this forthcoming paper will be to give social studies teachers tips on how to redesign American history courses to incorporate new teaching processes and content approaches. The paper will be particularly directed toward those teachers who have previously taught American history in a chronological mode and who wish to develop a new approach. The first section will contain an introduction to the purpose of studying history in the 1970's and a general examination of the latest processes, inquiry modes, and teaching strategies used to improve the teaching of history. The second section will examine specific approaches for teaching history that show promise for the future. These approaches are presented in the form of minilessons which the teacher may use in the classroom. These new approaches include: Innovative approaches to traditional content, American slavery; social history of the working class people during the process of American industrialization; comparative history of the American Revolution and other wars for independence; local history; and American studies/humanities interdisciplinary approach to the study of the American Indian.

SUBJECT AREA(S)

The subject areas are American history, social sciences, and humanities.

INTENDED USERS AND BENEFICIARIES

The intended users will be social studies teachers of grades 7 through 12 and social studies department chairpersons, supervisors, consultants, and teacher trainers.

TEACHING PSYCHOLOGY IN SECONDARY SCHOOLS

A paper which examines the history and growth of precollege psychology

This document examines the teaching of psychology at levels below the college level. Its purpose is to establish a separate identity for high school psychology teachers by tracing the growth and documenting the breadth of present-day psychology at the secondary school level. The focus is on distinguishing between the needs of the college professor and the high school psychology teacher. Discussion is limited primarily to high school psychology courses, where most curriculum development efforts and enrollment increases have occurred. A few efforts at the elementary and junior high school levels are also mentioned. A brief history of the field and documentation of the rapid growth in recent years are reviewed. In addition, some of the philosophical issues behind the teaching of psychology below college are considered. The main issue of contention is whether personal development or substantive knowledge of psychology as a discipline should be the primary goal. The last two sections are devoted to instructional approaches and teacher training, the primary areas in which the philosophical issues have had an impact.

SUBJECT AREA(S)

Social studies/social sciences: Psychology and high school curriculum.

Subject areas include history of the teaching and growth of precollege psychology, philosophies underlying high school psychology courses, psychology curriculum materials, and teacher training and certification.

INTENDED USERS AND BENEFICIARIES

The intended users of this document are secondary social studies teachers, curriculum developers, and teacher trainers (preservice and inservice).

TIPS FOR TEACHING ABOUT THE BICENTENNIAL IN THE SOCIAL STUDIES

A paper which suggests some creative classroom approaches and materials easily implemented by social studies teachers

The purpose of this paper will be to suggest some creative classroom approaches and materials that can be easily implemented by social studies teachers. It will suggest ways of thinking about the meaning of the Bicentennial; topics, concepts, and issues that are especially relevant in light of the Bicentennial celebrations; and instructional strategies and resources for dealing with these topics, concepts, and issues. Five specific lessons will be developed which will encourage inquiry and values clarification related to five major concepts: Dedication, humor, frontier, loyalty, and protest. The hope is that teachers will be able to use this paper to make the Bicentennial more than a series of ribbon cuttings and parades.

SUBJECT AREA(S)

The subject areas are the Bicentennial and social studies.

INTENDED USERS AND BENEFICIARIES

The intended users of this paper will be social studies teachers of grades kindergarten through 12 and social studies department chairpersons, supervisors, consultants, and teacher trainers (primarily inservice).

TIPS FOR TEACHING ABOUT ETHNIC HERITAGE IN PRE-COLLEGE SOCIAL STUDIES

A paper to aid precollege teachers who are teaching or plan to teach ethnic studies

The focus of this paper will be to aid precollege teachers who are presently teaching ethnic studies, and those who are planning to teach ethnic studies for the first time. In the prospectus, the author discusses what is meant by ethnic studies, where ethnic heritage studies education occurs, the goals of ethnic heritage studies education, demarginalization of ethnic studies, and suggested multiethnic studies and strategies for teaching ethnic studies. Also included will be annotated bibliographies of ethnic heritage materials appropriate for use in K-12 classes. The paper will provide teachers with a general overview of ethnic studies in a total school curriculum as well as specific teaching strategies for a variety of classroom settings. The author plans to emphasize ethnic studies as "education for understanding, not division."

SUBJECT AREA(S)

Subject areas include ethnic studies, humanistic education, and teaching strategies.

INTENDED USERS AND BENEFICIARIES

The intended users are the teachers of social studies, language arts, music, art, and humanities in K-12 classes.

TIPS FOR TEACHING PRE-COLLEGE SOCIOLOGY

A document which provides teachers of grades 7-12 with suggestions for teaching sociology

This document will present the teacher of 7th- to 12th-grade social studies classes with suggestions for teaching sociology. It will especially focus on giving aid to social studies teachers who have not taught sociological material in their classrooms before and would like to incorporate such material into their regular social studies courses or develop a course focusing exclusively on sociology. The author will make a selective compilation of appropriate resources, develop suggestions for incorporating these resources into lesson plans, suggest appropriate teaching strategies, and offer some thoughts about how to organize and conceptualize sociological-oriented content.

SUBJECT AREA(S)

The subject areas are social studies and sociology.

INTENDED USERS AND BENEFICIARIES

The intended users of this document will be social studies teachers of grades 7 through 12 and social studies department chairpersons, supervisors, consultants, and teacher trainers.

TRENDS AND RESOURCES IN PRE-COLLEGE TEACHING OF ANTHROPOLOGY

A paper which traces the growth in the importance of anthropology from the Second World War to the present time

This paper discusses the trends and resources in the teaching of anthropology at the elementary and secondary levels of education. The author traces the growth in the importance of anthropology as a part of the school curriculum from the Second World War to the present. The paper also discusses the reasons for including anthropology in the curriculum and outlines the content and structure of the field. In addition, it describes a variety of curriculum materials for teaching anthropology at the precollegiate level. Further, the paper lists a number of procedural hints and resource suggestions to help in the construction of anthropology courses and units. Two appendixes follow the main body of the paper. The first contains short essays by the directors of three of the anthropology curriculum materials development project. The second appendix deals with anthropology and an approach to the study of educational institutions. Finally, a selective annotated bibliography of resources for teachers of precollegiate anthropology is included in the volume.

SUBJECT AREA(S)

The subject areas are social science, social studies, and anthropology in education.

INTENDED USERS AND BENEFICIARIES

The intended users of this paper are curriculum planners, elementary and secondary teachers and administrators, and college methods teachers concerned with the social studies.

TEACHER EDUCATION

1346

OVERVIEW

KENNETH HOWEY
University of Minnesota
Minneapolis, Minnesota

The state of the art

The most salient condition of this final quarter of the twentieth century may well be the rapidity with which change occurs. The burden and stress placed upon the schools have never been greater and, correspondingly, the preparation and renewal of teachers are increasingly difficult tasks. Before specific trends within teacher education are reviewed, three recent changes in the larger society are briefly noted for their current impact on the state of teacher education.

First, the rate of population growth has slowed at an unprecedented rate. For the first time in the Nation's history, a new condition exists for those in the colleges and universities primarily responsible for teacher education. There is no longer a need to turn out large numbers of beginning teachers. Rather, there is more opportunity to explore seriously the new teacher roles and to further investigate the different program formats needed to train teachers cost effectively. The reduced and more stable force of teachers in service also provides an opportunity for a more systematic attempt to conceptualize and operationalize inservice training. Teacher educators, especially those in higher education, must critically examine what role they can effectively play in continuing education a process even more complex than initial training.

Second, the increased and diverse spectrum of information and experience available to more and more people within our society has resulted in a greater acceleration of diverse lifestyles and value systems. Therefore, expectations with respect to the purposes of the schools and responsibilities of the teachers differ not only between communities but within them as well. The degree to which teachers can continue to be prepared for both generalized and standardized needs of their students is questionable. Certainly, the demands require a more serious exploration of a number of distinctively different teacher models again, a process even more complex than traditional training practices.

Third, teachers are now collectively in a better position to determine policy and direction in teacher education. At this time the teachers in the United States constitute a genuine political force. In one State, for example, the direct campaign contributions of the teachers' organizations for State legislators was more than double the total given by all business, trade, and professional organizations combined. The influence of teachers on the function and roles of policymakers in State, intermediate, and local units, as well as teacher-trainers in both colleges and school systems, could promote more dramatic change due to the teachers themselves. New governance structures and delivery systems reflecting more collaborative intersystem effort are rapidly evolving—again, a process which complicates traditional practice in teacher education.

Dr. Kenneth Howey is on a sabbatical from the University of Minnesota, Minneapolis, Minnesota, where he is a member of the School of Education faculty. He is currently engaged in research on continuing education for teachers.

Preservice education trends

While the overriding concern in teacher education today is for more effective response to the needs and conditions of teachers in service, changes in teacher education are more evident in preservice programs. This trend is understandable since the legal, fiscal, and conceptual parameters of preservice teacher preparation are currently more explicit than the corresponding dimensions of inservice teacher education. Most major renewal efforts such as competency-based education have also focused upon preservice teacher training. Recent changes in curricular, instructional, and organizational formats at the preservice level are reviewed first.

Curricular trends.—The number of curricular modifications in teacher preparation is hardly surprising. The curricular concern in the early and mid-1960's that teachers have a better grasp of the traditional disciplines through greater integration with the colleges of arts and sciences has waned in the face of multiple new demands. The social activism of the late 1960's resulted in increased emphasis on understanding ethnic and cultural differences. Human relations training, stressing greater intrapersonal awareness and more effective interpersonal relations, has, in fact, been legislated in many States as part of the teacher education curriculum. Continuing concern in the 1970's about institutional racism, role stereotyping, and sexism has further contributed to this humanistic curriculum.

Concurrently, there have been broadened concern and increased study of the social, emotional, and even moral dimensions of child and adolescent development. The research and developmental work undertaken in the area by Kohlberg, Simon, Combs, and Rogers, combined with the considerable advances in cognitive-oriented domains made by Piaget, Hunt, Gagne, and Guilford, has considerably expanded our thinking about learners and learning. Not only has research on learning contributed to modification of the teacher education curriculum, but the studies on teaching have also generated data to contribute to this extension. The recent National Conference on Studies in Teaching, a major undertaking sponsored by NIE, helped synthesize research and development in such diverse areas of teaching as human interaction, behavioral analysis, skill performance, linguistic processes, and clinical information processing. This analytic study of teaching and laboratory components which facilitate the development of both content-free and context-specific teaching skills is now a common component of teacher education curriculums.

Although it would be naive to assume that teacher education has adequately incorporated modern technology into its curriculum, advances have also been made in this area. All programs include some work in terms of lighter hardware, such as television, video tape, and film; and several programs include components which address the multiple uses of computers and more sophisticated multimedia processes, such as dial access.

Since schooling is increasingly acknowledged as a political process, the multiple implications for teachers have further extended the curriculum beyond more traditional academic concerns. The role of the teacher, considered in a broader and more political professional context, reinforces the curricular concerns about the teacher's responsibility to the larger community and the educator's ability to cope with and effect change.

Finally, the articulation of more specified differences in curricular objectives and school organization, which in turn requires different teacher attributes and teaching roles, overlays each of these earlier training components. Variations in instruction, such as open classrooms, individually guided motivation or individually programmed instruction formats, and team-teaching arrangements are viewed in terms of their implications for each area of study. In many instances, interrelated training components are designed to accommodate specialization in a variety of instructional settings.

Instructional trends. The major impact of the competency-based movement has been to alter instructional practice and organizational procedures within teacher education. At this time it has effected more experience-based, if not competency-oriented, programs. The better integration of study and practice may well be the most noticeable trend in preservice teacher education. From the outset of the program, the trainee has opportunities to practice focused-teaching tasks. Recent research on the effects of feedback (who provides the best feedback, in what manner, in what amounts, and at what times) has led to more systematic and comprehensive data collection and feedback schemes. These more sophisticated feedback systems are a necessary corollary to the expanded opportunities to practice teaching.

Instructional advances are not limited to improved teaching opportunities in laboratory and clinical settings. More flexible instructional formats at the university level include modular instruction which has led to considerable diversification beyond the traditional lecture-discussion format. In this scheme the trainee is not only given more options in terms of how he or she can attain stated objectives, but is also provided with more flexible time frames in which to do it. The trainee's demonstration of attaining the desired objective, rather than arbitrary due dates, determines when requirements are satisfied.

Organizational trends. This more fluid and varied instruction has required a degree of faculty collaboration and organizational sophistication not necessary in more traditional programs. The management and organization of such programs have made new demands in terms of the storage and retrieval of materials, recordkeeping, and collaboration with the practicing professionals in arranging a variety of short-term and focused practice opportunities. There is a genuine need, then, for training materials which assist the teacher educator in meeting the challenges of educating for the year 2000.

While many innovative trends can be noted in preservice education, it would be erroneous to suggest that educators have boldly moved out with dramatic new programs. A desired outcome of several forces contributing to new directions in teacher education over the last 15 years has hardly been achieved. Various curricular and instructional modifications still tend to be developed in isolation from other programs. Coordinated and comprehensive program development both within and between institutions is still rare. Program changes are largely squeezed and shoved into the limited teacher education "professional sequence," a component which usually comprises only a portion of the final 2 years of baccalaureate study. Nonetheless, given shrinking monetary and personnel resources, much has been accomplished. The fact that this *Catalog* contains multiple products reflecting each of the newer directions noted here underscores this point.

Inservice education trends

Inservice teacher education mirrors most of the curricular modifications outlined above; therefore, those trends need not be reiterated. At this time in teacher education, the effective integration of teacher renewal activities and the ongoing responsibilities of teaching occupy center stage. A backdrop of legal-political and fiscal questions enshrouds this major problem. The development of a variety of consortia arrangements, teacher centers, renewal structures, and collaboratively operated training complexes is evidence of high concern for continuing teacher education. A critical need now is for viable guidelines for intersystem collaboration and decisionmaking.

NIE products for teacher educator needs

As indicated above, the knowledge base and resultant products and materials available to the teacher-educator today are considerable contrasted to those of a generation ago. The essence of the teaching role is defined by the myriad daily interactions that teachers have with their students. The teacher-educator today has a variety of tools and techniques to assist the prospective or practicing teacher in better understanding teaching behaviors.

Patterns of both verbal and nonverbal behavior and cognitive and social interactions can systematically be isolated and recorded for study. NIE-sponsored products such as *Interaction Analysis*, *Interaction Analysis: A Minicourse*, and *Systematic and Objective Analysis of Instruction* are but a few examples which reflect the substantial research and development to produce training materials for teachers.

Increased sophistication in understanding teacher-learning transaction is paralleled by the contributions of research and development in feedback and self-confrontation as reflected in the products *Training Materials for the Personal Assessment Feedback System* and *Training Materials for the Personalized Videotape Feedback System*.

There are a variety of techniques by which today's teachers can acquire feedback not only about their teaching behaviors, but also about their more general developmental needs and phenomenological orientation. The counselors have been integrated into many teacher education programs in a proactive feedback role. They are trained to assist both the student and teacher-trainer in planning instructional activity appropriate to each student's unique development pattern.

Protocol materials have also been developed which allow the teacher-educator to illustrate more vividly and to model concepts (e.g., *Protocol Materials: Training Materials for Uniting Theory and Practice*). Minicourses, (*Minicourse 1: Effective Questioning* and *Minicourse 15: Organizing Independent Learning*), allow the prospective or practicing teacher, in a self-contained and independent format, to acquire a wide range of specific teaching skills and strategies. Concise reviews of the literature, multiple opportunities to observe and analyze examples of desired skills, and focused practice with opportunity for feedback and analysis of the trainee's development are all interrelated in this new instructional format. In addition, a variety of microteaching (e.g., *Microteaching: Selected Papers*), role playing (e.g., *Minicourse 10: Role Playing in the Classroom*), and simulated techniques (e.g., *Simulation as an Instructional Alternative in Teacher Education*) allow the teacher-educator to work with trainees in more flexible, yet developmental and sequential, training formats.

This capability to better focus on specific teaching skills is part of a developmental process and not a fragmented and mechanized orientation toward teaching. Considerable research and development have been directed toward the organizational and instructional skill needed for teachers to provide more individualized learning opportunities within the classroom. Training materials which assist in creating a more flexible and responsible physical environment, organizing individualized and independent instruction (e.g. *Minicourse 8: Organizing Independent Learning: Primary Level*), utilizing proven principles in designing curriculum (e.g., *The Use of Learning Principles in Instruction*), implementing cross-age instructional formats (e.g., *Cross Age Peer Help*), and selecting computer instructional materials (e.g., *Selecting Computer Instructional Materials*) are among those which contribute to a more flexible, instructional environment. Research findings on the social dynamics of the classroom have resulted in specific strategies for getting students into more collaborative and less competitive structures (e.g., *Team-Games-Tournament: Instructional Process Curricular Units*). Strategies for responding effectively to counter-productive behavior are suggested in the *Classroom and Instructional Management Program*.

Recent research and development have not only allowed the teacher-educator to assist the teacher in designing more responsible instructional settings, they have also helped organize training programs in a similar vein. Products such as *A Guide to a Model for the Preparation of Elementary School Teachers* and *A Guide to the Teacher Innovator* are but a few that address the multiple problems encountered in designing and implementing more flexible, yet interrelated, teacher education programs. The teacher-educator also has more data on those programs designed to prepare specific types of teachers, such as teachers for urban settings (e.g., *Beginning Teachers in the Inner City*), the teacher as clinical practitioner (e.g., *A Guide to Behavioral Science Elementary Teacher Education Programs*), humanist (e.g., *A Guide to Model Training for the Individualization of Instruction*), in addition to institution builder and innovator. Changing teacher education programs calls for changes in the role of the teacher-educator. Training materials for ongoing teacher training are also available (e.g., *Interdisciplinary Faculty Teaming: A Workshop*).

Research has also resulted in products which can assist the teacher-educator in the increasing number of legal, political, and fiscal problems encountered in preparing teachers for productive careers. Products addressing current thinking on such issues as governance (e.g., *The Governance of Teacher Education*), accreditation (e.g., *Accreditation Problems and the Promise of PBTE*) in addition to shrinking enrollments and revenue, and school/college relations are now available. The growing concern about how more effective inservice education can be effected is also reflected in the *Catalog*. Other information about teacher centers, field-based instruction, beginning or transitional inservice teaching, performance-based certification of school personnel, as well as other topics within inservice training is available.

Future directions

As impressive as much of the recent research and development has been, there is obviously still much to be done. The better identification and validation of those teacher attributes and competencies effective for different types of teaching responsibilities in different school and curricular contexts represent critical needs and a complex challenge. However, knowing what is necessary for effective teaching is merely a prelude to determining how these different types of teachers can be trained cost effectively. Also, the areas of recruitment and selection of teachers, not to mention their placement and the legal dimensions involved in this process, remain open to further investigation. The selection and sequencing of training modalities and instructional formats appropriate to continuing educational schemes suggest multiple direction for further research in teacher training. Questions of effective intervention and feedback, especially in the inservice setting, demand additional investigations if school-based, ongoing teacher renewal is to become more of a reality. These are but a few of the many current educational concerns. A host of promising contexts must be further developed to provide teacher education with the empirical base it needs.

CLASSROOM AND INSTRUCTIONAL MANAGEMENT (CLAIM) PROGRAM

Inservice teacher training program to assist teachers in reducing the frequency of behavior problems and increase the quality of academic work

Classroom and Instructional Management (CLAIM) is an inservice training program designed to help teachers acquire skills that will help them reduce the frequency of behavior problems and increase the amount and quality of academic work done by students. The program is divided into 8 topical units which can be taught over 6, 10, or 14 group sessions. The materials consist of a participant's book for each member of the course, a coordinator's book, and four filmstrips and cassette tapes. Each unit in the participant's book contains several paper-and-pencil exercises to check the reader's comprehension. In addition, each unit includes several practice exercises to be completed in a classroom situation. The topics covered by the training course are: An introduction to behavior analysis, the influences on using behavior, describing behavior and measuring results, social reinforcers, the token economy, contingency contracts, response weakening, peer tutoring, and scheduling.

The program is based on the findings of behavior analysis. It emphasizes that teachers can change classroom behavior without having to change the entire life situations of students. By changing their own behavior and emphasizing positive classroom interactions, teachers can make the classroom a more pleasant and rewarding place.

The program was tested at 15 sites in Missouri and Tennessee. Over 100 teachers and administrators received the CLAIM training, thus exposing over 1,000 students to the approach.

SUBJECT AREA(S)

Inservice teacher training course: Behavior management techniques.

Teachers of preschool and elementary children learn how to change the behavior of students in order to bring about important learning outcomes; teachers learn to change their own behavior and to observe and describe the behaviors of students; teachers learn how to operate a token economy, how to select reinforcers, how to write contingency contracts, and how to use social reinforcers to make the classroom a more pleasant and rewarding place.

INTENDED USERS AND BENEFICIARIES

CLAIM is primarily aimed at teachers and administrators of preschool and early elementary schoolchildren. It is equally applicable, however, to day-care teachers and, with minor modifications, to older elementary, junior high, and high school teachers. The eventual beneficiaries of the course are children whose teachers learn the techniques and apply them in their classroom.

Since the program focuses on what has been called the "number one problem in education," i.e., discipline, CLAIM could have a profound impact on the progress and achievement of students in all classrooms which adopt the approach.

GOAL(S) OR PURPOSE(S)

The major goals are: (1) To describe in simple-to-follow units practical techniques teachers can use to reduce the frequency of disruptive behaviors in the classroom, (2) to suggest methods that will increase positive classroom interactions and enthusiasm and motivation for academic work, and (3) to encourage teachers to make the classroom a more pleasant and productive place for students and teachers.

PATTERNS OF USE

CLAIM can be read and implemented by teachers on their own, or a group of teachers can go through the course together with a leader or coordinator. CLAIM is usually used as an inservice training course lasting 8-14 weeks. However, it could easily be adapted for use in college methods courses.

ASSESSMENT PROVISIONS

Each unit in the participant's book contains self-check exercises to assess the reader's comprehension. Answers are provided with the exercises so that the participant can get immediate feedback on progress. Practical exercises to be carried out in classroom situations are also given. These exercises have less prescribed criteria for success. It is expected that the participants involved in the course will want some practical experience with the methods they are learning, and the course encourages them to meet with each other to discuss their questions, successes, and problems. The coordinator's book provides suggestions on how to organize the group sessions. No formal assessment or testing of participants is carried out as part of the course. The coordinator's role is less for quality control and more as a general discussion leader and organizer of the course.

TIME REQUIREMENTS

The CLAIM training course may be implemented in 6, 10, or 14 group sessions spread over 8-14 weeks. Each group session lasts from 45-60 minutes. Prior to each session, teachers read the appropriate unit, do the self-check exercises, and complete those practice exercises that will be discussed in the group session. The average reading time per week is 1 to 1-1/2 hours. The time for completing the practice exercises varies from 15 minutes to 1 hour or more, carried out in the classroom over several days. The total training time for the course is, therefore, approximately 40 hours, counting time spent in regular classrooms performing the practice exercises.

IMPLEMENTATION PROCEDURES

CLAIM is most effectively implemented by having a coordinator or group leader responsible for organizing the group sessions. The coordinator sets up the schedule, reads the materials in advance of other participants in the course, and is available to help and advise teachers about practice exercises. The coordinator will also arrange to show the four filmstrips and will conduct discussions of the topics in the various units. The coordinator needs no special training. The coordinator's book provides adequate instructions for how to organize and conduct the course.

Personnel Required for Product Adoption and Implementation

It is suggested that a part-time coordinator (e.g., a counselor, principal, or members of the special services staff) be used to organize group sessions and serve as a consultant to teachers when a group of people decide to take the CLAIM training at one time.

ASSURANCES AND CLAIMS

Assurances

The CLAIM program was evaluated with 43 teachers from schools in St. Louis County, Missouri, in 1973-74. The developers have not received any reports of harm associated with the use of this product. In fact, teachers' enthusiasm has been high. The materials were reviewed for any form of social bias, racial or ethnic stereotyping, or inappropriateness of content, and any problems-caused revisions of the materials. Particular attention was paid to the examples in the participant's book and to the choice of visuals in the filmstrips. The developer has tried to present a balance of racial types, men and women, and boys and girls in these examples. It should be noted that, although examples using male teachers are often used in the program materials, it seemed appropriate to refer to "the teacher" in the written materials with the pronoun "she." This is because most teachers of preschool and early elementary children are women. The coordinator is referred as "he" or "she," because the developers anticipate that this job would be held equally by either sex.

Information gathered from the field test indicates that the materials are effective in helping teachers learn new skills. During the field test, training sessions were conducted by onsite coordinators trained briefly at CEMREL, Inc. Also, the program developer and evaluation specialist attended all sessions in all schools acting as consultants to the experimental groups; therefore, the question of whether the materials can be implemented fully by an untrained local coordinator has not yet been answered. However, the materials were revised, based on the developer's experiences in the field test sites, to make them more self-implementing; and they now appear to be able to stand alone with no aid beyond that given in the program materials.

Since the CLAIM program deals with behavior analysis and behavior modification techniques, it may encounter negative user or community reactions from some audiences. The coordinator's book and sections of the teacher's guide provide some suggestions for how to deal with these issues. It should be noted, however, that the primary emphasis of CLAIM is that teachers should change their behavior in order to bring about positive changes in children. CLAIM is not mechanistic and demeaning to children; it aims at helping children respond to school in the most positive and productive way: With enthusiasm, curiosity, and joy about the learning process. The developers feel that the tone and presentation of materials in the course will allay the fears of any who believe that a program based on behavior modification might cause potential harm.

Claims

Evaluation of 43 teachers from schools in St. Louis County, Missouri, in 1973-74 showed that the CLAIM training had a significant impact on teachers' behavior, with a resulting decrease in undesirable behavior among students.

The results showed a positive correlation between CLAIM training and understanding of behavior analysis concepts, strategies, and recordkeeping procedures; mean frequency of approval statements in classrooms; and use of observation-feedback data to improve performance. In addition, the pilot teachers were overwhelmingly enthusiastic about the course. In every case, undesirable student behaviors diminished and desirable behaviors increased after CLAIM techniques were applied.

COOPERATIVE URBAN TEACHER EDUCATION (CUTE) PROGRAM

Preservice teacher education program to prepare teachers for inner-city schools

The *Cooperative Urban Teacher Education* (CUTE) *Program* is a nationally recognized preservice teacher education program designed to effectively prepare teachers for inner-city schools. CUTE is an intense 16-week training program conducted during the semester in which the college student is enrolled for student teaching. The objectives of the *CUTE Program* are to prepare teachers to understand their own and their pupils' environment, culture, attitudes, insecurities, anxieties, and prejudices. In addition, teachers are prepared to understand and possess competency in inquiry teaching methods.

The unique features of the CUTE model are that it is field based and interdisciplinary in approach. The first 8 weeks of CUTE consist of observations in schools, field experiences in the community, and seminars in three substantive areas: teacher education, sociology, and mental health. During the last 8 weeks of the program, the student carries out normal student teaching, but in a school located in a low-income area of the city.

Through the sociology component, students are required to participate in many field experiences in the inner-city community in which they will be teaching. Doing volunteer work with community agencies, tutoring pupils in their homes, observing for 4 hours in the waiting room of a hospital in the community, or doing a sociological case study of an individual pupil throughout the semester are examples of sociological activities in which CUTE students might participate. A vital part of the program is the "live-in"—an arrangement in which each student spends an entire weekend with a family in the community—perhaps the greatest learning experience for participating students. In this way, members of the community are actively involved in the operation of the program.

In the mental health component of CUTE, discussion sessions are guided by a psychologist or psychiatrist who encourages the student teachers to delve into their anxieties, prejudices, attitudes, and defense mechanisms. Children's emotional and psychological development are studied and discussed. Gradually, the CUTE students become more open and honest with themselves and with others; they become more secure, emotionally mature, and self-confident with the pressures they will face in everyday problems with students.

Finally, in the teacher education component of the CUTE program, emphasis is placed on inquiry teaching methods. The inquiry approach to learning strives to reduce the authoritarian role of the teacher and encourages pupil participation. CUTE students are taught to encourage their pupils to ask questions, to suggest alternatives, and to explore possible solutions to problems.

SUBJECT AREA(S)

Subject areas include:

Teacher Education—Focus and function of a teacher, teaching-learning process, analytical study of teaching, developing teaching plans, stimulating pupil responsibility, responding to pupils, individualized instruction, reaching tentative conclusions in the classroom.

Sociology—Sociological concepts pertinent to the inner city; processes of urban growth and their effects on social groups; identification of institutions, organizations, and size and location of different ethnic groups in the inner city; urban school organization; sociocultural aspects of the inner city; relationship between teaching strategies and sociocultural aspects of the inner-city; deviant behavior—causes of delinquency and methods of coping with them.

Mental Health—Determinants of behavior; mental processes in learning; internal motivations of behavior: sexual and aggressive drives, sexual drives and education, and defense mechanisms; striving for autonomy; external influences on behavior; the case study; exercises in self-awareness and group awareness; free-floating group discussions on current problems of the participating student teachers; personal and racial differences; problems developing from interaction between student teachers and the inner-city school and community.

INTENDED USERS AND BENEFICIARIES

Users include teacher education institutions and their staffs. These would include faculty members in schools of education at universities or colleges, and staff members in urban education centers affiliated with school districts. The program is intended to be used in training college seniors majoring in education during, or just prior to, the semester in which they do their student teaching. Student enrollment in the program is on a voluntary basis; interest in teaching in the inner-city is the only requirement.

The CUTE *Program* allows for flexibility and adaptability in teacher training. With modifications in the content area of the sociology component, the program can be modified to train student teachers interested in teaching in any part of the city or in rural areas, as opposed to just the inner city. Certain substantive areas of the program could be investigated in more depth for courses during the junior year of the student's academic program. Also, parts of the program could be adapted to inservice training programs for teachers, rather than the present preservice format.

Ultimate beneficiaries of the program are the inner-city schools and their pupils.

GOAL(S) OR PURPOSE(S)

The objectives of the CUTE program are to prepare the student teachers: (1) To understand their own and their pupils' environment and culture; (2) to understand their own and their pupils' attitudes, insecurities, anxieties, and prejudices; and (3) to understand and possess competency in inquiry teaching methods.

PATTERNS OF USE

The CUTE program is a complete, semester-long course to be used in the final stages of a preservice teacher preparation program. Units are sequential and cumulative. Parts of the sociology and mental health components could be covered in separate courses to educate anyone interested in the subject matter. If greater detail is desired, parts of the program could be presented also in courses prior to the final year in the teacher education curriculum.

ASSESSMENT PROVISIONS

Although some evaluation forms to assess students' progress are included in the CUTE manual or supplementary materials, they are not a complete assessment system. Forms include rating forms to evaluate CUTE students, a few essay and objective instruments to measure mastery of certain concepts, and numerous outlines for required reports to be completed by CUTE students. Some optional, standardized instruments that can be administered on a prebasis, midbasis, and postbasis are described in the program manual. Program staff will need to construct some measurement instruments; performance criteria and other guidelines are listed in the manual to assist staff in this task.

TIME REQUIREMENTS

The CUTE program is intended to be used over a 16-week semester period. The initial 8 weeks of the program entail seminars in teacher education, sociology, and mental health. Sessions in education are scheduled approximately three times per week, sociology and mental health sessions are planned usually two times a week. Between seminars and observations in schools, field experiences in the inner city are scheduled. During the second phase of the program, CUTE students do their student teaching in an inner-city school.

One installation site adapted the program for a 2-quarter time period since this particular university operated on a quarterly system (3 quarters of 10 to 12 weeks—equivalent to a 9-month school year). Such an arrangement was successful and demonstrated the flexibility of the program.

IMPLEMENTATION PROCEDURES

Proper implementation of the CUTE program requires prior training of the installation site director and staff. Training entails a 5-day workshop on the objectives and techniques of the CUTE program. Workshop staff include program developers and others experienced in directing or teaching in CUTE programs. Field trips in the inner city are planned for workshop participants so that they go through some of the same experiences the CUTE students go through. By means of presentations and group discussions, the rationale, procedures, and operational problems are thoroughly scrutinized.

Factors which are important to the successful implementation of the program include: some initial "seed money" to help get the program started in the institution, commitment of the staff and administrators involved to both the program and urban education, qualified staff in the three substantive areas, inclination of the staff to a field-oriented approach, ability of the staff to develop good relationships with community agencies and school staffs and administrators in the inner city, interest by enough students at the institution to participate in the program, and interest and support by the local school district in the program. Particularly important is the commitment and dedication of the program director at the implementation site.

The only special equipment required for the program is video tape recording equipment to be used for microteaching sessions.

Summary Cost Information

Major costs of operating the program are personnel salaries and facilities. Other costs might include xeroxing, arranging for the live-in or other field experiences, and fees for guest speakers. Members of the instructional staff may wish to order certain optional reference texts. Access to a good university or college library is sufficient for students in the program.

Using costs incurred during the developmental phase, McREL published an estimated startup figure of $68,485 for a first-year program. Three new installation sites operating during the 1972-73 school year reported an average cost of $42,082 for their initial year. Savings apparently were due chiefly to the more efficient use of staff time in institutions where multiple duties are assigned to staff members. Assuming an enrollment of 30 students each semester, the average cost per student would be approximately $700 per academic year.

Personnel Required for Product Adoption and Implementation

Personnel required are: a full-time project director who would spend part of the time teaching in the education component, a part-time teacher educator responsible for some instruction, a part-time (at least half-time) sociologist, a part-time psychologist or psychiatrist, and a part-time secretary. Professional personnel should have at least a master's degree. Knowledge of concepts in their particular field (whether it be teacher education, sociology, or mental health) and an ability to apply that knowledge to practical situations they encounter in a teacher education program like CUTE are the most important requisites for staff instructors in CUTE.

ASSURANCES AND CLAIMS

The CUTE program has been implemented successfully at 25 sites across the country. Approximately 1,900 student teachers have been trained in the program as of the end of 1974.

The second phase diffusion effort in 1973-74 involved the training of staff for 12 new regional sites (which were trained by McREL staff and had 1 year of experience with the program) rather than by McREL program development staff. Because of the lack of necessity for major intervention by the developers in the implementation process and the high ratings of new sites by project monitors on characteristics essential to the proper implementation of CUTE, it is clear that the program is transportable.

The program materials do not appear to display any form of social bias—including ethnic or sexual stereotyping—as far as is known by the developing organization. Of the many teacher education institutions and the many students who have participated in the program, no one has issued a complaint to McREL regarding negative effects of the program. In fact, one intent of the program is to promote a positive image of low-income persons to student teachers enrolled in the program.

CROSS-AGE PEER HELP

Two-day workshop to train teams of school personnel to set up a cross-age tutoring program

A leader's manual and participant materials have been developed for conducting a 2-day workshop to assist teams of school personnel who wish to set up and implement a cross-age tutoring program in which older students tutor younger students. The major part of the package consists of materials for conducting a series of training seminars for the older students on how to be effective tutors.

The training process which is facilitated by two or three seminar leaders is designed so that, following participation in the training workshop and involvement in some phase of back-home implementation, a person is able to set up a training workshop for others who wish to begin a cross-age program.

SUBJECT AREA(S)

Student tutoring

INTENDED USERS AND BENEFICIARIES

Those educators and students intending to participate in a cross-age helping program may find this system useful.

GOAL(S) OR PURPOSE(S)

All participants will be able: (1) To describe the nature, purposes, and content of cross-age helping programs; (2) to develop an awareness of their own roles and the roles of other team members; (3) to develop proficiencies in communication skills as they relate to effective participation in cross-age programs; and (4) to develop an awareness of their roles in the evaluation of the cross-age program.

PATTERNS OF USE

These materials are sequentially organized toward the cumulative attainment of the stated objectives.

ASSESSMENT PROVISIONS

Not applicable.

TIME REQUIREMENTS

Two full days are required for completing this workshop. All participants are requested to commit themselves to full attendance at all workshop sessions.

IMPLEMENTATION PROCEDURES

1. Two trainers are needed for this workshop because of the training for multiple roles. (For the 2d day of the workshop, three trainers—one for each role—help decidedly.)

2. Preworkshop materials need to be in the hands of the participants at least 1 week before the workshop begins.

3. The workshop is designed around teams who implement the program back home. This is a crucial part of the design.

4. Well before the actual beginning of the workshop, trainers should read over the preworkshop material, the training manual, and the material in the Lippitt Manual, *Orientation, Training, and Related Materials*, in order to become familiar with content, procedure, and materials.

5. Although the schedule of the workshop activities and directions for trainers are specific and structured, trainers may adapt these to fit their individual situations. Since the 2-day schedule is very tight timewise, trainers whose participants have more time available may wish to spread the activities over an additional 1/2-day.

6. Children (preferably 5th- and 6th-graders) are needed for demonstration purposes on each day of the workshop.

7. A large comfortable room with movable tables and chairs is needed to accommodate the total group. Beverages and refreshments should be available in the room, if possible.

ASSURANCES AND CLAIMS

Harmlessness

The draft of a training manual for use with *Cross-Age Peer Help* was given two rounds of trial and revision. Participants were asked for feedback. There were no reports from trainers, participants, or implementers regarding physical, psychological, or sociological harm.

Social Fairness

The Lippitts gave special attention to issues of social fairness in creating their system. This related manual reflects the same concern.

Replicability

Pending disposition of the draft of this manual with the Lippitts, issues of replicability still need to be explored. The manual was created to make it easy for a nonexpert to conduct an introductory workshop. The developers of the manual appeared successful in doing this.

TEACHER EDUCATION

RD 200 003

Product Development

The manual was developed over a 2-year period involving two rounds of trial and revision. Observation and questionnaire feedback of workshop participants in these trials were used in revisions. No further evaluation of the manual has been made.

INFORMATION CURRENT AS OF MARCH 1975 ■

RD 200 004

INTERACTIONAL ANALYSIS

Program focusing on the three phases of interaction analysis instruction: tallying, analysis, and interpretation and usage

This low-cost, mass-diffusable, competency-based instructional system includes all materials and procedures for 30-40 hours of instruction in either an inservice workshop or preservice course. There are 18 instructional sequences or units. Activities are sequenced to present an increasingly intense involvement with the three phases of interaction analysis instruction: Tallying, analysis and interpretation, and use. The effect of this spiral arrangement is a planned redundancy that eventually interlocks the skills and concepts involved. Each instructional sequence provides: A description, including a list of materials; rationale; objectives; procedures; and participant handouts. Teachers who complete the training program learn to use interaction analysis techniques for collecting data about what happens in the classroom, analyzing and interpreting the information, and using it to make sound judgments for improving instruction. In broad terms, teachers learn: To interpret instructional goals in terms of expected patterns of interaction; to gather data about the instructional materials in a classroom; to analyze interaction data to determine patterns of influence and areas of concern; to perceive the effects of different styles of verbal behavior in the classroom; to vary or limit verbal behavior to meet desired instructional goals; and to use analyzed interaction data as a basis for change in teaching behavior.

SUBJECT AREA(S)

This training system focuses on the three phases of interaction analysis (tallying, analysis and interpretation, and usage).

INTENDED USERS AND BENEFICIARIES

Classroom teachers and, indirectly, their students are the intended users.

GOAL(S) OR PURPOSE(S)

The purpose of the *Interaction Analysis* instructional system is to provide teachers with skills for using interaction analysis techniques for collecting data about what happens in the classroom, analyzing and interpreting the information, and using it to make sound judgments for improving instruction.

In broad terms, program goals would enable teachers: (1) To interpret instructional goals in terms of expected patterns of interaction, (2) to gather data about the instructional pattern in a classroom, (3) to analyze interaction data to determine patterns of influence and areas of concern, (4) to perceive the effects of different styles of verbal behavior in the classroom, (5) to vary or limit verbal behavior to meet desired instructional goals, and (6) to use analyzed interaction data as a basis for change in teaching behavior.

PATTERNS OF USE

These materials are sequentially organized toward the cumulative attainment of the stated objectives. The training design includes a great deal of participant interaction for feedback, simulation trials, and interdependent action. For this reason, all participants are required to commit themselves to full attendance at all workshop sessions.

ASSESSMENT PROVISIONS

Interaction Analysis has been deemed appropriate as an intitial experience for educators and, therefore, has no prerequisites. Throughout the workshop, participants evaluate their learning by mutual feedback, self-testing (e.g., paper-and-pencil tests), and skill practice.

TIME REQUIREMENTS

There are 18 instructional sequences with a total of 30-40 hours of instruction.

IMPLEMENTATION PROCEDURES

All new trainers should experience the workshop materials and design as a participant before attempting the trainer role. Initial cotraining with a trainer who has previously conducted the workshop is an additional benefit to a new trainer.

ASSURANCES AND CLAIMS

Assurances of Harmlessness

During a series of trial workshops, participants were repeatedly asked for feedback concerning this system. While criticisms were used to revise the system, there were no reports from participants, trainers, or implementers indicating that physical, psychological, or sociological harm had been experienced. During the years that this instructional system has been commercially available, the developers have received no reports of harm or perceived risk from users in the field.

Assurances of Social Fairness

Social fairness issues were considered during interim rounds of trial and revision in the development of this system. While the generic "he" is sometimes used in referring to persons of either sex, the system is generally fair and has been positively accepted as such.

Assurances of Replicability or Transportability

This system was developed with the intention of its being easily used by persons involved in the training of teachers. The developers feel that persons familiar with the content of this system, experienced in conducting teacher-training courses, and experienced as workshop trainees, have successfully used this system.

Claims of Effectiveness

Field tests of the interaction analysis system took place during summer 1973. Seventy-five volunteer trainees in Oregon and Montana served as subjects.

Data collected from these trainees indicate the following results:

1. Over 90 percent of the 75 participants reported the interaction analysis workshop was satisfying and worth while.
2. Of the 75 participants, over 85 percent reported the skills learned were useful.
3. As measured on a pretest and posttest of semantic differential, participants exhibited a change of attitude in the desired direction toward self, teaching and school, and use of interaction analysis in their classrooms.
4. On a locally produced, 27-item cognitive test administered immediately after training, 90 percent of the participants scored 80 percent or better.
5. A performance test designed to measure participants' coding ability and administered immediately following training, produced a mean Scott coefficient of reliability of .496.

It can be expected that most participants of a workshop using this system will experience satisfying and significant gains. However, potential users should be cautioned not to expect a high level of proficiency in skills when applying interaction analysis unless practice sessions are added beyond the scope of this design.

Claims of Careful Product Development

This system was developed over a period of 4 years involving repeated rounds of trial and revision with K-12 teachers. Evaluation included pilot trials, interim formative testing, and summative field test where developers were not involved in the workshop sites.

MATERIALS AND EQUIPMENT

Required Items	Quantity Needed	Cost per Item in Dollars	Replacement Rate and Cost	Source if Different from Distributor
Participant materials	1 for each participant	3.50		
Trainer's manual	1 for each trainer	5.00	Reusable

INTERACTION ANALYSIS, A MINICOURSE

Training course for elementary and secondary teachers using microteaching to demonstrate the special skills of verbal communication

Interaction Analysis, A Minicourse is an inservice or preservice training course for teachers at both elementary and secondary levels. Special skills of verbal communication are studied, practiced in microteaching, and analyzed by using interaction analysis. Special emphasis is given to the response and question skills of the teacher and the relationships of these skills to student initiation.

The course materials are designed to provide self-instruction, self-pacing, and collaboration with fellow trainees. The work can be accomplished without the cost of a substitute teacher. The teacher reads the material for each lesson, plans a microteach, and evaluates a cassette voice recording. During the first lesson, previously recorded interaction, carefully scaled from simple to more complex interaction patterns, is used in the playback mode for practicing interaction analysis procedures.

SUBJECT AREA(S)

The subject studied is verbal communication from the teacher's viewpoint. Procedures for coding interaction on a timeline display are taught; attention is given to praising, criticizing, directing, accepting, and using student ideas and feelings, and explaining the reasons for actions that the teacher initiates. The last lesson provides a simple model of personal inquiry which a teacher can adapt to those classroom problems considered most important.

INTENDED USERS AND BENEFICIARIES

The primary user is the classroom teacher with supplementary materials for teacher supervisors and building principals. The beneficiaries are not only teachers, but also the students of these teachers.

GOAL(S) OR PURPOSE(S)

The objectives of the minicourse include: (a) Increasing the proportion of responsive statements used by a teacher, (b) increasing the proportion of student statements in which ideas and opinions are initiated, and (c) increasing the proportion of time devoted to teacher/student interaction. To accomplish these goals, teachers learn to classify statements, to code classified statements onto a timeline display which can be quickly interpreted, and to compare the displays of what happened with a display of what was intended.

PATTERNS OF USE

One or more teachers can take the course. It is recommended that they work on each of the five lessons in the sequence presented. They can proceed at their own pace, but the mutual stimulation of a group of teachers working in a coordinated fashion with the help of a supervisor is known to be more effective than working alone. All microteaching occurs during regular school hours; individual work can be scheduled whenever it is convenient.

ASSESSMENT PROVISIONS

Teachers are specifically instructed to compare early microteaches with those completed near the end of the course. Standards of performance for each lesson can be inferred from clearly stated goals and objectives, but such evaluation is the responsibility of the learner.

TIME REQUIREMENTS

The course can be completed in 6 weeks providing a teacher spends from 3 to 6 hours per week. Two weeks are recommended for the first lesson when practice with the playback cassette occurs.

IMPLEMENTATION PROCEDURES

A special orientation kit consists of throwaway handouts and one 15-minute cassette voice recording. The kit is designed for use in a faculty meeting and is intended to help the teacher decide whether to take the course.

The teacher's handbook, the coordinator's manual, the orientation recording, and a prerecorded cassette of 23 classroom episodes are all reusable. The teacher's workbook, the orientation handouts, and a pad of timeline forms are consumable and should be reordered for each cycle of training.

ASSURANCES AND CLAIMS

Assurances of Harmlessness

There is no evidence to suggest that this product, when used as directed, will induce harm. The intent is to train teachers to use more open and unrestricted communication patterns with students. The field tests produced no known harmful results.

Assurances of Social Fairness

This product has been field tested in situations in which persons of different races and backgrounds participated. No unfair consequences were known to have occurred.

Assurances of Transportability

The materials have been used in situations in which no employee of the developer was present. The product can be adapted to the normal procedures for inservice and preservice education of teachers.

Claims of Effectiveness

A main field test report suggests that most of the teachers who took the course in the main field test modified their patterns of classroom interaction so that more responsive statements occur and more student initiation statements occur. The primary field test involved 19 elementary and 11 secondary teachers (see: Lai, M. K. *Main Field Test Report—Interaction Analysis*: A73-12, 1973, page 81; available from the Far West Laboratory, 1855 Folsom St., San Francisco, Calif. 94103.)

MATERIALS AND EQUIPMENT

Required Items	Quantity Needed	Cost per Item in Dollars	Replacement Rate and Cost	Source if Different from Distributor
Interaction Analysis handbook	1 per teacher	4.00	Reusable	
Interaction Analysis workbook	1 per teacher	3.00	Consumed by each teacher	
Interaction Analysis coordinator's manual	1 per coordinator	2.00	Reusable	
Cassette of 23 classroom episodes (prerecorded)	1 per teacher preferred; can be shared by 2 teachers	6.00	Reusable	
Pad of timelines	1 per teacher	.85	Consumed by each teacher	
Orientation kit				
(a) Handouts for faculty meeting	1 per member at meeting	5.00 per 100	Consumable	
(b) Cassette recording	1 per meeting	5.00	Reusable	

Note: When reusable materials are used for 3 cycles of training, the average cost of materials is $6.75 per teacher.

Special equipment: Each teacher requires the use of an ordinary cassette voice recorder to be used both for playback and for making a live recording of a microteach. Cost varies.

INTERDISCIPLINARY FACULTY TEAMING: A WORKSHOP

Series of activities to encourage development of teams of members from different facets of the teacher education faculty

The *Interdisciplinary Faculty Teaming Workshop* is a series of activities designed to facilitate the establishment and growth of teams composed of members of various sectors of the teacher education faculty. The workshop addresses skills in planning, communicating, and organizing programs to facilitate consideration of students' needs as well as needs of the faculty team itself. This emphasis on students' needs includes attention to their personal needs and feelings as well as their cognitive growth.

Interdisciplinary faculty teams are becoming more and more common in teacher education programs around the country. The teams aim to work together to provide a more integrated and concentrated program for preservice teachers. However, functioning as a member of a faculty team requires skills that faculty members cannot be assumed to possess. The experiences in the program develop these skills by allowing teams to work together in a directed, task-oriented situation with some of their own problems and concerns. Skills such as planning and problem solving, decisionmaking, effective communication, and evaluation of group effort are included.

There are two versions of this workshop: One covers 3 days and the other, 2 days. In addition to the series of experiences included in these two versions, a handbook of supplemental experiences and information is available to facilitate continual growth in the skills of faculty teaming.

SUBJECT AREA(S)

This workshop involves training educators in the skills necessary to participate successfully on a faculty team. The skills include communicating, planning, problem solving, decisionmaking, establishing meeting procedures, and identifying resources.

INTENDED USERS AND BENEFICIARIES

Although originally developed for use with teacher education faculty, this workshop has been used equally well with classroom teachers.

GOAL(S) OR PURPOSE(S)

The participant completing the workshop will possess both individual skills that enhance personal contribution to a team and skills that facilitate the process of teaming. Individual skills include communication skills such as paraphrasing and giving and receiving feedback and team support skills such as initiating, summarizing, and gatekeeping. Team process skills include decisionmaking, program planning, evaluation, and problem solving.

PATTERNS OF USE

The 3-day workshop is a series of 10 units in which intact teams participated. The 2-day workshop involves nine units of these same units that have been shortened. In each case, the units are sequential and cumulative and require a trainer for direction. A handbook of supplemental units is also available for use at any time subsequent to the workshop.

ASSESSMENT PROVISIONS

A preworkshop inventory is provided to give the workshop leader an indication of participant expectations and major questions about the subject matter of the workshop. Additional inventories at the end of each day provide continual feedback to the leader as to the climate, relevancy, and clarity of the workshop.

TIME REQUIREMENTS

In its long version, this workshop requires 3 days, approximately 6 to 7 hours per day. The shorter version requires 2 days of the same length.

IMPLEMENTATION PROCEDURES

The primary requirement for this workshop is freeing individuals to participate for the full extent of the workshop session. No special equipment is necessary. Two commercially available 16mm films and various handouts are used during the workshop.

ASSURANCES AND CLAIMS

The workshop was pilot tested by the developers with teams in three different university settings. Formative evaluation data were used to revise the workshop content, timing, and packaging in spring 1974. Since that time, various components of the workshop have been used without the developers present, in both schools and colleges, with positive results. It is most effective when used with working teams, rather than collections of individuals.

Success of the workshop is highly dependent upon the workshop leader. Qualities such as experience in working with groups and university faculty members, flexibility in timing and depth of content, and sensitivity to the needs of participants are required. The leader's manual and the handbook describe in detail the requirements of the workshop, plus possible alternative routes and followup activities. The leader must be able and willing to temper the requirements of the workshop with knowledge of participant concerns in implementing the workshop.

Workshop materials have been scrutinized to eliminate any form of social bias, ethnic or sexual stereotyping, or inappropriateness of content.

MINICOURSE 1: EFFECTIVE QUESTIONING–ELEMENTARY LEVEL

A microteaching program to train teachers to ask more effective questions in class discussions

Effective Questioning is one of a series of minicourses developed by the Far West Laboratory for Educational Research and Development. The minicourses are based on the Stanford microteaching program; teachers watch films demonstrating specific teaching skills, practice using a skill by microteaching (teaching a short lesson to a small number of students), and video tape their performance so they can evaluate themselves afterwards. By repeating this sequence for a number of skills, teachers can help themselves improve their teaching ability. The immediate feedback via video tape provides strong reinforcement for skills the teachers wish to cultivate.

The minicourse is aimed at developing the ability to ask questions in class discussions. The teacher learns ways to reduce the amount of teacher talk in class, to encourage indepth student responses to questions, and to avoid certain teacher behaviors that can interfere with class discussion. To work on a specific skill, the participant follows this instructional sequence: Read an appropriate section from the teacher's handbook, view an instructional film, plan a microlesson (5-15 minutes), microteach the lesson (while video taping it), view the video tape to evaluate use of the skill, replan the lesson, reteach and retape it, and reevaluate the performance. The teacher uses the minicourse's self-evaluation forms to judge skill performance at each stage. Direct supervision is neither required nor suggested, so the teacher is free from the anxiety frequently associated with programs using video tapes of the teacher's performance.

SUBJECT AREA(S)

Inservice or preservice teacher training in the use of questioning in class discussions.

There are eight lessons which develop teacher skill in calling on nonvolunteers, using higher cognitive rather than fact questions, using redirection, asking questions that call for longer pupil responses, prompting, and avoiding the repetition of pupil answers or repeating of questions.

INTENDED USERS AND BENEFICIARIES

The intended users of this minicourse are teachers of upper elementary grades in all subject areas where class discussion is used as an instructional technique.

GOAL(S) OR PURPOSE(S)

This course is designed to train teachers to use techniques which will increase pupils' participation in class discussions.

PATTERNS OF USE

The minicourse is an autoinstructional package. *Minicourse 1* consists of 11 reels of film of instructional and model lessons. The teacher's handbook contains instructional material and self-evaluation forms. Skills and concepts are sequenced according to increasing difficulty.

ASSESSMENT PROVISIONS

Teachers volunteer to take *Minicourse 1*. Teachers evaluate their own performance; there are no provisions for evaluation by others. Self-evaluation forms are provided.

TIME REQUIREMENTS

Three hours of class time per week for 5 weeks, plus an equal amount of preparation time after school, is required.

IMPLEMENTATION PROCEDURES

The coordinator should arrange for facilities to show the 16mm instructional/model films to participating teachers. A room with the video taping equipment and seating for the teacher and five students should be set up and made available for microteaching.

A staff member or the coordinator should be made available to relieve a teacher who is scheduled to microteach during class time.

Summary Cost Information

Initial cost to the user includes the purchase of the instructional films. The coordinator's handbook may be reused. Each teacher taking the course will require a handbook, as consumable evaluation forms and checklists are provided therein. Initially, the school or district should provide a 20-minute blank video tape to be used by each teacher for microteaching and evaluation. These tapes can be reused by teachers taking the course later.

Personnel Required for Product Adoption and Implementation

A coordinator recruits teachers to take the course, introduces the course and methods to the teachers, sets up the course schedule, and maintains the video tape equipment. Any staff member could fill this role, but it is usually filled by a principal or district supervisor.

ASSURANCES AND CLAIMS

Participants in the three field tests during the development cycle noted no harmful effects. Of 96 teachers who took *Minicourse 1* in Florida, 76 percent felt the course was more effective than other inservice training. The course was tested in different socioeconomic settings and was found to be effective in all settings.

The minicourse was field tested 3 times during its development—a preliminary field test with 6 teachers in 2 schools, a main field test with 48 teachers drawn from 12 elementary schools in 6 districts, and an operational test with 58 teachers. Laboratory development staff members were heavily involved in the preliminary and main field tests and the course was revised, based on the findings from these tests. The operational field test was carried out without development staff assistance. The course was coordinated by regular school personnel, assuring the course's transportability and replicability.

The effects of the minicourse on teacher behavior may be seen through some of the results of its main field test. Before taking the course, participating teachers talked in class discussions about 52 percent of the time; after the course, they talked only 28 percent of the time because they had learned to encourage more student participation. Before the course, only 37 percent of the teachers' questions asked the students to make higher cognitive responses (such as formulating hypotheses instead of just recalling facts); after the course, 52 percent called for such responses from students. As a result, student responses to teacher questions actually doubled from an average of 5 words to an average of 12 words after the course.

MATERIALS AND EQUIPMENT

Required Items	Quantity Needed	Cost per Item in Dollars	Replacement Rate and Cost	Source if Different from Distributor
Instructional/model films	1 set	1,600.00*	Reusable	
Teacher's handbook	1 per teacher	2.00	Not reusable	
Coordinator's handbook	1	4.00	Reusable	
20-minute video tapes	1 per teacher	22.00	Annually**	3M, Sony, Ampex, Memorex, Karex

*Instructional films may be purchased or rented for 6 weeks for $210.00.

**A video tape can be recorded, erased, and rerecorded about 400 times. Unless a teacher wishes to keep the tape, it can be reused about 5 times; each teacher taking the course needs a tape—he/she cannot share.

MINICOURSE 8: ORGANIZING INDEPENDENT LEARNING–PRIMARY LEVEL

A self-instructional microteaching program to help teachers meet individual learning needs in grades K-3

Minicourse 8: Organizing Independent Learning—Primary Level is one of a series of minicourses developed by Far West Laboratory for Educational Research and Development. Based on the microteaching program for preservice education developed at Stanford University, the minicourses are short, self-instructional courses designed to train teachers in specific classroom skills. Teachers are provided with a comprehensive handbook outlining the course. They view films demonstrating specific teaching skills, practice the skills by microteaching (teaching a short lesson to a small number of students), and later video tape their performance for self-evaluation. This sequence is repeated for a number of skills.

Minicourse 8: Organizing Independent Learning—Primary Level was designed to solve the pressing problem of meeting individual learning needs at the kindergarten and primary classroom levels. The purpose of this minicourse is to help the teacher create an independent learning environment in the classroom. The proposed classroom environment should encourage each pupil to work independently for portions of the schoolday. The teacher then has time to work with other pupils on either an individual or small-group basis, while the rest of the class is productively engaged. To create this type of learning atmosphere, which differs from the conventional classroom environment, three important conditions must be met. First, the pupils must have a clear understanding of what it means to work independently. Second, they must be able to solve problems which develop during the period of independent study. Third, they must accept and be able to wait for the teacher's comments and evaluation after their tasks are completed.

SUBJECT AREA(S)

Minicourse 8 focuses on how to organize independent learning at the primary level; it is applicable to general inservice or preservice teacher education, grades K-3.

INTENDED USERS AND BENEFICIARIES

The intended users are general inservice or preservice teachers, grades K-3.

GOAL(S) OR PURPOSE(S)

Minicourse 8 teaches a set of organizational procedures that makes it possible for teachers to uninterruptedly instruct a small group of children for 15-30 minutes while the remaining children work independently. In addition, teachers learn to teach pupils to solve problems independently and to wait for delayed teacher response.

PATTERNS OF USE

The teacher follows this instructional sequence: Read an appropriate section from the teacher's handbook, view an instructional film and a model lesson film, plan a 10-15 minute microteach lesson to be taught to four or five students, microteach the lesson (while video taping it), view the video tape to evaluate performance, replan the lesson, reteach and retape it, and reevaluate performance. Self-evaluation forms are provided.

The course consists of teacher's and coordinator's handbooks and five films, and units are sequenced according to increasing complexity of skills and concepts involved.

ASSESSMENT PROVISIONS

Minicourse 8 is an autoinstructional package. Direct supervision is neither required nor suggested. Teachers evaluate their own performance with self-evlauation forms which are provided.

TIME REQUIREMENTS

Sixteen days, 1 hour per day; optional followup lessons are provided.

IMPLEMENTATION PROCEDURES

The coordinator should arrange for facilities to show the instructional/model films to participating teachers. A room with the video taping equipment and seating for the teacher and four to five students should be set up and made available for microteaching.

The coordinator schedules when participating teachers are to use the microteaching room and should arrange for someone to relieve the teacher from regular classroom duties during microteaching.

Summary Cost Information

Initial cost to the user includes the purchase of the instructional films. The coordinator's handbook may be reused. Each teacher taking the course will require a handbook, as consumable evaluation forms and checklists are provided therein. Initially the school or district should provide a 30-minute blank video tape to be used by each teacher for microteaching and evaluation. These tapes can be reused by teachers taking the course later.

Personnel Required for Product Adoption and Implementation

A coordinator recruits teachers to take the course, introduces the course and methods to the teachers, sets up the course schedule, and maintains the video tape equipment. Any staff member could fill this role, but it is usually filled by a principal or district supervisor.

ASSURANCES AND CLAIMS

Psychological and educational research in concept formation, problem solving, and delayed feedback and reinforcement were used in the development of this minicourse. Evidence from the main and operational field tests indicates that teachers and pupils made significant gains in the behaviors necessary for the successful implementation of independent learning in the primary classroom. All of the teachers in the operational field test felt that the product had improved their overall competence to teach their pupils; 78 percent rated it higher than other inservice education experiences; and 99 percent rated it higher than their (preservice) education courses.

Results of the preliminary field test with six teachers indicated that the concepts and teaching procedures contained in the course were incorporated into the main field test version.

The main field test in spring 1969 included 46 teachers and 1,440 pupils. Data collected in this test indicated that the teachers made gains in the skills taught in the course: Discussing the concept of working alone, explaining their own role while pupils are working alone, describing an assigned activity, identifying problems that might occur while pupils are working independently, recommending possible solutions to those problems, and setting standards for what to do when pupils have finished with independent activities.

The operational field test included 61 teachers and 1,830 pupils in 8 public schools. The majority were at kindergarten level. A later operational test was conducted with 15 classrooms, from kindergarten to 3d-grade levels. The data received as a result of the operational field tests support the conclusion that *Minicourse 8: Organizing Independent Learning—Primary Level* is effective as a self-contained unit.

Development staff participated in the coordination of preliminary and main field tests, but operational tests are carried out entirely by school personnel, thus proving the course is replicable and transportable.

INFORMATION CURRENT AS OF MARCH 1975 ■

MINICOURSE 10: ROLE PLAYING IN THE CLASSROOM

A microteaching approach to help teachers plan student role-playing activities for grades 4-12

Minicourse 10: Role Playing in the Classroom is a course to help teachers train pupils to use role playing for instructional purposes in the classroom. Role playing is an instructional tool of considerable power and versatility. It can contribute excitement and relevancy to subject matter by substituting active involvement in learning for passivity, and it can provide a vehicle for students to create and use their own experiences as input for learning. To be effective as an instructional tool, role playing must be employed with the same attention to planning, the same sensitivity to students, and the same care and skill that characterize the effective use of any teaching tool. This minicourse trains teachers in the specific skills needed to use role playing.

The minicourse model is an adaptation of the microteach approach developed by the Stanford Universtiy intern program. Minicourse training requires the teacher to read a lesson in the teacher's handbook; plan a lesson using a specific teaching skill; microteach using this skill (while video taping the microteach session); view the video tape to evaluate use of the skill; and if additional practice is needed, to plan, conduct, and evaluate a lesson with the whole class. The teacher is then ready to move to the next lesson.

SUBJECT AREA(S)

This minicourse focuses on role playing in the classroom.

INTENDED USERS AND BENEFICIARIES

The intended users are inservice and preservice teachers, grades 4-12, in history, literature, and social sciences.

GOAL(S) OR PURPOSE(S)

Minicourse 10 training will enable the teacher: (1) To plan role-playing experiences as instructional activities, (2) to develop in students the capacity to participate successfully in classroom drama, (3) to guide the dramatic process—the techniques of role playing and (4) to help students talk about the insights they have developed through role playing.

PATTERNS OF USE

The course lessons are sequential; the teacher and students should demonstrate effective use of skill in a lesson before moving to the next. In the first section of the course, teachers learn about procedures for initiating role playing. In the balance of the course, they give primary concern to the instructional applications of inventive classroom drama.

ASSESSMENT PROVISIONS

Teachers volunteer to take *Minicourse 10*. It is a self-instruction, self-evaluation training procedure. Direct supervision is neither required nor suggested. Self-evaluation forms are provided.

TIME REQUIREMENTS

One hour per day for 5 weeks is required.

IMPLEMENTATION PROCEDURES

The coordinator should arrange for facilities to show the 16mm instructional/model films to participating teachers. A room with the video taping equipment and seating for the teacher and five students should be set up and made available for microteaching.

A staff member or the coordinator should be made available to relieve a teacher who is scheduled to microteach during class time.

Summary Cost Information

Initial cost to the user includes the purchase of the instructional films. The coorinator's handbook may be reused. Each teacher taking the course will require a handbook, as consumable evaluation forms and checklists are provided therein. Initially the school or district should provide a 30-minute blank video tape to be used by each teacher for microteaching and evaluation. These tapes can be reused by teachers taking the course later.

Personnel Required for Product Adoption and Implementation

A coordinator recruits teachers to take the course, introduces the course and methods to the teachers, sets up the course schedule, and maintains the video tape equipment. Any staff member could fill this role, but it is usually filled by a principal or district supervisor.

ASSURANCES AND CLAIMS

Minicourse 10: Role Playing in the Classroom is not intended to be used as a psychotherapeutic vehicle. It is intended to serve substantive instructional purposes only and not to make public the student's private world.

During field testing of *Minicourse 10*, special care was taken to assure that teachers who were asked to use role playing were given training in its application in order to avoid negative experiences for teachers and pupils.

Socioeconomic status is not a factor in role playing, as evidenced by results of the preliminary field test where students from a low-income, inner-city area participated.

Teachers who participated in the main field test responded favorably to their training in role-playing techniques. All felt it had value as an instructional technique and intended to use role playing in the future. A total of 97 percent would recommend the course to colleagues.

Eighty-six percent of the behaviors evaluated in the main field test exhibited at a 70-100 percent level of success, with 35 percent being exhibited at the 90-100 percent level.

MINICOURSE 15: ORGANIZING INDEPENDENT LEARNING–INTERMEDIATE LEVEL

A self-contained microteaching program to train teachers to plan and use independent study activities in grades 4-8

Independent study is one kind of instructional technique a teacher may use in the classroom. It may be used effectively in almost any organizational structure—in a graded or nongraded school, with team teaching or predominantly self-contained classrooms, and with any kind of student grouping. *Minicourse 15* is designed to help teachers increase the independent learning opportunities of students, no matter what the setting.

The minicourse format was adapted from the standard university microteaching model in which teacher interns are video taped, giving a lesson so that they can later view and evaluate themselves. The minicourse is a self-contained package that can be used in any school where a video tape recording system is available. It is self-instructional using written materials, filmed demonstrations, lessons, microteaching, and self-evaluation procedures.

SUBJECT AREA(S)

The subject area is inservice or preservice teacher education.

INTENDED USERS AND BENEFICIARIES

All teachers in grades 4 to 8 are the intended users.

GOAL(S) OR PURPOSE(S)

The major goal is to train teachers in the introduction, implementation, and use of independent activities for pupils in 4th- through 8th-grade classes.

PATTERNS OF USE

Minicourse 15 is organized into five instructional sequences, each treating two or more teacher behaviors considered critical to successfully conducting independent learning activities. In the first sequence, teachers learn to determine how students understand the significance of independent learning and how independent they are. Several strategies for assessing the levels of independence of students are presented. The second sequence introduces the "learning contract" which serves as a guide for a student's independent learning activities. The sequence is intended to develop teacher skills in identifying and stating learning objectives. In the third sequence, the teacher is expected to develop skill in three additional phases of preparing an independent learning contract: (1) Outlining learning steps to be completed, (2) identifying resources to be used, and (3) establishing deadlines for completing various learning steps as well as for finishing the total contract. The fourth instructional sequence develops teacher skill in providing reinforcements to students, including setting checkpoints at which student progress will be reviewed. The fifth sequence presents a number of teaching skills that should help the teacher incorporate independent learning into the normal routine of the classroom.

The course consists of a teacher's handbook, a coordinator's handbook, and seven 16mm color films of instructional and model lessons.

ASSESSMENT PROVISIONS

Teachers volunteer to take *Minicourse 15*. Self-evaluation and critiques from other teachers—rather than from supervisors—are standard for all minicourses.

TIME REQUIREMENTS

The course requires 16 days of activity, 1 hour per day.

IMPLEMENTATION PROCEDURES

The coordinator should arrange for facilities to show the instructional/model films to participating teachers. A room, with the video taping equipment and seating for the teacher and four to five students, should be set up and made available for microteaching.

The coordinator schedules when participating teachers are to use the microteaching room and arranges for someone to relieve the teachers from regular classroom duties during microteaching.

Summary Cost Information

Initial cost to the user includes the purchase of the instructional films. The coordinator's handbook may be reused. Each teacher taking the course will require a handbook, as consumable evaluation forms and checklists are provided therein. Initially the school or district should provide a 20-minute blank video tape to be used by each teacher for microteaching and evaluation. These tapes can be reused by teachers taking the course later.

Personnel Required for Product Adoption and Implementation

A coordinator recruits teachers to take the course, introduces the course and methods to the teachers, sets up the course schedule, and maintains the video tape equipment. Any staff member could fill this role, but it is usually performed by a principal or district supervisor.

ASSURANCES AND CLAIMS

Minicourse 15 underwent 2 field tests with a total of 75 teachers. The course is also being used as the basis for a research investigation of teacher effectiveness in independent learning instructional programs. Approximately 80 teachers are engaged in this research effort which is being conducted in a large urban school district.

The main field test of the course investigated teacher acquisition of skills in assessing students' levels of independence and in establishing an independent learning contract system.

In assessing students' levels of independence, teachers made major gains in asking students to identify both general and specific topics to be studied, obtaining information regarding students' ability to set deadlines, seeking information regarding the number and variety of resources students can identify, and outlining learning steps. The teachers also reduced significantly the proportion of times they told the student what to do as contrasted with asking them for ideas, an important feature of an assessment process.

In setting up independent learning contracts, teachers made significant changes in their performance in specifying learning outcomes that require more than recall of facts, specifying how learning will be demonstrated, specifying learning steps, organizing learning steps, using manipulative activities, establishing checkpoints, setting deadlines, and describing an anticipated activity.

At the end of training, the minicourse teachers differed significantly from a group of control teachers in all these areas except the levels of learning in the contract. They also differed significantly from the control group in the specificity with which they stated what the student was to learn.

The preliminary form of the course was developed after a careful search of the literature on individualized instruction, open education, and contingency management. After testing the preliminary form of the course with 5 teachers, revisions were made and the main field test was conducted in 3 locations with approximately 20 teachers in each site. Results of effectiveness of the course are based upon this main field test. Data regarding the teaching strategies contained in the course are currently being obtained as part of the research study mentioned above.

MATERIALS AND EQUIPMENT

Required Items	Quantity Needed	Cost per Item in Dollars	Replacement Rate and Cost	Source if Different from Distributor
Instructional/model films	1 set	1,200.00*	Reusable	
Teacher's handbook	1 per teacher	4.00	Not reusable	
Coordinator's handbook	1	4.00	Reusable

MINICOURSE 23: CLASSROOM MANAGEMENT THROUGH POSITIVE REINFORCEMENT

A microteaching approach to introduce teachers of grades 1-6 to basics of reinforcement theory

Minicourse 23: Classroom Management Through Positive Reinforcement has been designed for teachers of grades 1-6 who have not had any training in positive reinforcement skills. The objectives of the course are to train the teachers in the fundamentals of reinforcement theory and to provide practice in using positive reinforcement skills in the classroom. The course would also be useful to those teachers who are familiar with reinforcement theory but would like an opportunity for further practice in the classroom.

This course will give teachers the opportunity to practice a variety of reinforcement skills.

The course uses microteaching as an instructional technique for teachers taking the course. Microteaching allows a teacher to practice the new skills in small-group situations. Analysis of video tapes or audiotapes of these microteach sessions gives the teacher feedback on how well the new skills were used.

SUBJECT AREA(S)

Inservice or preservice training of teachers, grades 1 to 6, and elementary school principals is the subject area.

INTENDED USERS AND BENEFICIARIES

The intended users are all teachers in grades 1-6. The course skills could be used in other grades with some modification. Elementary school principals will also find the course useful.

GOAL(S) OR PURPOSE(S)

In order to acquire positive reinforcement skills, the teacher learns: (1) To use verbal and nonverbal attention to reinforcing students, (2) to use classroom activities or privileges to reinforce one student, and (3) to make the classroom environment more reinforcing to students and teachers.

PATTERNS OF USE

The content and activities of each lesson are to be presented sequentially. The course instructs teacher trainees in the use of positive reinforcement with students and their classrooms.

ASSESSMENT PROVISIONS

Teachers volunteer for *Minicourse 23* training. The course is self-instructional and makes use of self-evaluation. Direct supervision is neither suggested nor recommended.

TIME REQUIREMENTS

Approximately 7 weeks, 4 to 6 hours per week are required.

IMPLEMENTATION PROCEDURES

The coordinator should arrange for facilities to show the instructional/model video tapes to participating teachers. A room equipped with the video taping equipment and seating for the teacher and six students should be set up and made available for microteaching.

The coordinator schedules when participating teachers are to use the microteaching room and arranges for someone to relieve the teacher from regular classroom duties during microteaching.

MATERIALS AND EQUIPMENT

Materials for the course are currently not available. Work was stopped after the feasibility test due to a lack of funds. The complete course would consist of a teacher's handbook, a coordinator's handbook, a principal's module, and instructional/model films. Each teacher would need a 30-minute video tape to use for microteaching.

Summary Cost Information

Reusable components of this course are the instructional/model films, the coordinator's handbook, and the video tapes used for microteaching, which can be reused 5 times. The teacher's handbook and principal's module would be consumable because they contain self-evaluation forms.

Personnel Required for Product Adoption and Implementation

A coordinator recruits teachers to take the course, introduces the course and methods to the teachers, sets up the schedule, and maintains the video tape equipment. Any staff member could fill this role, but it is usually filled by a principal or district supervisor.

ASSURANCES AND CLAIMS

Nineteen teachers participated in a feasibility test of the course materials. A feasibility test is not designed to collect data on acquisition of teachers' skills, but to get teacher response to the design of training materials. To make the course more successful, changes were made as a result of this test.

The course materials have been shelved preparatory to the conduct of a preliminary field test. This test will validate the content and structure of the course. Data on effectiveness of the course will not be gathered until a main field test with a large sample of teacher trainees has been conducted.

INFORMATION CURRENT AS OF MARCH 1975 ■

MODULES AND THEIR ROLE IN PERSONALIZED PROGRAMS (MTRIPP): A WORKSHOP

Two-day workshop to introduce educators to competency-based teacher education

Modules and Their Role in Personalized Programs (MTRIPP) is a 2-day workshop for educators who are interested in pursuing competency-based, personalized and/or modularized instruction. The workshop has time flexibility with four interchangeable parts, each accompanied with a slide-tape show, participant activities, and discussion/feedback. The four parts focus on: (1) The structure of instructional modules, (2) their use in teacher education programs, (3) the characteristics and development of a competency-based program, and (4) strategies to personalize competency-based and/or modularized programs.

The MTRIPP workshop was developed in response to a need voiced by teacher educators to become familiar with the theory and strategies necessary to implement competency-based instructional programs. The workshop models the CBE approach: Participants know the objectives in advance; they frequently select the means for attaining the objectives; and a variety of modes of learning are offered, including audiovisual aids, readings, and interaction with the workshop leader. The workshop is trainer-directed; participants become fully involved through small-group work, simulations, and discussions.

The MTRIPP workshop can be approached and has been approached with different focuses for different audiences, since the sequence and level of the materials can vary. It has been used extensively to introduce teacher educators to competency-based teacher education, with strategies for instruction through learning modules and personalizing programs. It has also been approached as an introduction for teachers of school-age children to self-instructional learning packets. Other uses include an orientation for higher education faculty to objectives-based instruction in colleges and professional schools. The materials on concerns of teachers have been used with both school- and university-based teacher educators.

The MTRIPP materials include four slide-tape presentations, a prototype participant's notebook with master copies of handout materials, a folder of overhead transparencies, and a detailed manual for the workshop leader.

SUBJECT AREA(S)

Development of personalized, competency-based instruction.

Four self-contained components cover the following topics: (1) The structure of instructional modules, (2) use of modules in a course or program, (3) developing a competency-based program, and (4) personalizing a competency-based program.

INTENDED USERS AND BENEFICIARIES

The MTRIPP workshop was designed for use with teacher educators. However, it has also been used effectively with schoolteachers, liberal arts college faculty members, and health science faculty.

GOAL(S) OR PURPOSE(S)

The participant completing this workshop will be able: (1) To apply knowledge of the structure and use of instructional modules to modularizing a course or program for students, (2) to describe the characteristics of competency-based instruction, and (3) to outline strategies to personalize a competency-based program.

PATTERNS OF USE

Four self-contained components can be sequenced in any order. These components each contain a slide-tape show, participant activities, and discussion/feedback.

ASSESSMENT PROVISIONS

A preworkshop inventory is provided to give the workshop leader an indication of participant expectations and major questions about the subject matter of the workshop. Two additional inventories, one at the end of the first day and one after the second day, provide continual feedback to the leader as to the climate, relevancy, and clarity of the workshop.

TIME REQUIREMENTS

The complete workshop requires approximately 12 hours, most effectively accomplished in two 6-hour periods (excluding a lunch break). Each of the four components, when used separately, requires from 2 to 4 hours.

RD 200 012

IMPLEMENTATION PROCEDURES

The workshop requires a leader who is familiar with and experienced in competency-based instruction. One leader for each 30 participants is suggested, and several leaders can conduct the workshop for larger groups of participants. Standard audiovisual equipment and a large meeting room with flexible seating and work space are required.

ASSURANCES AND CLAIMS

The MTRIPP workshop was field tested by the developers with more than 400 educators in more than 10 university and school settings. Formative evaluation data were used to revise the workshop content, timing, and packaging in spring 1974. The workshop has since been led by other than the developers with equally positive results, as indicated by postworkshop inventories. Several of the institutions sponsoring the workshop are currently involved in competency-based programs, relying on the workshop as orientation for faculty.

Success of the workshop is highly dependent upon the workshop leader. Qualities such as experience with modules and competency-based programs, flexibility in timing and depth of content, and sensitivity to the needs of the participants are required. The leader's manual describes in detail the requirements of the workshop, plus possible alternate routes and supplementary and followup activities. The leader must be able and willing to combine the resources and information provided with knowledge of participant concerns in implementing the workshop.

An attempt has been made to eliminate social bias and inappropriateness of content from workshop materials. However, due to circumstances of the design, one slide-tape presentation uses predominantly female pronouns when referring to teachers.

MATERIALS AND EQUIPMENT

TEACHER EDUCATION

RD 200 013

SELECTING COMPUTER INSTRUCTIONAL MATERIALS

Materials to provide elementary and secondary teachers with an introduction to the basics of using computer hardware for computer-enhanced instruction

There are five units in *Selecting Computer Instructional Materials*. Four of these units make up the Background Units; the fifth is How To Select.

The units are:

1. *Background Unit: Hardware at a Glance*—This unit consists of 21 pages of information designed to introduce the user to the fundamental aspects of computer hardware. The unit describes the three basic types of hardware, input/output units, central processing unit, and storage devices; and provides a brief introduction to software and its uses.
2. *Background Unit: Software at a Glance*—This is a 47-page unit designed to introduce the user to several aspects of computer software.
3. *Background Unit: The Roles of Computer in Instruction*—This is a 46-page unit describing the role of the computer in drill and practice, tutorial, data analysis, problem solving, and simulation and games.
4. *Background Unit: Computers in the Curriculum*—This is a 149-page booklet which consists of a series of readings in computer applications written by experts in a number of curriculum areas.
5. *How to Select*—This is a 59-page description on what to look for in good uses of the computer and how to evaluate the units.

SUBJECT AREA(S)

The subject area is computer technology.

INTENDED USERS AND BENEFICIARIES

The primary intended users are teachers in elementary and secondary schools with a secondary audience of college inservice instructors.

GOAL(S) OR PURPOSE(S)

The purposes of these materials are to provide teachers with a means for evaluating computer-enhanced instruction and to make teachers more knowledgeable users of computer-enhanced instruction.

PATTERNS OF USE

This material is primarily intended for the instruction of upper elementary and secondary school teachers who have some access to computers. Since computer-enhanced instruction materials are highly subject oriented, this instruction is primarily for those teachers who are deeply involved in one or two subject areas. However, secondary audiences for these materials may be experts in computer-enhanced instruction applications and college ~~or~~ inservice instructors interested in teaching about computer-enhanced instruction.

These units may be used in several different ways. The original intent of the developers was that all five booklets were to form the basis for a 4-day workshop on selecting computer-enhanced units, with *How To Select* to serve as the primary text and the background booklets to serve as a supplement for those participants who might lack some necessary knowledge about computers in instruction. It was expected that these workshops would include participants with varying experience with computers. The background booklets were designed to bring all participants to a common level of knowledge. However, alternate formats have been proposed and employed. In one case, only the background booklets were used as the basis for a 4-day workshop for teachers who knew little about computers, and in the other case, *How To Select* was used as the basis for a 4-day workshop for teachers with computer experience. Thus, these materials can be used in a number of settings where persons are interested in instructional applications of the computer.

ASSESSMENT PROVISIONS

There are comprehension checks at the end of each unit.

TIME REQUIREMENTS

These materials were designed to be used in workshop settings that would last about 4 full days.

IMPLEMENTATION PROCEDURES

It is desirable to have a trained computer specialist and a time-sharing computer system with instructional programs available on the system for demonstration.

The instructor should be thoroughly familiar with these materials, as well as the instructional programs that are available on the computer system.

Provisions for getting demonstration programs running should be made well in advance of the workshop so that there will be no problems during the workshop.

ASSURANCES AND CLAIMS

No known harmful effects were noted by the observers during field test situations, nor have any been reported since the product has been in the field.

While the materials have not been specifically analyzed for racism or sexism, there is no evidence that either is present.

The materials are designed to be used with a computer and computer terminals, but they are also being used without computer access. Therefore, they can be used and are being used where computer systems are available, as well as in regular classroom situations.

SETTING UP THE CLASSROOM (PART OF THE CONCEPTS AND LANGUAGE COMPONENT)

Training manual presenting guidelines for kindergarten teachers in developing a constructive classroom atmosphere

Setting Up the Classroom is a training manual that presents guidelines for teachers to use in setting up and equipping their classroom. Precise specifications are not given since physical facilities vary from school to school. Certain basic principles of designing and equipping classrooms for young children are discussed.

Setting Up the Classroom consists of six chapters. Chapter 1, "Learning Centers," describes the number of learning centers needed, depending on the number of children assigned to a class, the size of the room, and the available equipment. The manual provides information for the user that includes ways to clearly define each learning center. It also relates information about each learning center and its relationship to other learning centers. Additional suggestions are given for other areas such as a listening center and a display area.

Chapter 2, "Storing and Displaying Equipment," encourages proper use of equipment and discusses the manner in which equipment is stored and displayed in the classroom.

Chapter 3, "Wall Displays," gives guidelines for ideal learning environments as well as for pleasing, decorative, and functional displays.

Chapter 4, "The Total Classroom," gives helpful suggestions in attending to all aspects of the classroom. These guidelines include information on traffic lanes, distractions, and conveniences.

Chapter 5, "Housekeeping," emphasizes the importance of having basic cleaning materials handy. It also emphasizes how the neatness of a classroom eliminates hazards as well as provides a suitable working atmosphere for children.

Chapter 6, "Illustration," is a unique feature of the publication. It contains color photographs illustrating specific aspects of learning-center arrangements, traffic lanes, equipment displays, and wall displays. The photographs were taken in actual classrooms used in SEDL programs. All illustrations have accompanying comments.

SUBJECT AREA(S)

This manual focuses on classroom arrangement and equipment.

INTENDED USERS AND BENEFICIARIES

This product was designed primarily to give assistance to kindergarten teachers and supervisors in charge of staff training. Teachers and supervisors who have used the product have reported it to be most helpful.

Other potential users are teachers working with individually guided education classes and open classrooms. This product not only meets the needs of teachers, but also may be used by research and development centers, curriculum specialists, teacher training institutes, and college and university instructors.

GOAL(S) OR PURPOSE(S)

The purpose of this product is to help teachers learn how to save time, minimize confusion, develop a constructive classroom atmosphere, and develop ways in which to equip and decorate their classrooms.

PATTERNS OF USE

Setting Up the Classroom is a self-instructional manual that can serve as a helpful resource throughout the year. It may be used by supervisors, coordinators, head teachers, or administrators for the training of other personnel. The information is presented in a way which assists users in easily adapting ideas to suit individual needs.

ASSESSMENT PROVISIONS

Assessment provisions are in the form of self-administered checklists for teacher use.

TIME REQUIREMENTS

The training package is intended for use as an ongoing information source; the amount of time spent in assimilating and implementing the suggested strategies depends upon the judgment of the individual user.

IMPLEMENTATION PROCEDURES

Although the manual is primarily self-instructional, trainees may benefit from workshops where detailed explanations and specific questions are addressed. To take full advantage of the individualized nature of the product, users should adapt the information to fit the teaching situation.

ASSURANCES AND CLAIMS

Teachers and administrators have found the information in this manual to be appropriate for use with young children in open-classroom settings, individualized-learning centers, and self-contained classrooms. The information is effective in each of these instructional environments and has been effectively used with both self-contained and team-teaching strategies. Although the manual has been used primarily with individualized instructional programs for young children, comments from users indicate its applicability in different situations involving all grade levels.

The manual was utilized by multicultural teachers. The program staff, also multicultural, reviewed the materials for biases and made changes where necessary. Since marketing, the product has been carefully reviewed by school personnel who expressed a desire for their schools to become demonstration centers. The program staff has found the manual usable without training, therefore assuring replicability and transportability.

SYSTEMATIC AND OBJECTIVE ANALYSIS OF INSTRUCTION (SOAI)

Teacher instruction in self-analysis and analysis of the teaching skills of others

The low-cost, mass-diffusible, competency-based instructional system for teachers, supervisors, and administrators provides all materials and procedures for conducting 100 hours of instruction. Organized into 47 instructional sequences or steps, it is conducted as an inservice workshop or preservice course.

The 47 steps vary in length from 15 minutes to 4 hours. The steps are structured sequentially as lecture, seminar, and practicum activities. This arrangement provides for the continuous input and application of knowledge, resulting in a broadening base of reference information for increasingly sophisticated levels of trainee performance. The orientation is toward achieving group unity and increasingly higher levels of group planning and decisionmaking, with diminishing levels of dependence on the trainer. Each lecture through step 17 comprises all trainees involved in the program, meeting in a large-group situation. The remaining seminar sessions can be conducted by individual trainers in regular practicum groups. Each practicum group is composed of up to 10 trainees and a trainer. Each operates independently of the other practicum groups in the workshop. Therefore, it is not to be expected that each of the practicum groups will necessarily engage in the same activities simultaneously or be in the same stages of development.

A doing-looking-learning type of instruction is used. In developing new skills, trainees: (1) Plan daily lessons together, (2) observe teachers using the plans with pupils, (3) learn to record systematically what happens in the classroom, (4) analyze objectively the information for patterns of teaching behavior, and (5) use the information to plan ways of improving instruction. Participants who complete the training, learn skills in interpersonal relations, supervisory techniques, and teaching strategies that can be applied in self-analysis and the analysis of other teachers for the improvement of instruction.

SUBJECT AREA(S)

Subject areas include interpersonal relations, supervisory techniques, and teaching strategies for self-analysis and the analysis of other's teaching.

INTENDED USERS AND BENEFICIARIES

Supervisory personnel, classroom teachers, and indirectly, the students are the intended users of this program.

GOAL(S) OR PURPOSE(S)

Systematic and Objective Analysis of Instruction is designed to enable each trainee to do the following: (1) To demonstrate provisionally different behaviors as a means to internalizing learning, (2) to demonstrate interpersonal communication skills such as paraphrasing, perception checks, behavior descriptions, describing feelings, and freeing responses; (3) to demonstrate increased interdependence in a group by applying the principles of effective group process; (4) to demonstrate skill in establishing interpersonal relationships with others by applying the principles for building trust; (5) to plan instructional objectives with a teacher which include observable pupil behavior, conditions for learning, and criteria of acceptable performance; (6) to observe a teaching performance and record in verbatim transcript most of the verbal and nonverbal behavior; (7) to analyze the transcript from the observation for patterns of teaching and learning behavior; (8) to plan strategy for a conference based on analysis of the transcript; (9) to conduct a conference which enables the teacher to gain insight into teaching and possible alternative behaviors; and (10) to interpret one's own and other's performance critically in relation to the objectives of this program.

PATTERNS OF USE

These materials are sequentially organized to achieve a cumulative attainment of the stated objectives. The training design includes extensive participant interaction for feedback, simulation trials, and interdependent action. For this reason, all participants are required to commit themselves to full attendance at all workshop sessions.

ASSESSMENT PROVISIONS

Educational personnel (teachers, supervisors, and administrators) who volunteer are asked to commit themselves to full workshop and practicum participation. This workshop combines mutual feedback by participants, with self-analysis and analysis of other teachers for the improvement of one's instruction.

TIME REQUIREMENTS

The 47 instructional sequences of this system are organized into a workshop or campus class requiring 100 hours of training.

IMPLEMENTATION PROCEDURES

Since small-group activities are an integral part of the program, the maximum trainer-participant ratio is 1 to 12.

Participation in the program requires a full-time effort from the participants for 4 weeks.

For each group of 12 participants, 2 laboratory school classrooms (15 pupil minimum including teachers) are required during the last 3 weeks of the program.

Ordinary classrooms are the only facilities requirement. For each group of 12 participants, 2 classrooms are required for the laboratory school classes and 1 additional room for seminars.

ASSURANCES AND CLAIMS

Assurances of Harmlessness

During a series of trial workshops, participants were repeatedly asked for feedback concerning the system. There were no reports from participants, trainers, or implementers to indicate that physical, psychological, or sociological harm had been experienced by participants.

Assurances of Social Fairness

Social fairness issues were considered during interim rounds of trial and revision resulting in some early modifications of this system. While the generic "he" is sometimes used when referring to persons of either sex, the system is generally fair and has been positively accepted as such.

Assurances of Replicability and Transportability

This system was designed for use by persons whose roles involve them in providing training for teachers and training of those who supervise teachers. In trial workshop sites, the developers observed that individuals who are familiar with the content of this training, have had trainee experiences in workshops, and have worked as cotrainers in conducting a workshop have successfully conducted the training for others.

Claims of Effectiveness

This instructional system was submitted to field testing during summer 1971. The test population consisted of 116 volunteer educators at 2 workshop sites in Oregon. Data collected indicated the following results:

1. Participants perceived the training as beneficial and appropriate. They rated the system 7.89 on a 9.0 scale.
2. Statistically significant cognitive gain was observed in trainees who responded to a locally produced, 30-item test administered prior to and following the training. Ninety percent of the trainees scored at or about the 75th percentile on the posttest.
3. Use of trainee communications skills, which were focused on in the workshop, increased significantly as observed on audiotapes collected daily during the first week of training and twice weekly until the end of training.

Claims of Careful Product Development

This system was developed over a 4-year period involving repeated rounds of trial and revision with K-12 teachers and administrators. Evaluation included pilot trials, interim formative testing, and summative field testing where developers were not involved.

TEAMS-GAMES-TOURNAMENT (TGT) INSTRUCTIONAL PROCESS CURRICULUM UNITS

An instructional method of using group competition among groups of students having equal ability

Teams-Games-Tournament (TGT) is an instructional method that produces a major reorganization of the classroom. The classroom is reorganized by dividing the students into groups of four or five members of varying abilities. The members of these groups compete individually in an instructional game against members of equal ability from other groups. In the competition, the members score points for their team. Grades are awarded to each group on the basis of the points scored by the entire group.

The TGT instructional method is applicable to grades 3-12, and is appropriate for any curriculum unit in which the objective is to teach basic skills and/or factual information. It is effective for teaching these skills to students of all ability levels.

The teacher may use TGT in one of two ways. First, TGT can be applied by the teacher by using only the teacher's manual. This requires that the teacher follow the manual directions for assigning the students to teams on the basis of their achievement levels, making instructional games, and running the practice session and tournament. During the tournament, the teacher provides individual assistance to students who appear to need it. In the second application, the teacher follows the manual directions but uses worksheets and games developed by the center.

The student in the TGT classroom becomes an active participant in the learning process. In team practice sessions, students cooperate in studying the material that will be presented in the tournament. High-achieving students tutor low-achieving students on their team. Following the practice, each student from the team competes against students from other teams of equal ability in the tournament. Students then take points back to their teams, depending on how well they did in the tournament. Because of the equal-ability aspect of the tournament, low-ability students have the potential to get as many points as high-ability students for their teams.

SUBJECT AREA(S)

TGT can be used in all subject areas that require the learning of information or basic skills. It can be used in: language arts (vocabulary, analogies, capitalization, punctuation, sentence structure, and parts of speech); mathematics (basic math, algebra, geometry, and metric education); science (biological processes, astronomy, and ecology); social studies (identification of other countries, States and their products, and organization of government); and industrial arts (tool identification and work processes).

INTENDED USERS AND BENEFICIARIES

TGT is used by teachers as an instructional process; the process is used with students in grades 3-12. Curriculum unit games are not available from the Center for all possible applications, but are available for language arts (grades 3-4 and 6-9), mathematics (grades 5-7 and 11), science (grades 7-8), and industrial arts (grades 11-12). These unit games are all teacher developed.

Nontarget population users of TGT would include all other teachers who work with students in a classroom setting; for example, teachers of dyslexic children and teachers of the handicapped or behaviorally disruptive children. The Mark Twain School in Rockville, Maryland, which is a school for "behavior problem" children, has reported considerable success using TGT.

GOAL(S) OR PURPOSE(S)

The goals of TGT are: (1) To improve student learning of basic skills, (2) to promote positive student attitudes toward schoolwork and classroom experiences, and (3) to increase the incidence of cooperation (peer tutoring) among students in the classroom.

PATTERNS OF USE

TGT is designed to be used complementarily with traditional teacher methods (lecture and drill), with individualized instruction, or with criterion-referenced (performance-based) learning. TGT is in no way a complex replacement for these techniques, but is a way to supplement them. Units may supplement any language arts, social studies, mathematics, or science course; several units could be combined for a semester or full-year course.

The TGT instructional process is carefully sequenced for best results on academic achievement, but the individual teacher may adapt and change elements to meet specific objectives. Teachers have allowed students to choose their own teams; they have made and used various types of instructional games or used commercial games; and they have changed the structure for allocating points. All these variations have produced positive results similar to those using the structured process.

ASSESSMENT PROVISIONS

No assessment program is provided. It is suggested that teachers use prior test results as the criterion for placing students on teams according to achievement level. Pretest/posttest is used by most teachers to determine the academic effects of using the unit; teacher observation will determine the incidence of peer tutoring and student interaction.

TIME REQUIREMENTS

A TGT curriculum unit is intended to be used in each class period over a 6- to 8-week period. The unit interacts with traditional or other instructional methods taking place during that time.

A short unit based on only a few learning objectives may be used in a 3- to 4-week period.

IMPLEMENTATION PROCEDURES

TGT requires no special equipment, facilities, services, or organizational changes. Implementing TGT does require that the teacher devote time to the preparation and reproduction of materials. Two strategies for counteracting this problem are: (1) The provision of curriculum units by the center, relieving teachers of the game-making process, and (2) the suggestion that teachers get student help in duplicating materials.

Summary Cost Information

The cost of TGT depends upon the extent to which the teachers wish to prepare their own materials. The basic cost is $3 for the manual, from which teachers can then prepare games, worksheets, and scoresheets by using the school duplication facilities.

For adopting TGT at the school or district level, the center provides workshop training on an actual-expense-plus-consultant-fee basis. TGT consultants are available from the Center and various other locations. Generally, workshop training and some experience with TGT qualify district personnel and teachers to run their own workshops.

ASSURANCES AND CLAIMS

Assurances of Harmlessness

In the developmental classroom experiments, participating teachers have reported no evidence of potential harm.

Assurances of Social Fairness

TGT does not perpetuate sexism, racism, or other biases. The TGT manual is written to the teacher, using the "you" designation and thereby avoids the problem of generic pronouns. However, the generic "he" is used in a few places to refer to students collectively. This will be corrected in future published editions.

Assurances of Replicability or Transportability

The TGT process was used successfully by 27 of 32 classroom teachers who implemented TGT using only the teacher's manual with no correspondence or assistance from the Center. These teachers made various adaptations to meet their special needs.

Claims of Effectiveness

1. Increased academic achievement—Nine classroom implementations of TGT have been conducted in mathematics (7th grade), social studies (7th grade and 10th through 12th grades), language arts (3d grade), and reading (3d grade). In all implementations but one (7th-grade social studies), TGT produced significant positive effects on student academic achievement in comparison to a control group. These studies included a total of 1,091 students. The measures of achievement used in the studies included the computations subtest of the Stanford Achievement Test in mathematics; a specific subject-matter subtest derived from the SAT in math; a divergent solutions test devised by the authors; a three-part social studies achievement test of basic skills, devised by the authors; a treatment-specific six-question social studies test; the SCAT-STEP, version II, social studies subtest; a treatment-specific test of language arts skills, devised by the teacher and authors; and the Hoyum-Sanders Elementary English Test.

2. Increased positive student attitudes toward classroom—In the nine implementations of TGT, analyses revealed that, compared to a control group, four of the implementations produced increased positive student attitudes toward class (e.g., interest in class, satisfaction with class); three produced no differences in attitudes for the TGT and control groups; and attitudes were not measured in the other two implementations.

The measures of student attitudes used in the studies were on an attitudes-toward-American-history-scale, devised by the authors; an attitudes-toward-class (Likert-type) measure devised by the authors; satisfaction, apathy, competition, and cohesiveness scales derived from the Learning Environment Inventory (Anderson and Walberg, 1972).

3. Increased peer tutoring and mutual concern—Peer tutoring and mutual concern of students were not measured in three of the nine studies. In the other six, all but one (social studies, 7th grade) showed that TGT had significant positive effects on peer tutoring and mutual concern. The measures used were sociometric items in a questionnaire devised by the authors; student behavior scale; class activities questionnaire; competition, cohesiveness, and mutual concern scales from the LEI; a normative climate measure; and a frequency-of-tutoring measure devised by the authors.

Claims of Social Fairness

The organization of teams in TGT specifies that the teams should be heterogeneous in race and sex. Thus, the teams provide a cooperative environment in which students of different sex and race work together and encourage each other academically. They are also mutually dependent for their classroom grade, as they are graded as a group and not individually.

Claims of Careful Product Development

During the developmental process, various research studies have examined the elements of TGT separately and as a whole. Effects have been reported for the games aspect and the group-reward aspects. Variations of the technique have been examined, such as basing group rewards on the performance of low achievers rather than on the average performance of the whole group. Because all TGT development was carried out through classroom experimentation, the participating teachers contributed greatly to the end result. Following the carefully controlled experiments, the preliminary user's manual was sent to more than 200 teachers and educational personnel with the request that they evaluate the manual itself and make suggestions for improving it, and that they implement TGT, using the manual and make suggestions for improving TGT.

Feedback from these teachers resulted in a revised, more concise manual and specific ideas for improving the TGT instructional process to meet specific needs of the teachers.

MATERIALS AND EQUIPMENT

Required Items	Quantity Needed	Cost per Item in Dollars	Replacement Rate and Cost	Source if Different from Distributor
Teacher's manual	1 per teacher	3.00	Reusable	
Supplemental items:				
Sample kit, including manual sample, games worksheets, scoresheets, table markers, etc.	1 per teacher	25.00	Reusable	
Specific curriculum unit set including manual, games for specific objectives, worksheets, scoresheets, table markers, etc.	1 per teacher	To be announced	Reusable

Baltimore, Md. 21218

David DeVries, Project Director
Keith Edwards, Project Codirector

AVAILABILITY

The following are currently available: TGT teacher's manual; TGT curriculum language arts units (grades 3, 4, 7, and 9); and TGT sample games for mathematics (grades 5, 6, 7, and 11), science (grades 7 and 8), and industrial arts (grades 11 and 12).

The continued development of the following products depends upon securing funds: TGT math curriculum (grades 7 and 8), TGT metric curriculum unit, and further field testing of TGT language arts curriculum units.

The TGT teacher's manual is under developmental copyright, which expires March 15, 1975. Authorization to seek publication of various TGT curriculum units is now being applied for in order to place these materials under developmental copyright and extend the developmental copyright period of the manual.

Future plans for the product depend upon which development and disseminating activities will be funded. The Center will provide manuals, sample kits, and workshop training, and will continue developmental activities as much as possible. A commercial publisher, who will assist in further development, graphics, and packaging of TGT curriculum units, is currently being sought.

The product is available in its present state from:
Center for Social Organization of Schools
Johns Hopkins University
3505 North Charles St.
Baltimore, Md. 21218

RD 200 017

TRAINING MATERIALS FOR THE PERSONAL ASSESSMENT FEEDBACK SYSTEM–PART OF THE COMPREHENSIVE ASSESSMENT SYSTEM (COMPASS) DEVELOPED FOR THE PERSONALIZED TEACHER EDUCATION PROGRAM (PTEP)

Technique-training materials for counseling psychologists in teacher education programs to train others in personal assessment feedback counseling

Training Material for the Personal Assessment Feedback System is designed for an audience of counseling psychologists affiliated with teacher education programs.

The system provides orientation, training, and consultation services to enable the audience: (1) To install and administer the Center's *Comprehensive Personal Assessment System*, a battery of 10 personal assessment instruments accompanied by scoring and interpretation manuals, and computer scoring and report programs; (2) to produce comprehensive and reliable analyses of the assessment data from the battery in a form that is communicable, comprehensive, and constructive to the student; (3) to engage productively in feedback counseling and consultation contacts with students based, in part, on the assessment data and its refinement, updating, and verification through succeeding contacts; (4) to engage in effective communication with other faculty members who instruct or supervise students toward the end of assisting faculty to personalize that part of the program for which they are responsible; and (5) to serve as a second-generation trainer and consultant to other institutions interested in adopting the *Personal Assessment Feedback* (PAF) component.

Training materials for the PAF component include manuals on use of the assessment instruments and how to synthesize their data for feedback, manuals detailing the theory and process of feedback, supplementary case and training materials, and protocol films that model the counselor behaviors discussed in the manuals and in workshop sessions. The training process usually includes a group workshop experience followed by continuing one-to-one contacts focusing on developmental problem solving. Alternately, when advanced students are trained, the workshop may be extended over an academic semester.

SUBJECT AREA(S)

The subject areas include evaluation, teacher training, and counseling.

INTENDED USERS AND BENEFICIARIES

The training materials for the PAF system are intended for use in teacher training institutions. The trainer's guide is used by counseling psychologists to train counselors of student teachers. Manuals for the PAF system are used by these counselors in interpreting the instruments completed by student teachers.

GOAL(S) OR PURPOSE(S)

The goal of the training materials is to prepare resident counseling or clinical psychologists in teacher education programs adopting components of the *Personalized Teacher Education Program* (PTEP), including the *Comprehensive Personal Assessment System* (COMPASS), to train other psychologists or advanced counseling students to install and conduct personal assessment feedback counseling.

One goal of the assessment feedback system is to enable the counselor and, to appropriate degrees, the staff of a teacher education program to know the students as unique persons and to tailor experiences in the program to fit individual needs and talents. An equally important goal is that of facilitating clearer understanding by the students of their own characteristics and interactional style as these are directly relevant to their potentiality for (and satisfaction with) their impact as teachers.

PATTERNS OF USE

The adoption of one or more components of a comprehensive training system like PTEP is a process, not an event. The component must become an element in an ongoing training program that must continue to function during adoption if the materials are not to become a dysfunctional appendage or an active disrupter of the ongoing program.

The training material for the PAF, if effectively used, serves as a catalyst for further changes in the ongoing training program. A second PTEP component may be offered and accepted as a means of bringing another aspect of the ongoing program into conceptual, operational, and goal-directional consistency with the change taking place through use of the earlier adopted component. Thus, PTEP is not adopted as a whole, but rather through the sequential adoption of components, of which this product is one.

These training components for teacher educators are selected to assist them to master the role functions required to "deliver" a PTEP program component as designed and intended.

The "training" of a target audience of teacher educators, crucial in any significant and sustained change in college-based teacher education, requires an approach specifically tailored to it. Therefore, a collaborative relationship is emphasized, rather than a didactic-instructional stance. The training materials were developed, however, specifically to minimize the amount of continuing interaction required between developers and adopters.

ASSESSMENT PROVISIONS

Assessment provisions for the assessment feedback component of the PTEP are an integral part of that component, namely the COMPASS battery. Additional assessment systems are available for monitoring and evaluating program effects (such as assessment and coding of classroom interaction, and supervisor and pupil evaluations of student teachers).

TIME REQUIREMENTS

Assuming adequate prior preparation and experience in general assessment and counseling, counselors in training for assessment feedback in teacher preparation programs have been adequately trained to commence using the COMPASS and recommended feedback and follow-through procedures in a 5-day intensive workshop. Optimally, trainees require approximately 8 hours of reading and study time prior to the workshop and 8 hours for further reading and analytic and report writing practice following the workshop. Additional time for supervision and consultation with the trainer during the trainee's early experience in implementing the system with students is highly desirable.

In situations in which graduate students are being trained to offer feedback, equivalent training with the same materials can be offered (usually in connection with an assessment or practicum course) over an academic semester.

When the system is operationalized, for each student teacher attending a PAF counseling session, the professional time of one counselor will be used for approximately 1 hour for preparation and 1-1/2 hours for feedback. Optimally, the counselor will also be available throughout the semester to consult with students and faculty team members. Two hours of student-teacher time will be spent in completing the assessment instruments, and 1 hour will be spent in each counseling session.

IMPLEMENTATION PROCEDURES

The main requirement for the 5-day training workshop is the clearing of 5 full days of uninterrupted time for trainer and trainees. A retreat setting is highly desirable since work and discussion almost always continue into the evening.

Implementation of the assessment feedback system in an ongoing program requires: (1) Installing and administering the COMPASS system; (2) providing space, time, and regularized procedures for administering the battery to all students included in the pilot phase of implementation and for scheduling and conducting feedback interviews; (3) establishing secure data storage and access facilities and policies; (4) orienting students and faculty to the purposes of the assessment feedback experience; (5) establishing necessary computer programs for test scoring; and (6) involving faculty in program development alternatives which are catalyzed by the introduction of this individualizing/personalizing component.

Personnel Required for Product Adoption and Implementation

Personnel required for the training workshop include one counseling psychologist and the counselors-in-training.

Personnel required for implementing the system after training is completed include the following: (1) Sufficient counselors to fulfill data analysis and feedback requirements imposed by the number of students initially offered the feedback experiences—optimally, additional counselor time for consultation with faculty regarding individual students and program planning is desired; (2) one psychometrist or assistant to administer and manage data collection, storage, and scoring procedures; and (3) students undergoing the assessment feedback experience.

ASSURANCES AND CLAIMS

While the concept and operationalization of PAF counseling has received considerable testing and revision since 1962, the training component for PAF is a more recent product. The training component consists of six manuals on the assessment instruments and their interpretation, a manual on conducting PAF, six 16mm color films on the role of the counselor in a teacher training program and on modeling specific aspects of the counseling process, a 1-hour-long video tape of a complete model PAF session, a trainer's guide, and supplementary training materials.

The complete package has been used for counselor training since fall 1973 in 4 institutions with a total of 55 counselors during 8 workshop sessions. Prior to this, components of the total training package were tested with some 30 counselors at 5 other institutions. Formative evaluation forms were completed by all workshop participants, and the training procedures have been slightly revised based on this feedback. The feedback received, however, was extremely positive and there were relatively few recommendations for change. Subsequent consultative interaction with most workshop graduates who have implemented the program strongly affirms the adequacy of the materials in preparing counselors to engage effectively both in assessment feedback per se and in their emerging role with related teacher education faculty.

Training materials from the package have been used by three institutions for second-generation training activities.

Evidence of the effectiveness of the the PTEP program as a whole, and of the PAF component alone, at both formative and summative levels has been gathered over many years. This evidence is extensive and extremely complex. The full reports of the major studies in this area are listed below and are available at the Center:

1. *The Evaluation of Personalized Teacher Education: Final Report to the National Institute of Education*, by G. D. Borich, et al., University of Texas, Research and Development Center for Teacher Education, Austin, Texas (1974).

2. *Impact of Personalized Teacher Education on Students and Faculty*, by G. G. Brown and S. L. Menaker, University of Texas, Research and Development Center for Teacher Education, Austin, Texas (1970).

3. *Effects of Personalized Feedback During Teacher Preparation of Teacher Personality and Teaching Behavior: Final Report to the U.S. Office of Education*, Report Series No. 1074, ERIC No. ED 038 148, by F. F. Fuller, et al. University of Texas, Research and Development Center for Teacher Education, Austin, Texas (1969).

4. *The Course of Treatment in the Personalized Teacher Education Program*, by R. A. Haak, University of Texas Research and Development Center for Teacher Education, Austin, Texas (1973).

TRAINING MATERIALS FOR THE PERSONALIZED VIDEOTAPE FEEDBACK SYSTEM

Materials to help teacher training staff personalize and increase the impact of the feedback given to students

Training in Personalized Videotape Feedback is designed for an audience of both counseling psychologists and supervisory personnel affiliated with teacher training programs. The system provides orientation, training, and consultation to enable them:

1. To provide resources and opportunities for students to be video taped while teaching in either a laboratory or public school setting, preferably several times during training;
2. To engage in effective, arousing feedback interaction with the student based on the video taped behavior sample;
3. To engage in effective follow-through instruction or consultation based on learning needs of the students as identified or clarified during PVTF interaction;
4. To serve as training and consultation resources for other institutions interested in adopting PVTF.

Training materials for the PVTF component include manuals on the feedback process with particular emphasis on the implications of research into the effects and mechanisms of self-confronatation counseling, films of video tape feedback sessions, and manuals on how to make nonintrusive video tapes in classrooms. The training process usually involves a group workshop followed by one-to-one consultation dealing with specific issues of installation and procedure at individual institutions.

SUBJECT AREA(S)

The subject area is teacher training.

INTENDED USERS AND BENEFICIARIES

The PVTF system is designed to be used by both counseling psychologists and supervisory personnel associated with teacher training programs. The chief beneficiaries are student teachers and their pupils.

GOAL(S) OR PURPOSE(S)

The goal of the training materials is to prepare psychologists and curriculum, methods, and field experience supervisors to personalize and increase the impact of their feedback to teachers-in-training. Most individuals in the target audience are provided some form of supervisory feedback prior to training. The training is most appropriate to, and desired by, teacher educators concerned with personal and professional development of the teacher in addition to specific skill training. The training is directed toward video tape feedback but can be generalized to feedback practices in laboratory situations and real classrooms which are audiotaped or observed by the supervisor offering feedback.

The goal of the PVTF system after implementation is the nonthreatening and effective use of video tape feedback to make the preservice teachers more aware of their own teaching styles and techniques of interaction with students. A firm research base and techniques from both counseling and teacher education are integrated to achieve this end.

PATTERNS OF USE

The materials have been tested only by Center staff conducting workshops with faculty groups from several teacher training institutions. The pattern of use may not be identical with that adopted in institutions using the training system. The trainer's guide is oriented toward a 1-day intensive workshop. An array of reading materials is provided for preworkshop preparation and postworkshop self-study. If training is followed by implementation of the system with teachers, consultation with colleagues similarly engaged in video feedback is encouraged and almost always occurs. With resident trainers, the 1-day workshop format is easily adaptable to shorter periods of contact over a longer time frame.

ASSESSMENT PROVISIONS

The training materials have been pilot tested at a national conference (ASCD) workshop and with several groups of teacher educators from collaborating institutions. Feedback on the training experience has been systematically solicited to guide development and refinement, but no formal assessment procedures have been developed.

TIME REQUIREMENTS

A 1-day intensive workshop has been the primary training vehicle employed to date. Approximately 8 hours of reading time before and following the workshop is recommended for participants.

When PVTF is implemented in an institution, the time of one or two faculty members (two if a counselor and curriculum supervisor work together) will be used for 1 to 1-1/2 hours with each student receiving feedback each time PVTF is given. Approximately 1 hour of student time and video taping time is required to make the tape.

IMPLEMENTATION PROCEDURES

The training materials are complete and self-contained for the workshop and recommended reading. One full day is required for trainer and trainees in a workshop setting.

The implementation of PVTF in an ongoing training program requires:

1. Minimally obtrusive video taping capability in (preferably) naturalistic settings in which teachers or teachers-in-training are teaching;
2. Development of adequate orientation procedures to place the PVTF experience in meaningful context with other ongoing facets of the student's (or teacher's) training experience and to inform the user of arrangements for video taping and feedback conferences;
3. Video tape playback equipment in a private office or conference room for the conduct of the feedback.

When the system is implemented, video taping and playback equipment is required. Faculty and student time for feedback conferences must be scheduled.

ASSURANCES AND CLAIMS

All parts of the training materials have been pilot tested and revised on the basis of trainee reaction and observed impact. Because of the phaseout of the institutional network shortly after the materials were completed, no field tests or formal evaluation studies have been possible. One collaborating institution has used the materials for "second generation" training purposes. Informal reports of the impact of training have been positive with respect to degree of impact on subsequent practice.

The effects of PVTF as a single component of the PTEP and as it contributes to the total system and its impact have been studied extensively. Research and evaluation evidence of the effects of the PTEP, in comparison with conventional programs, is summarized in the accompanying product description, *Training Materials for the Assessment Feedback System*.

MATERIALS AND EQUIPMENT

Required Items	Quantity Needed	Cost per Item in Dollars	Replacement Rate and Cost	Source if Different from Distributor
Trainer's manual for personalizing video tape feedback	1 for trainer	3.00	Reusable	
Counseling teachers using video feedback of their teaching behavior (and supplement)	1 for each trainee; 1 for trainer	3.00	Reusable	
7 other articles, guides, and literature reviews on video tape feedback (see "Subject areas")	1 or more copies of each to be available to trainer and trainees	7.50	Reusable	

Note: When the system is implemented, video taping and playback equipment is required. Faculty and student time for feedback conferences must be scheduled.

ASSESSING AND INFLUENCING BEHAVIOR: A SELF-INSTRUCTIONAL TEACHER TRAINING PROGRAM

A self-instructional program to train teachers to measure and change student behavior

This is a self-instructional program designed to train teachers to measure and record individual student behavior, enabling the trainees to then assess their own instructional techniques. Trainees are also taught to specify and communicate precise behavioral goals, and to systematically influence and change student behavior through the use of positive consequences. The program is designed for inservice teachers (preschool through high school) and other persons in the field of education who have access to an ongoing classroom.

Contained within a single workbook, the program consists of four units, each of which has certain behavioral objectives. In each unit, textual material is followed by exercises which give practice in the competencies outlined by the objectives. Applied classroom exercises are included which are designed to enhance trainees' insight into the principles taught by the program. Immediate feedback is provided for most exercises. It is recommended that the program be implemented by a coordinator. This can be a teacher who has had previous experience with the program. A coordinator's manual and a list of suggested readings are included.

SUBJECT AREA(S)

The program trains teachers to measure and change student behavior. It consists of four self-instructional units whose titles and page lengths are as follow:

I. Influencing Behavior (19 pages)
II. Measuring Behavior (126 pages)
III. Specifying Behavioral Goals (22 pages)
IV. Techniques for Influencing Behavior (81 pages)

INTENDED USERS AND BENEFICIARIES

Any inservice teacher (preschool through high school) or educator who works with teachers (e.g., administrators, school psychologists or social workers, and student teachers) and who has access to an ongoing classroom, could be a user of the program. Classroom students will be the chief beneficiaries of the program since participating educators will be better able to assess individual student performance and to develop in students positive academic and social behaviors.

GOAL(S) OR PURPOSE(S)

The trainee successfully completing the program will be able: (1) To operationally define behavior; (2) to measure, record, and graph behavior; (3) to specify and communicate clear behavioral goals; (4) to assess individual student performance; (5) to assess teaching strategies; (6) to use teaching strategies employing positive consequences for the purpose of developing and maintaining desired student behaviors; and (7) to decrease undesirable student behaviors and substitute appropriate student behaviors.

PATTERNS OF USE

The program should be used by educators who have access to an ongoing classroom, so that they can take advantage of the applied exercises. The program could be offered as part of a college or university course for inservice educators or it could be used by a group of teachers within a school. Trainees should proceed in order through units I-IV, since activities in later units build upon previously learned skills.

ASSESSMENT PROVISIONS

The program text incorporates periodic self-monitored exercises which provide immediate feedback to the learner. In addition, self-assessment questionnaires are included, which trainees are encouraged to discuss with the coordinator and other trainees.

TIME REQUIREMENTS

Because the program is individualized, time requirements will vary. A pilot study of the materials suggests that the range for completion be 10 to 15 weeks.

IMPLEMENTATION PROCEDURES

The program, presented in workbook form, provides all the necessary materials for trainee self-teaching. While trainees can proceed at their own pace, it is suggested that once per week they meet with the coordinator for the purpose of discussing issues and problems and sharing information related to applied exercises.

Personnel Required for Product Adoption and Implementation

It is recommended that a coordinator be available for weekly consultation by users of the program. This should be a person who has familiarity with behavioral assessment and influence procedures either through previous use of the program or other relevant experience, such as workshops or study related to the principles of learning.

ASSURANCES AND CLAIMS

Careful scrutiny by the developers indicates that the program does not appear to contain any form of social or sexual bias and that the materials should be usable by all ethnic groups. In a pilot study conducted with an economically and racially mixed population, the training materials have elicited no critical comments with regard to bias; and there is no evidence of any harmful effects of the training materials, either to the trainees or to their students. Assurances of transportability are not possible at this time. The program has been used with 16 students in a course in human learning under the supervision of the developer.

DESIGN AND DEVELOPMENT OF CURRICULAR MATERIALS

A course to teach methods and techniques for designing and implementing individualized curriculum materials

This is a self-instructional course in individualized curriculum design. It is intended to teach the methods and techniques of designing and implementing individualized curriculums for individuals who will hold major positions in curriculum development in a variety of professional settings. This curriculum design course is based on the Process Individualization Curriculum (PIC) model developed at the Learning Research and Development Center.

The PIC model for curriculum design incorporates content, concept, and component analysis procedures, with emphasis on: Instructional theory, learning-to-learn skills, criterion-referenced testing, and research-based instructional strategies. There are 12 units, each of which begins with a rationale which explains the relationship of the unit to the complete course. Included are a charter hierarchy of behavioral objectives, study guides, reference sources, and posttests to evaluate mastery of the terminal objectives of each unit. An instructor's manual is also included which provides suggestions for using the self-instructional units, either in a classroom situation or in an independent study situation with infrequent oncampus interaction sessions.

SUBJECT AREA(S)

Twelve self-instructional units comprise the comprehensive course in creating adaptive individualized instruction. The titles and page lengths of the units are as follows:

Background To Instructional Design

Introduction (4 pages)
I. Goals of Education (34 pages)
II. Psychological Bases of Instruction (55 pages)

Theoretical Rationale for Instructional Design

III. The Subject Matter (106 pages)
IV. The Skills (58 pages)
V. The Instruction (130 pages)
VI. Evaluation (112 pages)
VII. School Administration and Inservice Training (38 pages)

Applied Instructional Design

VIII. Design Procedures (71 pages)
IX. The Objectives (52 pages)
X. Criterion-Referenced Test Construction (71 pages)
XI. Lesson Writing (53 pages)
XII. Management System Design (87 pages)
Glossary (4 pages)
Instructor's Manual (62 pages)

INTENDED USERS AND BENEFICIARIES

The range of potential users is extremely broad. Those who completed the course and reported that it met their needs include: Teachers, school administrators, industrial training supervisors, community college professors, university instructors, nursing school instructors, directors, librarians, reading specialists, school psychologists, teachers of the blind, teachers of retarded children, and a director of an alternate school for dropouts. Thus, it is intended for anyone who teaches or supervises, or works with teachers, especially curriculum specialists and members of curriculum teams.

Other potential users are: Research and development centers for staff training, inservice teacher training institutes, university extramural postbaccalaureate programs, and graduate education programs of curriculum specialists.

The ultimate beneficiaries are the students who will benefit from teachers' increased abilities to individualize curriculum materials, as well as the students who use the actual curriculum materials, developed by the course trainees.

GOAL(S) OR PURPOSE(S)

The student successfully completing this training product will be able: (1) To select instructional goals; (2) to specify appropriate instructional methods, media strategies, and classroom environment; (3) to write tests based on a given curriculum hierarachy; and (4) to write individualized instructional materials.

PATTERNS OF USE

This self-study course may be given either oncampus or offcampus. The introduction describes each component of the course: Rationale, hierarchy, study guides with tasks and sources for the tasks, overview, articles, bibliography, posttest, and answer keys for study guides and posttests. Students receive a substantial amount of feedback from instructors on their curriculum products—whether the instructor meets with the students to evaluate their work or whether the work is sent to the teacher to be evaluated.

Units may be mastered in any order, depending on the background of the student. Students taking this course would begin with unit I and proceed through unit XII. However, there are 2 reasons for choosing to study fewer than 12 units: (1) Prior mastery of the objectives of any given unit; and (2) the specific needs of the student, such as the desire to learn more about testing and evaluation, administrative theory, inservice teacher training, and management system design. Thus, it would be appropriate to study units VI, VII, X, and XII.

ASSESSMENT PROVISIONS

A pretest is provided to determine a student's degree of knowledge prior to taking the course. Posttests are contained at the end of each unit, enabling students to determine whether they have mastered the concepts and skills and achieved the required terminal behavior of the unit. The students must satisfy both the concept and skill objectives and the terminal behavioral objective demonstrated by their response. Both pretests and posttests for the course are coded so that they can be divided into trimester blocks. The unit posttests may be self-monitored. The tests were found to be very helpful in pointing out to students their area of greatest weakness and strength and in making it possible for them to concentrate their efforts where most needed.

TIME REQUIREMENTS

Since this training product is individualized, time completion will vary. Students at the University of Pittsburgh who study all the units usually complete the course during three trimesters.

IMPLEMENTATION PROCEDURES

Although this product is primarily self-instructional, trainees need to receive detailed, positive, explanatory feedback from instructors who have extensive knowledge and experience in the design and development of curricular materials. To take advantage of the individualized nature of the product, instructors may need to change from group lecture to individual tutorial sessions.

Personnel Required for Product Adoption and Implementation

One instructor who has extensive knowledge and experience in the design and development of curricular materials can handle many students for the first four units since there is only one pretest for evaluation. For part 2 (units 5-8), instructor feedback is required on three posttests. Even greater instructor time is needed for evaluation and feedback for part 3 (units 9-12), which requires the development of a curriculum. In field testing, 70 students scattered throughout the 3 portions of the course were handled easily by 1 instructor on a 20-percent workload basis. Pretests and posttests are objective and can be handled by monitors or graduate assistants.

ASSURANCES AND CLAIMS

Assurances

This product (including earlier versions) has been used with approximately 250 trainees under the guidance of 2 instructors. Some of these courses have been conducted without active participation by the product developer. Thus it is clear that the course is transportable. However, an analysis of product use by two different instructors indicated the need for the instructor to give extensive positive explanatory feedback to the trainee. The instructor's manual now emphasizes this need. When the product was used without appropriate feedback, there was a high student dropout rate. This may have been detrimental by discouraging students from further study on curriculum materials, design, and development. However, the producer has no evidence that the students who did not receive this appropriate feedback changed their interests after their course experience or that any other students suffered any harmful effects.

The materials do not appear to display any form of social bias, including ethnic or sexual stereotyping (except for occasional use of the generic "he"). This assurance is based on an examination of the materials themselves and on the adaptive ways in which they may be used in order to accommodate to the special needs, interests, or goals of ethnic minorities, as well as the requirements of indivudual students.

Claims

A product-oriented curriculum in which mastery is measured by ability to produce comprehensive instructional systems can only be evaluated by the quality of the products produced and the growth of the students from neophytes in curriculum design to designers and developers of effective curriculum components.

There were major gains in posttest scores of the field test students on the criterion-referenced measures. During the unit field test, assessments of attitudes of students who received the appropriate instructor feedback generally resulted in "average" to "very good" ratings on items such as "subject matter relevancy to your own interests," "instructional value of tests and exercises," and "clarity of objectives." Many of the trainees were so enthusiastic about the course that they continued on to advanced academic work in curriculum design and recommended the course to others. The quality of the products produced by the trainees is impressive. Many of these trainee products have been adopted by school districts and other organizations and are already in active use. They, too, have positive impact on students. The credibility of this evidence, based on adequate instrumentation and appropriate indicators, appears solid; however, since the evaluations were performed and analyzed by the producer, the results may not be highly objective.

INDIVIDUALLY GUIDED MOTIVATION (IGM) (PART OF THE INDIVIDUALLY GUIDED MOTIVATION SYSTEM)

A system to enable teachers to relate instruction
to specific curriculum areas and attain
motivational objectives

Individually Guided Motivation (IGM) is a motivational-instructional system intended to provide teachers with knowledge and skills with which to help their students become more responsible and self-directed in learning and conduct. Multimedia instructional materials and an inservice program are designed to train practicing and potential teachers to apply key motivational principles within the context of specific motivational-instructional procedures. IGM thus serves as the focused effort of a school to deal with motivation; it enables teachers to relate, in systematic fashion, instruction in specific curriculum areas and attainment of motivational objectives.

Four independent motivational-instructional procedures have been developed. Each of the procedures incorporates, as appropriate, key motivational principles and related teacher behaviors: Focusing student attention on desired objectives, providing models to observe and imitate, helping set educational goals, providing feedback reinforcing desired behaviors, and reasoning about prosocial behavior and values.

One or more of the following four procedures may be used flexibly in each child's motivational program: (1) Adult-child conferences to encourage independent reading are conducted by a teacher or an adult aide as part of the instructional program in reading; (2) teacher-child conferences for goal setting enable children to set and attain realistic goals in specific curriculum areas such as mathematics or science; (3) guiding older children in tutoring younger children is designed to help the tutored child to achieve specific instructional objectives or to work on independent projects—tutors may also be high school or college students or noncertified adults; (4) small-group conferences to encourage self-directed prosocial behavior are conducted by the teacher as part of the regular curriculum, such as social studies or language arts, and are intended to increase self-direction and promote those behaviors that contribute to self-realization and good citizenship.

The IGM system and the four procedures composing it are described in a single six-chapter text. The text presents an overview of IGM and explains the motivational principles and related behaviors underlying the system, describes in detail each of the four procedures, and provides a background for the IGM system by surveying relevant motivational theories and research. Five films correspond to the first five chapters of the text: An overview film describes the entire IGM system and the four procedures; each of the remaining films describes and demonstrates in actual school use one of the four IGM procedures. Four additional books are designed for specialized use by teachers, aides, tutors, and those participating in college-level and inservice education.

SUBJECT AREA(S)

The IGM system can be incorporated into a variety of curriculum areas; e.g., reading, social studies, language arts, math, and science, depending on which IGM procedure is being implemented and on the needs of the student.

INTENDED USERS AND BENEFICIARIES

IGM was developed according to the Individually Guided Education (IGE) model of instructional programing for the individual student, but it can be implemented in either IGE or non-IGE schools.

Sets of multimedia instructional materials have been designed and developed to help beginning and experienced elementary and middle school teachers to understand and to use motivational principles, skills, and procedures so that they will be able to initiate and maintain a workable motivational program, systematically and within regular school curriculum areas. Prospective teachers are also a target group for training in IGM procedures; a manual has been developed to aid the college instructor in teaching effective use of IGM materials. Additional materials have been developed for student tutors, aides, and noncertified adults who do not ordinarily receive complete IGM inservice education. Ultimately, of course, the beneficiaries are the students who can develop self-direction in learning and conduct.

GOAL(S) OR PURPOSE(S)

Teachers typically must cope with motivational problems by either a variety of piecemeal techniques, often sporadically applied, or recourse to specialized personnel. IGM's primary objective is to provide teachers with a systematic, flexible program within which student initiative and responsibility for learning and conduct can be developed and maintained. An additional goal of the program is to provide teachers with a knowledge of motivational principles and skills which is not restricted solely to use in specific IGM procedures, but which can be applied more generally in many school situations.

PATTERNS OF USE

The IGM system calls for school-wide cooperative effort to identify general motivational objectives for all children in a particular school. Objectives are then identified for smaller groups of children, and each student's motivational level is assessed with regard to the objectives. Next, a motivational program, using one or more of the four procedures and based on each child's present level of motivation, achievement, and self-direction, is planned and carried out for each student. The procedures may be used in any pattern or combination, as the children's needs demand and school resources permit. The motivational program is intended to be incorporated into each child's regular instructional program.

ASSESSMENT PROVISIONS

Formalized assessment procedures, including checklists, observations, and interviews, have been developed and incorporated into the four motivational-instructional procedures composing the IGM system. In general, children are preassessed, using either formalized methods or more informal ones, to determine whether they could benefit from a specific procedure. Guidelines and materials for continued assessment are also provided to aid in monitoring each child's motivational progress.

TIME REQUIREMENTS

Time required to implement the full IGM system in a school, including all four procedures, is about 6 months to 1 year. If only one or two procedures are implemented, this time will be shortened.

As recommended by the developers, each procedure is scheduled into regular curriculum areas as follows: (1) Adult-child reading conferences are held weekly for 10-15 minutes, (2) goal-setting conferences are held weekly for about 10 minutes on an individual or small-group basis, (3) tutoring sessions are 10-20 minutes long and may be held weekly or more often, and (4) small-group conferences to encourage self-directed prosocial behavior are 20-30 minutes long and held weekly. These time recommendations are flexible and may be adapted to meet the needs of the children and the school. The length of time required to meet IGM objectives for the student necessarily varies with the individual child, the target behavior, and the particular instructional-motivational procedures being used.

IMPLEMENTATION PROCEDURES

A designated IGM coordinator who has attended a 2-day workshop sponsored by the developers conducts a 2-day inservice program for leaders from individual elementary or middle schools from one or more school districts. These leaders, in turn, conduct an inservice session for the staff of each building. Inservice education for the staff of a building uses the IGM text *Individually Guided Motivation*, other print materials, and the five IGM films which may be purchased or rented (materials may be shared by several school buildings). Teachers receiving inservice study the text and view and discuss the films. Exercises and activities to familiarize teachers with motivational behaviors and skills relevant to each procedure are presented in the IGM text. After becoming familiar with the IGM system and the four procedures, the staff decides which procedures to implement and when.

Decision to implement IGM requires cooperation and initiative on the part of school staff. Thus, certain organizational and scheduling changes will probably be necessary to incorporate the procedures into the instructional program of a school. Certain of the procedures are typically implemented using aides, noncertified adults, or parent volunteers. This supplementary staff must be recruited and trained in motivational principles and related behaviors using IGM guidelines and materials available for the purpose (e.g., *Tutoring Can Be Fun*, *A Guide for Adult-Child Reading Conferences*).

Once in operation, maintenance costs for the IGM system are minimal. If continuous formal assessment of student progress is desired, checklists and other evaluation guides to aid in recordkeeping are printed in the IGM text and can be duplicated within the school at low cost. In general, materials associated with IGM implementation are few in number and they are reusable, durable, and easily maintained.

MATERIALS AND EQUIPMENT

The developers recommend these materials and quantities for each school building implementing IGM.

IGM is relatively inexpensive to implement when costs are considered on a per-pupil basis. Using the current prices of the materials and assuming a building of 400 students, the cost per pupil for any component or for the total system would be as follows: Procedure 1—$1.04 procedure 2—$1.04; procedure 3—$1.17; procedure 4—$1.11; total IGM system—1.09.

The above costs are based on the prices of materials and an estimated average cost for training an IGM coordinator; they are therefore nonrecurring costs. Furthermore, the center recommends that each set of films be made available to five school buildings. Thus, in terms of both the expenses for training a coordinator and the purchase of the films, the costs can be spread over a greater number of students and substantially reduce the cost per pupil. Another means for reducing the cost is for the schools to rent the films for the center.

Personnel Required for Product Adoption and Implementation

A designated building leader (e.g., the principal, a unit leader, or a school guidance counselor) selected by the individual school is responsible for providing inservice education to the building staff. Certain of the IGM procedures typically use nonteachers (e.g., noncertified adults, parent volunteers) and this supplementary staff, if used, requires training in using the procedure. IGM print and film materials are used to aid in training such additional personnel. In general, IGM is relatively self-sufficient and needs little, if any, continuing support to be used properly.

ASSURANCES AND CLAIMS

Assurances

IGM is transportable. Evidence is available indicating that after a 2-day inservice education, school personnel can learn the motivational principles and procedures underlying IGM. Moreover, at this time they can prepare implementation plans for local school use. The program may thereafter be implemented by a school staff with little or no additional aid from the program's developers.

The developers and publishers of this program have received no reports of harm associated with use of IGM. Indeed, teachers and students have expressed favorable reactions and positive attitudes toward IGM. The developers are confident that the materials contain no social bias, ethnic or sexual stereotyping, or other socially objectionable references.

Claims

The IGM system has been carefully developed and tested. The four motivational-instructional procedures were identified and developed in cooperation with staffs of various school systems. Controlled experiments in schools were carried out to determine the conditions under which each procedure is optimally effective. Findings were used in the development of prototypical IGM materials related to each procedure. Field tests of each procedure were subsequently conducted in a number of school systems to determine effectiveness of materials both for adults implementing the program and students participating in a procedure. Field test evaluations contributed to further developments and refinements of the IGM materials.

School personnel can learn to use IGM materials effectively. Following inservice education they: Understand the motivational principles, procedures, and implementation requirements; can apply the motivational principles with children in a school setting; and can complete the required implementation tasks, such as conducting a local inservice, gathering baseline information on students, selecting students to participate in a procedure, and keeping records to monitor motivational progress.

Based on a field test with six schools, the success of independent reading conferences has been demonstrated. Independent reading conferences enable children to read more books, to develop more positive attitudes toward reading, to show higher reading achievement scores, and to continue to read more books independently after conferences have been discontinued. Younger children and poor readers benefit particularly. The procedure is effective with children from a variety of socioeconomic backgrounds, regardless of whether conferences are conducted by teachers, aides, or parent volunteers.

Evidence accrued during field testing in three schools shows that children benefit from goal-setting conferences. Following this procedure, children increase in skills mastery in a variety of curriculum areas and maintain improved rates of skill mastery after goal-setting conferences are discontinued. Positive attitudinal changes toward school have been reported by parents.

Positive results associated with participation in small-group conferences to promote self-directed prosocial behaviors have been demonstrated in field testing in eight schools. Following this procedure, children increase in frequency of specific prosocial behaviors, maintain this increase after conferences stop, and exhibit a target prosocial behavior with a frequency rate similar to that shown by the rest of the class.

Based on a field test with two schools, tutoring has a beneficial effect on the tutee. As a result of the tutoring procedure, tutees are able to increase in achievement on specific tutored skills and to maintain positive attitudes toward tutoring sessions. Both tutees and tutors express enjoyment of tutoring sessions.

MATERIALS AND EQUIPMENT

Required Items	Quantity Needed	Cost per Item in Dollars	Replacement Rate and Cost	Source if Different from Distributor
Text, *Individually Guided Motivation*	1 per teacher	2.00	Reusable	
Tutoring Can Be Fun	1 per tutor	1.75	Reusable	
A Guide for Adult-Child Reading Conferences	1 per conference leader	1.00	Reusable	
Inservice Implementation Manual for IGM	1 per building leader	1.00	Reusable	
Films: "Individually Guided Motivation: An Overview" "Encouraging Independent Reading" "Setting Individual Goals for Learning" "Guiding Children as Tutors" "Guiding Children Toward Self-Directed Behavior"	1 set per 5 schools	85.00 per film or 350.00 per set (films may also be rented for 3.00 per day plus 5.00 for handling)	Reusable

PREPARING AND USING SELF-TEACHING UNITS FOR FOREIGN LANGUAGES

Self-teaching units to guide the teacher's choice in learning medium and evaluation procedures for teaching foreign languages

Each unit of *Preparing and Using Self-Teaching Units for Foreign Languages* is designed to teach a specific concept or skill. A unit consists of a stated performance or behavioral objective, activities to enable the student to achieve the objective, and a test to determine whether the student has succeeded. This booklet begins with a description of the performance objective, and several sample objectives are presented. Section 2 contains suggestions on the selection and presentation of learning activities. In section 3, suggestions are made concerning ways in which self-teaching units can be used. Section 4 is devoted to the construction of a self-teaching unit. A self-instructional German lesson is presented as a sample, and the booklet concludes with recommendations concerning the teacher's choice of learning medium and effective evaluation procedures.

SUBJECT AREA(S)

The subject area is foreign language curriculum development at the classroom level.

INTENDED USERS AND BENEFICIARIES

Although intended primarily for the foreign language classroom teacher, this publication will also be of use to foreign language curriculum specialists, supervisors, and trainers of teachers.

THE USE OF LEARNING PRINCIPLES IN INSTRUCTION

Textbook on the design of lessons and curriculum for graduate students and curriculum designers

Use of Learning Principles in Instruction is a 34-unit textbook suitable for use as a self-study text or as the basis for a one-semester Keller-style course in lesson design for graduate students, advanced undergraduates, and curriculum writers and designers. The text aims at establishing in students: (1) A working knowledge of behavioral principles and their contribution to the development of good educational materials, (2) the ability to discriminate good from not-so-good curriculum materials over a very broad range of learning tasks, and (3) the ability to produce good curriculum materials in their own subject area.

The course is based on three assumptions about the nature of the technology of teaching. First, modern curriculum development is an applied science. A developer then must understand the fundamentals of the science in order to be able to apply it effectively across a wide range of learning tasks. One section of the text is devoted to basic learning principles as exemplified in the analysis of operant behavior.

Second, specific "models" of instruction are too limiting because they are merely particular codifications of underlying principles applied in a special domain. This text concentrates on the process of educational design and avoids a cookbook approach.

Third, experience with a variety of materials in a variety of contexts is necessary for one to abstract the useful principles. Students examine such diverse materials as *Sesame Street*, *Wishes, Lies and Dreams* (a procedure to get children generating poetry), Itard's procedure in training the wild child of Aveyron, as well as several conventional learning programs.

In most units students read some source materials (articles or samples of lessons) and then answer questions on them. They compare their answers to an answer key, then see their instructor for a brief interview before going on to a new unit. (A student using the text for self-study eliminates the interview process.) Other units require the production of curriculum material. Students are given guidelines in evaluating their own productions, and are encouraged to submit them to their peers as well as their instructor for evaluation.

The instructor is provided with a suggested interview question for each unit and guidelines for evaluating student replies. The teacher's manual also provides two section tests and a posttest.

SUBJECT AREA(S)

The subject matter of this course is the design of lessons and curriculum.

The first five units of the text provide a general overview and include some of the original writings on programed instruction, Individually Prescribed Instruction (IPI), Keller's Personalized System of Instruction, and contingency management. This overview provides both the critical principles that will be reflected in all good curriculum materials (e.g., active responses, immediate reinforcement, gradual progression in complexity of student response to promote errorless learning), and a rationale for looking at fundamental learning principles.

The second major section (six units) teaches the fundamental principles of the experimental analysis of behavior. For these units, students select a supplemental text (see "Materials and Equipment" section). In addition, each unit's source material contains an example of an educational application of these principles.

The third major section (six units) teaches the application of the fundamental principles of behavior to curriculum design. These units cover behavioral objectives, task analysis, learning hierarchies, and task taxonomies. Following this section, students begin to design a lesson in their selected subject matter.

In the final and longest section (17 units) students learn methods of evaluating lessons and practice evaluating a wide range of lesson materials. They also continue work on production of their own lessons. Students are encouraged to submit their lessons periodically to peer and instructor editing and evaluation.

INTENDED USERS AND BENEFICIARIES

The range of potential users is broad. Among these who have used this text in try-out versions and found it helpful were persons currently employed in jobs with some form of curriculum development responsibility (e.g., at Pittsburgh's Learning Research and Development Center, Philadelphia's

Research for Better Schools, and the Pennsylvania State Board of Education); high school and elementary school teachers; school administrators; graduate students in education; and undergraduates in speech correction.

The ultimate beneficiaries are the future students who will be using more effective educational materials designed or selected by a user of this text.

GOAL(S) OR PURPOSE(S)

The goal of this course is to enable students: (1) To recognize the operation of principles from the experimental analysis of behavior in curriculum materials, (2) to state learning tasks in behavioral terms, (3) to design effective curriculum materials which achieve the stated learning task, and (4) to evaluate learning materials in terms of their teaching effectiveness.

PATTERNS OF USE

The text may be used for self-study or as the basis for a Keller-style course. The chief characteristic of a Keller-style course is the demand for mastery of each unit of coursework before the student progresses to the next unit (F.S. Keller, *Journal of Applied Behavior Analysis*, 1968). When using the text for individual study, students are expected to test themselves on each unit and use the suggested answers as the basis for scoring their own work. When the text is used as the basis of a Keller-style course, students are expected to answer unit questions and then see the instructor for a "mastery interview" before going on to the next unit. The first 17 units are sequential; the order of the later units may be varied.

ASSESSMENT PROVISIONS

The teacher's manual contains two section tests (for the first and second sections of the text) and a posttest for use at the end of the course. It also contains suggested interview questions for each unit to assure correct use of the text by students. Curriculum produced by students as part of the course is evaluted by the instructor and other students. Students using the text for self-study use the answer key for assessment of progress.

TIME REQUIREMENTS

The course is usually completed in one semester, but completion time varies among individuals and depends on the size of each student's selected project. The text has been used as the basis for a 6-week intensive course, but such time constraints are not recommended except for very advanced students.

IMPLEMENTATION PROCEDURES

The text is complete enough to be used for self-study by advanced students. Instructors should have a background in the science of behavioral analysis, derived from use of the text or from other sources, and experience with curriculum materials. People currently employed on curriculum development projects could also use the text for group or individual study without a designated instructor.

ASSURANCES AND CLAIMS

Assurances

In development, approximately 100 students have used the text in 3 formal, Keller-style courses. One of these was conducted at Emerson College in Boston without developer participation. This hands-off field test was less successful than we had hoped because a short time period (6 weeks) and high enrollment (50 undergraduates) made it impossible for instructors to monitor each student's unit-by-unit progress. As a result of this field test, the teacher's manual and the introduction of the text now stress the importance of adequate monitoring and sufficient time to allow students to progress at their own rate. We believe these changes are sufficient to make the course transportable.

In a questionnaire administered to students in one of the courses in which this text was used, no students reported harmful effects. Our staff has examined the material carefully and has failed to find racial or sexual bias, excluding occasional use of the generic "he" in various source materials.

Claims

Use of Learning Principles in Instruction is an effective instructional program. The materials produce a considerable competence in graduate level students for critical judgment and production of curriculum materials which reflect the best of laboratory learning principles.

The program has been through three cycles of test and revision, each of which has included evaluation of the program's effectiveness. The first tryout was with a group of 10 special students, all of whom took the course in a special 6-week institute in summer and fall 1971. All these students already were employed in jobs with some form of curriculum development responsibility. The program was revised following this tryout.

After revision, the course was offered for graduate credit in the Educational Psychology Department of the University of Pittsburgh in summer 1973. Sixteen students participated, including elementary and high school teachers, school administrators, and curriculum writers. There were four sources of evaluation data: The students' responses for each unit, pretest and posttest results, a questionnaire, and the curriculum material produced by the students.

The final test was a hands-off field test at Emerson College in Boston. Two faculty members had the requisite background and were interested in using the course. Forty-six undergraduates enrolled. Because enrollment was much larger than expected, instructors dropped portions of the course and did not regularly monitor student answers.

An identical form pretest-posttest was used to measure student's ability to articulate behavior principles, to discriminate curriculum materials, and to produce samples of curriculum. For the first two tryouts using graduate students and practicing curriculum developers, overall pretest scores were 53 percent and 34 percent, while posttest scores were 83 percent and 61 percent. The median undergraduate pretest score was only 6 percent, and posttest median was 52 percent. Although the gain is sizable, the results were rather disappointing. Proper use of the material should produce better performance. The text now strongly suggests that undergraduates have adequate monitoring.

ACCREDITATION PROBLEMS AND THE PROMISE OF PBTE

A paper on the relationship between the accreditation of teacher education institutions and performance-based teacher education

This paper examines the relationship between the accreditation of teacher education institutions and performance-based teacher education. After a brief historical review, the author discusses four basic accreditation problems: (1) The need to allow for institutional differences, (2) the need to base decisions on substance rather than form, (3) the need to determine the actual qualifications of the graduate, and (4) the need to determine the focus or function of accreditation. Institutional statements of objectives for teacher education are frequently vague and provide little guidance for the accrediting team. The objectives of one institution are examined in detail to illustrate these problems. Performance-based teacher education, which requires the explicit definition of expected competencies, could help to move accreditation toward being based on elements of substantive achievement and could encourage a rethinking of admissions criteria. Finally, the two purposes of accreditation are considered; whether it should be used to identify institutions which meet a minimum set of standards or to stimulate institutions to improve their programs significantly.

SUBJECT AREA(S)

Institutional accreditation problems and needs and the relationship of performance-based teacher education to accreditation.

INTENDED USERS AND BENEFICIARIES

The intended users of this paper are teacher educators, State agency officials, and elementary and secondary school personnel.

GOAL(S) OR PURPOSE(S)

This paper examines the relationship between the accreditation of teacher education institutions and performance-based teacher education.

ALTERNATIVES FOR SCHOOLS OF EDUCATION CONFRONTED WITH EDUCATION ENROLLMENT AND REVENUE REDUCTIONS

A review of teacher supply and demand and its implications for teacher education institutions

This monograph reviews the alternative responses to the current teacher supply-and-demand situation being made by schools, colleges, and departments of education. Some options are identified as eliminating nonproductive programs and courses, emphasizing training in areas where shortages exist, refocusing the orientation of institutions to meet the training needs of nonschool settings, and expanding school-service components, particularly inservice and continuing education oriented to the needs and aspirations of teachers in school situations. It is impossible to predict accurately the number of new teachers who will be needed in the future; and additional questions are whether society will be willing to support a teaching force adequate for peak demand periods and whether employment alternatives should be considered. The teacher surplus does not take into account the growing need for new types of learning facilitators in nonschool settings, and these options should be considered as part of a realistic response to preparing multifaceted personnel for all of America's learning institutions.

SUBJECT AREA(S)

This monograph discusses teacher supply and demand and its impact and implications for teacher education institutions.

INTENDED USERS AND BENEFICIARIES

The intended users of this monograph are teacher education institutions; educational administrators; college and university faculty; Federal, State, and local legislators.

GOAL(S) OR PURPOSE(S)

The purpose of this monograph is to provide alternative responses for teacher education institutions with regard to the current supply-and-demand situation.

BEGINNING TEACHERS IN THE INNER CITY: A STUDY OF THE LITERATURE ON THEIR PROBLEMS AND SOME POSSIBLE SOLUTIONS

A review of the literature of problems of beginning teachers working in the inner city

This paper reviews literature on problems encountered by beginning teachers in the inner city and points out some steps that have been taken in both preservice and inservice teacher education to alleviate these problems. While books such as *Death at an Early Age* and *Up the Down Staircase*, are briefly reviewed, greater attention is given to research reports, program descriptions, program proposals, and comments by beginning teachers themselves. The section on current programs gives details of 24 programs which have been implemented and briefly describes 24 additional programs for which only limited material was available. The author concludes that the most important ingredients for successful urban teaching are the attitude of the prospective teacher and early, extensive preservice experience with the realities of the inner city. (A 137-item annotated bibliography is included.)

SUBJECT AREA(S)

This paper reviews the literature on problems encountered by beginning teachers in the inner city and points out some steps that have been taken to alleviate these problems.

INTENDED USERS AND BENEFICIARIES

The intended users are the inservice and preservice teachers and teacher educators.

GOAL(S) OR PURPOSE(S)

The goals are to present to readers some of the problems involved in teaching and training teachers for inner-city schools and to present some suggestions to alleviate these problems.

THE CAMPUS LABORATORY SCHOOL: PHOENIX OR DODO BIRD

A discussion of the history, purpose, and future of campus schools

The development of the campus laboratory school is traced from its origins in Europe in the 17th century and in the United States normal schools of the 1820's. These schools served as models of the desired teaching methods and provided opportunities for student teaching. Even before 1900, the function of the schools was being debated and the need was recognized to use them as experimental schools to test and demonstrate new techniques and materials. The student body in campus schools tended to be highly selected and too small to serve expanding programs of teacher education. In the late 1960's, much student teaching was transferred to public schools; and the concept of teacher education was changed to increase the collaboration between schools and colleges, with a resultant demand for more responsibility for the classroom teachers in student teaching and accreditation. The new emphasis is on a joint enterprise by public schools, universities and colleges, the community, and related public agencies. The means of disseminating the results of experimentation and research must be improved if campus schools are to have a useful future, and there must be opportunities for curriculum development and professional leadership. There is a need for flexible facilities which can be adapted to a variety of uses and for laboratory facilities primarily devoted to inservice education. The activities should be defined and limited to those which can make a unique contribution to the program of the sponsoring agencies.

SUBJECT AREA(S)

The history, purpose, and future of campus schools.

INTENDED USERS AND BENEFICIARIES

The intended users of this program are those involved with campus schools, and those interested in cooperation between schools, universities, and communities in general.

GOAL(S) OR PURPOSE(S)

The purpose of this document is to make the reader aware of problems and potentialities in campus schools.

CLASSROOM OBSERVATION SYSTEMS IN PREPARING SCHOOL PERSONNEL

A state-of-the-art and 42-item bibliography on classroom observation systems in preparing school personnel

This state-of-the-art paper and its accompanying 42-item annotated bibliography are on classroom observation systems in preparing school personnel. The paper is divided into four parts: (1) "Introduction," (2) "Description of Selected Classroom Observation Systems," (3) "Use of Classroom Observation Systems in the Preparation of School Personnel," and (4) "Summary and Conclusions." Part 2, the most detailed section, describes the more important classroom observation systems (i.e., "organized and systematic attempts to assess and qualify, through observation, the behaviors of teachers and students engaged in the teaching-learning process"). These systems are grouped into affective systems (those concerned primarily with intellectual activities which result in the improvement of cognitive processes and skills) and multidimensional systems (those which attempt to assess both the affective and cognitive domains). Among the conclusions suggested by this comparative study are that classroom observation systems (of which the affective ones have been most widely used) can be used profitably in conjunction with microteaching, role playing, and other preservice laboratory teaching experiences; and that, through their emphasis on teaching behaviors and indirect teacher influence, they have contributed to a greater emphasis on laboratory experience in teacher preparation and to an increasing "humanization" of teaching.

SUBJECT AREA(S)

This document includes a state-of-the-art paper and a 42-item bibliography on classroom observation systems in preparing school personnel.

INTENDED USERS AND BENFICIARIES

The intended users of this document are all those directly involved in teacher preparation.

GOAL(S) OR PURPOSE(S)

The goal of this document is to examine how classroom observation systems can be used in preparing school personnel.

COMPENSATORY EDUCATION: IMPLICATIONS FOR TEACHER EDUCATION

A paper providing an analysis of development and teacher implications of compensatory education

This paper is divided into three parts: Compensatory education and its future, the kind of teacher education which will be used to support these compensatory trends, and a bibliography selected to provide background for both sections. The first part reviews the present condition, developments of compensatory education, the implications of future developments in other areas of education, and value judgments. The second part, implications for teacher education, concerns the forces and trends affecting education. Also included is an outline summary of what content might be offered to future teachers to support the compensatory education movement and the likelihood of such content actually being offered. The final section includes an annotated bibliography on teacher education and further selected bibliographies on teacher education, compensatory education, selected programs and demonstrations, selected project descriptions and discussions, and compensatory programs.

SUBJECT AREA(S)

This document is concerned primarily with compensatory education, its development, and its implications for teacher education.

INTENDED USERS AND BENEFICIARIES

Teacher educators are the primary users of this publication, but other persons interested in compensatory education will benefit from it.

GOAL(S) OR PURPOSE(S)

The purpose of this paper is to provide a sound background analysis of compensatory education.

COMPETENCY-BASED EDUCATION:
THE STATE OF THE SCENE

An outline of the competency-based education movement in the United States

This document outlines the Competency-Based Education (CBE) movement in the United States. Following introductory material, this outline covers the roots of the CBE movement; distinguishing characteristics, degree of participation by States, higher education, teachers, administrators, and community; current resources; a bibliography of significant publications; major issues; a glossary for CBE; and a profile of CBE by State.

SUBJECT AREA(S)

The subject area is Competency-Based Education (CBE).

INTENDED USERS AND BENEFICIARIES

The intended users of this document are persons within the education community who wish to become familiar with CBE and those interested in its implementation.

GOAL(S) OR PURPOSE(S)

The goals of this document are to enable the reader to master the basic concepts and terminology and use them as a point of departure in studying the evergrowing literature on CBE, and to enable the reader to implement those aspects of CBE which are desirable and feasible in particular educational settings.

COMPREHENSIVE PROPOSALS FOR TEACHER EDUCATION: A CONCISE GUIDE DERIVED FROM DONALD R. CRUICKSHANK'S STUDY OF PROPOSALS FOR SECOND-PHASE COMPREHENSIVE ELEMENTARY TEACHER EDUCATION MODELS PROJECT

A review of applications for phase 2 of the program to determine their general characteristics and their reactions to the program

The proposals from 27 of the 34 applicants for phase 2 of the *Comprehensive Elementary Teacher Education Models (CETEM) Program* were reviewed to determine, among other things (1) which kinds of institutions participated, (2) how responsive applicants were to guidelines, (3) which phase 1 programs phase 2 applicants found most useful, (4) what were some major and common features of phase 2 programs, and (5) how applicants felt about phase 3 competition. It was found that applicants were mostly State colleges and universities and that applicants varied considerably in how they responded to guidelines. Taken together, they were strongest in describing programmatic features. Phase 1 work of Michigan State, Syracuse, Massachusetts, and Florida State was found most useful; there was agreement on many teacher education program features. Applicants felt that phase 2 competition was exhilarating but that they doubted the existence of fair competition. The conclusions were that the process of teacher education curriculum needs a theoretical base before the profession can engage wisely and economically in curriculum reform; that phase 2 applicants did provide a blueprint for teacher education, requiring dissemination and support; and that the U.S. Office of Education (USOE) must plan more efficiently and communicate more effectively.

SUBJECT AREA(S)

This document reviews 27 of the 34 applicants for phase 2 of the *Comprehensive Elementary Teacher Education Models Program.*

INTENDED USERS AND BENEFICIARIES

The intended users are educational leaders in elementary education at all levels.

GOAL(S) OR PURPOSE(S)

The goal of this document is to determine general characteristics of and reaction to the *Comprehensive Elementary Teacher Education Models Program.*

CONCEPTS OF TEACHER CENTERS

Review of the literature on problems of designing a teacher center

This report reviews the literature that is pertinent to a broad understanding of the teacher center concept and to the specific problems of designing a teacher center. Emphasis is placed on the origins, themes, methods of operation, and future plans for teacher centers. The origins include the revolution in teacher training underway in England, the stress placed on ongoing inservice teacher training in the United States, and the movement toward competency-based teacher education and certification. The major themes stress the felt needs of the teacher, a school improvement thrust, and a need to increase teacher competency. Three styles of operating teacher centers are discussed: The informal English style, the corporate style, and the competency-oriented style. A 29-item bibliography is included.

SUBJECT AREA(S)

The subject area is teacher centers.

INTENDED USERS AND BENEFICIARIES

This publication is of use to the general education community and, especially, those concerned with the professional development of teachers.

GOAL(S) OR PURPOSE(S)

The goals of this publication are to analyze teacher centers and to assist in the conceptualization and implementation of teacher centers.

EFFECTIVE OBSERVATION OF EDUCATORS

A discussion of how teachers' value systems can determine their interpretations of children's behavior

This paper presents a discussion of value presuppositions which can determine the "facts" upon which children are judged, learning situations are structured, and relationships, in general are established. The assumptions or presuppositions are: (1) That young children necessarily have a short attention span, (2) that "giving" children language is always a good thing, (3) that maximum intervention is educationally sound, (4) that people are neither out of their minds nor out of their bodies, and (5) that people recognize that they are a violent society. It is concluded that, to use observation effectively, educators must be prepared to continually reassess their own system of values.

SUBJECT AREA(S)

The subjects discussed in this paper include: Early childhood educational practices, childhood needs, observation and student evaluation, learning processes and student-teacher relationship, and teacher role and social values.

INTENDED USERS AND BENEFICIARIES

The intended users of this paper are teachers and caregivers of young children. The paper is also of interest to administrators and teacher trainers.

GOAL(S) OR PURPOSE(S)

The purpose of this paper is to emphasize the need for educators to be aware of how their own value systems can affect their interpretations of children's behavior.

EXPLORING TEACHERS' CENTERS

Descriptions of centers that offer inservice training or advisory services to elementary school teachers

Exploring Teachers' Centers will contain 30 or 40 descriptions of selected American centers which offer inservice training or advisory services to elementary school teachers. Each center description is organized around a format which will be common to all the entries and which is designed to help readers focus on commonalities and uniquenesses among centers. The statement about each center will include a short description of setting, constituency, educational program, instructional style, staff, origins, governance, and priorities. Each entry will stand as a unique, colloquial definition of the term "teachers' centers," but all together the statements will help to explain and illustrate this new field of inservice practice and thus contribute to readers' translation of the basic ideas to their own local situations. The book will also contain a number of position papers about inservice education and the teachers' center movement and its implications for American education.

Exploring Teachers' Centers is part of a 14-month survey and design study to investigate the feasibility of creating an information and resource exchange network between American teachers' centers. Compilation of a directory of teachers' centers, advisories, and similar programs, and the offering of referral and matchmaker services within this constituency and with interested outsiders, was one of several "information central" functions that leaders of experienced American teachers' centers and advisories volunteered during a summer 1974 survey.

SUBJECT AREA(S)

Inservice education for teachers

INTENDED USERS AND BENEFICIARIES

The intended users of this product are inservice educators, university professors of education, practicing-teacher groups, and others interested in alternative forms of inservice education.

GOAL(S) OR PURPOSE(S)

The goals of this program are: (1) To respond to a need expressed by leaders in teachers' centers; (2) to make available information gathered about centers; and (3) to see whether this practical information about centers can serve as the start for a central information-, idea-, and resource-sharing organization among these teachers' centers and incipient teacher-determined staff-development programs. (A questionnaire survey of recipients will be conducted to ascertain their uses of the information in the book and their evaluation of a continuing resource center.)

PATTERNS OF USE

The product is a reference tool.

FIELD-BASED TEACHER EDUCATION AND K-12 PERSONNEL RESPONSIBILITIES IN TEACHER EDUCATION: A REVIEW

An examination of the implications of field-based teacher education

This monograph traces the development of field-based teacher education in the United States from the first State-supported normal school (1839) to the present questions of control and the dual system of standards of the National Association of State Directors of Teacher Education and Certification and the National Council for Accreditation of Teacher Education. Some of the topics reported on are associations and unions, competency-based teacher education, local needs, teacher centers, reciprocity systems, and economic problems. The extensive appendixes provide the reader with reference material for better understanding the text. They are "Standard VI—Professional Laboratory Experiences"; "Constitution of the CITE Project"; and "Interstate Agreement on Qualification of Educational Personnel Contract."

SUBJECT AREA(S)

The development of field-based teacher education, including the roles of associations and unions, performance-based teacher education, local needs, teacher centers, reciprocity systems and economic problems.

INTENDED USERS AND BENEFICIARIES

This document was prepared for use by teacher educators, decisionmakers, and practitioners on all levels of education.

GOAL(S) OR PURPOSE(S)

This document provides an examination of the implications of field-based teacher education, the involvement of the teaching profession in decisions about college-based programs and their impact on certification and accreditation.

FLEXIBILITY IN PROGRAM PLANNING AND NCATE STANDARDS

A discussion of flexibility as it is viewed by the standards of the National Council for Accreditation of Teacher Education

This monograph discusses the question of flexibility as it is permitted by the standards of the National Council of Accreditation of Teacher Education (NCATE), a question of concern to educators eager to meet the standards, but also eager to satisfy the needs of school personnel. Flexibility is defined, and the purpose and design of NCATE standards are discussed. It is indicated that deliberate effort is said to have been made in the standards to encourage individuality, imagination, and innovation. In spite of this stated effort, the author continues, questions about flexibility persist for the following reasons: Lack of distinction between flexibility and alternative approaches, lack of distinction between standards as a basis for program development and evaluation and as a framework for preparing the institutional report, lack of statements in the standards about experimentation, and uncertainty about what the visiting team and evaluation board deem important. Each of these reasons is examined in relation to the standards. The author advocates working within the standards to improve and develop programs and further explication of the standards by NCATE.

SUBJECT AREA(S)

Subject area concerns the standards of NCATE and the need for more flexibility in these standards.

INTENDED USERS AND BENEFICIARIES

The intended users are primarily collegiate-level teacher educators.

GOAL(S) OR PURPOSE(S)

Based on material assembled at a writing conference at Gatlinburg, Tennessee, on June 19, 1972, the publication should stimulate progress toward relevant and vital programs, as accreditation is a powerful influence in teacher education.

A GUIDE TO A COMPETENCY-BASED FIELD-CENTERED SYSTEMS APPROACH TO ELEMENTARY TEACHER EDUCATION

A model demonstrating elementary teacher competencies necessary for certification

The ComField model of the Northwest Regional Educational Laboratory requires that trainees demonstrate, prior to certification, their ability to bring about learning outcomes in children and parental involvement in the program. Hence, the functions and behaviors of teachers in given settings need to be specified. The ComField model itself does not specify the functions and behaviors; rather, the adopting college and public school systems should be equal partners in selecting the competencies and behaviors to be taught in laboratory and live conditions. Similarly, they should jointly evaluate trainee performance and make policy decisions. The model also expects the trainee to become a self-understanding, self-directed learner; to contribute to the design and continual assessment of the program; and to function in a wide range of social contexts. The latter presumes the involvement of the community. The model provides for a preservice component, which can be adapted to many types of education programs, and an inservice component for supervising and practicing teachers. It also features eight support systems: personnel, supplies, instructional development, program evaluation, program modification, cost accounting, and a computer-based information management system.

SUBJECT AREA(S)

Teacher education.

INTENDED USERS AND BENEFICIARIES

The intended users of this model are teacher educators involved in preservice and inservice of elementary education-trainee preparation.

GOAL(S) OR PURPOSE(S)

The goal of this program is to present a model which demonstrates teacher competencies before certification.

A GUIDE TO BEHAVIORAL SCIENCE ELEMENTARY TEACHER EDUCATION PROGRAM

A model for teaching approached as a clinical practice

A key concept of the Michigan State University model is the clinical behavior style of the teachers it produces. Teachers are expected to approach teaching as clinical practice and to stylize a particular set of activities: Describing, analyzing, hypothesizing; prescribing, treating, analyzing, hypothesizing; prescribing, treating, and observing consequences. Training in the clinical approach occurs, in part, in a clinic-school network—a cooperative project of the university and one or more school systems—where prospective teachers observe and analyze teacher behavior patterns, where interns teach, and where the university staff develops teaching materials. The model, which was designed by interdisciplinary teams, has five major areas of study: General-liberal education, scholarly modes of knowledge, professional use of knowledge, human learning, and clinical and field study. The trainee moves individually through single-purpose experiences and modules, each of which aims for a specific behavioral objective. The modules, as well as information about student progress, evaluation, research, and clinic-school settings (rural, suburban, and urban), are part of an information retrieval system. Trainees may specialize in a subject area and age group. The program also features entrance requirements based on evolving standards of continual feedback for program modification, early trainee experience with children, and faculty currency through the rotation of professors into field experiences.

SUBJECT AREA(S)

Teacher education.

INTENDED USERS AND BENEFICIARIES

The intended users of this model are teacher educators involved in preservice and inservice preparation of elementary education trainees.

GOAL(S) OR PURPOSE(S)

The purpose of this program is to present a model in which the key concept is the clinical behavior style of the teachers it produces.

A GUIDE TO EDUCATIONAL SPECIFICATIONS FOR A COMPREHENSIVE ELEMENTARY TEACHER EDUCATION PROGRAM

Specifications of behavioral objectives in elementary education and in elementary teacher preparation

The teacher education model developed by the consortium of Ohio universities contains 818 specifications which include more than 2,000 behavioral objectives. Each specification identifies the behavioral objectives. Specifications were developed within five broad contexts and apply to one or more of the six target populations involved in elementary education and the preparation of elementary schoolteachers. The model is predicated on the assumption that the elementary school will move in the direction of team teaching, specifically with the instructional organization of the multiunit school or a modification thereof. Each specification is identified by number and is coded according to a numerical code in terms of information contained in the specification. This coding process is designed to enable the user of the specifications to deal with them more effectively and flexibly in developing model programs in a variety of contexts. A process was developed whereby composites of specifications can be identified and programs based upon these specifications can be designed and implemented. An evaluative process was designed so that any program arranged in behavioral terms can be evaluated at a given point in time with provisions for prompt and objective feedback for program self-correction and modification.

SUBJECT AREA(S)

Teacher education

INTENDED USERS AND BENEFICIARIES

The intended users of this document are all those involved in elementary education and the preparation of elementary schoolteachers.

GOAL(S) OR PURPOSE(S)

The purpose of this document is to provide specifications on which programs can be based in elementary education and the preparation of elementary schoolteachers.

A GUIDE TO GEORGIA EDUCATIONAL MODEL SPECIFICATIONS FOR THE PREPARATION OF ELEMENTARY TEACHERS

A presentation of an elementary teacher education program which is based on teacher performance behaviors

At the core of the University of Georgia model are teacher performance behaviors. They are the basis of the trainee's learning activities throughout the 6-year program. The trainee moves through several program phases: Preprofessional, preparing for paraprofessional service, professional, and preparing for specialization in 1 of 15 areas. During these phases, the trainee experiences learning activities through Proficiency Modules (PM's), which are manuals of instruction—available from computers, published documents, or the trainee—that guide the trainee through individual study and group interaction toward acquiring specified behaviors. The modules are classified into "types" if they are to be used sequentially. Each PM also incorporates a variety of evaluation devices for pretesting and posttesting. Data on the trainee's progress (and on the program) are kept in tape storage. Among the model's other features are laboratory and field experiences; multiple entry points and paths; reciprocal agreements with local schools, agencies, and departments; year-round education, and sensitivity training.

SUBJECT AREA(S)

Teacher education

INTENDED USERS AND BENEFICIARIES

The intended users of this program are those involved in both preservice and inservice teacher preparation.

GOAL(S) OR PURPOSE(S)

The purpose of this document is to present teacher performance behaviors for trainees in an elementary teacher preparation program.

A GUIDE TO MODEL ELEMENTARY TEACHER EDUCATION PROGRAM

A model which attempts to institutionalize change by analysis of educational roles and objectives

The University of Massachusetts model is an attempt to institutionalize change by way of a thorough analysis of educational roles, tasks, structure, and objectives. Among the essential characteristics of the model are its provision for a wide variety of possible overall teacher-training strategies and its provision for continuous diagnosis of the needs of each trainee and for constant evaluation of the program components designed to meet these needs. (Cronbach's concept of aptitude-treatment interaction is an important research component of the program.) Trainee requirements are stated in terms of performance criteria in three major areas: Human relations, behavioral skills, and subject matter knowledge. In addition, for every criterion at least two instructional alternatives are provided for learning how to meet the criterion. When the trainees meet the specified criteria requirements, they will have completed the program regardless of the length of time enrolled. Among other major concepts incorporated in the model (organized, managed, and designed according to systems analysis) are: Differentiated staffing, variable entry and exit points, and university commitment to graduates beyond graduation.

SUBJECT AREA(S)

This report deals with an attempt by the University of Massachusetts to institutionalize change by way of a thorough analysis of educational roles, tasks, structure, and objectives.

INTENDED USERS AND BENEFICIARIES

The intended users of this product are teacher educators preparing trainees in elementary education.

A GUIDE TO A MODEL FOR THE PREPARATION OF ELEMENTARY SCHOOLTEACHERS

A guide to planning instruction with behavioral objectives for preparation of elementary schoolteachers

Teacher educators need to plan instruction with behavioral objectives; their selection of lesson content, teaching strategies, and student evaluation criteria should be consistent with these objectives. In the Florida State University model program, trainees are expected to reach these goals by progressing at individual rates through performance specifications. The trainee moves through three phases: Underclass (general and preprofessional education, which may be undertaken in a junior college); preservice (academic and professional); and inservice. It is expected that the academic and professional faculty will collaborate closely during this program, stimulus for collaboration comes from the mutual development of a battery of diagnostic tests to be used in trainee selection and placement. Learning for the trainee continues beyond graduation into a full-time teaching position in a "portal school"—a public school responsible for training new teachers as well as educating children. The "portal school" should encourage cooperation between university and school personnel and should provide feedback for improving both the preservice and inservice phases. Other important features of the Florida model are its emphasis on differentiated staffing and its computerized management control system, used to monitor individual trainees' progress and to provide feedback for program modification.

SUBJECT AREA(S)

This is a guide to planning instruction with behavioral objectives for the preparation of elementary school teachers.

INTENDED USERS AND BENEFICIARIES

The intended users of this guide are teacher educators involved in preservice and inservice preparation of elementary education trainees.

GOAL(S) OR PURPOSE(S)

The goal of this guide is to outline a program for elementary education trainees based on behavioral objectives and individualized instruction.

A GUIDE TO A MODEL OF TEACHER TRAINING FOR THE INDIVIDUALIZATION OF INSTRUCTION

An educational model to humanize education through individualized instruction

The University of Pittsburgh model addresses itself to the humanization of education through individualized instruction. Large blocks of regular courses are replaced by peer group interaction, independent study, small seminars, and simulated modules of instruction. Throughout preservice and inservice years, the trainee plans a learning program with an adviser—since the trainee is expected to plan learning programs with elementary school pupils when training is completed. During preservice training, the trainee is part of a guidance program concerned with personal as well as professional development, the trainee also selects courses in academic and clinical sequence. Teacher competencies are developed in a clinical school, where the trainee comes as an observer, tutor, assistant teacher, student teacher, and intern. The school is a cooperative project of the college, local schools, teacher organizations, and State or Federal agencies. The model also advises systematic feedback and cooperation between the research-oriented and operation-oriented faculty in the program's implementation.

SUBJECT AREA(S)

Teacher education

This document describes individualized instruction for trainees to be used with their future students.

INTENDED USERS AND BENEFICIARIES

The intended users are teacher educators who are training school personnel, especially those interested in individualizing instruction.

GOAL(S) OR PURPOSE(S)

The goal of this document is to humanize education through individualized instruction.

A GUIDE TO SPECIFICATIONS FOR A COMPREHENSIVE UNDERGRADUATE AND IN-SERVICE TEACHER EDUCATION PROGRAM FOR ELEMENTARY TEACHERS

A sample of elementary teacher education models to train teachers to confront and initiate change

The Syracuse University model educates teachers to confront change and initiate change responsibly in schools and communities. The model's 4 preservice years, composed of seven instructional units, focus on process goals. The first 2-1/2 years are devoted to liberal education with the aim of developing new ways of perceiving, realizing, feeling, and deciding. The junior and senior years are for specialization and for professional study in six areas: Methods and curriculum (focusing on problem resolution), child development, teaching theory and practice (focusing on decisionmaking), professional sensitivity training, self-directness, and social-cultural foundations. During the latter unit, the trainees, while working with a counselor determine the behavioral changes they would like to bring about in their pupils and attempt to accomplish those changes in the 5th or inservice year—a year of partnership teaching in a school. All the instructional units are composed of modules, which are planned instructional episodes lasting from several hours to several months. Instruction is often individual; the largest grouping of students is 15. The model also provides for support systems, continual feedback, and the participation of students, teachers, researchers, public schools, and education industries in program development and implementation.

SUBJECT AREA(S)

Teacher education.

This document presents the Syracuse University undergraduate and inservice teacher education programs for elementary teachers, which train teachers to confront and responsibly initiate change.

INTENDED USERS AND BENEFICIARIES

The intended users of this model are inservice and preservice teacher educator-trainees in elementary education.

GOAL(S) OR PURPOSE(S)

The goal of this model is to train teachers to confront change and initiate change responsibly in schools and communities.

A GUIDE TO THE TEACHER-INNOVATOR: A PROGRAM TO PREPARE TEACHERS

A model to train teachers for four roles:
institution-builder, interactive teacher,
innovator, and scholar

The teacher-innovator model from Teachers College, Columbia University, trains the teacher for four roles: Institution builder, interactive teacher, innovator, and scholar. Teachers acquire an understanding of these roles during preservice and inservice experiences in four methodologies: Inquiry and feedback groups (democratically organized groups of students who administer the program to themselves under faculty counseling), differential training (a model providing the faculty with ways of individualizing instruction), laboratory school (an inquiry school in which teaching and learning are studied as well as carried on), and a contact laboratory (a "real" school for direct contact with children). An example of the interrelationships among the four roles and methodologies is found in the contact laboratory. The trainee moves through six phases—from experiencing the school as an unpaid teacher aide during the first 4-8 weeks of the program; through tutoring, designing an individualized learning unit, working in an inquiry school, and operating an educational program for children (after school, summers, or weekends); and into internship, which specifies a two-thirds teaching position and proximity to other members of the trainee's feedback group. The model also anticipates technological support systems.

SUBJECT AREA(S)

Teacher education.

This document describes the teacher-innovator model from Columbia University which trains teachers for four roles (institution builder, interactive teacher, innovator, and scholar) during preservice and inservice experiences.

INTENDED USERS AND BENEFICIARIES

The intended users of this model are those involved in both preservice and inservice teacher preparation.

GOAL(S) OR PURPOSE(S)

The purpose of this product is to present a model for preservice and inservice teacher training.

GUIDELINES FOR THE SELECTION OF STUDENTS INTO PROGRAMS OF TEACHER EDUCATION

A review of research evidence relating to the selection of students for teacher education

The author reviews research evidence considered pertinent to the selection of teacher education students and synthesizes the evidence into 11 criteria for selection. The areas of childhood development, adult learning, college influence on students, college student characteristics, and present selection practices are all explored. In particular, the author discusses the durability of values learned in childhood, the outstanding cognitive and affective characteristics of adults in their 20's and 30's (usually considered too old to enter the profession), the relatively weak influence of the college environment on vocationally oriented students, the cultural pluralism of the new student population, and the use of grades as the currently most popular selection criterion for admission into teacher education programs. These observations lead the author to the formation of selection criteria which emphasize a candidate's values and capacity for adult growth and define student characteristics in terms of program goals rather than in terms of typically acceptable student characteristics.

SUBJECT AREA(S)

This publication focuses on selection criteria for students wishing to enter teacher education programs.

INTENDED USERS AND BENEFICIARIES

The intended user of this product is the teacher education community.

GOAL(S) OR PURPOSE(S)

The purpose of this publication is to review research evidence considered pertinent to the selection of teacher education students and to synthesize the evidence.

THE GOVERNANCE OF TEACHER EDUCATION

A paper reviewing three theses of teacher education

This paper developes three theses: (1) Education, generally, and teacher education in particular, are disadvantaged by faulty governance systems and structures; (2) many of the problems of education stem directly or indirectly from these faulty structures; and (3) there is an urgent need for a whole new set of assumptions about the governance of teacher education. The varying interrelationships between the disciplines, professional schools, and professions are examined through the use of concepts of systems, subsystems, and suprasystems. Although teacher education is a subsystem of the university, it also forms a part of the suprasystems of governmental units, the professions, and the community and there is a need for a collaborative relationship between teacher education/university/profession and school unit/community/State. Some conclusions indicate that education should be viewed as the training function of the teaching profession, teacher education should be regarded as a professional school, there should be less emphasis on teacher education as an all-university function, the organized teaching profession should assume the role of major suprasystem, accountability and responsiveness should be sharply defined, and local and State government responsibility should be reduced.

SUBJECT AREA(S)

Governance of teacher education, including the role of the profession, and governing agencies (Federal, State, and local) are discussed.

INTENDED USERS AND BENEFICIARIES

The intended users of this product are teacher educators and administrators of teacher education.

GOAL(S) OR PURPOSE(S)

The purpose of this product is to analyze roles and teachers, both preservice and inservice.

IN-SERVICE TEACHER EDUCATION—SOURCES IN THE ERIC SYSTEM

A review of 1973-74 inservice teacher education documents in the ERIC data base system

A total of 256 ERIC 1973-74 citations dealing with inservice teacher education was reviewed. Types of documents included project and research reports, syntheses of theory and research, precis of doctoral theses, program proposals, and evaluation studies. Programs to improve the teaching of reading and mathematics to disadvantaged students were numerous, and introductions to new curriculums in other subject areas were well represented. Although many subjects were treated, the reports reflect little attempt to formulate a comprehensive program. Too often, objectives were narrow and unrelated to a larger purpose, and most of the programs focused on the teacher as an individual rather than as a member of a group. None of the reported programs dealing broadly with the professionalization of teachers in a full sense was comprehensive. Few of the reports dealt with formal graduate study. Four documents dealing with broad concerns are identified, and a 30-item selected annotated bibliography is included.

SUBJECT AREA(S)

The primary focus of this publication is inservice teacher education as it is treated in the ERIC data base.

INTENDED USERS AND BENEFICIARIES

The intended users of this document include school district supervisors of inservice education and collegiate personnel involved in inservice education.

GOAL(S) OR PURPOSE(S)

This document is part of a series of brief papers which have been designed to provide a popularized overview of inservice education through an analysis of the literature.

INSERVICE TRAINING FOR THE BEGINNING TEACHER

An overview of inservice education from an analysis of the literature

The public has a major financial investment in the education of teachers but has failed to give this problem the attention it deserves. Preservice education prepares the teacher only to the readiness-for-teaching stage, and on-the-job experience occupies only a minor proportion of the teacher education program. In the first year of teaching, provision should be made to diagnose, prescribe, and program for the beginning teacher; to correct teaching weaknesses; and to develop competencies. Several exemplary programs, which are discussed briefly, suggest 10 steps that could help in developing a 2-year program of inservice training for the beginning teacher. A concluding section is to be used for the professional development of the teacher, with the heaviest investment during the first 2 or 3 years of teaching and the balance used for inservice development during the remainder of the teacher's career.

SUBJECT AREA(S)

The subject areas include beginning teachers, their needs, and strategies for providing support and meeting their needs.

INTENDED USERS AND BENEFICIARIES

The intended users include the school district supervisors of inservice education and collegiate personnel who are involved in inservice training as resource persons.

GOAL(S) OR PURPOSE(S)

This paper is one of a series which is intended to provide a popularized overview of inservice education from an analysis of the literature to serve as a current awareness publication for educators.

INSERVICE EDUCATION FOR TEACHERS OF DISADVANTAGED ADULTS

A review of the literature on the goals of adult basic education students

Inservice education for Adult Basic Education (ABE) teachers is a relatively new development, and teachers need to understand the students' motivation in taking the courses. A brief review of the literature shows that the majority of students attended classes for reasons other than course content. Data gathered in Georgia to examine perceptions of these goals revealed significant differences. Teachers gave first ranking to a desire to learn, which students ranked third. "To make my family proud of me" was ranked 7th by teachers and 4th by students; "to get a better job" was ranked 10th by teachers and 5th by students; and "to pass the high school test" was ranked 18th by teachers and 6th by students. Some implications of these differences are discussed, and it is concluded that the teacher needs to understand the student's motives in order to modify the program so that the desired objectives will be reached.

SUBJECT AREA(S)

Motivating factors of adult basic education students and how they affect ABE teachers and their programs are the subject areas.

INTENDED USERS AND BENEFICIARIES

The intended users of this program are teachers of ABE and administrators of ABE programs.

GOAL(S) OR PURPOSE(S)

This paper is one of a series which is intended to provide a popularized overview of inservice education to serve as a current awareness publication for educators.

MICROTEACHING: HISTORY AND PRESENT STATUS

A state-of-the-art paper summarizing the history and uses of microteaching

This state-of-the-art paper summarizes the history of microteaching's development and its rationale, the many uses of microteaching, and the research evidence of microteaching—a training procedure which has become an established element in the programs of many colleges, universities, and school districts in the education of various groups of educational personnel (e.g., preservice teachers, inservice teachers, counselors, supervisors, and college teachers). Although the authors make the distinction between microteaching (a teaching situation scaled down in terms of time, number of students, number and specificity of teaching skills focused on, and the opportunity offered for immediate feedback in some form), and simulation (which uses the same process and the same teach-critique/reteach-critique cycle, but which, unlike microteaching, involves peer-group students, rather than "real" ones), they recognize that the latter is by far the more common practice in preservice education. Emphasis of the research summary is on empirically based, rather than experientially based, studies of behavioral change and on areas related to both teaching skills and training protocols in which a great deal of further research is needed. Included with the document are a list and explanation of 15 specific teaching skills and an annotated bibliography.

SUBJECT AREA(S)

This state-of-the-art paper summarizes the history of microteaching's development and its rationale, the many uses of microteaching, and the research evidence on microteaching.

INTENDED USERS AND BENEFICIARIES

The intended users of this paper are teacher educators in colleges, universities, and school districts.

GOAL(S) OR PURPOSE(S)

The purpose of this paper is to give the reader an overview of microteaching—a training procedure which has become an established element in the programs of many colleges, universities, and school districts.

MICROTEACHING: SELECTED PAPERS

A report on three microteaching programs

This is the second of a series of three bulletins dealing with "Supervisory Strategies in Clinical Experiences." The first of the two papers, *Microteaching: History and Present Status* by James M. Cooper and Dwight W. Allen, begins with a definition of microteaching as a teaching situation which is scaled down in terms of time and numbers of students but which is not synonymous with simulated teaching, as the teacher, students, and lesson are all "real." The history of microteaching from its development in 1963 is outlined, followed by an explanation of the rationale, the uses of microteaching in preservice and inservice training in the Peace Corps, counseling, supervisor training, and the training of college teachers. Research evidence on the effectiveness of microteaching is examined and the teaching skills involved are listed. There is a bibliography of 58 items. The second paper, *Microteaching in Teacher Education Programs* by Robert F. Schuck, considers three programs: (1) The original Stanford Teacher Education Project, which developed nine specific technical skills in secondary education; (2) the Brigham Young University Program, which forms part of the preservice curriculum; and (3) the San Jose State College Study of that institution's program for elementary intern teachers. A brief concluding section suggests that microteaching holds promise as a research strategy for investigators interested in patterns of instruction.

SUBJECT AREA(S)

This report deals with the history and present status of microteaching, and considers three programs in microteaching.

INTENDED USERS AND BENEFICIARIES

The intended users of this report are teacher educators involved in preservice education.

GOAL(S) OR PURPOSE(S)

The purpose of this report is to inform readers of the history and present status of microteaching and to give examples of some microteaching programs.

PARSING THE PARADOX: ASSURING QUALITY IN SCHOOL PERSONNEL PREPARATION

A preparation of problems involved in changing teacher certification

Despite recent calls for changes in teacher certification, there are many questions to be considered before changes are made. Some of these questions are: What are the basic qualities and abilities that a teacher must have? Who will decide on these qualities and abilities? How will they be measured? Who needs to be certified? The trend toward accountability and performance criteria for certification is an encouraging step, but it is just a step. Such an approach needs further consideration in order to develop a rationale and workable procedures. Another change being demanded is to give teachers control over entry into the profession. This too is a good idea, but before teachers can be given such control they must present a feasible plan. There are many other problems and paradoxes which complicate the issue of teacher certification, such as the conflict between human and intellectual values, student attitudes toward education, and efforts to recruit minority group members into teaching while still maintaining high standards.

SUBJECT AREA(S)

This document deals with problems involved in changing teacher certification.

INTENDED USERS AND BENEFICIARIES

The intended users are all persons involved in teacher certification.

GOAL(S) OR PURPOSE(S)

The goal is to present the problems that might be involved in implementing change in teacher certification.

PERFORMANCE-BASED CERTIFICATION OF SCHOOL PERSONNEL

A consideration of techniques needed for determining an individual's ability to teach in the public schools and to qualify for certification

The 1970 Miami Beach training sessions for national leaders in teacher education was conducted by the Florida Department of Education at the invitation of the U.S. Office of Education. The purpose of the sessions was to consider the necessary techniques for determining an individual's ability to perform as a teacher in public schools and to qualify for certification. The document is in three parts. Part 1 contains five papers on performance-based certification: Describing the concept and why it is needed; discussing participation in decisionmaking; giving an overview of current approaches to accountability; considering whether the focus should be on knowledge, teacher behavior, or pupil achievement; and considering the role of differentiated staffing. Part 2 details the plans for changing certification procedures, with notes on forces which are helping or hindering selected organizations and State agencies. Part 3 considers the impact performance criteria will have on teacher certification in substituting demonstrated teaching ability for evidence of having followed an approved program of studies.

SUBJECT AREA(S)

Performance-based certification.

INTENDED USERS AND BENEFICIARIES

Those persons involved in teacher certification.

GOAL(S) OR PURPOSE(S)

To consider the techniques needed for using performance criteria to determine an individual's ability to perform as a teacher and qualify for certification.

PROFESSIONAL LABORATORY EXPERIENCES AT THE PRESERVICE LEVEL

*A theoretical analysis of the definition, role,
and purpose of preservice laboratory services*

This monograph presents a completely theoretical analysis of data pertaining to professional laboratory experiences at the preservice level. The intention is to bring together in a useful pattern what is known and what is asserted about these experiences and to make specific functional proposals that, if implemented, may be conducive to enhancing the quality of professional laboratory experiences. The document is divided into discussions of the definition of professional laboratory experiences; their purpose, their role; the characteristics of high-quality professional laboratory experiences; principles which should govern them; theory; educational concepts underlying them; types (directed observation, participation, and student teaching); range; facilities; and forward-looking developments. A bibliography is included.

SUBJECT AREA(S)

The definition, role, and purpose of professional preservice laboratory experiences are the subjects of this publication.

INTENDED USERS AND BENEFICIARIES

This publication is intended for all elementary, secondary, and collegiate personnel responsible for improving school personnel preparation.

GOAL(S) OR PURPOSE(S)

The purpose of this publication is to analyze and interpret contemporary practices and perspectives.

PROGRAMMATIC DEVELOPMENT OF IN-SERVICE TEACHER EDUCATION

A discussion of teacher development via teacher centers, instructional training centers, and specialized workshops

A "programmatic concept" of inservice education is suggested. Inservice activity, congruent with the concept must emerge from an operational complex which has demonstrated the capability to create and/or diffuse instructional programs targeted to a group of teachers with particular needs. Three approaches which fit the criterion rule are described: (a) Inservice education as a programmatic activity of teacher education centers, (b) inservice education as a product of specialized instructional and curriculum product/training centers, and (c) inservice education as disseminated through specialized workshops. Examples which fit each of the three approaches are presented. A 29-item annotated bibliography is included.

SUBJECT AREA(S)

Development of inservice training for teachers via teacher centers, curriculum and instructional product/training centers, and specialized workshops is the subject of this product.

INTENDED USERS AND BENEFICIARIES

The intended users are the school district supervisors of inservice education and collegiate personnel involved as resource persons.

GOAL(S) OR PURPOSE(S)

This paper is part of a series designed to provide an overview of inservice teacher education derived from the literature.

PROMISING PRACTICES IN THE TRAINING AND RENEWAL OF TEACHER EDUCATORS

A variety of trends and programs in preservice and inservice teacher educator training

This monograph reviews a variety of trends and programs in the preservice and inservice training of teacher educators. Diversified instructional formats are discussed, as represented in the Keller plan, directed study, the Stanford catalog of teacher training products, and protocol materials. The methods of computer-assisted instruction and the use of consulting groups (as in the Minnesota "Field-Plot" model and the western Kentucky model) are also explored as vehicles that are being used to train teacher educators. Finally, the implications of competency-based teacher education and of alternative teacher education programs for the training of teacher educators are revealed. A 25-item bibliography concludes the paper.

SUBJECT AREA(S)

Trends for the improvement of inservice teacher education programs; implications of performance based teacher education for inservice education.

INTENDED USERS AND BENEFICIARIES

Teacher educators and administrators of teacher education.

GOAL(S) AND PURPOSE(S)

The purpose of this product is to delineate the potentialities for improving collegiate-based educational personnel development.

PROTOCOL MATERIALS: TRAINING MATERIALS FOR UNITING THEORY AND PRACTICE

A paper on history, theory, practice, and evaluation of protocol materials

This publication brings together seven papers by writers who have been extensively involved in the preparation and use of protocol materials in teacher education. These papers are "Protocol Materials: Historical Notes on Protocols Development" by Doris V. Gunderson, "The Protocol Materials Movement: An Exemplar of Efforts to Wed Theory and Practice in Teacher Education" by Donald R. Cruickshank, "The University of Colorado Protocol Project: A Case Study" by Celeste P. Woodley and Laura A. Driscoll, "A Catalogue of Concepts in the Pedagogical Domain of Teacher Education" by Bryce B. Hudgins, "The Protocol Materials Program" by Donald E. Orlosky, "A Protocol Materials Evaluation: The Language of Children" by Victor M. Rentel, and "A Survey of Protocol Materials Evaluation" by John E. Cooper.

SUBJECT AREA(S)

This paper focuses on various aspects of protocol materials including history, theory, practice, and evaluation.

INTENDED USERS AND BENEFICIARIES

The publication is aimed at teacher educators.

GOAL(S) OR PURPOSE(S)

The goal of this paper is to analyze and synthesize information about protocol materials.

A READER'S GUIDE TO THE COMPREHENSIVE MODELS FOR PREPARING ELEMENTARY TEACHERS

A guide to preservice teacher education models

This document consists of guides to models for preparing elementary teachers. The nine models included in the document are:

1. "A Guide to a Model of Teacher Training for the Individualization of Instruction"
2. "A Guide to Model Elementary Teacher Education Program"
3. "A Guide to Educational Specifications for a Comprehensive Elementary Teacher Education Program"
4. "A Guide to Georgia Educational Model Specifications for the Preparation of Elementary Teachers"
5. "A Guide to the Teacher-Innovator: A Program to Prepare Teachers"
6. "A Guide to Specifications for a Comprehensive Undergraduate and Inservice Teacher Education Program for Elementary Teachers"
7. "A Guide to a Competency-Based Field-Centered Systems Approach to Elementary Teacher Education"
8. "A Guide to Behavioral Science Elementary Teacher Education"
9. "A Guide to a Model for the Preparation of Elementary School Teachers."

SUBJECT AREA(S)

Preservice teacher education models is the subject area.

INTENDED USERS AND BENEFICIARIES

The intended users of this document are teacher educators.

GOAL(S) OR PURPOSE(S)

The purpose of this document is to provide a compilation of elementary teacher education models.

SCHOOL-COLLEGE RELATIONS IN PREPARING SCHOOL PERSONNEL

An analysis of the school-college relationship in preparing school personnel

This monograph analyzes the current situation in the school-college relationship in preparing school personnel and suggests some future developments. The growth of this cooperation is traced from its tentative beginnings in the early years of the century to the much greater activity of the 1960's. The rationale for cooperation and partnership is examined and five of the common forms of partnership are described: Internship, teacher centers, laboratory centers, regional councils, and partnership at State level. The author then considers some of the issues and problems involved in the current situation, as well as the promising developments, including the increasing participation of State departments of education and teacher unions and associations. Four probable future developments are identified as: (1) Greater emphasis on partnership at the State level, (2) an increasing participation by teacher organizations, (3) the development of the teaching center as the clinical dimension of teacher education, and (4) a greatly increased student participation in the decisionmaking structure.

SUBJECT AREA(S)

This monograph analyzes the current situation in school-college relationships in preparing school personnel and suggests some future developments.

INTENDED USERS AND BENEFICIARIES

The intended users of this monograph are teacher educators at both the school and college levels.

GOAL(S) OR PURPOSE(S)

The purpose of this monograph is to inform the reader of the history, current status, and future possibilities of the school-college relationship in preparing school personnel.

SIMULATION AS AN INSTRUCTIONAL ALTERNATIVE IN TEACHER EDUCATION

An examination of the field of simulation as an instructional alternative in teacher education

This paper brings together and examines several of the better known developments in the field of simulation as an instructional alternative in teacher education. Six examples of simulation in preservice and inservice teacher education are described. Each description includes information on the purpose and form of the simulation, how to use it, its specific advantages and drawbacks, and whom to contact for further information. The six examples are: (1) Classroom simulator; (2) teaching problems laboratory; (3) Project Insite; (4) low-cost instructional simulation; (5) human relations, one dimension of teaching; and (6) inner-city simulation laboratory. The booklet discusses the general advantages of simulation and the specific advantages of using it in conjunction with student teaching, as part of the college-based teacher education program and in inservice and graduate education. The report also outlines briefly several questions which should be considered in deciding whether to use a particular simulation.

SUBJECT AREA(S)

This paper brings together and examines several developments in the field of simulation as an instructional alternative in teacher education.

INTENDED USERS AND BENEFICIARIES

The intended users of this paper are those involved in inservice and preservice teacher education.

GOAL(S) OR PURPOSE(S)

The purpose of this paper is to describe simulation as an instructional alternative for teacher educators.

SIMULATION IN PREPARING SCHOOL PERSONNEL

An overview of how simulation relates to the professional preparation of school personnel

The purpose of this state-of-the-art paper is to provide an overview of simulation ("a representation of several variables in the same arrangement as they occur in a particular natural or artificial system"), particularly as it relates to the professional preparation of school personnel. After distinguishing between "simulation" and "simulation games" (the primary, although admittedly tenuous, distinction being that the latter usually involves interpersonal or team competition), the authors summarize simulation-based practice and theory under the following headings: (1) The design and development of instructional simulation in professional education, (2) the uses of instructional simulation in professional education (which includes both general uses and specific examples), (3) some issues to be resolved (which identify 11 controversial areas), (4) advantages of simulation, (5) disadvantages of simulation, and (6) questions in need of research. The use of simulation as a training methodology is becoming increasingly widespread and has considerable educational potential if properly designed, utilized, and evaluated. A great deal of research remains to be done if the effectiveness of the technique is to be empirically validated and educationally proven. A 130-item bibliography is included.

SUBJECT AREA(S)

This state-of-the-art paper presents an overview of simulation, particularly as it relates to the professional preparation of school personnel.

INTENDED USERS AND BENEFICIARIES

The intended users of this program are those involved in preparing school personnel.

GOAL(S) OR PURPOSE(S)

The purpose of this program is to present an overview of simulation, particularly as it relates to the professional preparation of school personnel.

STRUCTURED CAREER DEVELOPMENT FROM TEACHER AIDE AND BEYOND

A description of implementation of career ladders and advancement programs for school paraprofessionals

In the first of the two papers in this monograph, the author describes the concepts of career ladders and career lattices for paraprofessionals in education and the ways in which these concepts have been implemented in the past few years. Various aspects of implementation are examined, including functions performed, requirements for advancement, training, compensation, recruitment and selection, evaluation, and credentials and certification. Because this is a relatively new development in education, some potential problems are considered, with suggested strategies for dealing with them. Finally, the various benefits resulting from a career ladder and paraprofessional program are discussed as they apply to the student, the paraprofessional, the professional, the institution, and the community. The second paper describes, in more detail, the career opportunities program of the U.S. Office of Education. The operation of the program is discussed, and trends for the future are considered, including the use of differentiated staffs in team teaching and informal classrooms, the role of State agencies, revisions in teacher certification, the increased use of local funds, the effect of career lattices on school salary structure, and modifications in teacher training programs. There are four appendixes and a bibliography.

SUBJECT AREA(S)

The subject areas include problems, strategies, and benefits in the development and implementation of career ladders and advancement programs for school paraprofessionals.

INTENDED USERS AND BENEFICIARIES

The publication was created to be useful to preservice and inservice teachers and administrators, as well as to teachers of teachers.

GOAL(S) OR PURPOSE(S)

A most significant development in education has been the addition of paraprofessionals to the school team—with implications for the professional training sequence, for servicing children and youth better, and for relating school and community social and educational needs. This paper is intended to shed light on this development.

A SYNTHESIS OF RESEARCH AND INNOVATION IN PROGRAMS FOR THE FURTHER DEVELOPMENT OF TEACHERS OF ADULTS

A description of eight projects concerned with program innovation for adult learners

ERIC and other literature on innovative programs for the further development of teachers of adults have been identified. Experts in the development of teachers of adults were canvassed for nominations of current programs of high merit. Eight projects were singled out for specific description in order to acquaint the reader with the structure and processes involved in program innovation for adult learners. The review constitutes a synthesis of literature and project reports organized to give those engaged in the preservice and inservice improvement of teachers of adults new goals and procedures.

SUBJECT AREA(S)

This manuscript discusses development of teachers of adults.

INTENDED USERS AND BENEFICIARIES

The intended users of this program are professors of adult and continuing education, and principals and supervisors of schools for adult learners.

GOAL(S) OR PURPOSE(S)

The goals of this program are to assemble and report the best practice in improving teachers of adults and to provide models of good practice which others may consider for adaptation and/or adoption.

ASSURANCES AND CLAIMS

Prior to completion, the manuscript was submitted to more than 12 practitioners, policymakers, and professors of adult education for critical review and determination of professional competence. Their comments were incorporated as appropriate.

TEACHING CENTERS: TOWARD THE STATE OF THE SCENE

An overview of different teacher center concepts

This monograph is intended: (1) To outline the background and current extent of teacher centering in the United States, (2) to stimulate intercenter communication, (3) to identify resources for potential program developers, (4) to raise some developmental problems and issues confronting center builders, and (5) to provide a framework for a systematic analysis of the nature and promise of the teaching center concept. After a brief discussion of the problems of naming these projects, the authors identify some roots of the movement. This is followed by an analysis of the extent and nature of teaching centers, which is based on a survey conducted by Syracuse University and includes 18 selected summary tables from that survey. A typology of teaching centers identifies seven organizational types and four functional types. Five major issues for center developers are listed, followed by 25 questions arising from them. Current resources listed include 14 national progams and 46 exemplary centers. A 152-item bibliography is included.

SUBJECT AREA(S)

This document focuses on various aspects of teacher centers, including facilities, costs, evaluation methods, and governance.

INTENDED USERS AND BENEFICIARIES

The intended users of this monograph are teacher educators and institutions, especially those involved with or considering teacher center programs.

GOAL(S) OR PURPOSE(S)

This document contains an overview of diverse teacher center concepts and a synthesis of current thought on the topic.

TOWARD A HUMANE CURRICULUM

Six aspects of "humaneness" are discussed and applied to curriculums in this paper

This paper is a revision of a presentation to the American Educational Research Association in April 1974. The author applies the term "humane" to the design of educational experiences. Six aspects of "humaneness"—intellectual, emotional, social, physical, aesthetic, and spiritual—are discussed and applied to the curriculum. Three goals of teaching are also stated. These goals and the 6 humane qualities are combined in a grid, which shows 18 different combinations of teaching pedagogy and human behavior that need to be present if a curriculum is to be humane. Development of the grid leads to the central proposition of the paper: "In order to achieve a humane curriculum, each subject matter and each experience must be responsive to all the aspects of the human condition, in the context of all the pedagogical intentions the teacher has."

SUBJECT AREA(S)

Subject areas include curriculum development, humanistic education, and philsosphy of education.

INTENDED USERS AND BENEFICIARIES

The intended users of this paper are teachers of all subject areas and all grade levels, curriculum developers and decisionmakers, and teacher trainers (inservice and preservice).

UNIQUE CHALLENGES OF PREPARING TEACHERS FOR INNER-CITY SCHOOL: PROGRESS AND PROSPECTS

A paper on the history of and prospects for inner-city teacher education

During the 1960's, there was growing awareness that without competent teachers who understand the problems of ghetto life, further deterioration of the educational process was virtually assured. The first half of this paper traces the growth of this awareness through the writings of leading educators and through an examination of teacher education programs which were established to implement their proposals. These include Project 120 at Hunter College, the Associated Colleges of the Midwest Urban Semester Program, the Inner-City Teacher Education Project in Missouri, the Syracuse University Urban Teacher Preparation Program, the Inter-Institutional Program Development Project, the Sausalito Teacher Education Project (STEP), and the Cooperative Urban Teacher Education Program (CUTE). The second part of the paper deals with future prospects for inner-city teacher education and examines the challenges facing the teacher, economic factors affecting teacher supply and demand, and the desirable characteristics of inner-city teachers. The need for exposure to inner-city conditions during training is emphasized, as are the problems of language and communication, reading skills, individualized instructions, and the increased use of paraprofessional personnel.

SUBJECT AREA(S)

This paper concerns itself primarily with the training of the urban teacher, the history of such efforts, and future prospects.

INTENDED USERS AND BENEFICIARIES

The intended users of this paper are teachers, school administrators, and teacher educators concerned with improving the lives of those in the inner-city through education.

GOAL(S) OR PURPOSE(S)

This paper traces the history of a proliferation of efforts concerning the inner city, which serves as a basis for emerging programs and deals with future prospects for inner-city teacher education.

UTILIZATION OF INFORMATION RESOURCES IN PLANNING TEACHER PROFESSIONAL PREPARATION PROGRAMS

A publication providing teacher educators, educational innovators, and decisionmakers with resources to manage change

This publication is designed to provide teacher educators and educational innovators and decisionmakers with information that will help them to manage change. In the 1st section, "Pressures for Change," societal and reform pressures are identified. The 2d section, "The Institutional Imperatives," discusses finance, facilities, and curriculum as the major areas of institutional activity affecting planning for teacher education. In the 3d section, "A Macrosystem for Information Utilization," an ideal dissemination and utilization system is outlined. The 4th section, "Some Major Information Resources for Planning Teacher Education," has three subsections: (a) "The Research World, Basic and Applied Research and Development"; (b) "The Practice World: Practice Professions, Product Organizations, and Service Organizations"; and (c) "The Consumer and Government as Protector of Consumer Interest." Each citation in section 4 includes: Name of organization, address and telephone number, areas of interest, holdings, publications, and information services.

SUBJECT AREA(S)

This document focuses mainly on the management of change in teacher education.

INTENDED USERS AND BENEFICIARIES

The intended audience for this publication includes faculty members of all institutions with teacher preparation programs, elementary and secondary teachers, and cooperating teachers.

GOAL(S) OR PURPOSE(S)

The purpose of this monograph is to provide information of particular significance to small developing institutions.

INDEXES

1454

SUBJECT INDEX

This index lists product titles within the 20 subject areas of the *Catalog*. Since products cut across fields and defy simple classification, the user is advised to review multiple subject areas to identify products of interest. For example, some Basic Skills products are located in the Early Childhood Education or Educational Equity sections when their primary focus lies in these areas. Similarly, some Career Education products are included in the Guidance and Counseling section.

The following list shows the subject areas in the *Catalog*, by volume number, RD number range, and page range:

VOLUME 1

SUBJECT AREA	RD NO. RANGE	PAGE RANGE
Aesthetic Education	010 001-010 044	11 to 138
Basic Skills		
Mathematics and Science	020 001-020 039	145 to 249
Reading and Language Arts	030 001-030 041	253 to 357
Reasoning and Problem Solving	040 001-040 018	363 to 407
Early Childhood Education	050 001-050 069	415 to 550
Education and Work (Career Education)		
Administration and Staff Development	060 001-060 029	559 to 611
Career Awareness and Exploration	070 001-070 027	613 to 667
Career Counseling	080 001-080 032	669 to 733
Work Experience-Based Programs	090 001-090 010	735 to 760

VOLUME 2

SUBJECT AREA	RD NO. RANGE	PAGE RANGE
Educational Equity		
Handicapped	100 001-100 014	765 to 783
Multicultural/Bilingual	110 001-110 059	787 to 939
Sex Fairness	120 001-120 009	943 to 959
Evaluation, Measurement and Needs Assessment	130 001-130 044	967 to 1056

USER INDEX

This index lists product titles by "user." Two categories of users have been included—the target recipient and the implementer of the product. Therefore, some products may be included under more than one "user" category.

Product titles are listed under the following headings and subheadings, as indicated by developers in their product descriptions:

- Administrators:
  - Local
  - State
- Curriculum Specialists
- Guidance Counselors
- Parents, Community Groups, and the Public
- Policymakers
- Researchers
- School Board Members
- Students:
  - Preschool
  - Elementary
  - Secondary
  - Postsecondary
  - Adult/Continuing
- Teachers:
  - Preschool
  - Elementary
  - Secondary
  - Postsecondary
  - Adult/Continuing
- Teacher Educators

Product titles are listed under user categories in alphabetical order, ignoring articles and conjunctions at the beginning of the title. The RD identification number is at the end of and immediately below the product title, as shown in the examples below:

DEVELOPER/AUTHOR INDEX

This index lists each of the 660 products in the *Catalog* by its principal author and institutional developer(s). Authors are listed alphabetically by last names, and institutions by first name. Products are listed under developer/author names alphabetically by the first word in the product title, ignoring articles and conjunctions.

As shown in the examples below, the RD identification number is displayed at the end of and immediately below the title:

Adams, Doris Hill

In-Service Education for Teachers of Disadvantaged Adults
RD 200 050

Ahrens, Christine

Community Use of the ERIC System: Information Packages
RD 160 017

Allman, Katherine A.

A Reference Guide to Postsecondary Education Data Sources
RD 170 004

Statewide Measures Inventory
RD 170 006

Almy, Millie

Early Childhood Research: Second Thoughts and Next Steps
RD 050 053

Althoff, Sally A.

Preparing Teachers, Students and Citizens To Deal Constructively With the Problems and Potentialities of Aging
RD 180 018

Alward, Keith

Arranging the Classroom for Children (Part of the Flexible Learning System)
RD 050 027

Understanding and Assessing the Intellectual Development of Young Children (Part of the Flexible Learning System)
RD 050 018

American Association of Colleges for Teacher Education

A Guide to a Competency-Based Field-Centered Systems Approach to Elementary Teacher Education
RD 200 037

A Guide to a Model for the Preparation of Elementary School Teachers

GEOGRAPHIC LOCATION OF DEVELOPERS/AUTHORS INDEX

This index lists products according to the geographic location of the institutional developers and/or authors who produced the product. The index is arranged alphabetically by State and city within the State. Products having more than one author or developer are listed by the location of the primary author and the institutional developers.

Under a given city and State, products are arranged alphabetically by the first word, articles and conjunctions excluded.

As shown in the examples below, the RD identification number is displayed at the end of and immediately below the product title:

MEDIA INDEX

This index shows, in chart form, the variety and type of media required for using each of the 660 products in the *Catalog*. It lists the products by subject area in the order of their appearance in the *Catalog*, according to the following media categories:

- Book or Other Reading Material
- Film/Filmstrip
- Motion Picture
- Slides
- Transparencies
- Cassette
- Record
- Video Tape
- Computer
- Computer Terminal
- Miscellaneous (See Product Description)

A Miscellaneous category is included for those products requiring such varied "manipulables" as scissors, crayons, or Styrofoam blocks. *Catalog* users are referred to the Materials and Equipment section of the product description for specific information.

The Computer and Computer Terminal categories are included for those products requiring different types of computer software. The software for products marked "Computer" requires a computer hardware system using a batch (computer code) process mode. The software for products marked "Computer Terminal" may be used in an interactive mode.

The RD identification number appears to the right of the product title as in the examples below:

Subject/Product Title/Identification Number		Book	Film/Filmstrip	Motion Picture	Slides	Transparencies	Cassette	Record	Video Tape	Computer	Computer Terminal	Miscellaneous *
Aesthetic Education

AESTHETIC EDUCATION	7	OVERVIEW
	11	INTRODUCTION TO LIGHT (PART OF THE AESTHETIC EDUCATION PROGRAM) *A package to introduce kindergarten and primary grade students to light as a basic phenomenon*
	14	INTRODUCTION TO MOTION (PART OF THE AESTHETIC EDUCATION PROGRAM) *A learning package for young children focusing on functional and aesthetic aspects of motion*
	16	INTRODUCTION TO SOUND (PART OF THE AESTHETIC EDUCATION PROGRAM) *Materials for students in kindergarten and the primary grades to help them become aware of sounds in their everyday environment*
	19	INTRODUCTION TO SPACE (PART OF THE AESTHETIC EDUCATION PROGRAM) *An introduction for young children to what space is and how it is used in the environment*
	22	DRAMATIC CONFLICT (PART OF THE AESTHETIC EDUCATION PROGRAM) *A package to enable students in grades 1-3 to explore major elements of structuring a plot*
	25	MOVEMENT (PART OF THE AESTHETIC EDUCATION PROGRAM) *Materials to introduce 3d-grades students to movement and its expressive elements*
	28	NONVERBAL COMMUNICATION (PART OF THE AESTHETIC EDUCATION PROGRAM) *A set of materials which introduces primary students to nonverbal communication in their environment and in the theater*
	32	PART AND WHOLE (PART OF THE AESTHETIC EDUCATION PROGRAM) *A package designed to introduce students in grades K-2 to part and whole as a pervasive relationship in their lives*
	35	RHYTHM/METER (PART OF THE AESTHETIC EDUCATION PROGRAM) *A package which helps students in grades 2-4 to become familiar with rhythm and meter in music*
	38	SETTING AND ENVIRONMENT (PART OF THE AESTHETIC EDUCATION PROGRAM) *A package for 2d graders and older students which focuses on the interactive nature of people and their environment*
	41	SHAPE (PART OF THE AESTHETIC EDUCATION PROGRAM) *A package which introduces primary grade students to basic concepts of shape*
	44	SHAPE RELATIONSHIPS (PART OF THE AESTHETIC EDUCATION PROGRAM) *A package which helps primary grade students explore relationship between shapes*
	47	SHAPES AND PATTERNS (PART OF THE AESTHETIC EDUCATION PROGRAM) *A package which helps students discover the relationship of shapes to patterns*
	50	TEXTURE (PART OF THE AESTHETIC EDUCATION PROGRAM) *A package to help young children better understand the qualities of texture in their environment and in the arts*
	54	TONE COLOR (PART OF THE AESTHETIC EDUCATION PROGRAM) *A group of materials which helps students from preschool to 5th grade sharpen their perception of one quality of sound–tone color*
	57	THE ACTOR (PART OF THE AESTHETIC EDUCATION PROGRAM) *A package designed to acquaint students in grades 4-8 with actors*
	60	THE ARCHITECT (PART OF THE AESTHETIC EDUCATION PROGRAM) *A set of materials which introduces 4th- and 5th-grade students to architects and the realm of architecture*
	62	THE CHOREOGRAPHER (PART OF THE AESTHETIC EDUCATION PROGRAM) *A package which introduces 5th-grade students to the artists who create dances*
	65	THE COMPOSER (PART OF THE AESTHETIC EDUCATION PROGRAM) *A package which introduces 4th- and 5th-grade students to composers as the originators of music*

AESTHETIC EDUCATION (Continued)

68 **THE CRITICAL AUDIENCE (PART OF THE AESTHETIC EDUCATION PROGRAM)**
A set of instructional materials for grades 6-8 which explores the world of the artist's receiver, the audience

70 **THE FILMMAKER (PART OF THE AESTHETIC EDUCATION PROGRAM)**
A set of instructional materials suitable for grades 4-8 which explores the world of the filmmaker

73 **THE VISUAL ARTIST (PART OF THE AESTHETIC EDUCATION PROGRAM)**
A package suitable for grades 4-8 which introduces the visual artist as a real person

76 **WRITERS: POETS, STORYTELLERS, AND PLAYWRIGHTS (PART OF THE AESTHETIC EDUCATION PROGRAM)**
A set of instructional materials which introduces 5th- and 6th-grade students to three different kinds of writers

79 **ANALYZING CHARACTERIZATION (PART OF THE AESTHETIC EDUCATION PROGRAM)**
A package designed to help students in grades K-4 verbalize more descriptively their perceptions regarding people

82 **ARRANGING SOUNDS WITH MAGNETIC TAPES (PART OF THE AESTHETIC EDUCATION PROGRAM)**
A package which involves 3d graders and older students in the creative process

85 **CONSTRUCTING DRAMATIC PLOT (PART OF THE AESTHETIC EDUCATION PROGRAM)**
A series of games in which 3d-grade students begin to see how a playwright achieves unity in a play

88 **CREATING CHARACTERIZATION (PART OF THE AESTHETIC EDUCATION PROGRAM)**
A package used primarily with 3d graders which deals with the physical and vocal expression of emotion in the theater

91 **CREATING WITH SOUNDS AND IMAGES (PART OF THE AESTHETIC EDUCATION PROGRAM)**
A package which helps students in grades 3-4 to become aware of various means of communication

94 **CREATING WORD PICTURES (PART OF THE AESTHETIC EDUCATION PROGRAM)**
A package which encourages students in grades 2-4 to explore the English language as a tool for effective communication

97 **EXAMINING POINT OF VIEW (PART OF THE AESTHETIC EDUCATION PROGRAM)**
A package which introduces the conceptual and physical aspects of point of view to 2d graders and older students

100 **FORMING WITH MOVEMENT (PART OF THE AESTHETIC EDUCATION PROGRAM)**
A package giving 3d graders and older students an opportunity to become familiar with some elements of the art form of dance

103 **MAKING SOUNDS INTO PATTERNS (PART OF THE AESTHETIC EDUCATION PROGRAM)**
A package designed to provide primary students with some basic skills to make them more sensitive listeners to music

106 **PERCEIVING SOUND WORD PATTERNS (PART OF THE AESTHETIC EDUCATION PROGRAM)**
A package which introduces 2d-grade students to word patterns as devices used in literature

109 **RELATING SOUND AND MOVEMENT (PART OF THE AESTHETIC EDUCATION PROGRAM)**
A package intended for 2d graders which explores the relationships that exist between sounds and body movements

112 **SWRL ELEMENTARY ART PROGRAM**
A program for grades K-6 which provides resources for sequenced, systematic art instruction

115 **SWRL MUSIC PROGRAM**
A program for grades K-6 which provides resources for conducting sequential music instruction

118 **ARTS/PARTS: PERCEIVING AND ANALYZING THE ARTS (PART OF THE AESTHETIC EDUCATION PROGRAM)**
A teacher education package which deals with the arts as examples of aesthetic education

121 **THE CREATIVE PROCESS (PART OF THE AESTHETIC EDUCATION PROGRAM)**
Materials for elementary teachers emphasizing the expressive qualities of an object or experience

123 **HOW DOES A RAINBOW FEEL? AN INTRODUCTION TO AESTHETIC EDUCATION**
An overview for elementary teachers of the value of aesthetic education in the school

125 **WHAT DO YOU SAY AFTER YOU SAY "I LIKE IT"?: A METHOD OF AESTHETIC PERCEPTION (PART OF THE AESTHETIC EDUCATION PROGRAM)**
A teacher education package which is an introduction to aesthetic education concepts

129 **AESTHETIC EDUCATION LEARNING CENTERS (PART OF THE AESTHETIC EDUCATION PROGRAM)**
A cooperative community effort to develop innovative teacher education programs in aesthetic learning

133 **AESTHETICS IN THE EVERYDAY WORLD (WORKING TITLE) AND SHAPES (TELEVISION PROGRAMS) (PART OF THE AESTHETIC EDUCATION PROGRAM)**
A program with the goal of having the viewer accept aesthetic values as important to human life and society

135 **THE FIVE SENSE STORE (PART OF THE AESTHETIC EDUCATION PROGRAM)**
A traveling exhibit which provides students with a general introduction to the concepts of aesthetic education

138 **SWRL SONG RETRIEVAL SYSTEM**
An integrated, computer-assisted system to locate or analyze songs with desired characteristics

BASIC SKILLS: Mathematics and Science

141 **OVERVIEW**

145 **STORIES BY FREDERIQUE (PART OF THE COMPREHENSIVE SCHOOL MATHEMATICS PROGRAM)**
Twenty-two stories for children (ages 5-14) designed to introduce fundamental mathematics concepts in an appealing manner

147 **FILMS OF TWELVE DEMONSTRATION CLASSES TAUGHT BY FREDERIQUE (PART OF THE COMPREHENSIVE SCHOOL MATHEMATICS PROGRAM)**
A film series demonstrating a functional-relational approach to elementary school mathematics

149 **AN INTRODUCTION TO MATHEMATICS OF GRADES K TO 2 (PART OF THE COMPREHENSIVE SCHOOL MATHEMATICS PROGRAM)**
A textbook for teaching elementary mathematics education at the undergraduate level of training

152 **CSMP ELEMENTARY SCHOOL PROGRAM (K-3) (PART OF THE COMPREHENSIVE SCHOOL MATHEMATICS PROGRAM)**
A program providing a complete mathematics curriculum for students in grades K-3

156 **A SHORT COURSE IN PROBABILITY (PART OF THE COMPREHENSIVE SCHOOL MATHEMATICS PROGRAM)**
A program-oriented approach to probability for grades 7-12

158 **ELEMENTS OF MATHEMATICS (EM) PROGRAM (PART OF THE COMPREHENSIVE SCHOOL MATHEMATICS PROGRAM)**
A program to bring modern mathematics to highly verbal, well-motivated students in grades 7-12

161 **MATHEMATICS ACTIVITY PACKAGE I (MAP I) (MAY BE USED WITH MAPS II AND III OF THE EXPLORING NUMBER CONCEPTS PROGRAM)**
A sequential mathematics curriculum for 5- and 6-year-old English-speaking children from low-income communities

164 **MATHEMATICS ACTIVITY PACKAGE II (MAP II) (MAY BE USED WITH MAPS I AND III OF THE EXPLORING NUMBERS CONCEPTS PROGRAM)**
A cassette-directed package for teaching basic mathematics skills to 1st-graders from low-income communities

168 **MATHEMATICS GAMES PACKAGE (MAY BE USED WITH EXPLORING NUMBERS CONCEPTS, MAPS II AND III)**
Mathematical games to incorporate skills and concepts found in primary level mathematics programs

170 **MATHEMATICS MUSIC PACKAGE**
A multimedia package which reinforces primary mathematics instruction by associating mathematics concepts to songs

172 **FUNCTIONS PUZZLES COMPUTER ASSISTED INSTRUCTION PROGRAM (FUNPUZ)**
A program designed to give students in grades 2-12 experience in solving problems

174 **MATH FUNCTIONS COMPUTER ASSISTED INSTRUCTION PROGRAM (MATH FUNCTIONS)**
A program which teaches problem solving by an inductive method to students in grades 2-6

176 **NUMBER FACTS COMPUTER ASSISTED INSTRUCTION PROGRAM (NUMBER FACTS)**
A program to teach and drill the elementary number combinations found in addition, subtraction, multiplication, and division tables

178 **WORD PROBLEMS COMPUTER ASSISTED INSTRUCTION PROGRAM (WORD PROBLEMS)**
A program which teaches noncomputational skills involved in solving arithmetic word problems to grades 3-7

181 **DEVELOPING MATHEMATICAL PROCESSES**
A program for grades K-6 which provides an intuitive introduction to the major ideas of geometry and statistics

185 **INDIVIDUALIZED MATHEMATICS**
A program for individualized adaptive instruction including independent study for grades K-[illegible]

188 **INDIVIDUALLY PRESCRIBED INSTRUCTION IN MATHEMATICS (IPI), EDITION II**
A multimedia program for grades K-6 with planned transfer of responsibility to the student

191 **INDIVIDUALIZED MIDDLE MATHEMATICS (IMM), LEVELS I AND II**
A mathematics program allowing entry of students at individual rates and work pace

194 **METRIC MEASUREMENT**
An individualized program for students in grades 3-7 giving concrete experience in using the metric system

BASIC SKILLS: Mathematics and Science (Continued)

196 **INDIVIDUALIZED LEARNING FOR ADULTS – MATHEMATICS**
A mathematics curriculum consisting of a carefully structured continuum of skills designed to lead to a 9th-grade mathematics skill level

199 **NUMBER SKILLS PARENT TEACHING PACKAGE**
A portable package designed to teach (individually) children from grades K-3 to match, name, and count the numbers 1-10

202 **MATH COMBINATIONS – ADDITION PARENT TEACHING PACKAGE**
A portable package designed to teach individual children answers to mathematics combination facts in addition

205 **MATH COMBINATIONS – SUBTRACTION PARENT TEACHING PACKAGE**
A portable package designed to teach individual children answers to combination facts in subtraction

208 **CARRYING AND BORROWING PARENT TEACHING PACKAGE**
A package designed for individual instruction of elementary students in carrying and borrowing in addition and subtraction

211 **MATH COMBINATIONS MULTIPLICATION PARENT TEACHING PACKAGE**
A portable package designed to teach individual children answers to combination facts in multiplication

214 **MATH COMBINATIONS – DIVISION PARENT TEACHING PACKAGE**
A portable package designed to teach individual children answers to mathematics combination facts in division

217 **TIME TELLING PARENT TEACHING PACKAGE**
A portable package designed to teach individual children how to tell time to the nearest minute

220 **ELEMENTARY ARITHMETIC DIAGNOSTIC TESTING PACKAGE**
Computer-assisted package for evaluating the mathematics achievement of students in grades 3-6

222 **SWRL LEARNING MASTERY SYSTEM (LMS) FOR ADDISON-WESLEY MATHEMATICS**
A program which augments the effectiveness of the Addison-Wesley program for grades 1-6

225 **SWRL LEARNING MASTERY SYSTEM: HOUGHTON MIFFLIN MATHEMATICS**
A program which augments the effectiveness of the Houghton Mifflin mathematics program for grades 1-6

228 **SWRL PROFICIENCY VERIFICATION SYSTEM: MATH**
A testing program to be used in connection with 10 widely used mathematics text series

230 **CURRICULUM DEVELOPMENT IN ELEMENTARY MATHEMATICS: NINE PROGRAMS**
Descriptions of nine mathematics programs that grew from the education reform efforts of the 1950's

231 **GOING METRIC: AN ANALYSIS OF EXPERIENCES IN FIVE NATIONS AND THEIR IMPLICATIONS FOR U.S. EDUCATIONAL PLANNING**
A report to help planners and policymakers benefit from the metrication experiences of other countries

233 **METRIC IN-SERVICE TEACHER TRAINING: LEARNING FROM THE ENGLISH AND AUSTRALIAN EXPERIENCE**
A report which offers recommendations to assist in the planning of metric teacher-training programs

235 **MINICOURSE 5: INDIVIDUALIZING INSTRUCTION IN MATHEMATICS**
A program to help 4th- to 6th-grade teachers improve their skills in tutoring mathematics students

237 **ELEMENTARY SCIENCE INFORMATION UNIT**
A review of six science curriculums to aid school personnel in deciding which of the programs suits their own situation

239 **INDIVIDUALIZED SCIENCE (IS)**
A basal science program closely integrated with an individualized learning management system

244 **INQUIRY ROLE APPROACH (ADAPTED FOR USE WITH SILVER BURDETT'S HIGH SCHOOL PROGRAM "BIOLOGY")**
A complete instructional system for teaching secondary-level biology

247 **"MEN AND IDEAS" FILMSTRIPS SERIES**
Filmstrips which explore some of the interactions between science and society, as well as the differences among scientists as individuals

BASIC SKILLS: Reading and Language Arts

251 **OVERVIEW**

253 **SWRL/GINN SPELLING PROGRAM**
A program for conducting sequential spelling instruction for children in grades K-6

257 **SWRL/GINN COMPOSITION PROGRAM**
A program for conducting sequential composition instruction for children in grades K-6

260 **SWRL/GINN EXPRESSIVE LANGUAGE PROGRAM**
A program designed to develop the oral language and expressive skills of elementary schoolchildren

263 **SWRL/GINN BEGINNING READING PROGRAM (BRP)**
A program to help children with sequential instruction in beginners' reading, generally used in kindergarten

BASIC SKILLS: Reading and Language Arts (Continued)

266 **SWRL/GINN READING PROGRAM**
A program to assess the reading level of students in grades K-12

269 **SWRL/GINN ADVANCED READING PROGRAM**
A program used in grades 4-6 which emphasizes critical reading

272 **TEACHING STRATEGIES IN COMMUNICATION**
A package for 9th-grade students who are not succeeding in the usual language arts approaches

275 **PRE-READING SKILLS PROGRAM (PRS)**
A program which insures that children will be ready to learn to read when they begin formal reading instruction

279 **WISCONSIN DESIGN FOR READING SKILL DEVELOPMENT (WDRSD): WORD ATTACK**
A program which enables the teacher to focus instruction on specific reading development of students in grades K-6

283 **WISCONSIN DESIGN FOR READING SKILL DEVELOPMENT (WDRSD): STUDY SKILLS**
Behavioral objectives that a child must master to read maps, graphs, and tables

287 **WISCONSIN DESIGN FOR READING SKILL DEVELOPMENT (WDRSD): SELF-DIRECTED, INTERPRETIVE, AND CREATIVE READING**
The basis for a skill-oriented approach to the teaching of reading in grades K-6

290 **THE SPELLING PROOF PROGRAM (SPRUF)**
A program that requires the student to choose the correctly spelled word from a set to complete an analogy or a sentence

292 **THE DRILL AND PRACTICE SPELLING PROGRAM (DPSPEL) (PART OF THE COMPUTER ASSISTED ELEMENTARY SPELLING PROGRAM)**
A program that provides practices in spelling root words and adding prefixes and suffixes

294 **THE TRY SPELLINGS PROGRAM (TRYSPL) (PART OF THE COMPUTER ASSISTED ELEMENTARY SPELLING PROGRAM)**
A program that allows children to generate multiple spellings for a word they wish to spell and then choose one that looks correct

296 **THE SPELLING PATTERNS PROGRAM (SPLAT) (PART OF THE COMPUTER ASSISTED ELEMENTARY SPELLING PROGRAM**
A program teaching the concept that a target sound can be spelled by alternative letters or graphemes

298 **SWRL LANGUAGE ANALYSIS PACKAGE**
A computer-assisted package which enables the user to reduce textual data to a form amenable to analysis

300 **COLOR KEYS TO READING. (FORMERLY CALLED STEPPING STONES TO READING)**
A program based on the concept that symbols presented to the beginning reader must be limited

303 **SYSTEMATIC PROGRESS IN READING AND LITERATURE (SPIRAL)**
An individualized program for grades 4-6 to maximize reading comprehension and application

307 **INDIVIDUALLY PRESCRIBED INSTRUCTION IN READING (IPI READING)**
A reading program of sequenced reading skills organized into units and levels of work

310 **INDIVIDUALIZED SPELLING AND WRITING PATTERNS (ISWP)**
An individualized spelling series to enable children in grades 2-6 to master the spelling of most commonly used words

313 **THE NEW PRIMARY GRADES READING SYSTEM**
An individualized adaptive system for teaching reading skills to students in grades 1-3

317 **THE SPELLING PROGRAM**
An individualized program designed to allow students to practice and acquire spelling words at their own rate

319 **INDIVIDUALIZED LEARNING FOR ADULTS – COMMUNICATIONS SKILLS**
A program which concentrates on the systematic development of reading ability

322 **BLENDING SOUNDS PARENT TEACHING PACKAGE**
A portable package designed to teach children in the elementary grades to "sound out" words

325 **SOUND SYMBOL PARENT TEACHING PACKAGE**
A portable package designed to teach the sounds of letters to elementary schoolchildren in grades 5-12

328 **VOCABULARLY BUILDING PARENT TEACHING PACKAGE**
A portable package to increase the reading ability of students in grades 8-12

331 **WORD RECOGNITION PARENT TEACHING PACKAGE**
A portable package designed to increase the elementary schoolchild's speed in recognizing words that are not possible to sound out

334 **SWRL PROFICIENCY VERIFICATION SYSTEM: READING**
A system developed to operate in connection with 10 widely used reading text series

336 **SYSTEM FOR OBJECTIVE-BASED ASSESSMENT – READING (SOBAR)**
A program to assess the reading level of students in grades K-12

BASIC SKILLS: Reading and Language Arts (Continued)

338 **COORDINATED HELPS IN LANGUAGE DEVELOPMENT (CHILD)**
A teacher's guide to expand the verbal power of kindergarten children

340 **DIAGNOSTIC AND PRESCRIPTIVE READING INSTRUCTION PROGRAM (DPRI)**
A multimedia program to enable teachers to diagnose and correct children's specific reading problems

342 **MINICOURSE 2: DEVELOPING CHILDREN'S ORAL LANGUAGE**
A multimedia program to train teachers of grades K-3 to help students speak and think with more precision and flexibility

345 **MINICOURSE 18: TEACHING READING AS DECODING**
A self-instructional training sequence for teachers of beginning readers in grades K-3

348 **MINICOURSE 22: TEACHING READING COMPREHENSION**
A teacher training sequence to improve student comprehension in the reading process

350 **AIDS TO CURRICULUM PLANNING: ENGLISH LANGUAGE ARTS K-12**
A set of aids which are excerpts of representative curriculum guides

351 **ALTERNATIVES IN ENGLISH: A CRITICAL APPRAISAL OF ELECTIVE PROGRAMS. ERIC/RCS INFORMATION ANALYSIS SERIES: GROUP I**
A study of elective programs in English curriculums of American high schools during the last decade

352 **COMMUNICATION SKILLS ORIENTED CURRICULUM GUIDE**
A program aimed at organizing the communication skills of students in grades K-12

354 **LANGUAGE LEARNING, LANGUAGE DEVELOPMENT: A BIBLIOGRAPHY**
A reference to materials on language development and language learning for preschool children

355 **MISCUE ANALYSIS: APPLICATIONS TO READING INSTRUCTION**
A series of essays on the subject of miscue analysis

356 **RECOMMENDED ENGLISH LANGUAGE ARTS CURRICULUM GUIDES K-12 AND CRITERIA FOR PLANNING AND EVALUATION, 1974**
An annotated list of curriculum guides for schools revising their language arts programs

357 **TEACHER EFFECTIVENESS IN ELEMENTARY LANGUAGE ARTS: A PROGRESS REPORT**
A survey of recent research on teacher behaviors associated with pupil "success"

BASIC SKILLS: Reasoning and Problem Solving

359 **OVERVIEW**

363 **ACHIEVEMENT COMPETENCE TRAINING (ACT)**
A multimedia course to teach 5th- through 7th-graders a strategy for setting and achieving their own goals

367 **INVESTIGATING YOUR ENVIRONMENT**
An instructional unit allowing secondary students to select and investigate an environmental question

370 **LANGUAGE AND THINKING PROGRAM (LAT), LEVEL 1**
A program to develop skills that promote intellectual development and reasoning ability in preschoolers and 1st-graders

374 **LANGUAGE AND THINKING PROGRAM (LAT), LEVEL 1, TEACHER ORIENTATION PACKAGE**
A multimedia instructional program for teaching essential comprehension and reasoning skills to students in grades 2-6

376 **LANGUAGE AND THINKING PROGRAM (LAT), LEVEL 1, MASTERY LEARNING CRITERION TESTS**
A series of tests to evaluate student achievement on content of the LAT-1 instructional program

379 **LANGUAGE AND THINKING PROGRAM (LAT), LEVEL 2**
A program to develop critical listening skills for children in grades 2-6

382 **LANGUAGE AND THINKING PROGRAM (LAT), LEVEL 2, TEACHER ORIENTATION PACKAGE**
A package to provide orientation for teachers to the LAT-2 instructional program

384 **MAKING JUDGMENTS**
An instructional package that teaches students in grades 6-9 skills of critical thinking

386 **THE PERCEPTUAL SKILLS CURRICULUM**
A set of four programs to teach preschool children basic skills before they enter formal instructional programs

389 **SWRL/GINN INSTRUCTIONAL CONCEPTS PROGRAM (ICP)**
A program which provides resources for teaching children conceputal skills fundamental to academic achievement

392 **LOGO TEACHING MANUAL**
A self-instructional manual designed to enable students in grades 4-8 to learn computer language

394 **SERIES COMPUTER ASSISTED INSTRUCTION PROGRAM (SERIES)**
A sequenced program to give students in grades 2-12 experience in solving problems

BASIC SKILLS: Reasoning and Problem Solving (Continued)

396 **DEVELOPMENT OF HIGHER LEVEL THINKING ABILITIES (HLTA)**
An instructional system in which teachers learn strategies that increase students' abilities to solve problems

398 **FACILITATING INQUIRY IN THE CLASSROOM**
An instructional system which trains teachers in behaviors which encourage students to inquire and become autonomous learners

400 **INSTRUCTIONAL STAFF DEVELOPMENT**
A multimedia program to train teachers to exhibit behaviors which lead to inquiry-skill development in students

402 **MINICOURSE 9: HIGHER COGNITIVE QUESTIONING**
A training course for preparing teachers to help students (grades 4-8) to think carefully and logically

404 **TEACHING CHILDREN HOW TO THINK: SYNTHESIS, INTERPRETATION AND EVALUATION OF RESEARCH AND DEVELOPMENT ON CREATIVE PROBLEM SOLVING**
A guide to assist elementary teachers in material selection and development for problem solving and creativity instruction

406 **THINKING AND REASONING TEACHER DEVELOPMENT**
A teacher training kit to promote the development of children's analytic thinking and problem-solving skills

EARLY CHILDHOOD EDUCATION

411 **OVERVIEW**

415 **CLASSIFICATION AND COMMUNICATION SKILLS CURRICULUM (PART OF THE EARLY LEARNING PROGRAM)**
An individualized instructional program designed to teach preschool and kindergarten children basic skills in classification and communication

418 **QUANTIFICATION SKILLS CURRICULUM (PART OF THE EARLY LEARNING PROGRAM)**
An individualized instructional program designed to teach preschool and kindergarten children basic mathematics concepts

421 **THE EXPLORATORY LEARNING PROGRAM (PART OF THE EARLY LEARNING PROGRAM)**
A program designed to teach children, preschool to 2d grade, to integrate skills that have been learned in other structured curriculums

424 **CONCEPTS AND LANGUAGE PROGRAM**
Twelve curriculum units to stimulate intellectual and social development for low-income multiethnic children ages 5 and 6

428 **GETTING STARTED (PART OF THE CONCEPTS AND LANGUAGE COMPONENT)**
A training manual for kindergarten teachers that implements planned learning experiences for preschool children

430 **CLASSROOM MANAGEMENT, K-1 (PART OF THE CONCEPTS AND LANGUAGE COMPONENT)**
A training manual describing teacher behaviors and attitudes that create an interesting and smooth-running classroom for grades K-1

432 **DARCEE PRESCHOOL PROGRAM**
Materials for use with children from ages 3 to 5 providing planned activity sequences for preschool teachers

436 **IMPROVING MOTOR-PERCEPTUAL SKILLS (IMPS)**
A teacher's manual containing 34 activities for improving motor perception of children from ages 4 to 7

438 **LEARNING ACTIVITIES FOR USE BY CLASSROOM TEACHERS, COLLATED TO 58 DEVELOPMENTAL COMPETENCIES FOR PRESCHOOL CHILDREN (AGES 3-5)**
Learning activity cards to guide classroom activity selections for classroom teachers of children from ages 3 to 5

440 **LEARNING ACTIVITIES FOR USE BY HOME VISITORS AND PARENTS, COLLATED TO 58 COMPETENCIES FOR PRESCHOOL CHILDREN (AGES 3-5 YEARS)**
Learning activity cards to guide home visitors and parents of 3- to 5-year-olds in learning activities in the home

442 **THE SELF-SCHEDULE SYSTEM**
An instructional learning-management system to allow children to work on both structured and unstructured learning activities in one classroom setting

445 **INFANT RATING SCALES FOR USE BY CAREGIVERS IN DAYCARE CENTERS**
Eight numeric scaling instruments measuring the psychological characteristics and competencies of infants from 3 to 15 months

448 **KRISP—KANSAS REFLECTION-IMPULSIVITY SCALE FOR PRESCHOOLERS**
A test instrument which identifies those learning styles of children from ages 3 to 5-1/2 that may handicap later educational development

451 **TEST FOR THE ASSESSMENT OF BASIC SKILLS (TABS) FORM A, FORM B**
An individually administered, domain-referenced test to measure cognitive skills in children ages 4 and 5

454 **A COMPETENCY BASE FOR CURRICULUM DEVELOPMENT IN PRESCHOOL EDUCATION**
A four-volume report defining child competencies and behavioral objectives for early childhood curriculum developers

EARLY CHILDHOOD EDUCATION (Continued)

456 **A GOOD BEGINNING FOR BABIES: GUIDELINES FOR GROUP CARE**
Guidelines for maintaining quality group care for infants during the 1st year of life

458 **INTRODUCTION TO EARLY CHILDHOOD EDUCATION (PART OF THE FLEXIBLE LEARNING SYSTEM)**
A teaching manual that explains responsive education to teachers

460 **UNDERSTANDING AND ASSESSING THE INTELLECTUAL DEVELOPMENT OF YOUNG CHILDREN (PART OF THE FLEXIBLE LEARNING SYSTEM)**
Handbooks and video tapes to acquaint teachers of children from ages 4 to 8 with Piaget's theory of mental development

462 **DEVELOPING CHILDREN'S CLASSIFICATION SKILLS (PART OF THE FLEXIBLE LEARNING SYSTEM)**
A guide for teaching those working with preschool children about concept formation

464 **ENRICHING LITERATURE EXPERIENCES FOR YOUNG CHILDREN (PART OF THE FLEXIBLE LEARNING SYSTEM)**
A two-volume unit to guide teachers in teaching literature creatively to children from ages 4 to 8

466 **DEVELOPING CHILDREN'S SENSE PERCEPTION (PART OF THE FLEXIBLE LEARNING SYSTEM)**
A two-volume unit for teachers of children from grades pre-K to 3 to increase teachers' understanding of sense perception

468 **HELPING CHILDREN DEVELOP HEALTHY SELF-CONCEPTS (PART OF THE FLEXIBLE LEARNING SYSTEM)**
A learner's guide for teachers of children from grades pre-K to 3, discussing methods that can be used by a teacher to help promote healthy self-concepts in children

470 **OBSERVING AND EXTENDING CHILDREN'S PLAY ACTIVITIES (PART OF THE FLEXIBLE LEARNING SYSTEM)**
A learner's guide for teachers of children from ages 4 to 8 focusing on the importance of play to a child's growth and development

472 **PROBLEM-SOLVING WITH YOUNG CHILDREN (PART OF THE FLEXIBLE LEARNING SYSTEM)**
A two-volume unit to help adults working with children from ages 4 to 8 set up a problem-solving classroom setting

474 **TEACHING CHILDREN TO INTEGRATE LANGUAGE EXPERIENCE (PART OF THE FLEXIBLE LEARNING SYSTEM)**
A unit for teachers of grades pre-K to 3 to create a responsive language program for and with the children

476 **USING TOYS AND GAMES WITH CHILDREN (PART OF THE FLEXIBLE LEARNING SYSTEM)**
A two-volume unit to teach adults working with children from grades pre-K to 3 how to use toys and games to help children acquire cognitive skills and develop a healthy self-concept

478 **ARRANGING THE CLASSROOM FOR CHILDREN (PART OF THE FLEXIBLE LEARNING SYSTEM)**
A teacher's guide which focuses on physical aspects of a learning environment for children from ages 3 to 8

480 **MANAGING THE PRESCHOOL CLASSROOM (PART OF THE FLEXIBLE LEARNING SYSTEM)**
A learner's and instructor's guide to teach teachers of preschool children how to better manage and organize the classroom

482 **COMMUNICATING WITH PARENTS (PART OF THE FLEXIBLE LEARNING SYSTEM)**
A learner's guide to help improve communications between parents and teaching staff at all grade levels

484 **MANUAL FOR OPERATING AN INFANT CARE CENTER**
Six guides for the operation of day care centers for infants from 3 weeks to 14 months

486 **MULTIMEDIA TRAINING PACKAGE FOR PARAPROFESSIONAL TEACHERS "SETTING THE SCENE FOR GOOD CLASSROOM BEHAVIOR"**
Multimedia training package for helping paraprofessionals who work with preschool children learn basic principles of classroom arrangement and maintenance

489 **PROCEDURES FOR THE DAILY OPENING AND CLOSING OF A DAY CARE CENTER**
A checklist for monitoring the daily opening and closing routines of day care centers

491 **SCHOOL BEFORE SIX: A DIAGNOSTIC APPROACH**
A comprehensive manual of diagnostic procedures and activities for preschool children

493 **TEACHER EXPECTATIONS EARLY ELEMENTARY PROGRAM**
A three-chapter training package to help kindergarten teachers with classroom management problems that might be caused by teaching behavior

495 **HOME-ORIENTED PRESCHOOL EDUCATION (HOPE)**
A system for delivering comprehensive home-oriented preschool education for 3- to 5-year-olds in rural Appalachia

498 **HOME VISITOR TRAINING PACKAGE (HVTP)**
Materials for 2-week training sessions for beginning home visitors who will work with parents to help increase the development of their children.

501 **HOME VISITING WITH MOTHERS AND INFANTS**
A home-visiting approach to increase infant educability

503 **MATERIALS FOR INFANT DEVELOPMENT**
A description of 40 toys and other objects that can be used to promote infant development in the home

EARLY CHILDHOOD EDUCATION (Continued)

505 **MULTIMEDIA TRAINING PACKAGE FOR PARENTS "LIVING AND LEARNING IN THE HOME"**
A multimedia training package for low-income parents of preschool children for teaching their children at home

507 **PARENT/CHILD TOY-LENDING LIBRARY**
A toy library that helps parents learn how to teach problem solving skills to 3- and 4-year-old children

510 **TEACHING YOUR CHILD, A TELEVISED PARENT TRAINING PROGRAM**
A guidebook and a television program to provide basic concepts in child rearing to the parents of economically disadvantaged preschool children.

512 **TV SPOT ON READING TO YOUR CHILD**
A television spot announcement and booklet to convey basic child-rearing skills to low-income parents of preschool children

514 **CHILDREN'S FRIENDSHIPS IN SCHOOL SETTINGS**
Existing research on children's friendships in nursery and elementary school settings

515 **COGNITIVE DEVELOPMENT IN YOUNG CHILDREN: A REPORT TO TEACHERS**
A review of psychological research on cognitive development in children from ages 3 to 8 with suggestions to teachers on how to apply the research findings

517 **A COLLECTION OF PAPERS FOR TEACHERS**
Four papers on selected issues in early childhood education

518 **A COMPARISON OF PROVISIONS IN STATE AND FEDERAL STANDARDS FOR INSTITUTIONAL DAY CARE**
A comparison of State provisions for institutional day care

520 **A CROSSCULTURAL ANALYSIS OF THE CHILD CARE SYSTEM**
An overview of child care systems in the United States, Sweden, Israel, and China

521 **DAY CARE: AN ABSTRACT BIBLIOGRAPHY (SUPPLEMENT NO. 1)**
A bibliography of documented abstracts of materials in the ERIC system that relate to day care programs

522 **DISCIPLINE AND BEHAVIOR: AN ABSTRACT BIBLIOGRAPHY**
A bibliography of ERIC documents on discipline and behavior modification

523 **EARLY CHILDHOOD EDUCATION PROGRAM AND RESEARCH SUPPORT LITERATURE: A STATE OF THE ART REVIEW**
A comparison of the results of 19 early childhood programs of the 1960's

525 **EARLY CHILDHOOD INFORMATION UNIT**
A multimedia information unit that informs decisionmakers of alternative early childhood educational models for grades pre-K to 3

527 **EARLY CHILDHOOD NEWSLETTERS: A SELECTED GUIDE**
A comprehensive listing of early childhood newsletters, journals, and magazines

528 **EARLY CHILDHOOD RESEARCH: SECOND THOUGHTS AND NEXT STEPS**
An overview of early childhood research for those concerned with future planning

529 **EDUCATION FOR PARENTS OF PRESCHOOLERS: AN ABSTRACT BIBLIOGRAPHY**
Bibliography of 108 ERIC documents on parent education and involvement during children's preschool years

530 **ISSUES AND PROCEDURES IN TESTING YOUNG CHILDREN: ERIC/TM REPORT 37**
A report discussing characteristics of children and the limitations of testing when small children are examined

531 **DISCUSSION GUIDE FOR PARENT GROUPS BASED ON 58 CHILD DEVELOPMENTAL COMPETENCIES FOR USE WITH HOME-ORIENTED PRESCHOOL PROGRAMS**
Two resource documents, a parent guide and a parent coordinator guide, to increase parent effectiveness in fostering learning and development in their preschool children

533 **HEAD START AND FOLLOW THROUGH, 1972-1974: AN ERIC ABSTRACT BIBLIOGRAPHY**
A bibliography of 123 ERIC documents on the Head Start and Follow Through programs

534 **INFANT EDUCATION AND STIMULATION (BIRTH TO 3 YEARS): A BIBLIOGRAPHY**
A bibliography of research reports on infant education and stimulation

535 **CURRENT RESEARCH AND PERSPECTIVES IN OPEN EDUCATION**
A publication of selected presentations of a National Conference on Open Education

536 **MOVEMENT EDUCATION FOR PRESCHOOL PROGRAMS (NATIONAL PROGRAM ON EARLY CHILDHOOD EDUCATION)**
An illustrated discussion of physical exercise needs of preschool children

538 **NEW DIRECTIONS FOR EARLY CHILD DEVELOPMENT PROGRAMS: SOME FINDINGS FROM RESEARCH**
An overview of preschool studies and programs of the 1960's

539 **NINE MODEL PROGRAMS FOR YOUNG CHILDREN**
A two-volume survey of nine model preschool programs

541 **NOTES ON THE DISTINCTION BETWEEN EDUCATION AND EXCITEMENT**
A comparison of the educational outcomes of alternative teaching methods

EARLY CHILDHOOD EDUCATION (Continued)

542 **PARENTING MATERIALS INFORMATION CENTER (PMIC)**
A system for the collection and dissemination of parenting materials in basic child care practices

544 **PSYCHOLOGICAL PERSPECTIVES AND EARLY CHILDHOOD EDUCATION: SOME RELATIONS BETWEEN THEORY AND PRACTICE**
Three approaches to psychological programing in early childhood education

545 **RESPONSIVE CARE CLASSROOM: SOURCE BOOKS AND A HANDBOOK FOR ADMINISTRATORS**
An administrator's handbook and three sourcebooks for running a preschool for children from ages 3 to 6

547 **REVIEW AND INDEX TO TESTS AND MEASUREMENTS FOR EARLY CHILDHOOD EDUCATION**
An index and reference of 800 early childhood-assessment tests for children from birth to 8 years

549 **SELF-CONCEPT: AN ABSTRACT BIBLIOGRAPHY**
An annotated bibliography of ERIC documents dealing with development of self-concept in young children

550 **WORKING WITH PARENTS IN THE PRIMARY SCHOOL**
An annotated bibliography of ERIC documents on parent participation at the primary school level

EDUCATION AND WORK (CAREER EDUCATION): Administration and Staff Development

553 **OVERVIEW**

559 **THE ADMINISTRATION OF CAREER EDUCATION**
Products to allow an administrator to examine career education and its implications for an educational program

562 **ATTITUDES TOWARD CAREER EDUCATION**
A program to foster more favorable participant attitudes toward career education

564 **GENERAL ORIENTATION TO CAREER EDUCATION–AN INDIVIDUAL APPROACH**
An individualized approach to familiarize administrators with career education

566 **THE COMMUNITY AND SCHOOL BASED CAREER EDUCATION**
A planning guide for school practitioners who are responsible for involving the community in career education

568 **DEVELOPING LOCAL CAREER INFORMATION SYSTEMS FOR MIDDLE AND SECONDARY SCHOOLS**
A handbook for developers planning to implement a career information system

570 **AN ORIENTATION TO CAREER EDUCATION–GROUP APPROACH**
Products to provide general career education orientation to teachers and administrators

572 **STAFF AWARENESS: RACIAL, SOCIOECONOMIC, SEX STEREOTYPES, LIMITED CAREER POTENTIAL**
Products to help teachers increase their expectations of career potentials of all students

574 **STAFF DEVELOPMENT IN CAREER EDUCATION FOR THE ELEMENTARY SCHOOL**
Materials to provide general career orientation to all teachers, with special emphasis on elementary teachers

576 **STAFF DEVELOPMENT GUIDELINES FOR CAREER EDUCATION**
Guides for school personnel on the role of the inservice coordinator within career education programs

578 **STAFF DEVELOPMENT PROGRAM FOR THE IMPLEMENTATION OF CAREER EDUCATION**
Products for local school district personnel who will conduct teacher training programs in career education

580 **STAFF DEVELOPMENT PROGRAM FOR PROMOTING EFFECTIVE USE OF COMMUNITY RESOURCES IN CAREER EDUCATION**
Guides for school staff members to help generate extensive use of community resources in career education

582 **A TRAINING PROGRAM FOR THE IN-SERVICE COORDINATOR IN CAREER EDUCATION**
Training products to familiarize school personnel with functions of the inservice coordinator in career education programs

584 **TEACHER AIDES IN CAREER EDUCATION**
Guides to create awareness of potential contribution of community helpers to career education programs

586 **MANAGEMENT INFORMATION SYSTEM FOR VOCATIONAL EDUCATION (MISVE)**
A system for managers to increase accountability through the improved utilization of information

588 **MODULE DEVELOPMENT HANDBOOK (A PRODUCT OF THE PERFORMANCE-BASED PROFESSIONAL EDUCATION CURRICULA PROGRAM)**
A handbook to assist teacher educators and administrators in the development of performance-based instructional modules

590 **ORIENTATION TO MODULARIZED INSTRUCTION BOOKLET (A PRODUCT OF THE PERFORMANCE-BASED PROFESSIONAL EDUCATION CURRICULA PROGRAM)**
A booklet to assist teacher education faculties develop necessary concepts regarding performance-based instruction

EDUCATION AND WORK (CAREER EDUCATION): Administration and Staff Development (Continued)

592 **PROFESSIONAL VOCATIONAL TEACHER EDUCATION MODULES (118) (PRODUCTS OF THE PERFORMANCE-BASED PROFESSIONAL EDUCATION CURRICULA PROGRAM)**
Vocational teacher curricular materials for vocational education training

595 **CAREER EDUCATION IN THE ELEMENTARY SYSTEM**
A training course in career education in elementary schools consisting of video taped instructional units

597 **CURRICULUM CONTENT DERIVATION SYSTEM: A USER'S MANUAL OF PROCEDURES AND GUIDELINES**
A system offering curriculum developers a data-based approach to deriving program content of occupational preparation

600 **AN ANNOTATED BIBLIOGRAPHY FOR THE IMPLEMENTATION OF OCCUPATIONAL CLUSTERS**
A bibliography of documents relating to 15 Office of Education occupational clusters

601 **CAREER EDUCATION—A HUMANISTIC VIEW (PART 3 OF THE ERIC CLEARINGHOUSE ON TEACHER EDUCATION PROJECT ON CAREER EDUCATION)**
A monograph examining the career education concept

602 **CAREER EDUCATION PRODUCT INSTALLATION HANDBOOK**
A resource book to increase one's ability to formulate career education product utilization strategies

604 **CAREER INITIATION WHEN ALIENATION FROM SECONDARY SCHOOL OCCURS: A REVIEW OF THE LITERATURE**
A synthesis of ERIC and other literature on career education programs for secondary school dropouts

605 **THE CONTINUING EDUCATION UNIT**
A book to illustrate forms and procedures needed to implement a continuing education unit

606 **DIRECTORY OF VOCATIONAL INFORMATION RESOURCES IN THE UNITED STATES**
A directory of primary vocational information resources in each State

607 **EPIE CAREER EDUCATION S*E*T* (SELECTION AND EVALUATION TOOLS)**
A two-volume guide for the selection and evaluation of career education instructional materials

609 **IMPLEMENTATION OF OCCUPATIONAL CLUSTER CONCEPTS**
A narrative pertaining to the organizing and synthesizing of literature on occupational clusters

610 **THE ROLES OF THE TEACHER, THE COUNSELOR, THE COMMUNITY, AND MEDIA IN CAREER GUIDANCE AND CAREER EDUCATION: A CONCEPTUAL MODEL**
A document synthesizing ERIC and other literature on roles of teacher, counselor, community, and media in career education programs

611 **STRENGTHENING THE RELATIONSHIP OF EDUCATION AND WORK**
A synthesis of ERIC and other literature on education and work

EDUCATION AND WORK (CAREER EDUCATION): Career Awareness and Exploration

613 **CAREERS IN TECHNOLOGY**
A guide to acquaint students in grades 2-4 with machines and the concept of technology

615 **EXPLORING THE WORLD OF WORK**
A guide to acquaint students in grades 2 and 3 with occupational areas

617 **CAREER EDUCATION CONCEPT LESSON CARDS**
A program to provide career awareness to students in grades K-6

619 **BASIC MEASUREMENT AND RELATED CAREERS: A**
Material for kindergarten children on topics of time, weight, money, and length

621 **BASIC MEASUREMENT AND RELATED CAREERS: B**
Topics for 1st-graders including measuring, time, weight, money, length, and volume

623 **BASIC MEASUREMENT AND RELATED CAREERS: C**
A teacher's guide for teaching 3d- and 4th-graders to relate measurement skills to work experiences

625 **BASIC MEASUREMENT AND RELATED CAREERS: D**
A teacher's guide for teaching 3d- and 4th-graders to measure solid and liquid volume

627 **CAREERS IN VISUAL ART**
A guide to acquaint students in grades 4-6 with some great achievements in fine art

629 **CAREER EXPLORATION IN EARTH SCIENCES**
A guide to introduce students (grade 8) to the earth sciences

631 **CAREER EXPLORATION IN THE LIFE SCIENCES**
A guide to acquaint students in grades 7-9 with ecology, zoology, and medicine

633 **CAREER EXPLORATION IN THE PHYSICAL SCIENCES**
A guide to acquaint 9th-graders with chemistry, physics, geology, metallurgy, and general science

635 **ELEMENTS OF COMPUTER CAREERS**
A course teaching high school students how people operate and use computers

638 **ECONOMIC AND CAREER AWARENESS: A**
A guide to provide students in grades 1-4 with an awareness of the family as an economic unit

EDUCATION AND WORK (CAREER EDUCATION):
Career Awareness and Exploration (Continued)

640 **ECONOMIC AND CAREER AWARENESS: B**
A guide with an emphasis on consumer knowledge, for grades 1-4

642 **ECONOMIC AND CAREER AWARENESS: C**
A guide to familiarize students in grades 1-4 with basic economic terms and concepts

644 **COMMUNITY SERVICE WORKERS**
Materials to acquaint primary grade students with services performed by various workers in the community

646 **CAREER EXPLORATION THROUGH MATHEMATICS**
A guide for career education teachers helping students in grades 8-10 to develop and reinforce mathematical skills

648 **MATHEMATICS AND RELATED CAREERS: B**
A guide to help students in grades 9 and 10 to develop and reinforce mathematical skills

650 **CREATING GREETING CARDS: A BUSINESS BRINGS PLEASURE**
A guide which allows students (grades 2-4) to participate in the creation and production of greeting cards

652 **LEARNING ABOUT BUSINESS**
A guide to help primary grade students understand interrelationships among businesses, workers, and families

654 **MAKING TOYS THROUGH TEAMWORK**
A guide to acquaint students in grades 4-6 with wood construction and mass production

656 **THE SUPERMARKET**
A guide to acquaint students in grades 2-4 with the food industry

658 **THE SERVICE STATION**
A guide to acquaint 2d-graders with the service station as part of the community

660 **PEOPLE WHO WORK WITH ANIMALS**
A guide to provide primary grade students with awareness of careers available for people who work with animals

662 **PHYSICAL EDUCATION FOR TOMORROW**
Materials for preschool and primary grade students to realize self-awareness by performing basic motor skills

664 **WORKING WITH TREES**
A guide to acquaint students in grades 3 and 4 with the products and services trees provide

666 **INDIVIDUALIZED APPROACH TO INSTRUCTION IN FOUNDATION EDUCATION**
Foundation education for students entering occupational training

EDUCATION AND WORK (CAREER EDUCATION):
Career Counseling

669 **THE CAREER DEVELOPMENT SERIES (PRODUCT OF THE HOME/COMMUNITY-BASED CAREER EDUCATION MODEL III)**
Information and practical suggestions on several major areas of career development

671 **DEVELOPING CAREER-RELATED MATERIALS FOR USE WITH AND BY ADULTS (PRODUCT OF THE HOME/COMMUNITY-BASED CAREER EDUCATION MODEL III)**
A discussion of ways to gather, organize, and present data on occupational projections

673 **ATTRACTING CLIENTS TO SERVICE-ORIENTED PROGRAMS (PRODUCT OF THE HOME/COMMUNITY-BASED CAREER EDUCATION MODEL III)**
A product which discusses the principles and issues involved in advertising and promoting inservice oriented community-based career education programs

675 **DESIGNING AND OPERATING A CAREER COUNSELING SERVICE FOR ADULTS (PRODUCT OF THE HOME/COMMUNITY-BASED CAREER EDUCATION MODEL III)**
A manual to show how to plan, establish, and operate a comprehensive counseling service

677 **ESTABLISHING AND OPERATING A CAREER RESOURCE CENTER FOR ADULTS (PRODUCT OF THE HOME/COMMUNITY-BASED CAREER EDUCATION MODEL III)**
Specific guidelines for establishing a resource center of career-related materials for adults

679 **EXTERNAL DEGREE STUDY: A NEW ROUTE TO CAREERS (PRODUCT OF THE HOME/COMMUNITY-BASED CAREER EDUCATION MODEL III)**
An alternative form of postsecondary education

681 **FROM LIBERAL ARTS AND SCIENCES TO CAREERS: A GUIDE (PRODUCT OF THE HOME/COMMUNITY-BASED CAREER EDUCATION MODEL III)**
A booklet to help students to identify and develop professional competencies resulting from liberal arts studies and experiences

683 **INTEGRATING RESEARCH AND EVALUATION INTO THE OPERATION OF SERVICE-ORIENTED PROGRAMS (PRODUCT OF THE HOME/COMMUNITY-BASED CAREER EDUCATION MODEL III)**
A manual to help plan, establish, and operate a comprehensive counseling service

685 **BIBLIOGRAPHIES OF CAREER-RELATED MATERIALS (PRODUCT OF THE HOME/COMMUNITY-BASED CAREER EDUCATION MODEL III)**
A shelf collection list and a series of annotated bibliographies of career-related materials

EDUCATION AND WORK (CAREER EDUCATION): Career Counseling (Continued)

687 **REPORT ON FIFTY SELECTED CENTERS OFFERING CAREER COUNSELING SERVICES FOR WOMEN (PRODUCT OF THE HOME/COMMUNITY-BASED CAREER EDUCATION MODEL III)**
A telephone study of selected counseling centers to collect data for the purpose of improving a research and development model

689 **CHRIS BEGINS AGAIN**
A film produced to illustrate the career-related needs of adults

690 **TALKING WITH CLORAE AND ALBIE/ (WORKING TITLE)/(PRODUCT OF THE HOME/COMMUNITY-BASED CAREER EDUCATION MODEL III)**
A film to make young people aware of some of the problems and solutions encountered in the search for career training

692 **CAREER GUIDANCE UNITS**
A program to help students gain greater understanding of themselves by facilitating development of exploratory and decisionmaking skills

695 **CAREER INFORMATION SYSTEMS (CIS)**
A system designed to serve as the career information component of career education programs

698 **OPERATION GUIDANCE (AN ELEMENT OF CPSS, THE CAREER PLANNING SUPPORT SYSTEM)**
A self-help program aimed at providing high schools with the capability to improve career guidance programs

701 **COMMUNICATION AND YOU**
A teacher guide to allow intermediate students to discover the complexities of communication

704 **JUST ME**
A teacher guide for helping 1st-grade students realize that individuals are unique

706 **INSTRUCTIONAL HANDBOOK: COPING IN THE WORLD OF WORK: PRACTICE IN PROBLEM SOLVING (CPSS) (A PRODUCT OF THE CAREER PLANNING SUPPORT SYSTEM (CPSS))**
An instructional unit designed to ease the transition of 11th- and 12th-grade students from school to work

709 **MYSELF AND OTHERS AT HOME AND SCHOOL**
A teacher guide to encourage students in grades 1-3 to deal with an expanded idea of self

711 **SELF-APPRAISAL FOR DECISION MAKING AND CAREER PLANNING**
A teacher guide intended to lead the secondary-level student to self-awareness

713 **UNDERSTANDING SELF**
A teacher guide to learning experiences for students in grades 8-10 to increase self-perception and career awareness

715 **YOUR PERSONALITY, YOUR HEALTH, YOUR JOB**
A teacher guide to learning experiences for students (grades 8-11) that focus on various elements of career education

717 **SELF-DIRECTED CAREER PROGRAM (SDC)**
A vocational guidance system designed to provide effective, theoretically based guidance at low cost

720 **CAREER COUNSELING IN COMMUNITY COLLEGES**
A product that allows counselors to train themselves to reuse effective career counseling techniques

722 **CAREER GUIDANCE RESOURCE CENTER**
A guide for those who wish to implement the research center concept in career education

723 **THE COMPUTER AND GUIDANCE IN THE UNITED STATES: PAST, PRESENT, AND A POSSIBLE FUTURE**
Five available computer guidance systems

724 **LIFE CAREER PLANS: REVIEWING AND RENEWING**
A plan for helping adults review and perhaps change career plans

725 **A COMPREHENSIVE VIEW OF CAREER DEVELOPMENT**
Actual programs and practices in career guidance that clarify goals and objectives

726 **AGE-INCOME GRAPHS BY SEX FOR 336 OCCUPATIONS**
A set of graphs which forces students to consider income over the lifespan rather than just the entering salary

728 **THE CAREER DATA BOOK (INCLUDING "STUDENT'S BOOKLET")**
A resource book which provides detailed information about career plans of persons 5 years out of high school

731 **USING THE TALENT PROFILES IN COUNSELING: A SUPPLEMENT TO PROJECT TALENT'S CAREER DATA BOOK**
Suggestions for the use of TALENT profiles in counseling

733 **SOURCES OF INFLUENCE ON CAREER DECISION MAKING AND THEIR IMPACT ON CAREER ATTAINMENT: A HANDBOOK FOR COUNSELORS AND EDUCATORS (A PRODUCT OF CPSS, THE CAREER PLANNING SUPPORT SYSTEM)**
A state-of-the-art (career decisionmaking) review

EDUCATION AND WORK (CAREER EDUCATION): Work Experience-Based Programs

735 **EXPERIENCE-BASED CAREER EDUCATION (EBCE)**
An inschool and out-of-school secondary school program focused on career development and guidance

738 **EXPERIENCE-BASED CAREER EDUCATION (EBCE)**
An alternative education program that provides comprehensive learning opportunities in the community for 16- to 18-year-olds

EDUCATION AND WORK (CAREER EDUCATION): Work Experience-Based Programs (Continued)

741 **EXPERIENCE-BASED CAREER EDUCATION (EBCE AEL VERSION)**
A comprehensive alternative to traditional secondary school programs allowing students to earn credits through community experiences

745 **FAR WEST LABORATORY EXPERIENCE-BASED CAREER EDUCATION**
An experience-based alternative to traditional secondary school formats

749 **MANAGEMENT INTERNSHIPS: A NEW MODEL FOR YOUTH SOCIALIZATION AND LEARNING**
A report on increasing on-the-job training by means of internships in general work skills

751 **INDIVIDUALIZED APPROACH TO INSTRUCTION AND ANCILLARY MAINTENANCE ACTIVITIES IN FAMILY CORE CURRICULUM**
A course specifically designed as a companion to vocational training oriented toward providing "life skills"

753 **INDIVIDUALIZED APPROACH TO INSTRUCTION IN THE BUILDING TRADES AND SERVICES**
A curriculum designed for those students planning to enter the building trades

756 **INDIVIDUALIZED APPROACH TO INSTRUCTION IN AUTOMOTIVE AND SMALL ENGINE REPAIR**
A method to teach concepts and manipulative tasks related to the repair of automobiles and small engines

757 **INDIVIDUALIZED APPROACH TO INSTRUCTION IN MARKETING AND TOURISM**
A set of courses to train students to enter the job market in marketing and tourism

759 **INDIVIDUALIZED APPROACH TO INSTRUCTION IN OFFICE EDUCATION**
A learning system emphasizing training for entry occupations in office education

VOLUME 2

EDUCATIONAL EQUITY: Handicapped

763 **OVERVIEW**

765 **SWRL SPEECH ARTICULATION KITS**
A kit designed to correct four common speech articulation problems found among children in the primary grades

767 **WEEKLY MEAL SEQUENCE PROGRAM (A PROGRAM TO TEACH FOOD PREPARATION SKILLS TO THE RETARDED)**
A program to teach food preparation skills to handicapped children

769 **LIPPINCOTT'S COMPREHENSION QUESTIONS (SIX BOOKS, D THROUGH I)**
A set of books to evaluate students' literal and inferential comprehension skills

771 **SPECIAL EDITION FOR HEARING IMPAIRED STUDENTS, 1973 STANFORD ACHIEVEMENT TESTS**
A complete achievement test battery adopted for use with hearing-impaired students

773 **LINGUISTICS AND THE LANGUAGE OF DEAF CHILDREN**
A text introducing transformational syntax to teachers of deaf children

774 **THE TRAINING PROGRAM FOR PARENTS AND THERAPISTS OF AUTISTIC CHILDREN (PART OF THE INSTRUCTIONAL SYSTEMS PROGRAM)**
A program to develop instructional programs to remedy the behavioral and learning disorders of autistic children

776 **CONFIGURATIONS OF CHANGE: THE INTEGRATION OF MILDLY HANDICAPPED CHILDREN INTO THE REGULAR CLASSSROOM**
Validated approaches to "mainstreaming"

777 **INTEGRATING HANDICAPPED CHILDREN INTO REGULAR CLASSROOMS (WITH ABSTRACT BIBLIOGRAPHY)**
A discussion of the desirability of integrating handicapped children into regular classrooms

778 **PARENTS AS TEACHERS: A RATIONALE FOR INVOLVING PARENTS IN THE EDUCATION OF YOUNG HANDICAPPED CHILDREN**
A review describing a set of adverse factors that may hamper the development of the handicapped child

779 **UNDERSTANDING YOUNG CHILDREN: EMOTIONAL AND BEHAVIORAL DEVELOPMENT AND DISABILITIES**
A booklet for training regular preschool teachers who work with emotionally and behaviorally handicapped children

780 **UNDERSTANDING YOUNG CHILDREN: LANGUAGE DEVELOPMENT AND LANGUAGE DISABILITIES**
A booklet for training teachers and aides who work with children with language disabilities in their regular classrooms

781 **UNDERSTANDING YOUNG CHILDREN: LEARNING DEVELOPMENT AND LEARNING DISABILITIES**
A booklet for training teachers and aides who work with children with learning disabilities in their regular classrooms to recognize how the factors of heredity, maturation, and environment determine the degree of development an individual will achieve

782 **UNDERSTANDING YOUNG CHILDREN: INTELLECTUAL DEVELOPMENT AND INTELLECTUAL DISABILITIES**
A booklet for training regular classroom teachers and aides who work with children with intellectual disabilities

783 **UNDERSTANDING YOUNG CHILDREN: THE HANDICAPPED CHILD IN THE NORMAL PRESCHOOL CLASS**
A booklet for training teachers and aides who work with aurally, visually, and physically handicapped children

EDUCATIONAL EQUITY: Multicultural/ Bilingual Education

785 **OVERVIEW**

787 **TEACHER INSERVICE TRAINING PROGRAM (PART OF THE ALASKA SATELLITE DEMONSTRATION PROGRAM)**
A series of video programs which provides information on teaching techniques for teachers in rural Alaska

789 **ALASKA NATIVE MAGAZINE PROGRAM (PART OF THE ALASKA SATELLITE DEMONSTRATION PROGRAM)**
A series of video programs, each designed around a specific topic, relevant to Alaska's adult native population

791 **HEALTH EDUCATION PROGRAM (PART OF THE ALASKA SATELLITE DEMONSTRATION PROGRAM)**
A series of video programs, modeled after "Sesame Street," which gives attention to the health problems of 8- to 10-year-old Alaskan children

793 **BASIC ORAL LANGUAGE DEVELOPMENT PROGRAM (BOLD) (PART OF THE ALASKA SATELLITE DEMONSTRATION PROGRAM)**
A series of video programs designed specifically to meet the language arts needs of 5- to 7-year-old native Alaskan children

796 **ALASKAN READERS (ALASKAN READING AND LANGUAGE DEVELOPMENT PROGRAM)**
A comprehensive program for use with rural Alaskan children, grades 1-3, who speak English as a second language

798 **COMMUNICATION ARTS PROGRAM I (CAP I)**
An educational system to advance the communication arts of 3- to 9-year-old children from minority backgrounds

802 **SWRL ENGLISH LANGUAGE AND CONCEPTS PROGRAM FOR SPANISH-SPEAKING CHILDREN (LCS)**
A performance-based program which teaches Spanish-speaking children, grades K-1 to communicate effectively in the English language

805 **BILINGUAL EARLY CHILDHOOD PROGRAM, LEVEL I**
A comprehensive learning system for 3-year-old Spanish-speaking children, their teachers, and parents

809 **BILINGUAL EARLY CHILDHOOD PROGRAM, LEVEL I - THREE YEAR OLDS, INSTRUCTIONAL MATERIALS**
A developmentally oriented program which emphasizes mastery of skills and concepts in 3-year-old Spanish-speaking children

812 **BILINGUAL EARLY CHILDHOOD PROGRAM, LEVEL I, STAFF DEVELOPMENT**
A comprehensive model for teacher preservice and inservice training

815 **BILINGUAL EARLY CHILDHOOD PROGRAM, LEVEL I, PARENT INVOLVEMENT**
A program designed to be used by parents at home to reinforce the materials used by children in school

817 **BILINGUAL EARLY CHILDHOOD PROGRAM (BECP), LEVEL II**
A comprehensive learning system for 4-year-old Spanish-speaking children, their teachers, and parents

821 **BILINGUAL EARLY CHILDHOOD PROGRAM, LEVEL II, INSTRUCTIONAL MATERIALS**
A developmentally oriented program concerned with mastery of skills and concepts among 4-year-old Spanish-speaking children

824 **BILINGUAL EARLY CHILDHOOD PROGRAM, LEVEL II, STAFF DEVELOPMENT**
A comprehensive model for teacher training, both preservice and inservice

827 **BILINGUAL EARLY CHILDHOOD PROGRAM, LEVEL II, PARENT INVOLVEMENT**
A set of parent activities designed for use at home to reinforce what the children have learned in school

829 **BILINGUAL EARLY CHILDHOOD PROGRAM, LEVEL III**
A comprehensive learning system for 5-year-old Spanish-speaking children, their teachers, and parents

833 **BILINGUAL EARLY CHILDHOOD PROGRAM (BECP), LEVEL III, INSTRUCTIONAL MATERIALS**
A developmentally oriented program for 5-year-old Spanish-speaking children, concerned with mastery of skills and concepts in eight major areas

836 **BILINGUAL EARLY CHILDHOOD PROGRAM (BECP), LEVEL III STAFF DEVELOPMENT**
A comprehensive model for teacher training, both preservice and inservice

839 **PARENT INVOLVEMENT III**
A system of parent activities to be used at home to reinforce what the children learn in school

841 **PASO A PASO CON LOS NINOS (PART OF THE EARLY CHILDHOOD PROGRAM)**
A collection of songs and dances which can supplement any preschool program

843 **BILINGUAL KINDERGARTEN SYSTEM**
A comprehensive multimedia program to make Spanish-speaking preschool children functionally bilingual

847 **BILINGUAL KINDERGARTEN INSTRUCTIONAL MATERIALS**
A multimedia curriculum to teach 5-year-old Spanish-speaking children English while strengthening their present Spanish-language skills

850 **BILINGUAL KINDERGARTEN PARENT INVOLVEMENT**
A program to aid parents in complementing the school experience

EDUCATIONAL EQUITY: Multicultural/Bilingual Education (Continued)

853 **BILINGUAL KINDERGARTEN STAFF DEVELOPMENT**
An extensive multimedia product designed for preservice and inservice training

856 **VIVIENDO Y APRENDIENDO EN EL HOGAR**
A multimedia training package for Spanish-speaking, low-income parents of preschool children

859 **BILINGUAL ORAL LANGUAGE AND READING (BOLAR), GRADE 1**
A comprehensive program including English and Spanish components

863 **BILINGUAL ORAL LANGUAGE AND READING (BOLAR), ENGLISH ORAL LANGUAGE, GRADE 1**
A program which employs a modified version of the audiolingual approach to English-as-a-second-language instruction

866 **SPANISH ORAL LANGUAGE, GRADE 1 (PART OF BILINGUAL ORAL LANGUAGE AND READING PROGRAM)**
A program which employs a situational approach in which Spanish is used as a means for conveying ideas and information in meaningful contexts

869 **BILINGUAL ORAL LANGUAGE AND READING (BOLAR), ENGLISH READING, GRADE 1**
A program which makes use of the most relevant features of language experience: Sight reading and phonics

872 **SPANISH READING, GRADE 1 (PART OF THE BILINGUAL ORAL LANGUAGE AND READING PROGRAM)**
A systematic program of language experience based on the premise that children will read about things that are of interest to them

875 **BILINGUAL ORAL LANGUAGE AND READING (BOLAR), GRADE 2**
A comprehensive program composed of two carefully sequenced and interrelated English and Spanish components

878 **BILINGUAL ORAL LANGUAGE AND READING (BOLAR), ENGLISH ORAL LANGUAGE, GRADE 2**
A program which employs a modified version of the audiolingual approach to English-as-a-second-language instruction for learners in grade 2

881 **BILINGUAL ORAL LANGUAGE AND READING (BOLAR), SPANISH ORAL LANGUAGE, GRADE 2**
A program which employs a situational approach in which Spanish is used as a means for conveying ideas in meaningful contexts

884 **BILINGUAL ORAL LANGUAGE AND READING (BOLAR), ENGLISH READING, GRADE 2**
A product which makes use of the most relevant features of language experience: Sight reading and phonics for learners in grade 2

887 **BILINGUAL ORAL LANGUAGE AND READING (BOLAR), SPANISH READING, GRADE 2**
A product which makes use of the most relevant features of both the language experience and the sound-to-symbol approaches to reading instruction in grade 2

890 **ABE READINESS MATERIALS**
Bilingual instructional packages to fill the void in materials available for teaching undereducated Mexican-American adults

892 **SYSTEMS APPROACH TO LESSON PLANNING PACKAGE**
Teacher training materials in conversion of written objectives to lesson plans

894 **EMPLEEN INGLES**
A series of 31 films designed to teach English to Spanish-speaking adults

896 **PERFORMANCE OBJECTIVES PACKAGE**
A product developed to provide teachers with a tool by which they can determine what their adult students want to learn

898 **BILINGUAL BALANCE TESTS**
A set of comprehensive tests to measure the Spanish and English language skills of students, grades 1-7, coming from homes where only Spanish is spoken

900 **BIDIALECTAL BALANCE TESTS**
A set of comprehensive tests to measure the language skills of students grades 1-6 coming from homes where standard English is not spoken

902 **SOBER-ESPANOL**
An objectives-based system to assess reading achievement in Spanish, for students in grades K-3

904 **BLACK DIALECTS AND READING**
A book for teachers of black children to improve the effectiveness of language and reading instruction

905 **DIALECTS AND DIALECT LEARNING**
A self-contained inservice program for elementary and secondary schoolteachers aimed toward teacher understanding of nonstandard dialects

907 **ANALYZING CHILDREN'S BOOKS WITH A CHICANO PERSPECTIVE (PART OF THE FLEXIBLE LEARNING SYSTEM)**
A unit to prepare teachers of Chicano children ages 4-8 to foster the self- and community concept of the Chicano child

909 **SELECTING CHILDREN'S BOOKS WITH A BLACK PERSPECTIVE (PART OF THE FLEXIBLE LEARNING SYSTEM)**
A unit to prepare teachers of black children, K-4, to choose texts appropriate to the black experience

911 **CONTENT ANALYSIS OF TEXTBOOKS FOR BLACK STUDENTS, GRADES 1-3**
A self-instructional guide for teachers who wish to identify cultural bias in school materials

914 **LEARNING A STANDARD ENGLISH**
An individualized programed course for teachers who wish to individualize the teaching of standard English to nonstandard English speakers in grades K-14

EDUCATIONAL EQUITY: Multicultural/ Bilingual Education (Continued)

917 **TEACHING A STANDARD ENGLISH TO SPEAKERS OF OTHER DIALECTS**
A self-contained, 1-day workshop for English and language arts teachers

919 **TEACHING WRITING TO SPEAKERS OF NONSTANDARD DIALECTS**
An inservice or preservice course containing programs in a variety of self-correction and self-pacing formats

922 **ENGLISH AS A SECOND LANGUAGE PACKAGE**
A product designed to aid the teacher to relate the instruction to the specific needs of the students

924 **THINKING AND REASONING GAMES (PART OF THE THINKING AND REASONING PROGRAM)**
Three teacher training units which enable teachers to act as effective facilitators for children in an independent, game-oriented learning environment

927 **THE GAME CENTER (PART OF THE THINKING AND REASONING PROGRAM)**
A color film to encourage children in grades K-2 to cooperate in a game-learning environment

929 **PREPARING TEACHERS FOR MEXICAN AMERICAN CHILDREN**
A document to help teachers understand the learning problems of Mexican-American children

930 **PRACTICE-CENTERED TEACHER TRAINING: STANDARD ENGLISH FOR SPEAKERS OF NONSTANDARD DIALECTS**
A manual for training teachers of standard English to understand speakers of nonstandard dialects

932 **MULTIMEDIA TRAINING PACKAGE FOR SPANISH SPEAKING PARAPROFESSIONAL TEACHERS: "EL ARREGLO DE LA SALA DE CLASE PARA BUEN COMPORTAMIENTO"**
A multimedia training package for Spanish-speaking, low-income paraprofessional teachers of preschool children

935 **THE IMPLICATIONS OF BILINGUAL EDUCATION FOR DEVELOPING MULTICULTURAL SENSITIVITY THROUGH TEACHER EDUCATION**
An aid for teachers who are sensitive to the cultural differences of their pupils

936 **CONFRONTATION: HUMAN RELATIONS TRAINING UNIT**
A set of films to aid teachers in analyzing specific interpersonal race-related problems in their school

939 **TRANSCULTURAL COUNSELING: NEEDS, PROGRAMS, AND TECHNIQUES**
An analysis of literature concerning the counseling needs of minority groups

EDUCATIONAL EQUITY: Sex Fairness

941 **OVERVIEW**

943 **AFFIRMATIVE ACTION: WOMEN'S RIGHTS ON CAMPUS, REPORT NO. 6**
An examination of laws governing affirmative action programs and sex discrimination on campus

944 **GIRLS AT 12 (PART OF THE ROLE OF WOMEN IN AMERICAN SOCIETY PROJECT)**
A film for grades 10-12 on the impact of sex role stereotyping on career choice

947 **PARENT-STUDENT HANDBOOK ON SEX BIAS AND STEREOTYPING: IMPLICATIONS FOR CAREER PLANS (A PRODUCT OF CPSS, THE CAREER PLANNING SUPPORT SYSTEM)**
A resource for parents of high school students on techniques for helping their children become aware of sex bias in the career world

949 **PROTOCOLS ON THE PROCESS OF CHANGE (SEX ROLE STEREOTYPING IN SCHOOLS)**
Two films to demonstrate how to bring about changes in stereotyped thinking in student career choice

952 **PROTOCOLS ON SEX ROLE STEREOTYPING IN SCHOOLS**
Three films to increase awareness of sex role stereotyping

955 **SEX ROLE DEVELOPMENT IN YOUNG CHILDREN: AN ABSTRACT BIBLIOGRAPHY**
A bibliography of materials in the ERIC system about recent research on sex role development in young children

956 **SEX ROLE AND PUPIL ROLE IN EARLY CHILDHOOD EDUCATION**
A paper on the interaction of sex role with pupil role in early childhood settings

957 **SOUNDS OF CHANGE: A REPORT ON TRAINING IN COUNSELING AND PROGRAMMING FOR WOMEN'S CAREER OPPORTUNITIES**
A report on a workshop for adult women planning to return to work

958 **WOMEN AND THE WORLD OF WORK (PRODUCT OF THE HOME/COMMUNITY-BASED CAREER EDUCATION MODEL III)**
A manual to help women in their career development

EVALUATION, MEASUREMENT, AND NEEDS ASSESSMENT

963 **OVERVIEW**

967 **CSE ELEMENTARY SCHOOL EVALUATION KIT: NEEDS ASSESSMENT**
The "consultant-in-a-box" for school personnel responsible for program evaluations

EVALUATION, MEASUREMENT, AND NEEDS ASSESSMENT (Continued)

970 **CSE ELEMENTARY SCHOOL FORMATIVE EVALUATION KIT**
A comprehensive unit including detailed instructions for each step and formation evaluation of a school program with specific learner objectives

972 **EVALUATION WORKSHOP I: AN ORIENTATION (EW-I)**
A set of highly structured training materials focusing on the major steps and components in the evaluation of educational programs

975 **EVALUATION WORKSHOP II: NEEDS ASSESSMENT (EW-II)**
A set of highly structured training materials focusing on the major steps and components of a needs assessment project

978 **CSE PRESCHOOL/KINDERGARTEN HIERARCHICAL OBJECTIVES CHARTS**
A set of charts outlining the goals and objectives of preschool and kindergarten education

980 **CSE ELEMENTARY SCHOOL HIERARCHICAL OBJECTIVES CHARTS**
A set of charts outlining 145 goals and objectives of elementary education

983 **CSE/RBS TEST EVALUATIONS: TEST OF HIGHER-ORDER COGNITIVE, AFFECTIVE, AND INTERPERSONAL SKILLS**
An evaluation of 2,610 scales measuring skills in the higher order cognitive, affective, and interpersonal areas

985 **CSE-ECRC PRESCHOOL/KINDERGARTEN TEST EVALUATIONS**
Evaluations of the most commonly used measures of school achievement

987 **CSE ELEMENTARY SCHOOL TEST EVALUATIONS**
Evaluations of standardized achievement tests in all elementary school subject areas

989 **CSE SECONDARY SCHOOL TEST EVALUATIONS**
A three-volume kit which aids school personnel in the selection of testing measurements relative to school program goals

991 **CSE ELEMENTARY SCHOOL PROGRAM PLANNING KIT**
Instructional planning materials for elementary school staff

994 **DEVELOPMENT, DISSEMINATION, AND EVALUATION (DD&E) ASSESSMENT BATTERY**
A model assessment system for competence-based professional training

997 **EVALUATION FOR PROGRAM IMPROVEMENT**
Training materials for school personnel concerned with providing educational opportunities for children

999 **PUPIL-PERCEIVED NEEDS ASSESSMENT PACKAGE**
A multimedia package to aid in the design and implementation of an assessment of school needs as perceived by pupils

1001 **PUPIL ASSESSMENT SYSTEM**
Instruments to assess six dimensions of elementary and junior high school student achievement, attitudinal, and behavioral development

1004 **HANDBOOK OF COMPREHENSIVE PLANNING IN SCHOOLS**
A handbook designed to assist administrators in collecting data on the results of the instructional process rather than to test students in the traditional sense

1006 **SCHOOL PLANNING, EVALUATION, AND COMMUNICATION SYSTEM (SPECS)**
A set of processes for collecting and analyzing data describing school system outcomes, processes, and costs

1008 **A SYSTEM FOR ASSESSING THE STAGES OF CONCERN OF INNOVATION USERS (THE S OF C DIMENSION OF THE CONCERNS-BASED ADOPTION MODEL [CBAM])**
An instrument to measure an individual's concern regarding innovations

1010 **A SYSTEM FOR ASSESSING THE LEVELS OF USE OF INNOVATION USERS (THE L OF U DIMENSION OF THE CONCERNS-BASED ADOPTION MODEL [CBAM])**
An instrument to determine an individual's ability to identify and utilize innovative techniques

1013 **TWO INSTRUMENTS FOR DIAGNOSING USER SYSTEM READINESS FOR INNOVATIVE ADOPTION**
Two checklists for use by educational change agents attempting to measure an organization's potential for change

1015 **AN ADMINISTRATOR'S HANDBOOK ON CURRICULUM EVALUATION**
A handbook to assist school district administrators in their efforts to evaluate pilot and ongoing programs of management direction with text, examples, and worksheets for a model school district evaluation program

1017 **COMMUNITY PERCEIVED NEEDS ASSESSMENT**
A step-by-step guide for administrators who wish to collect data about community concerns and perceptions of the school and individual school programs

1019 **EVALUATING SCHOOL PERSONNEL TODAY**
A review of the literature on evaluation stored in the ERIC system

1020 **MODEL TRAINING PROGRAM IN QUALITATIVE EDUCATIONAL EVALUATION**
An introduction to the basics of educational evaluation

1021 **SCHOOL DISTRICT PLANNING GUIDE FOR CHANGE**
A kit designed to lead a curriculum planning committee through the steps required to plan curriculum improvement

EVALUATION, MEASUREMENT, AND NEEDS ASSESSMENT (Continued)

1023 **A RADICAL AND REGRESSIVE SOLUTION TO THE PROBLEM OF EVALUATION**
A review of two major advances in preschool strategy, which proposes another evaluation approach

1024 **ACADEMIC AND SOCIAL BEHAVIOR ASSESSMENT KIT**
A system which allows relatively untrained personnel to systematically assess student performance

1027 **ASSESSMENT OF STUDENT ATTITUDES TOWARD LEARNING ENVIRONMENTS SCALE (ASA)**
An instrument measuring secondary students' attitudes toward a variety of traditional and nontraditional learning environments

1029 **COLORED BLOCKS TEST OF BASIC COGNITIVE LEVEL**
A language/culture free measure of Piagetian stages of development

1031 **A COMPUTER PROGRAM FOR ASSESSING "TRUE" STUDENT LEARNING GAINS AND THEIR RELATION TO TEACHER AND STUDENT CHARACTERISTICS**
A statistical package computing student gain scores and correlations between these scores and other pupil or teacher data

1033 **PSYCHOSOCIAL MATURITY (PSM) INVENTORY**
A self-report inventory measuring the psychological maturity of adolescents, ages 11-18

1036 **PURDUE SELF CONCEPT SCALE FOR PRIMARY GRADE CHILDREN**
A paper-and-pencil instrument for measuring self-esteem as related to physical, social, and academic skills

1037 **PURDUE SOCIAL ATTITUDE SCALES FOR PRIMARY GRADE CHILDREN**
A paper-and-pencil instrument for measuring attitudes towards peers, school, home, and community

1039 **RACIAL ATTITUDES SURVEY INSTRUMENT**
An instrument which measures student racial prejudices as a function of inschool interaction

1041 **CLASSROOM OBSERVATION SYSTEM**
A set of instruments measuring attitudes and interpersonal behavior of teachers and students

1044 **PEER EVALUATION TO IMPROVE TEACHING**
A text and workbook presenting innovative methods for evaluating teacher performance

1046 **THE TEACHER CONCERNS CHECKLIST (TCCL)**
A Likert Scale instrument which measures teacher motivations

1048 **TEACHER ASSESSMENT SYSTEM**
An assessment system using self-report instruments to give personalized feedback to each teacher

1050 **TEACHER AFFECTIVE SENSITIVITY SCALE (TASS)**
A validated simulation device measuring a teacher's ability to identify verbal and nonverbal emotions expressed by a student

1052 **ISSUES AND PROCEDURES IN THE DEVELOPMENT OF CRITERION REFERENCED TESTS: ERIC/TM REPORT 26**
A paper providing a nontechnical discussion of issues and procedures in the development and use of criterion-referenced tests

1053 **OPENING INSTITUTIONAL LEDGER BOOKS—A CHALLENGE TO EDUCATIONAL LEADERSHIP: ERIC/TM REPORT 28**
Methods of reporting test results to audiences lacking sophistication in measurement

1054 **PROCEDURES AND ISSUES IN THE MEASUREMENT OF ATTITUDES: ERIC/TM REPORT 30**
A guide to the design, construction, scoring, and interpretation of original scales to measure attitudes

1055 **A COLLECTION OF CRITERION REFERENCED TESTS: ERIC/TM REPORT 31**
An annotated bibliography of 21 criterion-referenced tests

1056 **EVALUATION DESIGNS FOR PRACTITIONERS: ERIC/TM REPORT 35**
Four evaluation designs used in school inservice settings

FINANCE, PRODUCTIVITY, AND MANAGEMENT

1059 **OVERVIEW**

1061 **COST-EFFECTIVENESS GUIDE FOR ADMINISTRATORS**
A handbook for a cost/benefit analysis of an alternative curriculum

1063 **COST EFFECTIVENESS TECHNIQUE**
A cost-effectiveness model for assessment of a basic elementary school skills curriculum

1065 **HANDBOOK OF ORGANIZATION DEVELOPMENT IN SCHOOLS**
Methods to plan and implement change in a school organization

1068 **HOW TO INVENTORY ORGANIZATIONAL NEEDS**
A discussion of implementation of school improvement through setting goals, selecting curriculum, and implementing and evaluating programs

1070 **PLANNING PROGRAM IMPLEMENTATION: A PROCESS GUIDE**
A handbook outlining major tasks to be considered when developing program implementation plans

1072 **ATTENDANCE MONITORING SYSTEM (AMS)**
A documented computer system to prepare daily and cumulative attendance reports

FINANCE, PRODUCTIVITY, AND MANAGEMENT (Continued)

1074 **SYSTEM APPROACH FOR EDUCATION (SAFE)**
A competency-based instructional system which provides materials for 36 hours of workshops in simulated problem solving through system analysis and synthesis

1076 **INDIVIDUALLY GUIDED EDUCATION (IGE)**
An alternative form of public schooling which focuses on student development through individualized curriculum and instruction

1080 **ARIOLE PLANNING KIT**
A self-instructional educational planning kit for practicing educators and students of education

1082 **DATA MANAGEMENT AND DECISION-MAKING**
Instructional materials designed to acquaint educational administrators with the applications of operations research to educational administration

1085 **RELEVANT EDUCATIONAL APPLICATIONS OF COMPUTER TECHNOLOGY (REACT) COMPUTERS IN EDUCATION: A SURVEY COURSE I: COMPUTERS IN EDUCATION: A SURVEY**
A training course to introduce school personnel to the potential applications of computer technology to their field

1087 **RELEVANT EDUCATIONAL APPLICATIONS OF COMPUTER TECHNOLOGY FOR TEACHERS (REACT) COURSE II: TEACHERS: COMPUTER-ORIENTED CURRICULUM**
A training course to provide teachers with specific examples of methods of integrating computer technology in business, mathematics, and science curriculums

1089 **RELEVANT EDUCATIONAL APPLICATIONS OF COMPUTER TECHNOLOGY FOR ADMINISTRATORS (REACT) COURSE III: COMPUTER APPLICATIONS FOR ADMINISTRATORS**
A training course to allow administrators to examine the benefits and limitations of a computerized data management system

1091 **DESIGNING INSTRUCTIONAL PROGRAMS**
A training package for team activities in workshops, college courses, and school settings

1093 **DIAGNOSTIC SURVEY FOR LEADERSHIP IMPROVEMENT (DSLI)**
A 52-item survey for assessing discrepancies between staff and student needs and organizational demands

1096 **ERNSTSPIEL TASK GROUP COMMUNICATIONS KIT**
An eight-segment kit for developing individual skills in communications and interpersonal relationships

1098 **INTERPERSONAL COMMUNICATIONS (IPC)**
A program package kit which focuses on the concepts and skills of interpersonal communications in the classroom, community, and one-to-one situations

1101 **INTERPERSONAL INFLUENCE**
A 20-unit training program designed to increase participant awareness of the consequences of personal communications style on the process of interpersonal influence

1104 **ORGANIZATION DEVELOPMENT: BUILDING HUMAN SYSTEMS IN SCHOOLS**
An introduction to organizational development theory and practice

1106 **ORGANIZATION DEVELOPMENT IN SCHOOLS (AN AUDIO SLIDE PRESENTATION)**
A slide show on how the school community can serve as a source of innovative programs in the schools

1107 **PROJECT MANAGEMENT BASIC PRINCIPLES**
A multimedia, self-instructional package to improve school-personnel-project-management techniques

1110 **PREPARING EDUCATIONAL TRAINING CONSULTANTS: SKILLS TRAINING (PETC-I)**
Two-week workshop to train participants in diagnosing individual and group needs in the process skills of goal setting, communicating, and decisionmaking

1113 **PREPARING EDUCATIONAL TRAINING CONSULTANTS: CONSULTING (PETC-II)**
The second part in a series of three instructional programs designed to introduce participants to comprehensive diagnostic and intervention models which facilitate instructional or organizational innovation

1116 **PREPARING EDUCATIONAL TRAINING CONSULTANTS: ORGANIZATIONAL DEVELOPMENT (PETC-III)**
An 8-month workshop and inservice training program designed to develop individual skills in designing and maintaining organization change

1119 **PROJECT MANAGEMENT EXECUTIVE ORIENTATION**
A multimedia training product to introduce top-level school administrators to the concepts and techniques of project management

1122 **PROPOSAL DEVELOPMENT**
An individualized package to train school administrators and teachers in the techniques of obtaining approval and financial support for educational activities

1124 **RURAL FUTURES DEVELOPMENT STRATEGY DESCRIPTIONS**
Four types of descriptions of strategy to help people in rural communities regain self-determination and local control

1127 **RURAL FUTURES DEVELOPMENT GUIDE FOR SUPPORT AGENCIES**
A guide for regional or State educational staff providing support for educational change in a rural setting

FINANCE, PRODUCTIVITY, AND MANAGEMENT (Continued)

1130 **RURAL FUTURES DEVELOPMENT GUIDE FOR SCHOOL BOARDS**
A handbook for school-board-member participation in educational problem solving in a rural community

1132 **RURAL FUTURES DEVELOPMENT GUIDE FOR SCHOOLS**
A handbook for community groups participating in planning and implementing educational improvements in a rural community

1135 **RURAL FUTURES DEVELOPMENT NOTEBOOK FOR SCHOOL-COMMUNITY GROUPS**
A handbook for those who work in educational problem solving in rural communities

1138 **RURAL FUTURES DEVELOPMENT GUIDE FOR TRAINING SCHOOL-COMMUNITY PROCESS FACILITATORS**
A guide for the trainers of external change agents who are to facilitate educational improvement in a rural community

1140 **RURAL FUTURES DEVELOPMENT MANUAL FOR SCHOOL-COMMUNITY PROCESS FACILITATORS**
Information, guidelines, and resources for those facilitating educational problem solving in rural communities

1143 **RESEARCH UTILIZING PROBLEM SOLVING (RUPS)**
A training package to develop problem-solving skills of administrators and teachers

1147 **SOCIAL CONFLICT AND NEGOTIATIVE PROBLEM SOLVING (NPS)**
A 25-hour series of structured experienced-based workshops to develop skills, personnel and organizational insights required for bargaining and negotiation

1150 **SWRL INSTRUCTIONAL DEVELOPMENT CONTROL AND MONITORING SYSTEM (IDCMS)**
A minicomputer and software system designed to facilitate research and development on teaching and learning

1152 **SWRL INSTRUCTIONAL MANAGEMENT SYSTEM (IMS-3)**
Computer software system, operation guides, and operational forms to allow school personnel and parents to monitor instructional programs

1154 **SWRL INSTRUCTIONAL PRODUCT SELECTION KIT**
Resources for use in conducting inservice training in the selection of effective instructional products

1156 **A TRAINING PACKAGE FOR DETERMINING INSTRUCTIONAL PURPOSES**
Materials for staff workshops in instructional planning and management

1159 **COMMUNITY SCHOOLS**
Research on community schools: administration, curriculum development, facilities, staff, and finance

1160 **DESIGNING SCHOOL ORGANIZATIONS: THEORY, RESEARCH RESULTS, AND APPROACHES**
A survey-feedback approach to the identification and solution of school problems

1162 **DEVELOPING OPEN EDUCATION IN AMERICA**
Community and school environment prerequisites for open learning

1163 **DIRECTORY OF ORGANIZATIONS AND PERSONNEL IN EDUCATIONAL MANAGEMENT**
A sourcebook of educational administration: the subject area and dissemination policy of the leading organizations and researchers

1164 **FREE/OPEN SCHOOLS**
Alternative, experimental, and traditional schools: a comparison

1165 **GUIDE TO THE DEVELOPMENT OF A REGIONAL CONSORTIUM OF STATE DEPARTMENTS OF EDUCATION**
A developmental history of the Appalachian Region Consortium

1166 **A GUIDE TO ORGANIZING SHORT-TERM STUDY ABROAD PROGRAMS**
Information on arrangements for study abroad for groups of high school and college students

1167 **THE IMPACT OF LEGAL DECISIONS ON THE FUTURE OF EDUCATION**
Court decisions affecting teaching and teacher education

1168 **PARENTAL AND COMMUNITY INVOLVEMENT IN EDUCATION AND TEACHER EDUCATION**
History, model programs, and benefits of parental and community involvement

1169 **STUDENTS' RIGHTS: A GUIDE TO THE RIGHTS OF CHILDREN, YOUTH, AND FUTURE TEACHERS**
Case histories of student rights to freedom of expression, search and seizure, dress, invasion of privacy, and discipline

1170 **PLAYGROUND FACILITIES AND EQUIPMENT**
A report on implications of major research findings on playground facilities and equipment

1171 **SOURCEBOOK OF TRAINING PRODUCTS IN INSTRUCTIONAL PLANNING AND MANAGEMENT**
A catalog of training products with a user's guide to product review and selection

1173 **STUDENT PRESS RIGHTS: STRUGGLES IN SCHOLASTIC JOURNALISM**
Court cases and decisions concerning student publications and underground newspapers

1174 **YEAR-ROUND SCHOOLS**
Parent, teacher, and taxpayer questions and answers on the topic of year-round school

GUIDANCE AND COUNSELING

1177 **OVERVIEW**

1179 **AN EXPERIMENTALIST APPROACH TO COUNSELING**
A discussion on the role of the counselor in contemporary society

1180 **BEHAVIOR MODIFICATION HANDBOOK FOR HELPING PROFESSIONALS**
A handbook of behavioral techniques useful to counselors

1181 **COUNSELING OLDER PERSONS: CAREERS, RETIREMENT, DYING**
A paper to help counselors work with the aging

1182 **DEVELOPING STUDENTS' POTENTIALS**
A publication for helping professionals to develop student potentials

1183 **AN ACCOUNTABILITY MODEL FOR COUNSELORS: ERIC/TM REPORT 27**
A paper describing accountability in counseling

1184 **NEW DESIGNS AND METHODS FOR DELIVERING HUMAN DEVELOPMENTAL SERVICE**
A resource document for those who are planning to initiate or update their own program.

1185 **PARAPROFESSIONALS IN HUMAN SERVICES**
A monograph dealing with the use of paraprofessionals in educational and mental health settings

1186 **PARENT EDUCATION AND ELEMENTARY COUNSELING**
A description of several model programs in parent counseling

1187 **WHAT'S HAPPENING IN COUNSELING IN U.S. FEDERAL PRISONS**
An overview of the current status of counseling in the Federal and State prison systems

1188 **IMPACT MAGAZINE**
A bimonthly magazine promoting change and innovation in counseling and related professions

1190 **SEARCHLIGHT**
Sixteen annotated bibliographies on subject areas of importance to counselors

INFORMATION UTILIZATION AND DISSEMINATION

1193 **OVERVIEW**

1195 **ANALYZING AND IMPROVING THE IMPLEMENTATION OF A LOCAL EDUCATION PROGRAM (COMPONENT OF A 10-UNIT PROGRAM OF TRAINING FOR LEADERSHIP IN LOCAL EDUCATIONAL IMPROVEMENT PROGRAMS)**
A self-instructional training unit providing a problem-solving model on improving the implementation of a local educational program

1197 **DIFFUSING EDUCATIONAL IMPROVEMENT PROGRAMS WITHIN A SCHOOL DISTRICT (COMPONENT OF 10-UNIT PROGRAM OF TRAINING FOR LEADERSHIP IN LOCAL EDUCATIONAL IMPROVEMENT PROGRAMS)**
A training product presenting theory and strategies for spreading the adoption of an innovative program within a school district

1199 **DIFFUSION STRATEGY GUIDE**
A methodology for planning and managing the diffusion of innovations

1200 **THE EDUCATIONAL INFORMATION CONSULTANT (EIC) TRAINING PROGRAM**
A team-learning program which explores methods of communicating research and development information to the education practitioner

1203 **ENQUIRY AS AN EDUCATIONAL THEME (COMPONENT OF 10-UNIT PROGRAM OF TRAINING FOR LEADERSHIP IN LOCAL EDUCATIONAL IMPROVEMENT PROGRAMS)**
A training program offering a model for inquiry and examining innovations in terms of the model

1205 **INDIVIDUALIZATION, MASTERY, AND STUDENT SELF-DIRECTION AS THEMES OF EDUCATIONAL REFORM, WITH RELATED INNOVATIONS (COMPONENT OF 10-UNIT PROGRAM OF TRAINING FOR LEADERSHIP IN LOCAL EDUCATIONAL IMPROVEMENT PROGRAMS)**
A training product offering models for analysis of the three themes and examining innovations in terms of the model

1208 **INSTRUCTOR'S GUIDE TO TRAINING FOR LEADERSHIP IN LOCAL EDUCATIONAL IMPROVEMENT PROGRAMS (A 10-UNIT TRAINING PROGRAM)**
Description of a 10-unit training program and how it can be used in planning and conducting instruction with educational leaders in different categories

1210 **PERSONAL/SOCIAL DEVELOPMENT AS AN EDUCATIONAL THEME, WITH RELATED INNOVATIONS (COMPONENT OF 10-UNIT PROGRAM OF TRAINING FOR LEADERSHIP IN LOCAL EDUCATIONAL IMPROVEMENT PROGRAMS)**
A self-instructional training unit describing aspects of personal/social development and analyzing approaches to achieving these goals

1213 **PROMOTING CHANGE IN SCHOOLS, A DIFFUSION CASEBOOK**
Ten case studies of successful innovations

1214 **RELEVANCE AS AN EDUCATIONAL THEME, WITH RELATED INNOVATIONS (COMPONENT OF 10-UNIT PROGRAM OF TRAINING FOR LEADERSHIP IN LOCAL EDUCATION IMPROVEMENT PROGRAMS)**
A training program analyzing meanings of relevance and examining various approaches to achieving relevance in the school program

INFORMATION UTILIZATION AND DISSEMINATION (Continued)

1217 **SELECTING AN EDUCATIONAL IMPROVEMENT PROGRAM (COMPONENT OF 10-UNIT PROGRAM OF TRAINING FOR LEADERSHIP IN LOCAL EDUCATIONAL IMPROVEMENT PROGRAMS)**
A self-instructional training unit providing a six-step model of the process of selecting an improvement program to meet local needs

1219 **TASK FLOW FOR DESIGNING AND CONDUCTING LOCAL EDUCATIONAL IMPROVEMENT PROGRAMS (COMPONENT OF 10-UNIT PROGRAM OF TRAINING FOR LEADERSHIP IN LOCAL EDUCATIONAL IMPROVEMENT PROGRAMS)**
A self-instructional training product presenting an 11-step task flow model for planning and conducting a local improvement program

1222 **THEORY AND STRATEGIES OF LOCAL EDUCATIONAL IMPROVEMENT (COMPONENT OF 10-UNIT PROGRAM OF TRAINING FOR LEADERSHIP IN LOCAL EDUCATIONAL IMPROVEMENT PROGRAMS)**
Conceptual models providing bases for selecting, designing, and conducting any kind of local school improvement program

1224 **TRAINING PROGRAM INTRODUCTION AND GENERAL STUDY PLAN GUIDE (COMPONENT OF 10-UNIT PROGRAM OF TRAINING FOR LEADERSHIP IN LOCAL EDUCATIONAL IMPROVEMENT PROGRAMS)**
Self-instructional training unit on types of local change programs and leadership roles in such programs

1227 **ALERT, A SOURCEBOOK OF ELEMENTARY CURRICULA, PROGRAMS, AND PROJECTS**
A selected sample of curriculums, training programs, model projects, and resources for use in elementary education

1228 **BEHAVIOR OF INNOVATIVE PERSONNEL**
A paper discussing characteristics of innovative educational personnel

1229 **COMMUNITY USE OF THE ERIC SYSTEM: INFORMATION PACKAGES**
A set of packages to familiarize community groups with the ERIC information system

1230 **CHANGE STRATEGIES AND TECHNIQUES FOR THE HELPER**
An overview of the process of planned change

1231 **ERIC: WHAT IT IS, HOW TO USE IT**
A kit for individual or group training in use of the ERIC system

1233 **THE EVALUATION OF EDUCATIONAL INFORMATION CENTERS: ERIC/TM REPORT 34**
An overview of strategies for assessing educational information centers

1234 **1974 DIRECTORY OF RESOURCES IN ADULT EDUCATION**
A compendium of adult education associations, periodicals, data bases, and data retrieval systems

1235 **OPTIONS AND PERSPECTIVES: A SOURCEBOOK OF INNOVATIVE FOREIGN LANGUAGE PROGRAMS IN ACTION, K-12**
A survey of 50 successful experiments in foreign language instruction

1237 **HOW TO CONDUCT A SEARCH THROUGH ERIC**
An introduction to ERIC resources, including Resources in Education, Current Index to Journals in Education, *and the ERIC* Thesaurus

1238 **LIBRARY AND REFERENCE SKILLS CURRICULUM**
A complete library program for students in grades 3-6

POSTSECONDARY EDUCATION

1243 **OVERVIEW**

1247 **STATE POSTSECONDARY EDUCATION PLANNING MODEL (SPEPM)**
A computerized State planning model to assess the impact of alternative financing plans on postsecondary education

1249 **AN EXAMINATION OF POSSIBLE STATEWIDE APPLICATIONS AND EXTENSIONS OF THE NCHEMS PROGRAM CLASSIFICATION STRUCTURE**
An outline of a State-level information structure incorporating the National Center for Higher Education Management Program Classification Structure

1251 **INFORMATION EXCHANGE PROCEDURES (IEP)**
A set of recommendations and guidelines for collecting, reorganizing, and displaying educational planning data

1253 **A REFERENCE GUIDE TO POSTSECONDARY EDUCATION DATA SOURCES**
A summary of publications, articles, and data bases containing data items used in the NCHEMS educational planning systems

1255 **POSTSECONDARY EDUCATION INSTITUTIONAL DATA USE MANUAL**
A guide for interpretation and use of institutional and student data

1256 **STATEWIDE MEASURES INVENTORY**
Information on statewide postsecondary education planning and management

1258 **POSTSECONDARY EDUCATION OUTCOMES MEASURES AND PROCEDURES MANUAL**
A manual which suggests the definitions and data-acquisition procedures necessary for collecting top-priority outcomes measures

1260 **PROGRAM MEASURES**
A system for organizing information about postsecondary education

POSTSECONDARY EDUCATION (Continued)

1262 **REVISION OF THE PROGRAM CLASSIFICATION STRUCTURE**
An update of the 1972 program classification guide providing a more easily implemented system for organizing information and postsecondary education

1263 **RESOURCE REQUIREMENTS PREDICTION MODEL (RRPM) 1.6**
An instructional cost simulation model for all types of postsecondary institutions

1266 **COSTING AND DATA MANAGEMENT SYSTEM**
A data management system which provides historical instructional cost studies

1268 **DATA ELEMENT DICTIONARY (DED)**
A second edition of a guide to assist institutions and agencies concerned with higher education in the identification, definition, and collection of data required for implementation of the NCHEMS systems

1270 **NCHEMS GLOSSARY**
A collection of basic terminology used in NCHEMS products

1271 **POSTSECONDARY EDUCATION ACADEMIC UNIT PLANNING MANUAL (AUPM)**
A technique to identify and organize information about academic unit functions and human and physical resources

1273 **FACULTY ACTIVITY ANALYSIS MANUALS (FAA)**
Techniques for collecting data to serve as a foundation for analyzing faculty activities and allocating salaries to instructional programs

1275 **STUDENT FLOW MODEL SFM-IA**
A tool for analyzing and predicting student flow between fields of study

1277 **ACCOUNTABILITY IN HIGHER EDUCATION, REPORT NO. 1**
A summary of trends in accountability and a bibliography of the accountability literature of the 1970's

1278 **COMMUNITY COLLEGES RESPOND TO ELDERS: A SOURCEBOOK FOR PROGRAM DEVELOPMENT**
A guide to developing and implementing educational programs for the elderly

1280 **COMPETENCY-BASED EDUCATIONAL PROGRAMS IN HIGHER EDUCATION**
Summary of status of developments in competency-based programs

1281 **COMPUTERIZED DATA SOURCES FOR HIGHER EDUCATION**
A summary of available data sources, definitions, and methods of access

1282 **A CONCEPTUAL REVIEW OF EXPERIENTIAL LEARNING IN HIGHER EDUCATION**
A critical review of the conceptual literature on experiential learning

1283 **CONCERNS OF HISTORICALLY AND DEVELOPING BLACK INSTITUTIONS: A BIBLIOGRAPHY**
A bibliography of ERIC materials on various aspects of black institutions

1284 **FACULTY WORKLOAD: FACTS, MYTHS, AND COMMENTARY**
A description of the state of the art of faculty workload measures

1285 **HIGHER EDUCATION AND THE STEADY STATE**
An examination of the response of postsecondary educational institutions to declining enrollments

1286 **INFORMATION CENTERS IN HIGHER EDUCATION**
An overview of resource centers which exchange noncomputerized data concerning postsecondary education

1287 **LIFETIME LEARNING: EXTENDING AVAILABILITY OF EDUCATION BEYOND COLLEGE AGE**
Recent developments, prospects, and potential problems of extending higher education beyond the traditional student age group level

1288 **THE PERSONALIZED SYSTEM OF INSTRUCTION: AN EDUCATIONAL ALTERNATIVE**
A detailed monograph tracing the history of the personalized system of instruction

1289 **STATE AID TO PRIVATE HIGHER EDUCATION, REPORT NO. 3**
A summary of proposed legislation for State support of independent postsecondary institutions

1290 **STRATEGIES FOR IMPROVING COLLEGE TEACHING, REPORT NO. 8**
Techniques to improve and reform college instruction

1291 **TIME SHORTENED DEGREES**
Historical background, benefits, and criticisms of degrees obtained over a shorter than usual period of time

1292 **URBAN INTERNSHIPS IN HIGHER EDUCATION, REPORT NO. 9**
A paper on the objectives and goals of internship programs

SOCIAL EDUCATION/ SOCIAL SCIENCE

1295 **OVERVIEW**

1301 **ENVIRONMENTAL EDUCATION CONCEPT LESSON CARDS**
An instructional program for students in K-6 organized around conservation education, natural environment, and outdoor recreation

1303 **DISCUSSING CONTROVERSIAL ISSUES**
A high school program to develop teachers' and students' skills in discussing controversial issues effectively in the classroom

1305 **LANGUAGE OF PERSONAL EXPERIENCE (LOPE)**
An instructional package to help children from ages 10 to 12 learn how to analyze significant elements of personal experience

SOCIAL EDUCATION (Continued)

1307 **PASS IT ON, I**
A multimedia product to increase opportunities for children ages 5-7 to grow in self-confidence

1310 **PASS IT ON, II (PART OF THE CHILDREN'S FOLKLORE PROGRAM)**
A multimedia product to increase opportunities for children ages 6-8 to grow in self-confidence

1313 **FROM CHILD TO CHILD (PART OF THE CHILDREN'S FOLKLORE PROGRAM)**
A motivational overview used to familiarize the viewer with the importance of play to the learning of young children

1315 **RESPONSIVE EDUCATION PROGRAM**
A program for grades K-3 meant to strengthen educational experiences by responding to the uniqueness of learners

1318 **SOCIAL ENCOUNTER AND RESEARCH CURRICULUM FOR HUMANIZATION (SEARCH)**
An individualized, interdisciplinary program of social education for grades K-3

1322 **SOCIAL EDUCATION, YEAR 1**
A multimedia instructional package to introduce social concepts about the family to 1st graders

1325 **SOCIAL EDUCATION, YEAR 2**
A package for 2d graders to develop selected concepts from the social sciences that relate to families in a community

1328 **SOCIAL EDUCATION, YEAR 3**
An introduction to basic relationships among lifestyles, environments, and traditions for 3d graders

1331 **RELEVANT EXPLORATIONS IN ACTIVE LEARNING (REAL) SETS I AND II**
A set of resource materials designed to help people better understand themselves and their potentials

1334 **PEOPLE AND PROBLEMS**
A film created for teachers to stimulate thought and discussion on developing problem-solving skills of students

1336 **SOCIAL DEVELOPMENT AND BEHAVIOR: AN ABSTRACT BIBLIOGRAPHY**
An annotated bibliography referring to children's peer relationships, interpersonal competence, social attitudes, and sociometric techniques

1337 **A CRITICAL ANALYSIS OF VALUES EDUCATION RESOURCES**
A paper to aid in the selection of values education materials

1338 **EDUCATING PRISONERS FOR SOCIALLY CONSTRUCTIVE ROLES**
A document concerned with the prevention of juvenile delinquency, and the education and certification of teachers of inmates

1339 **PREPARING SCHOOL PERSONNEL RELATIVE TO VALUES: A LOOK AT MORAL EDUCATION IN THE SCHOOLS**
A clarification of the development of moral judgment

1340 **PREPARING TEACHERS, STUDENTS AND CITIZENS TO DEAL CONSTRUCTIVELY WITH THE PROBLEMS AND POTENTIALITIES OF AGING**
A monograph to understand the physical and psychological aspects of aging

1341 **SOCIAL DEVELOPMENT IN YOUNG CHILDREN: A REPORT FOR TEACHERS**
A review of the current psychological research on social development in children ages 3-8

1343 **SOCIAL ORGANIZATION OF THE HIGH SCHOOL**
Training materials to help educational administrators and teachers look at educational encounters in terms of social action organization

1346 **VALUES EDUCATION: APPROACHES AND MATERIALS**
A paper to help social studies educators organize, comprehend, and choose values education materials appropriate to their needs

SOCIAL SCIENCE

1347 **SOCIAL PSYCHOLOGY: A RESOURCE FOR ELEMENTARY AND SECONDARY EDUCATORS**
A volume which describes 10 areas of educational practice for applying social-psychological resources

1348 **AMERICAN GOVERNMENT INFORMATION UNIT (AGIU)/(CURRICULUM ALTERNATIVES FOR SECONDARY SCHOOLS)**
A review and comparison of nine high school social studies programs

1350 **LEARNING WITH GAMES: AN ANALYSIS OF SOCIAL STUDIES EDUCATIONAL GAMES AND SIMULATIONS**
A book which describes and analyzes games and simulations suitable for children in grades K-12

1351 **BRINGING ABOUT CHANGE IN SOCIAL STUDIES EDUCATION**
A publication which addresses itself to the unique problems of diffusion, adoption, and change in social studies

1352 **COPING WITH COMMUNITY CONTROVERSY: GUIDELINES FOR INTRODUCING NEW SOCIAL STUDIES PROGRAMS**
General guidelines and introduction to new social studies programs

1353 **18, 19, 20: WILL THEY VOTE?**
A document containing suggestions and resources for preparing and motivating new young voters

1354 **GEOGRAPHY IN ELEMENTARY AND SECONDARY EDUCATION: TRADITION TO OPPORTUNITY**
A paper on the precollege teaching of the geography of the United States, from 1800 to the present

SOCIAL SCIENCE (Continued)

1355 **GLOBAL DIMENSIONS IN THE NEW SOCIAL STUDIES**
A survey which identifies a number of materials and guides that contain components useful for global education

1356 **GUIDELINES FOR USING A SOCIAL SIMULATION/GAMES**
Suggestions which provide analytical and critical information on the use of simulation/games in social studies classrooms

1357 **PREPARING TO TEACH POLITICAL SCIENCE: SOURCES AND APPROACHES**
A monograph listing resources and instructional methods for secondary teachers of political science

1358 **PROFILES OF PROMISE (POPs)**
A set of descriptive brochures that highlight innovative social studies programs and practices

1360 **TEACHING AMERICAN HISTORY: SOURCES AND APPROACHES**
A paper to help social studies teachers redesign American history courses to incorporate new teaching processes and approaches

1361 **TEACHING PSYCHOLOGY IN SECONDARY SCHOOLS**
A paper which examines the history and growth of precollege psychology

1362 **TIPS FOR TEACHING ABOUT THE BICENTENNIAL IN THE SOCIAL STUDIES**
A paper which suggests some creative classroom approaches and materials easily implemented by social studies teachers

1363 **TIPS FOR TEACHING ABOUT ETHNIC HERITAGE IN PRE-COLLEGE SOCIAL STUDIES**
A paper to aid precollege teachers who are teaching or plan to teach ethnic studies

1364 **TIPS FOR TEACHING PRE-COLLEGE SOCIOLOGY**
A document which provides teachers of grades 7-12 with suggestions for teaching sociology

1365 **TRENDS AND RESOURCES IN PRE-COLLEGE TEACHING OF ANTHROPOLOGY**
A paper which traces the growth in the importance of anthropology from the Second World War to the present time

TEACHER EDUCATION

1369 **OVERVIEW**

1373 **CLASSROOM AND INSTRUCTIONAL MANAGEMENT PROGRAM (CLAIM)**
Inservice teacher training program to assist teachers in reducing the frequency of behavior problems and increase the quality of academic work

1376 **COOPERATIVE URBAN TEACHER EDUCATION PROGRAM (CUTE)**
Preservice teacher education program to prepare teachers for inner-city schools

1379 **CROSS-AGE PEER HELP**
Two-day workshop to train teams of school personnel to set up a cross-age tutoring program

1381 **INTERACTIONAL ANALYSIS**
Program focusing on the three phases of interaction analysis instruction: tallying, analysis, and interpretation and usage

1384 **INTERACTION ANALYSIS, A MINICOURSE**
Training course for elementary and secondary teachers using microteaching to demonstrate the special skills of verbal communication

1386 **INTERDISCIPLINARY FACULTY TEAMING: A WORKSHOP**
Series of activities to encourage development of teams of members from different facets of the teacher education faculty

1388 **MINICOURSE 1: EFFECTIVE QUESTIONING—ELEMENTARY LEVEL**
A microteaching program to train teachers to ask more effective questions in class discussions

1390 **MINICOURSE 8: ORGANIZING INDEPENDENT LEARNING—PRIMARY LEVEL**
A self-instructional microteaching program to help teachers meet individual learning needs in grades K-3

1393 **MINICOURSE 10: ROLE PLAYING IN THE CLASSROOM**
A microteaching approach to help teachers plan student role-playing activities for grades 4-12

1395 **MINICOURSE 15: ORGANIZING INDEPENDENT LEARNING—INTERMEDIATE LEVEL**
A self-contained microteaching program to train teachers to plan and use independent study activities in grades 4-8

1397 **MINICOURSE 23: CLASSROOM MANAGEMENT THROUGH POSITIVE REINFORCEMENT**
A microteaching approach to introduce teachers of grades 1-6 to basics of reinforcement theory

1399 **MODULES AND THEIR ROLE IN PERSONALIZED PROGRAMS: A WORKSHOP (MTRIPP)**
Two-day workshop to introduce educators to competency-based teacher education

1401 **SELECTING COMPUTER INSTRUCTIONAL MATERIALS**
Materials to provide elementary and secondary teachers with an introduction to the basics of using computer hardware for computer-enhanced instruction

1403 **SETTING UP THE CLASSROOM (PART OF THE CONCEPTS AND LANGUAGE COMPONENT)**
Training manual presenting guidelines for kindergarten teachers in developing a constructive classroom atmosphere

TEACHER EDUCATION (Continued)

1405 **SYSTEMATIC AND OBJECTIVE ANALYSIS OF INSTRUCTION (SOAI)**
Teacher instruction in self-analysis and analysis of the teaching skills of others

1408 **TEAMS-GAMES-TOURNAMENT (TGT) INSTRUCTIONAL PROCESS CURRICULUM UNITS**
An instructional method of using group competition among groups of students having equal ability

1412 **TRAINING MATERIALS FOR THE PERSONAL ASSESSMENT FEEDBACK SYSTEM (PART OF THE COMPREHENSIVE ASSESSMENT SYSTEM (COMPASS) DEVELOPED FOR THE PERSONALIZED TEACHER EDUCATION PROGRAM (PTEP)**
Technique-training materials for counseling psychologists in teacher education programs to train others in personal assessment feedback counseling.

1416 **TRAINING MATERIALS FOR THE PERSONALIZED VIDEOTAPE FEEDBACK SYSTEM**
Materials to help teacher training staff personalize and increase the impact of the feedback given to students

1419 **ASSESSING AND INFLUENCING BEHAVIOR: A SELF-INSTRUCTIONAL TEACHER TRAINING PROGRAM**
A self-instructional program to train teachers to measure and change student behavior

1421 **DESIGN AND DEVELOPMENT OF CURRICULAR MATERIALS**
A course to teach methods and techniques for designing and implementing individualized curriculum materials

1424 **INDIVIDUALLY GUIDED MOTIVATION (IGM) (PART OF THE INDIVIDUALLY GUIDED MOTIVATION SYSTEM)**
A system to enable teachers to relate instruction to specific curriculum areas and attain motivational objectives

1428 **PREPARING AND USING SELF-TEACHING UNITS FOR FOREIGN LANGUAGES**
Self-teaching units to guide the teacher's choice in learning medium and evaluation procedures for teaching foreign languages

1429 **THE USE OF LEARNING PRINCIPLES IN INSTRUCTION**
Textbook on the design of lessons and curriculum for graduate students and curriculum designers

1432 **ACCREDITATION PROBLEMS AND THE PROMISE OF PBTE**
A paper on the relationship between the accreditation of teacher education institutions and performance-based teacher education

1433 **ALTERNATIVES FOR SCHOOLS OF EDUCATION CONFRONTED WITH EDUCATION ENROLLMENT AND REVENUE REDUCTIONS**
A review of teacher supply and demand and its implications for teacher education institutions

1434 **BEGINNING TEACHERS IN THE INNER CITY: A STUDY OF THE LITERATURE ON THEIR PROBLEMS AND SOME POSSIBLE SOLUTIONS**
A review of the literature of problems of beginning teachers working in the inner city

1435 **THE CAMPUS LABORATORY SCHOOL: PHOENIX OR DODO BIRD**
A discussion of the history, purpose, and future of campus schools

1436 **CLASSROOM OBSERVATION SYSTEMS IN PREPARING SCHOOL PERSONNEL**
A state-of-the-art and 42-item bibliography on classroom observation systems in preparing school personnel

1437 **COMPENSATORY EDUCATION: IMPLICATIONS FOR TEACHER EDUCATION**
A paper providing an analysis of development and teacher implications of compensatory education

1438 **COMPETENCY-BASED EDUCATION: THE STATE OF THE SCENE**
An outline of the competency-based education movement in the United States

1439 **COMPREHENSIVE PROPOSALS FOR TEACHER EDUCATION: A CONCISE GUIDE DERIVED FROM DONALD R. CRUICKSHANK'S STUDY OF PROPOSALS FOR SECOND-PHASE COMPREHENSIVE ELEMENTARY TEACHER EDUCATION MODELS PROJECT**
A review of applicants for phase 2 of the program to determine their general characteristics and their reactions to the program

1440 **CONCEPTS OF TEACHER CENTERS**
Review of the literature on problems of designing a teacher center

1441 **EFFECTIVE OBSERVATION OF EDUCATORS**
A discussion of how teachers' value systems can determine their interpretations of children's behavior

1442 **EXPLORING TEACHERS' CENTERS**
Descriptions of centers that offer inservice training or advisory services to elementary schoolteachers

1443 **FIELD-BASED TEACHER EDUCATION AND K-12 PERSONNEL RESPONSIBILITIES IN TEACHER EDUCATION: A REVIEW**
An examination of the implications of field-based teacher education

1444 **FLEXIBILITY IN PROGRAM PLANNING AND NCATE STANDARDS**
A discussion of flexibility as it is viewed by the standards of the National Council for Accreditation of Teacher Education

1445 **A GUIDE TO A COMPETENCY-BASED FIELD-CENTERED SYSTEMS APPROACH TO ELEMENTARY TEACHER EDUCATION**
A model demonstrating elementary teacher competencies necessary for certification

TEACHER EDUCATION (Continued)

1446 **A GUIDE TO BEHAVIORAL SCIENCE ELEMENTARY TEACHER EDUCATION PROGRAM**
A model for teaching approached as a clinical practice

1447 **A GUIDE TO EDUCATIONAL SPECIFICATIONS FOR A COMPREHENSIVE ELEMENTARY TEACHER EDUCATION PROGRAM**
Specifications of behavioral objectives in elementary education and in elementary teacher preparation

1448 **A GUIDE TO GEORGIA EDUCATIONAL MODEL SPECIFICATIONS FOR THE PREPARATION OF ELEMENTARY TEACHERS**
A presentation of an elementary teacher education program which is based on teacher performance behaviors

1449 **A GUIDE TO MODEL ELEMENTARY TEACHER EDUCATION PROGRAM**
A model which attempts to institutionalize change by analysis of educational roles and objectives

1450 **A GUIDE TO A MODEL FOR THE PREPARATION OF ELEMENTARY SCHOOL TEACHERS**
A guide to planning instruction with behavioral objectives for preparation of elementary schoolteachers

1451 **A GUIDE TO A MODEL OF TEACHER TRAINING FOR THE INDIVIDUALIZATION OF INSTRUCTION**
An educational model to humanize education through individualized instruction

1452 **A GUIDE TO SPECIFICATIONS FOR A COMPREHENSIVE UNDERGRADUATE AND IN-SERVICE TEACHER EDUCATION PROGRAM FOR ELEMENTARY TEACHERS**
A sample of elementary teacher education models to train teachers to confront and initiate change

1453 **A GUIDE TO THE TEACHER-INNOVATOR: A PROGRAM TO PREPARE TEACHERS**
A model to train teachers for four roles: institution-builder, interactive teacher, innovator, and scholar

1454 **GUIDELINES FOR THE SELECTION OF STUDENTS INTO PROGRAMS OF TEACHER EDUCATION**
A review of research evidence relating to the selection of students for teacher education

1455 **THE GOVERNANCE OF TEACHER EDUCATION**
A paper reviewing three theses of teacher education

1456 **IN-SERVICE TEACHER EDUCATION–SOURCES IN THE ERIC SYSTEM**
A review of 1973-74 inservice teacher education documents in the ERIC data base system

1457 **IN-SERVICE TRAINING FOR THE BEGINNING TEACHER**
An overview of inservice education from an analysis of the literature

1458 **IN-SERVICE EDUCATION FOR TEACHERS OF DISADVANTAGED ADULTS**
A review of the literature on the goals of adult basic education students

1459 **MICROTEACHING: HISTORY AND PRESENT STATUS**
A state-of-the-art paper summarizing the history and uses of microteaching

1460 **MICROTEACHING: SELECTED PAPERS**
A report on three microteaching programs

1461 **PARSING THE PARADOX: ASSURING QUALITY IN SCHOOL PERSONNEL PREPARATION**
A presentation of problems involved in changing teacher certification

1462 **PERFORMANCE-BASED CERTIFICATION OF SCHOOL PERSONNEL**
A consideration of techniques needed for determining an individual's ability to teach in the public schools and to qualify for certification

1463 **PROFESSIONAL LABORATORY EXPERIENCES AT THE PRESERVICE LEVEL**
A theoretical analysis of the definition, role, and purpose of preservice laboratory services

1464 **PROGRAMMATIC DEVELOPMENT OF IN-SERVICE TEACHER EDUCATION**
A discussion of teacher training centers, and specialized workshops

1465 **PROMISING PRACTICES IN THE TRAINING AND RENEWAL OF TEACHER EDUCATORS**
A variety of trends and programs in preservice and inservice teacher educator training

1466 **PROTOCOL MATERIALS: TRAINING MATERIALS FOR UNITING THEORY AND PRACTICE**
A paper on history, theory, practice, and evaluation of protocol materials

1467 **A READER'S GUIDE TO THE COMPREHENSIVE MODELS FOR PREPARING ELEMENTARY TEACHERS**
A guide to preservice teacher education models

1468 **SCHOOL-COLLEGE RELATIONS IN PREPARING SCHOOL PERSONNEL**
An analysis of the school-college relationship in preparing school personnel

1469 **SIMULATION AS AN INSTRUCTIONAL ALTERNATIVE IN TEACHER EDUCATION**
An examination of the field of simulation as an instructional alternative in teacher education

1470 **SIMULATION IN PREPARING SCHOOL PERSONNEL**
An overview of how simulation relates to the professional preparation of school personnel

TEACHER EDUCATION (Continued)

1471 **STRUCTURED CAREER DEVELOPMENT FROM TEACHER AIDE AND BEYOND**
A description of implementation of career ladders and advancement programs for school paraprofessionals

1472 **A SYNTHESIS OF RESEARCH AND INNOVATION IN PROGRAMS FOR THE FURTHER DEVELOPMENT OF TEACHERS OF ADULTS**
A description of eight projects concerned with program innovation for adult learners

1473 **TEACHING CENTERS: TOWARD THE STATE OF THE SCENE**
An overview of different teacher center concepts

1474 **TOWARD A HUMANE CURRICULUM**
Six aspects of "humaneness" are discussed and applied to curriculums in this paper

1475 **UNIQUE CHALLENGES OF PREPARING TEACHERS FOR INNER-CITY SCHOOL: PROGRESS AND PROSPECTS**
A paper on the history and prospects for inner-city teacher education

1476 **UTILIZATION OF INFORMATION RESOURCES IN PLANNING TEACHER PROFESSIONAL PREPARATION PROGRAMS**
A publication providing teacher educators, educational innovators, and decisionmakers with resources to manage change
